#	ARTICLE	IF	CITATIONS
1	Diversity and distribution of avian malaria and related haemosporidian parasites in captive birds from a Brazilian city. <i>Malaria Journal</i> , 2017, 16, 83.	2.3	65
2	Avian host composition, local speciation and dispersal drive the regional assembly of avian malaria parasites in South American birds. <i>Molecular Ecology</i> , 2019, 28, 2681-2693.	3.9	54
3	Hemosporidian parasites of free-living birds in the São Paulo Zoo, Brazil. <i>Parasitology Research</i> , 2016, 115, 1443-1452.	1.6	37
4	<i>Plasmodium</i> (Novyella) nucleophilum from an Egyptian Goose in São Paulo Zoo, Brazil: microscopic confirmation and molecular characterization. <i>International Journal for Parasitology: Parasites and Wildlife</i> , 2013, 2, 286-291.	1.5	33
5	<i>Anopheles</i> (Kerteszia) cruzii (DIPTERA: CULICIDAE) IN PERIDOMICILIARY AREA DURING ASYMPTOMATIC MALARIA TRANSMISSION IN THE ATLANTIC FOREST: MOLECULAR IDENTIFICATION OF BLOOD-MEAL SOURCES INDICATES HUMANS AS PRIMARY INTERMEDIATE HOSTS. <i>Revista Do Instituto De Medicina Tropical De Sao Paulo</i> , 2014, 56, 403-409.	1.1	25
6	Merozoite surface protein-1 genetic diversity in <i>Plasmodium malariae</i> and <i>Plasmodium brasilianum</i> from Brazil. <i>BMC Infectious Diseases</i> , 2015, 15, 529.	2.9	18
7	Survey of <i>Plasmodium</i> spp. in Free-Ranging Neotropical Primates from the Brazilian Amazon Region impacted by Anthropogenic Actions. <i>EcoHealth</i> , 2013, 10, 48-53.	2.0	17
8	Avian Malaria and Related Parasites from Resident and Migratory Birds in the Brazilian Atlantic Forest, with Description of a New Haemoproteus Species. <i>Pathogens</i> , 2021, 10, 103.	2.8	14
9	Influence of polymorphisms in toll-like receptors (TLRs) on malaria susceptibility in low-endemic area of the Atlantic Forest, São Paulo, Brazil. <i>Acta Tropica</i> , 2018, 182, 309-316.	2.0	8
10	Genetic ancestry effects on the distribution of toll-like receptors (TLRs) gene polymorphisms in a population of the Atlantic Forest, São Paulo, Brazil. <i>Human Immunology</i> , 2018, 79, 101-108.	2.4	8
11	Higher infection probability of haemosporidian parasites in Blue-black Grassquits (<i>Volatinia jacarina</i>) inhabiting native vegetation across Brazil. <i>Parasitology International</i> , 2021, 80, 102204.	1.3	8
12	First Molecular Detection of Polychromophilus Parasites in Brazilian Bat Species. <i>Microorganisms</i> , 2021, 9, 1240.	3.6	7
13	Phylogeny of <i>Anopheles</i> (Kerteszia) (Diptera: Culicidae) Using Mitochondrial Genes. <i>Insects</i> , 2020, 11, 324.	2.2	6
14	First molecular screening of <i>Plasmodium</i> species in ungulates from Southern Brazil. <i>BMC Research Notes</i> , 2018, 11, 536.	1.4	4
15	Assessing Diversity, <i>Plasmodium</i> Infection and Blood Meal Sources in Mosquitoes (Diptera: Culicidae) from a Brazilian Zoological Park with Avian Malaria Transmission. <i>Insects</i> , 2021, 12, 215.	2.2	4
16	TLRs in Malaria. , 2019, , 1-11.		0
