

# Takashi Kondoh

## List of Publications by Citations

**Source:** <https://exaly.com/author-pdf/7311274/takashi-kondoh-publications-by-citations.pdf>

**Version:** 2024-04-20

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
12	Hypothalamic and amygdalar neuronal responses to various tastant solutions during ingestive behavior in rats. <i>Journal of Nutrition</i> , <b>2000</b> , 130, 954S-9S	4.1	32
11	Dried bonito dashi: a preferred fish broth without postoral reward actions in mice. <i>Chemical Senses</i> , <b>2014</b> , 39, 159-66	4.8	14
10	Increased histidine preference during specific alteration of rhythm of environmental temperature stress in rats.. <i>Behavioral Neuroscience</i> , <b>1996</b> , 110, 1187-1192	2.1	10
9	Ingestion of dried-bonito broth (dashi) facilitates PV-parvalbumin-immunoreactive neurons in the brain, and affects emotional behaviors in mice. <i>Nutritional Neuroscience</i> , <b>2017</b> , 20, 571-586	3.6	9
8	Dried bonito dashi: taste qualities evaluated using conditioned taste aversion methods in wild-type and T1R1 knockout mice. <i>Chemical Senses</i> , <b>2015</b> , 40, 125-40	4.8	9
7	Long-term consumption of dried bonito dashi (a traditional Japanese fish stock) reduces anxiety and modifies central amino acid levels in rats. <i>Nutritional Neuroscience</i> , <b>2015</b> , 18, 256-64	3.6	9
6	Contribution of chorda tympani and glossopharyngeal nerves to taste preferences of rat for amino acids and NaCl. <i>Brain Research</i> , <b>1996</b> , 739, 139-55	3.7	7
5	Effects of repeated cold stress on activity of hypothalamic neurons in rats during performance of operant licking task. <i>Journal of Neurophysiology</i> , <b>2000</b> , 84, 2844-58	3.2	6
4	Dried bonito dashi: Contributions of mineral salts and organic acids to the taste of dashi. <i>Physiology and Behavior</i> , <b>2019</b> , 199, 127-136	3.5	5
3	Physiological Significance of Glutamate Signaling in Gut-Brain Communication. <i>Bioscience and Microflora</i> , <b>2009</b> , 28, 109-118		2
2	Induction of Fos expression in the rat brain after intragastric administration of dried bonito. <i>Nutritional Neuroscience</i> , <b>2021</b> , 24, 688-696	3.6	1
1	Intake and preference for dried bonito dashi in male Sprague-Dawley rats and C57BL/6 N mice. <i>Physiology and Behavior</i> , <b>2020</b> , 213, 112708	3.5	0
