#	ARTICLE	IF	CITATIONS
1	Cloud-to-Ground Lightning in the United States: NLDN Results in the First Decade, 1989-1998. Monthly Weather Review, 2001, 129, 1179-1193.	0.5	252
2	Enhancement of cloud-to-ground lightning over Houston, Texas. Geophysical Research Letters, 2001, 28, 2597-2600.	1.5	223
3	Global Distribution of Midnight Lightning: September 1977 to August 1978. Monthly Weather Review, 1986, 114, 2640-2653.	0.5	184
4	Lightning return stroke velocities in the thunderstorm research international program (TRIP). Journal of Geophysical Research, 1982, 87, 4903-4916.	3.3	180
5	The North American Lightning Detection Network (NALDN)-First Results: 1998-2000. Monthly Weather Review, 2002, 130, 2098-2109.	0.5	168
6	Cloud-to-Ground Lightning Observations from TOGA COARE: Selected Results and Lightning Location Algorithms. Monthly Weather Review, 1996, 124, 602-620.	0.5	146
7	The importance of NOx production by lightning in the tropics. Atmospheric Environment, 2002, 36, 1509-1519.	1.9	136
8	Lighting Ground Flash Density in the Contiguous United States: 1992-1995. Monthly Weather Review, 1997, 125, 631-638.	0.5	112
9	Global Lightning Flash Frequency. Monthly Weather Review, 1979, 107, 934-943.	0.5	111
10	The North American Lightning Detection Network (NALDN)-Analysis of Flash Data: 2001-2009. Monthly Weather Review, 2011, 139, 1305-1322.	0.5	111
11	Cloud-to-ground lightning flash characteristics in the contiguous United States: 1989-1991. Journal of Geophysical Research, 1994, 99, 10833.	3.3	109
12	Lightning leader characteristics in the Thunderstorm Research International Program (TRIP). Journal of Geophysical Research, 1982, 87, 11177-11192.	3.3	108
13	Cloud-to-ground lightning characteristics over Houston, Texas: 1989-2000. Journal of Geophysical Research, 2002, 107, ACL 2-1-ACL 2-12.	3.3	104
14	Upward lightning observations from towers in Rapid City, South Dakota and comparison with National Lightning Detection Network data, 2004-2010. Journal of Geophysical Research, 2012, 117, .	3.3	101
15	Correlated observations of three triggered lightning flashes. Journal of Geophysical Research, 1984, 89, 1385-1394.	3.3	100
16	Cloud-to-ground lightning flash characteristics from June 1984 through May 1985. Journal of Geophysical Research, 1987, 92, 5640-5644.	3.3	100
17	Development of the National Lightning Detection Network. Bulletin of the American Meteorological Society, 2008, 89, 180-190.	1.7	96
18	Global lightning: Total, cloud and ground flash estimates. Journal of Geophysical Research, 1998, 103, 19791-19809.	3.3	90

#	ARTICLE	IF	CITATIONS
19	A High-Speed Time-Resolved Spectroscopic Study of the Lightning Return Stroke: Part I. A Qualitative Analysis. <i>Journals of the Atmospheric Sciences</i> , 1968, 25, 827-838.	0.6	89
20	High-speed video observations of positive lightning flashes to ground. <i>Journal of Geophysical Research</i> , 2010, 115, .	3.3	88
21	An East Coast Lightning Detection Network. <i>Bulletin of the American Meteorological Society</i> , 1983, 64, 1029-1037.	1.7	87
22	A High-Speed Time-Resolved Spectroscopic Study of the Lightning Return Stroke: Part II. A Quantitative Analysis. <i>Journals of the Atmospheric Sciences</i> , 1968, 25, 839-851.	0.6	84
23	Lightning Ground Flash Measurements over the Contiguous United States: 1995-1997. <i>Monthly Weather Review</i> , 1999, 127, 2693-2703.	0.5	78
24	Calibration of a magnetic direction finding network using measured triggered lightning return stroke peak currents. <i>Journal of Geophysical Research</i> , 1991, 96, 17135-17142.	3.3	77
25	Lightning Ground Flash Density and Thunderstorm Duration in the Continental United States: 1989-1996. <i>Journal of Applied Meteorology and Climatology</i> , 1999, 38, 1013-1019.	1.7	77
26	High-speed video observations of natural cloud-to-ground lightning leaders - A statistical analysis. <i>Atmospheric Research</i> , 2014, 135-136, 285-305.	1.8	77
27	Locating initial breakdown pulses using electric field change network. <i>Journal of Geophysical Research D: Atmospheres</i> , 2013, 118, 7129-7141.	1.2	76
28	Cloud-to-ground lightning enhancement over Southern Louisiana. <i>Geophysical Research Letters</i> , 2003, 30, .	1.5	75
29	Changes in measured lightning flash count and return stroke peak current after the 1994 U.S. National Lightning Detection Network upgrade: 1. Observations. <i>Journal of Geophysical Research</i> , 1999, 104, 2151-2157.	3.3	73
30	Absolute Spectral Irradiance Measurements of Lightning from 375 to 880 nm. <i>Journals of the Atmospheric Sciences</i> , 1984, 41, 3180-3187.	0.6	72
31	Correlated peak relative light intensity and peak current in triggered lightning subsequent return strokes. <i>Journal of Geophysical Research</i> , 1985, 90, 6159-6164.	3.3	72
32	Effect of pollution from Central American fires on cloud-to-ground lightning in May 1998. <i>Geophysical Research Letters</i> , 2000, 27, 2249-2252.	1.5	66
33	Lightning Ground Flash Density in the Contiguous United States-1989. <i>Monthly Weather Review</i> , 1991, 119, 573-577.	0.5	65
34	Spectrum of the lightning stepped leader. <i>Journal of Geophysical Research</i> , 1968, 73, 6999-7008.	3.3	64
35	Thunderstorm Characteristics of Cloud-to-Ground Lightning at the Kennedy Space Center, Florida: A Study of Lightning Initiation Signatures as Indicated by the WSR-88D. <i>Weather and Forecasting</i> , 1999, 14, 640-649.	0.5	61
36	A 10-yr Monthly Lightning Climatology of Florida: 1986-1995. <i>Weather and Forecasting</i> , 1997, 12, 439-448.	0.5	59

#	ARTICLE	IF	CITATIONS
37	The opacity of lightning. <i>Journal of Geophysical Research</i> , 1965, 70, 5491-5497.	3.3	57
38	Evolution of the total lightning structure in a leadingâ€line, trailingâ€stratiform mesoscale convective system over Houston, Texas. <i>Journal of Geophysical Research</i> , 2008, 113, .	3.3	57
39	Production of nitric oxide by lightning on Venus. <i>Geophysical Research Letters</i> , 1982, 9, 893-896.	1.5	56
40	Radar Nowcasting of Cloud-to-Ground Lightning over Houston, Texas. <i>Weather and Forecasting</i> , 2011, 26, 199-212.	0.5	56
41	A High-Speed Time-Resolved Spectroscopic Study of the Lightning Return Stroke. Part III. A Time-Dependent Model. <i>Journals of the Atmospheric Sciences</i> , 1968, 25, 852-856.	0.6	54
42	Total Lightning Signatures of Thunderstorm Intensity over North Texas. Part I: Supercells. <i>Monthly Weather Review</i> , 2007, 135, 3281-3302.	0.5	54
43	NO _x production by lightning over the continental United States. <i>Journal of Geophysical Research</i> , 2001, 106, 27701-27710.	3.3	52
44	Seasonal and global NO _x production by lightning estimated from the Optical Transient Detector (OTD). <i>Tellus, Series B: Chemical and Physical Meteorology</i> , 2000, 52, 1206-1215.	0.8	51
45	Characteristics of Cloud-to-Ground Lightning Associated with Violent Tornadoes. <i>Weather and Forecasting</i> , 1997, 12, 428-437.	0.5	50
46	Cloud-to-Ground Lightning in Tropical Cyclones: A Study of Hurricanes Hugo (1989) and Jerry (1989). <i>Monthly Weather Review</i> , 1994, 122, 1887-1896.	0.5	48
47	Recoil leader formation and development. <i>Journal of Electrostatics</i> , 2013, 71, 763-768.	1.0	48
48	Peak-current variations of lightning return strokes as a function of latitude. <i>Nature</i> , 1990, 343, 149-151.	13.7	46
49	Changes in measured lightning flash count and return stroke peak current after the 1994 U.S. National Lightning Detection Network upgrade: 2. Theory. <i>Journal of Geophysical Research</i> , 1999, 104, 2159-2162.	3.3	45
50	Seasonal and global NO _x production by lightning estimated from the Optical Transient Detector (OTD). <i>Tellus, Series B: Chemical and Physical Meteorology</i> , 2022, 52, 1206.	0.8	45
51	Bipole patterns revealed by lightning locations in mesoscale storm systems. <i>Geophysical Research Letters</i> , 1988, 15, 129-132.	1.5	44
52	Warm Season Cloud-to-Ground Lightningâ€Precipitation Relationships in the South-Central United States. <i>Weather and Forecasting</i> , 1997, 12, 449-458.	0.5	44
53	Upward lightning flashes characteristics from highâ€speed videos. <i>Journal of Geophysical Research D: Atmospheres</i> , 2016, 121, 8493-8505.	1.2	44
54	Return stroke velocity measurements in multistroke lightning flashes. <i>Journal of Geophysical Research</i> , 1976, 81, 4461-4466.	3.3	41

#	ARTICLE	IF	CITATIONS
55	Leader observations during the initial breakdown stage of a lightning flash. Journal of Geophysical Research D: Atmospheres, 2014, 119, 12,198.	1.2	38
56	Luminosity characteristics of lightning M components. Journal of Geophysical Research, 1995, 100, 25695.	3.3	37
57	Global Distribution of Midnight Lightning—September to November 1977. Monthly Weather Review, 1981, 109, 391-395.	0.5	34
58	Electron density measurement in lightning from stark-broadening of H β . Journal of Geophysical Research, 1964, 69, 5151-5154.	3.3	33
59	Spectral (600–1050 nm) time exposures (99.6%) of a lightning stepped leader. Journal of Geophysical Research, 2011, 116, .	3.3	33
60	The Density, Pressure, and Particle Distribution in a Lightning Stroke near Peak Temperature. Journals of the Atmospheric Sciences, 1964, 21, 306-310.	0.6	32
61	Quantitative analysis of a lightning return stroke for diameter and luminosity changes as a function of space and time. Journal of Geophysical Research, 1974, 79, 4059-4067.	3.3	32
62	Channel tortuosity variation in Florida triggered lightning. Geophysical Research Letters, 1988, 15, 645-648.	1.5	32
63	A Comparison Of WSR-88D Reflectivities, SSM/I Brightness Temperatures, and Lightning for Mesoscale Convective Systems in Texas. Part I: Radar Reflectivity and Lightning. Journal of Applied Meteorology and Climatology, 1996, 35, 902-918.	1.7	32
64	Ozone production during thunderstorms, measured by the absorption of ultraviolet radiation from lightning. Journal of Geophysical Research, 1967, 72, 3557-3561.	3.3	31
65	An analytical solution to obtain the optimum source location using multiple direction finders on a spherical surface. Journal of Geophysical Research, 1987, 92, 10877-10886.	3.3	31
66	The Relationships between Network Lightning Surface and Hourly Observations of Thunderstorms. Monthly Weather Review, 1990, 118, 94-108.	0.5	31
67	Lake-Effect Thunderstorms in the Lower Great Lakes. Journal of Applied Meteorology and Climatology, 2009, 48, 889-902.	0.6	31
68	Enhanced NO $_x$ by lightning in the upper troposphere and lower stratosphere inferred from the UARS Global NO $_2$ measurements. Geophysical Research Letters, 2000, 27, 685-688.	1.5	30
69	Spectrum of the Lightning Dart Leader. Journals of the Atmospheric Sciences, 1975, 32, 1829-1837.	0.6	29
70	A Climatology, Synoptic Assessment, and Thermodynamic Evaluation for Cloud-to-Ground Lightning in Georgia: A study for the 1996 Summer Olympics. Bulletin of the American Meteorological Society, 1996, 77, 1483-1495.	1.7	29
71	Radar Nowcasting of Total Lightning over the Kennedy Space Center. Weather and Forecasting, 2012, 27, 189-204.	0.5	29
72	Bipolar cloud-to-ground lightning flash observations. Journal of Geophysical Research D: Atmospheres, 2013, 118, 11,098.	1.2	29

#	ARTICLE	IF	CITATIONS
73	A Comparison of WSR-88D Reflectivities, SSM/I Brightness Temperatures, and Lightning for Mesoscale Convective Systems in Texas. Part II. SSM/I Brightness Temperatures and Lightning. <i>Journal of Applied Meteorology and Climatology</i> , 1996, 35, 919-931.	1.7	28
74	The East Coast Lightning Detection Network. <i>IEEE Transactions on Power Delivery</i> , 1987, 2, 899-907.	2.9	26
75	Evolution of radar reflectivity and total lightning characteristics of the 21 April 2006 mesoscale convective system over Texas. <i>Atmospheric Research</i> , 2008, 89, 113-137.	1.8	25
76	On the Triggering Mechanisms of Upward Lightning. <i>Scientific Reports</i> , 2019, 9, 9576.	1.6	24
77	Total Lightning Signatures of Thunderstorm Intensity over North Texas. Part II: Mesoscale Convective Systems. <i>Monthly Weather Review</i> , 2007, 135, 3303-3324.	0.5	23
78	The propagation speed of a positive lightning return stroke. <i>Geophysical Research Letters</i> , 1987, 14, 1150-1153.	1.5	22
79	Winter lightning along the East Coast. <i>Geophysical Research Letters</i> , 1990, 17, 713-715.	1.5	22
80	UPLIGHTS: Upward Lightning Triggering Study. <i>Bulletin of the American Meteorological Society</i> , 2013, 94, 631-635.	1.7	22
81	High-speed video and electric field observation of a negative upward leader connecting a downward positive leader in a positive cloud-to-ground flash. <i>Electric Power Systems Research</i> , 2015, 118, 89-92.	2.1	22
82	High-Speed, Time-Resolved Spectrum of a Lightning Stroke. <i>Science</i> , 1966, 151, 451-452.	6.0	21
83	Lightning Characteristics in Lake-Effect Thunderstorms. <i>Monthly Weather Review</i> , 1990, 118, 1767-1782.	0.5	21
84	Observations of bidirectional lightning leader initiation and development near positive leader channels. <i>Journal of Geophysical Research D: Atmospheres</i> , 2016, 121, 9251-9260.	1.2	21
85	Strokes of upward illumination occurring within a few milliseconds after typical lightning return strokes. <i>Journal of Geophysical Research</i> , 2012, 117, .	3.3	20
86	On the spatial relationship between lightning discharges and propagation paths of perturbed subionospheric VLF/LF signals. <i>Journal of Geophysical Research</i> , 1991, 96, 249-258.	3.3	18
87	Transient luminosity along negative stepped leaders in lightning. <i>Journal of Geophysical Research D: Atmospheres</i> , 2015, 120, 3408-3435.	1.2	18
88	Daylight Spectra of Individual Lightning Flashes in the 370-690 nm Region. <i>Journal of Applied Meteorology</i> , 1980, 19, 470-473.	1.1	17
89	Three unusual strokes in a triggered lightning flash. <i>Journal of Geophysical Research</i> , 1984, 89, 7311-7316.	3.3	16
90	The East Coast Lightning Detection Network. <i>IEEE Transactions on Power Systems</i> , 1986, 1, 243-246.	4.6	16
