| #  | Article                                                                                                                                                  | IF  | CITATIONS |
|----|----------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 1  | Boundary layer state detection using piezoelectric sensors. Smart Materials and Structures, 2022, 31, 015014.                                            | 3.5 | 1         |
| 2  | Experimental Investigation of Isolated Roughness Induced Transition in a Swept Wing Boundary Layer. , 2022, , .                                          |     | 0         |
| 3  | Secondary instabilities in swept-wing boundary layers: Direct Numerical Simulations and BiGlobal stability analysis. , 2022, , .                         |     | 2         |
| 4  | Reducing turbulent convective heat transfer with streamwise plasma vortex generators. Experimental<br>Thermal and Fluid Science, 2022, 134, 110596.      | 2.7 | 8         |
| 5  | Effects of actuation mode on plasma-induced spanwise flow oscillations. Journal Physics D: Applied Physics, 2022, 55, 205203.                            | 2.8 | 3         |
| 6  | Unsteady interaction of crossflow instability with a forward-facing step. Journal of Fluid Mechanics, 2022, 939, .                                       | 3.4 | 3         |
| 7  | Receptivity of crossflow instability to discrete roughness amplitude and location. Journal of Fluid Mechanics, 2022, 939, .                              | 3.4 | 12        |
| 8  | Direct numerical simulation of interaction between a stationary crossflow instability and forward-facing steps. Journal of Fluid Mechanics, 2022, 943, . | 3.4 | 3         |
| 9  | Three-Dimensional Development of Coherent Structures in a Two-Dimensional Laminar Separation<br>Bubble. AIAA Journal, 2021, 59, 493-505.                 | 2.6 | 8         |
| 10 | Mechanisms of interaction between stationary crossflow instabilities and forward-facing steps. , 2021, , .                                               |     | 3         |
| 11 | Cross-flow instabilities under plasma actuation: Design, commissioning and preliminary results of a new experimental facility. , 2021, , .               |     | 1         |
| 12 | Beat-Frequency-Operated Dielectric-Barrier Discharge Plasma Actuators for Virtual Wall<br>Oscillations. AIAA Journal, 2021, 59, 763-767.                 | 2.6 | 8         |
| 13 | Impact of a forward-facing step on the development of crossflow instability. Journal of Fluid<br>Mechanics, 2021, 924, .                                 | 3.4 | 11        |
| 14 | Plasma-Based Forcing Strategies for Control of Crossflow Instabilities. AIAA Journal, 2021, 59, 3406-3416.                                               | 2.6 | 8         |
| 15 | Experimental Investigation on Receptivity of Crossflow Instability to Discrete Roughness Amplitude and Location. , 2021, , .                             |     | 1         |
| 16 | Active Control of Turbulent Convective Heat Transfer with Plasma Actuators. Springer Proceedings in Physics, 2021, , 21-27.                              | 0.2 | 0         |
| 17 | New pulsed jet using spark plasma discharge: Subsonic configuration. , 2020, , .                                                                         |     | 0         |
|    |                                                                                                                                                          |     |           |

18 Effect of DBD plasma actuation on structures in a plane mixing layer. , 2020, , .

3

| #  | Article                                                                                                                                                                | IF  | CITATIONS |
|----|------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 19 | Influence of a Forward-Facing Step Surface Irregularity on Swept Wing Transition. AIAA Journal, 2020, 58, 5243-5253.                                                   | 2.6 | 12        |
| 20 | Aeroacoustic design and characterization of the 3D-printed, open-jet, anechoic wind tunnel of Delft<br>University of Technology. Applied Acoustics, 2020, 170, 107504. | 3.3 | 46        |
| 21 | Plasma Actuation for Mitigation of Fluctuating Loads on Airfoils: An Experimental Study. Journal of<br>Physics: Conference Series, 2020, 1618, 052067.                 | 0.4 | 2         |
| 22 | Three-dimensional vortical structures generated by plasma synthetic jets in crossflow. Physics of<br>Fluids, 2020, 32, .                                               | 4.0 | 9         |
| 23 | Virtual wall oscillations forced by a DBD plasma actuator operating under beat frequency - a concept for turbulent drag reduction. , 2020, , .                         |     | 4         |
| 24 | Effect of dielectric barrier discharge plasma actuators on vortical structures in a mixing layer.<br>Physics of Fluids, 2020, 32, .                                    | 4.0 | 14        |
| 25 | Pressure Output Feedback Control of Tollmien–Schlichting Waves in Falkner–Skan Boundary Layers.<br>AIAA Journal, 2019, 57, 1538-1551.                                  | 2.6 | 4         |
| 26 | Experimental Model-Based Estimation and Control of Natural Tollmien–Schlichting Waves. AIAA<br>Journal, 2019, 57, 2344-2355.                                           | 2.6 | 11        |
| 27 | Effect of velocity ratio on the interaction between plasma synthetic jets and turbulent cross-flow.<br>Journal of Fluid Mechanics, 2019, 865, 928-962.                 | 3.4 | 22        |
| 28 | Crossflow Transition of a Swept-Wing Boundary Layer and its Sensitivity to Free-Stream Conditions and Surface Roughness. , 2019, , .                                   |     | 0         |
| 29 | Model reduction of parabolic PDEs using multivariate splines. International Journal of Control, 2019, 92, 175-190.                                                     | 1.9 | 8         |
| 30 | Vortex merging in a laminar separation bubble under natural and forced conditions. Physical Review Fluids, 2019, 4, .                                                  | 2.5 | 17        |
| 31 | On the origin of spanwise vortex deformations in laminar separation bubbles. Journal of Fluid Mechanics, 2018, 841, 81-108.                                            | 3.4 | 52        |
| 32 | Spanwise flow development within a laminar separation bubble under natural and forced transition.<br>Experimental Thermal and Fluid Science, 2018, 96, 169-179.        | 2.7 | 9         |
| 33 | Experimental control of swept-wing transition through base-flow modification by plasma actuators.<br>Journal of Fluid Mechanics, 2018, 844, .                          | 3.4 | 39        |
| 34 | Conditioning of unsteady cross-flow instability modes using dielectric barrier discharge plasma actuators. Experimental Thermal and Fluid Science, 2018, 93, 305-318.  | 2.7 | 12        |
| 35 | Formation, evolution and scaling of plasma synthetic jets. Journal of Fluid Mechanics, 2018, 837,<br>147-181.                                                          | 3.4 | 68        |
| 36 | Plasma Synthetic Jet Actuators for Active Flow Control. Actuators, 2018, 7, 77.                                                                                        | 2.3 | 47        |

| #  | Article                                                                                                                                                  | IF  | CITATIONS |
|----|----------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 37 | Airfoil flow separation control with plasma synthetic jets at moderate Reynolds number. Experiments<br>in Fluids, 2018, 59, 1.                           | 2.4 | 28        |
| 38 | Effect of Two-Dimensional Surface Irregularities on Swept Wing Transition: Forward Facing Steps. ,<br>2018, , .                                          |     | 6         |
| 39 | Secondary crossflow instability through global analysis of measured base flows. Journal of Fluid<br>Mechanics, 2018, 846, 605-653.                       | 3.4 | 20        |
| 40 | Swept-Wing Transition Control Using AC-DBD Plasma Actuators. , 2018, , .                                                                                 |     | 4         |
| 41 | An Assessment of Flow Development in a Separation Bubble Subjected to Spanwise Modulated<br>Disturbances using Particle Image Velocimetry. , 2018, , .   |     | 0         |
| 42 | Transition in a separation bubble under tonal and broadband acoustic excitation. Journal of Fluid Mechanics, 2018, 853, 1-36.                            | 3.4 | 29        |
| 43 | Effect of Local DBD Plasma Actuation on Transition in a Laminar Separation Bubble. Flow, Turbulence and Combustion, 2017, 98, 195-216.                   | 2.6 | 37        |
| 44 | Airfoil Optimisation for DBD Plasma Actuator in a Wind Energy Environment: Design and Experimental Study. , 2017, , .                                    |     | 4         |
| 45 | Airfoil Stall Hysteresis Control with DBD Plasma actuation. , 2017, , .                                                                                  |     | 4         |
| 46 | Secondary Stability Analysis of Crossflow Vortices using BiGlobal Theory on PIV Base Flows. , 2017, , .                                                  |     | 1         |
| 47 | Steady and transient response of a laminar separation bubble to controlled disturbances. Journal of Fluid Mechanics, 2017, 813, 955-990.                 | 3.4 | 62        |
| 48 | Towards laminar flow control on swept wings with AC-DBD plasma actuators as active roughness. , 2017, , .                                                |     | 4         |
| 49 | Effect of slotted exit orifice on performance of plasma synthetic jet actuator. Experiments in Fluids, 2017, 58, 1.                                      | 2.4 | 31        |
| 50 | Interaction between plasma synthetic jet and subsonic turbulent boundary layer. Physics of Fluids, 2017, 29, .                                           | 4.0 | 31        |
| 51 | Response of a laminar separation bubble to impulsive forcing. Journal of Fluid Mechanics, 2017, 820, 633-666.                                            | 3.4 | 35        |
| 52 | Realisation of plasma synthetic jet array with a novel sequential discharge. Sensors and Actuators A:<br>Physical, 2017, 266, 314-317.                   | 4.1 | 10        |
| 53 | Conditioning of cross-flow instability modes using dielectric barrier discharge plasma actuators.<br>Journal of Fluid Mechanics, 2017, 833, 164-205.     | 3.4 | 41        |
| 54 | Localised estimation and control of linear instabilities in two-dimensional wall-bounded shear flows.<br>Journal of Fluid Mechanics, 2017, 824, 818-865. | 3.4 | 6         |

| #  | Article                                                                                                                                                                 | IF  | CITATIONS |
|----|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 55 | Fluctuations of angle of attack and lift coefficient and the resultant fatigue loads for a large<br>Horizontal Axis Wind turbine. Renewable Energy, 2017, 114, 904-916. | 8.9 | 66        |
| 56 | Experimental investigation on frequency characteristics of plasma synthetic jets. Physics of Fluids, 2017, 29, 115107.                                                  | 4.0 | 17        |
| 57 | Effect of nanosecond-pulsed plasma actuation on a separated laminar flow. Experimental Thermal and Fluid Science, 2017, 81, 406-419.                                    | 2.7 | 6         |
| 58 | Laminar Boundary Layer Flow with DBD Plasma Actuation: A Similarity Equation. Lecture Notes in<br>Computational Science and Engineering, 2017, , 63-76.                 | 0.3 | 0         |
| 59 | Induced Velocity and Density Gradients due to Nanosecond Plasma Actuation. AIAA Journal, 2016, 54, 3895-3902.                                                           | 2.6 | 5         |
| 60 | Characterisation of plasma synthetic jet actuators in quiescent flow. Journal Physics D: Applied Physics, 2016, 49, 335202.                                             | 2.8 | 21        |
| 61 | Electro-mechanical efficiency of plasma synthetic jet actuator driven by capacitive discharge. Journal<br>Physics D: Applied Physics, 2016, 49, 455201.                 | 2.8 | 14        |
