| #  | Article   | IF  | CITATIONS |
|----|---|-----|-----------|
| 1  | Consideration of a New Definition of Clinically Relevant Myocardial Infarction AfterÂCoronary<br>Revascularization. Journal of the American College of Cardiology, 2013, 62, 1563-1570.   | 1.2 | 506       |
| 2  | Occupational hazards of interventional cardiologists: Prevalence of orthopedic health problems in contemporary practice. Catheterization and Cardiovascular Interventions, 2004, 63, 407-411.   | 0.7 | 245       |
| 3  | Expert consensus statement on the use of fractional flow reserve, intravascular ultrasound, and optical coherence tomography. Catheterization and Cardiovascular Interventions, 2014, 83, 509-518.  | 0.7 | 154       |
| 4  | Occupational health hazards of interventional cardiologists in the current decade: Results of the 2014 SCAI membership survey. Catheterization and Cardiovascular Interventions, 2015, 86, 913-924.   | 0.7 | 126       |
| 5  | Occupational Health Hazards in the Interventional Laboratory: Time for a Safer Environment.<br>Radiology, 2009, 250, 538-544.   | 3.6 | 119       |
| 6  | Percutaneous coronary interventions in octogenarians in the American College of<br>Cardiology–National Cardiovascular Data Registry. Journal of the American College of Cardiology,<br>2002, 40, 394-402.   | 1.2 | 117       |
| 7  | Occupational health hazards in the interventional laboratory: Time for a safer environment.<br>Catheterization and Cardiovascular Interventions, 2009, 73, 432-438.   | 0.7 | 105       |
| 8  | Mortality After Emergent Percutaneous Coronary Intervention in Cardiogenic Shock Secondary to<br>Acute Myocardial Infarction and Usefulness of a Mortality Prediction Model. American Journal of<br>Cardiology, 2005, 96, 35-41.                                  | 0.7 | 82        |
| 9  | Occupational Health Hazards in the Interventional Laboratory: Time for a Safer Environment. Journal of Vascular and Interventional Radiology, 2009, 20, 147-152.  | 0.2 | 65        |
| 10 | Society of cardiac angiography and interventions: Suggested management of the no-reflow phenomenon in the cardiac catheterization laboratory. Catheterization and Cardiovascular Interventions, 2003, 60, 194-201.  | 0.7 | 59        |
| 11 | Occupational Health Hazards in the Interventional Laboratory: Time for a Safer Environment. Journal of Vascular and Interventional Radiology, 2009, 20, S278-S283.  | 0.2 | 54        |
| 12 | Longâ€term outcomes following fractional flow reserveâ€guided treatment of angiographically<br>ambiguous left main coronary artery disease: A metaâ€analysis of prospective cohort studies.<br>Catheterization and Cardiovascular Interventions, 2015, 86, 12-18. | 0.7 | 51        |
| 13 | Cost-Effectiveness of RevascularizationÂStrategies. Journal of the American College of Cardiology, 2015, 65, 1-11.  | 1.2 | 50        |
| 14 | Relationship Between Procedure Indications and Outcomes of Percutaneous Coronary Interventions<br>by American College of Cardiology/American Heart Association Task Force Guidelines. Circulation,<br>2005, 112, 2786-2791.                                       | 1.6 | 47        |
| 15 | Risk-Adjusted Mortality Analysis of Percutaneous Coronary Interventions by American College of<br>Cardiology/American Heart Association Guidelines Recommendations. American Journal of Cardiology,<br>2007, 99, 189-196.   | 0.7 | 46        |
| 16 | Predictors of Short- and Long-Term Outcomes of Takotsubo Cardiomyopathy. American Journal of<br>Cardiology, 2015, 116, 1586-1590.   | 0.7 | 45        |
| 17 | Report of a new anomaly of the left anterior descending artery: Type VI dual LAD. Catheterization and<br>Cardiovascular Interventions, 2012, 80, 626-629.   | 0.7 | 44        |
| 18 | The Rationale for Performance of CoronaryÂAngiography and Stenting Before Transcatheter Aortic<br>Valve Replacement, IACC: Cardiovascular Interventions, 2016, 9, 2371-2375,  | 1.1 | 44        |

| #  | Article   | IF  | CITATIONS |
|----|---|-----|-----------|
| 19 | The use of radiographic contrast media during PCI: A focused review. Catheterization and Cardiovascular Interventions, 2009, 74, 728-746.   | 0.7 | 42        |
| 20 | Assessing coronary blood flow dynamics with the TIMI frame count method: Comparison with simultaneous intracoronary Doppler and ultrasound. Catheterization and Cardiovascular Interventions, 2001, 53, 459-463.  | 0.7 | 34        |
| 21 | Quality assessment and improvement in interventional cardiology: A position statement of the Society of Cardiovascular Angiography and Interventions, part 1: Standards for quality assessment and improvement in interventional cardiology. Catheterization and Cardiovascular Interventions, 2011, 77, 927-935. | 0.7 | 34        |
| 22 | Current operator volumes of invasive coronary procedures in medicare patients: Implications for future manpower needs in the catheterization laboratory. Catheterization and Cardiovascular Interventions, 2013, 81, 34-39.   | 0.7 | 32        |
| 23 | Are Drug-Eluting Stents the Preferred Treatment for Multivessel Coronary Artery Disease?. Journal of the American College of Cardiology, 2006, 47, 22-26.   | 1.2 | 29        |
| 24 | ASCERT: The American College of Cardiology Foundation–The Society of Thoracic Surgeons<br>Collaboration on the Comparative Effectiveness of Revascularization Strategies. JACC:<br>Cardiovascular Interventions, 2010, 3, 124-126.  | 1.1 | 26        |
| 25 | The catheterization laboratory and interventional vascular suite of the future: Anticipating innovations in design and function. Catheterization and Cardiovascular Interventions, 2011, 77, 447-455.   | 0.7 | 26        |
| 26 | Coronary artery perforation during interventional procedures. Catheterization and Cardiovascular Interventions, 2006, 68, 713-717.  | 0.7 | 25        |
| 27 | Quality assessment and improvement in interventional cardiology: A position statement of the society of cardiovascular angiography and interventions, Part II: Public reporting and risk adjustment. Catheterization and Cardiovascular Interventions, 2011, 78, 493-502.   | 0.7 | 25        |
| 28 | 2016 <scp>R</scp> evision of the SCAI position statement on public reporting. Catheterization and Cardiovascular Interventions, 2017, 89, 269-279.  | 0.7 | 25        |
| 29 | <scp>SCAI</scp> expert consensus statement on out of hospital cardiac arrest. Catheterization and<br>Cardiovascular Interventions, 2020, 96, 844-861.   | 0.7 | 23        |
| 30 | Implications of Public Reporting of Risk-Adjusted Mortality Following Percutaneous Coronary<br>Intervention. JACC: Cardiovascular Interventions, 2016, 9, 2077-2085.  | 1.1 | 21        |
| 31 | Focused update of expert consensus statement: Use of invasive assessments of coronary physiology and structure: A position statement of the society of cardiac angiography and interventions. Catheterization and Cardiovascular Interventions, 2018, 92, 336-347.  | 0.7 | 18        |
| 32 | SCAI Multi-Society Position Statement on Occupational Health Hazards ofÂtheÂCatheterization<br>Laboratory: Shifting the Paradigm for HealthcareÂWorkers' Protection. Journal of the American<br>College of Cardiology, 2020, 75, 1718-1724.   | 1.2 | 18        |
| 33 | Occupational health hazards in the interventional laboratory: Time for a safer environment.<br>Catheterization and Cardiovascular Interventions, 2018, , .  | 0.7 | 17        |
| 34 | A Longitudinal Assessment of Coronary Interventional Program Quality. JACC: Cardiovascular<br>Interventions, 2009, 2, 136-143.  | 1.1 | 17        |
| 35 | Special Communication— Occupational Health Hazards in the Interventional Laboratory: Progress<br>Report of the Multispecialty Occupational Health Group. Journal of the American College of<br>Radiology, 2010, 7, 679-683.   | 0.9 | 17        |
| 36 | Coronary complications of percutaneous coronary intervention: A practical approach to the management of abrupt closure. Catheterization and Cardiovascular Interventions, 2005, 64, 395-401.  | 0.7 | 16        |

| #  | Article   | IF                | CITATIONS                  |
|----|---|-------------------|----------------------------|
| 37 | National Trends of Outcomes in Transcatheter Aortic Valve Replacement (TAVR) Through Transapical<br>Versus Endovascular Approach: From the National Inpatient Sample (NIS). Cardiovascular<br>Revascularization Medicine, 2020, 21, 964-970.  | 0.3               | 15                         |
| 38 | Is Patient Frailty the Unmeasured Confounder That Connects Subacute Stent Thrombosis With<br>Increased Periprocedural Bleeding and Increased Mortality?. Journal of the American College of<br>Cardiology, 2012, 59, 1760-1762.   | 1.2               | 14                         |
| 39 | SCAI multiâ€society position statement on occupational health hazards of the catheterization<br>laboratory: Shifting the paradigm for Healthcare Workers' Protection. Catheterization and<br>Cardiovascular Interventions, 2020, 95, 1327-1333.   | 0.7               | 12                         |
| 40 | A new hypothesis of the developmental origin of congenital left anterior descending coronary artery to pulmonary artery fistulas. Catheterization and Cardiovascular Interventions, 2008, 71, 568-571.  | 0.7               | 11                         |
| 41 | Frequency of abrupt vessel closure and side branch occlusion after percutaneous coronary<br>intervention in a 6.5-year period (1994 to 2000) at a single medical center. American Journal of<br>Cardiology, 2002, 89, 1151-1155.  | 0.7               | 10                         |
| 42 | The Implications of Acute Clinical Care Responsibilities on the Contemporary Practice of Interventional Cardiology. JACC: Cardiovascular Interventions, 2019, 12, 595-599.  | 1.1               | 10                         |
| 43 | Outcomes of Transcatheter Aortic Valve Replacement With Percutaneous Coronary Intervention<br>versus Surgical Aortic Valve Replacement With Coronary Artery Bypass Grafting. American Journal of<br>Cardiology, 2020, 137, 83-88.   | 0.7               | 10                         |
| 44 | Editorial comment: When we "act―on ACT levels: Activated clotting time measurements to guide heparin administration during and after interventional procedures. , 1996, 37, 154-157.  |                   | 9                          |
| 45 | Alternative therapeutic strategies for patients with severe end-stage coronary artery disease not<br>amenable to conventional revascularization. Catheterization and Cardiovascular Interventions, 2003,<br>60, 57-66.  | 0.7               | 9                          |
| 46 | Composite Outcomes in Coronary Bypass Surgery Versus Percutaneous Intervention. Annals of Thoracic Surgery, 2014, 97, 1983-1990.  | 0.7               | 9                          |
| 47 | The Economic Imperatives Underlying the Occupational Health Hazards of the Cardiac Catheterization Laboratory. Circulation: Cardiovascular Interventions, 2016, 9, e003742.   | 1.4               | 8                          |
| 48 | Proposed Framework for the Optimal Measurement of Quality Assessment in Percutaneous Coronary<br>Intervention. JAMA Cardiology, 2019, 4, 963.   | 3.0               | 8                          |
| 49 | Frailty Predicts Adverse Outcomes in Older Patients Undergoing Transcatheter Aortic Valve<br>Replacement (TAVR): From the National Inpatient Sample. Cardiovascular Revascularization Medicine,<br>2022, 34, 56-60.   | 0.3               | 8                          |
| 50 | Determinants of embolic protection device use: Case study in the acceptance of a new medical technology. Catheterization and Cardiovascular Interventions, 2005, 65, 597-599.   | 0.7               | 7                          |
| 51 | Optimizing Operator Protection by Proper Radiation Shield Positioning in the Interventional<br>Cardiology SuiteâŽâŽEditorials published in JACC: Cardiovascular Interventions reflect the views of the<br>authors and do not necessarily represent the views of JACC: Cardiovascular Interventions or the<br>American College of Cardiology JACC: Cardiovascular Interventions. 2011. 4. 1140-1141. | 1.1               | 7                          |
| 52 | How Do Interventional Cardiologists Make Decisions?. JACC: Cardiovascular Interventions, 2013, 6, 989-991.  | 1.1               | 7                          |
| 53 | Cardiovascular Risk Among Patients ≥65 Years of Age with Parkinson's Disease (From the National) Tj ETQo  | 1 1 0.7843<br>0.7 | 314 <sub>.</sub> rgBT /Ove |
|    |   |                   |                            |

<sup>54</sup> How appropriate for assessing quality are the 2009 Appropriateness Criteria for Coronary Revascularization?. Journal of Invasive Cardiology, 2009, 21, 558-62.

|----|--|-----|-----------|
| 55 | Risk-Adjusted Models of 30-DayÂMortality Following Coronary Intervention. JACC: Cardiovascular<br>Interventions, 2013, 6, 623-624.   | 1.1 | 6         |
| 56 | Clinical Trials Versus Clinical Practice. JACC: Cardiovascular Interventions, 2015, 8, 1647-1656.  | 1.1 | 6         |
| 57 | Performance Metrics to Improve Quality in Contemporary Percutaneous Coronary Intervention<br>Practice. JAMA Cardiology, 2020, 5, 859.  | 3.0 | 6         |
| 58 | Etiology and Determinants of In-Hospital Survival in Patients Resuscitated After Out-of-Hospital<br>Cardiac Arrest in an Urban Medical Center. American Journal of Cardiology, 2020, 130, 78-84.   | 0.7 | 6         |
| 59 | Systemic and Coronary Hemodynamic Effects of Tobacco Products on the Cardiovascular System and Potential Pathophysiologic Mechanisms. Cardiology in Review, 2022, 30, 188-196.   | 0.6 | 6         |
| 60 | First use of intracoronary beta-radiation to prevent recurrent in-stent restenosis in a transplanted heart. Catheterization and Cardiovascular Interventions, 2002, 55, 373-375.   | 0.7 | 5         |
| 61 | Clinical Implications and Mechanisms of Plaque Rupture in the Acute Coronary Syndromes. The<br>American Heart Hospital Journal, 2005, 3, 249-255.  | 0.2 | 5         |
| 62 | Acute coronary syndromes in young patients with angiographically normal coronary arteries.<br>American Heart Journal, 2006, 152, 607-610.  | 1.2 | 5         |
| 63 | The appropriate use criteria: Improvements for its integration into real world clinical practice.<br>Catheterization and Cardiovascular Interventions, 2021, 98, 1349-1357.  | 0.7 | 5         |
| 64 | Role of inflammatory mediators in the pathogenesis of plaque rupture. Journal of Invasive Cardiology, 2014, 26, 484-92.  | 0.4 | 5         |
| 65 | The Embryologic Origin of Vieussens' Ring. Journal of Invasive Cardiology, 2019, 31, 49-51.  | 0.4 | 5         |
| 66 | Views of Appropriate Use Criteria for catheterization and percutaneous coronary revascularization<br>by practicing interventional cardiologists: Results of a survey of American College of Cardiology<br>Interventional Section members. Catheterization and Cardiovascular Interventions, 2019, 93, 875-879. | 0.7 | 4         |
| 67 | The Metamorphosis of ST-SegmentÂElevation Myocardial Infarction Programs. JACC: Cardiovascular<br>Interventions, 2017, 10, 2574-2576.  | 1.1 | 3         |
| 68 | SCAI position statement concerning coverage policies for percutaneous coronary interventions based on the appropriate use criteria. Catheterization and Cardiovascular Interventions, 2016, 87, 1127-1129.   | 0.7 | 2         |
| 69 | Ambiguities in Selecting the Optimal Strategy for the Nonculprit Stenosis in STEMI. JACC:<br>Cardiovascular Interventions, 2017, 10, 325-328.  | 1.1 | 2         |
| 70 | Relation of Age to Survival in Patients with Obstructive Sleep Apnea who Develop an Acute Coronary<br>Event (from the National Inpatient Sample). American Journal of Cardiology, 2020, 125, 1571-1576.  | 0.7 | 2         |
| 71 | Overcoming Obstacles in Designing and Sustaining a High-Quality Cardiovascular Procedure Environment. JACC: Cardiovascular Interventions, 2020, 13, 2806-2810.   | 1.1 | 2         |
| 72 | Giant unruptured sinus of valsalva aneurysm. Journal of Invasive Cardiology, 2008, 20, 258.  | 0.4 | 2         |
