#	ARTICLE	IF	CITATIONS
1	The circulating LncRNA SNHG15/miR-346 axis may be a potential biomarker of cardiomyocyte apoptosis during myocardial ischemia/reperfusion injury. <i>International Journal of Cardiology</i> , 2021, 334, 30.	0.8	4
2	LncRNA XIST may exert a profibrotic role via sponging miR-133a through SOCS2-activated autophagy in myocardial infarction. <i>International Journal of Cardiology</i> , 2021, 337, 100.	0.8	3
3	Circulating HOTAIR/miR-126 axis is negatively associated with disease risk of incident myocardial infarction. <i>International Journal of Cardiology</i> , 2020, 298, 121.	0.8	5
4	TUG1/miR-421/PINK1: A potential mechanism for treating myocardial ischemia-reperfusion injury. <i>International Journal of Cardiology</i> , 2019, 292, 197.	0.8	8
5	MEG3/miR-223: A potentially reliable risk factor predictor for myocardial ischemia-reperfusion injury. <i>International Journal of Cardiology</i> , 2019, 293, 259.	0.8	3
6	Dexmedetomidine Preconditioning Protects Cardiomyocytes Against Hypoxia/Reoxygenation-Induced Necroptosis by Inhibiting HMGB1-Mediated Inflammation. <i>Cardiovascular Drugs and Therapy</i> , 2019, 33, 45-54.	1.3	35
7	LncRNA MALAT1 Promotes Oxygen-Glucose Deprivation and Reoxygenation Induced Cardiomyocytes Injury Through Sponging miR-20b to Enhance beclin1-Mediated Autophagy. <i>Cardiovascular Drugs and Therapy</i> , 2019, 33, 675-686.	1.3	23
8	Circular RNA DLGAP4 ameliorates cardiomyocyte apoptosis through regulating BCL2 via targeting miR-143 in myocardial ischemia-reperfusion injury. <i>International Journal of Cardiology</i> , 2019, 279, 147.	0.8	23
9	MALAT1/miR-204/LC3-II: A potential regulated axis of autophagy in myocardial ischemia-reperfusion injury. <i>International Journal of Cardiology</i> , 2019, 277, 222.	0.8	10
10	MALAT1/miR-144/Brg1: A potential regulated axis of inflammation in myocardial ischemia-reperfusion injury. <i>International Journal of Cardiology</i> , 2019, 283, 151.	0.8	4
11	LncRNA MALAT1 sponges miR-203 to promote inflammation in myocardial ischemia-reperfusion injury. <i>International Journal of Cardiology</i> , 2018, 268, 245.	0.8	29
