#	ARTICLE	IF	CITATIONS
1	A high throughput colorimetric assay of β -1,3-d-glucans by Congo red dye. <i>Journal of Microbiological Methods</i> , 2015, 109, 140-148.	0.7	53
2	Structure of Amidase from <i>Pseudomonas aeruginosa</i> Showing a Trapped Acyl Transfer Reaction Intermediate State. <i>Journal of Biological Chemistry</i> , 2007, 282, 19598-19605.	1.6	46
3	Production, purification and characterisation of polysaccharides from <i>Pleurotus ostreatus</i> with antitumour activity. <i>Journal of the Science of Food and Agriculture</i> , 2012, 92, 1826-1832.	1.7	39
4	Assay for glucose oxidase from <i>Aspergillus niger</i> and <i>Penicillium amagasakiense</i> by Fourier transform infrared spectroscopy. <i>Analytical Biochemistry</i> , 2004, 333, 320-327.	1.1	36
5	Production of laccase and xylanase from <i>Coriolus versicolor</i> grown on tomato pomace and their chromatographic behaviour on immobilized metal chelates. <i>Process Biochemistry</i> , 2008, 43, 1265-1274.	1.8	36
6	Optimisation and economic assessment of lipase-catalysed production of monoesters using <i>Rhizomucor miehei</i> lipase in a solvent-free system. <i>Journal of Cleaner Production</i> , 2016, 137, 953-964.	4.6	34
7	Application of Fourier transform infrared spectroscopy for monitoring hydrolysis and synthesis reactions catalyzed by a recombinant amidase. <i>Analytical Biochemistry</i> , 2005, 346, 49-58.	1.1	31
8	Biosensor for acrylamide based on an ion-selective electrode using whole cells of <i>Pseudomonas aeruginosa</i> containing amidase activity. <i>Biocatalysis and Biotransformation</i> , 2009, 27, 143-151.	1.1	26
9	Substitutions of Thr-103-Ile and Trp-138-Gly in Amidase from <i>Pseudomonas aeruginosa</i> Are Responsible for Altered Kinetic Properties and Enzyme Instability. <i>Molecular Biotechnology</i> , 2001, 17, 201-212.	1.3	25
10	Supercritical CO ₂ Extracts and Volatile Oil of Basil (<i>Ocimum basilicum</i> L.) Comparison with Conventional Methods. <i>Separations</i> , 2018, 5, 21.	1.1	23
11	Glucose 1- and 2-oxidases from fungal strains: isolation and production of monoclonal antibodies. <i>Journal of Biotechnology</i> , 1999, 69, 151-162.	1.9	21
12	Measuring enzymatic activity of a recombinant amidase using Fourier transform infrared spectroscopy. <i>Analytical Biochemistry</i> , 2003, 322, 208-214.	1.1	20
13	A Sensitive Microplate Assay for Lipase Activity Measurement Using Olive Oil Emulsion Substrate: Modification of the Copper Soap Colorimetric Method. <i>Journal of Oleo Science</i> , 2016, 65, 775-784.	0.6	20
14	Protein-polysaccharides of <i>Trametes versicolor</i> : production and biological activities. <i>Medicinal Chemistry Research</i> , 2012, 21, 937-943.	1.1	19
15	Production, purification and characterization of laccase from <i>Pleurotus ostreatus</i> grown on tomato pomace. <i>World Journal of Microbiology and Biotechnology</i> , 2012, 28, 245-254.	1.7	16
16	Investigation of structural effects and behaviour of <i>Pseudomonas aeruginosa</i> amidase encapsulated in reversed micelles. <i>Process Biochemistry</i> , 2012, 47, 264-272.	1.8	15
17	Substitution of Glu-59 by Val in Amidase From <i>Pseudomonas aeruginosa</i> Results in a Catalytically Inactive Enzyme. <i>Molecular Biotechnology</i> , 2000, 16, 05-16.	1.3	14
18	Production of polygalacturonase from <i>Coriolus versicolor</i> grown on tomato pomace and its chromatographic behaviour on immobilized metal chelates. <i>Journal of Industrial Microbiology and Biotechnology</i> , 2008, 35, 475-484.	1.4	14

#	ARTICLE	IF	CITATIONS
19	Characterization of Monoclonal Antibodies Against Altered (T1031) Amidase From <i>Pseudomonas aeruginosa</i> . <i>Molecular Biotechnology</i> , 2005, 30, 207-220.	1.3	13
20	Screening of suitable immobilized metal chelates for adsorption of monoclonal antibodies against mutant amidase from <i>Pseudomonas aeruginosa</i> . <i>Journal of Molecular Recognition</i> , 2006, 19, 340-347.	1.1	13
21	Extraction of hemoglobin with calixarenes and biocatalysis in organic media of the complex with pseudoactivity of peroxidase. <i>Journal of Molecular Catalysis B: Enzymatic</i> , 2010, 62, 96-103.	1.8	13
22	An Electrochemical Biosensor for Acrylamide Determination: Merits and Limitations. <i>Portugaliae Electrochimica Acta</i> , 2011, 29, 361-373.	0.4	13
23	One-step affinity purification of urease from jack beans. <i>Biochimie</i> , 1988, 70, 1369-1372.	1.3	12
24	One-step purification and properties of catalase from leaves of <i>Zantedeschia aethiopica</i> . <i>Biochimie</i> , 1988, 70, 1759-1764.	1.3	12
25	Immobilized Metal Affinity Chromatography of Monoclonal Immunoglobulin M Against Mutant Amidase From <i>Pseudomonas aeruginosa</i> . <i>Molecular Biotechnology</i> , 2006, 33, 103-114.	1.3	12
26	Production and chromatographic behaviour of polygalacturonase from <i>Pleurotus ostreatus</i> on immobilized metal chelates. <i>Process Biochemistry</i> , 2008, 43, 531-539.	1.8	12
27	One-step affinity purification of amidase from mutant strains of <i>Pseudomonas aeruginosa</i> . <i>Biochimie</i> , 1989, 71, 1179-1184.	1.3	11
28	The use of Fourier transform infrared spectroscopy to assay for urease from <i>Pseudomonas aeruginosa</i> and <i>Canavalia ensiformis</i> . <i>Analytical Biochemistry</i> , 2004, 331, 115-121.	1.1	11
29	Kinetic properties of wild-type and altered recombinant amidases by the use of ion-selective electrode assay method. <i>Analytical Biochemistry</i> , 2006, 355, 232-239.	1.1	10
30	Bioconversion of d-glucose into d-glucosone by Glucose 2-oxidase from <i>Coriolus versicolor</i> at Moderate Pressures. <i>Applied Biochemistry and Biotechnology</i> , 2011, 163, 906-917.	1.4	10
31	Chromatographic behaviour of glucose 1- and 2-oxidases from fungal strains on immobilized metal chelates. <i>Journal of Industrial Microbiology and Biotechnology</i> , 1998, 21, 57-64.	1.4	8
32	Production of hydroxamic acids by immobilized <i>Pseudomonas aeruginosa</i> cells: Kinetic analysis in reverse micelles. <i>Journal of Molecular Catalysis B: Enzymatic</i> , 2013, 93, 28-33.	1.8	8
33	Monoclonal antibodies against urease from <i>Canavalia ensiformis</i> . <i>Biochimie</i> , 1993, 75, 1001-1006.	1.3	7
34	Monoclonal Antibodies Recognize Conformational Epitopes on Wild-type and Recombinant Mutant Amidases from <i>Pseudomonas aeruginosa</i> . <i>Molecular Biotechnology</i> , 2007, 37, 136-145.	1.3	7
35	Human alfa-fetoprotein: isolation and production of monoclonal antibodies. <i>Biochimie</i> , 1990, 72, 369-374.	1.3	6
36	A Monoclonal Antibody Specific for <i>Pseudomonas aeruginosa</i> Amidase. <i>Hybridoma</i> , 2001, 20, 273-279.	0.9	6

#	ARTICLE	IF	CITATIONS
37	A novel colorimetric assay of β -D-glucans in basidiomycete strains by alcian blue dye in a 96-well microtiter plate. <i>Biotechnology Progress</i> , 2015, 31, 1526-1535.	1.3	6
38	Purification and properties of peroxidase from <i>Pinus pinaster</i> needles. <i>Biochimie</i> , 1988, 70, 1373-1377.	1.3	5
39	Amidase encapsulated in TTAB reversed micelles for the study of transamidation reactions. <i>Biocatalysis and Biotransformation</i> , 2005, 23, 407-414.	1.1	5
40	Development of a biosensor for urea assay based on amidase inhibition, using an ion-selective electrode. <i>Biocatalysis and Biotransformation</i> , 2011, 29, 130-140.	1.1	5
41	Purification and Partial Characterization of Peroxidases from Three Food Waste By-Products: Broad Bean Pods, Pea Pods, and Artichoke Stems. <i>Applied Biochemistry and Biotechnology</i> , 2019, 189, 576-588.	1.4	5
42	<i>Pseudomonas aeruginosa</i> amidase: Aggregation in recombinant <i>Escherichia coli</i> . <i>Biotechnology Journal</i> , 2011, 6, 888-897.	1.8	4
43	The extracts of <i>Gentiana lutea</i> with potential cytotoxic effects on human carcinoma cell lines: A preliminary study. <i>European Journal of Integrative Medicine</i> , 2019, 27, 34-38.	0.8	4
44	Extraction of Phenolic Compounds from Olive Leaf Extracts and Their Effect on Proliferation of Human Carcinoma Cell Lines. <i>Agricultural Sciences</i> , 2019, 10, 1271-1285.	0.2	4
45	Production and Characterization of a Specific Rubisco Monoclonal Antibody, and Its Use in Rubisco Quantification During <i>Zantedeschia aethiopica</i> Spathe Development. <i>Hybridoma</i> , 1999, 18, 203-209.	0.9	3
46	Crystallization, diffraction data collection and preliminary crystallographic analysis of hexagonal crystals of <i>Pseudomonas aeruginosa</i> amidase. <i>Acta Crystallographica Section F: Structural Biology Communications</i> , 2007, 63, 214-216.	0.7	3
47	Chromatographic behaviour of monoclonal antibodies against wild-type amidase from <i>Pseudomonas aeruginosa</i> on immobilized metal chelates. <i>Biomedical Chromatography</i> , 2011, 25, 1327-1337.	0.8	3
48	Bioconversion of d-glucose into d-glucosone by immobilized glucose 2-oxidase from <i>Coriolus versicolor</i> at moderate pressures. <i>Process Biochemistry</i> , 2011, 46, 168-173.	1.8	3
49	Detection of FRET signals with a wavelength sensitive device based on a-SiC:H. <i>Applied Surface Science</i> , 2013, 275, 49-53.	3.1	3
50	Novel polyol-responsive monoclonal antibodies against extracellular β -D-glucans from <i>Pleurotus ostreatus</i> . <i>Biotechnology Progress</i> , 2016, 32, 116-125.	1.3	3
51	Development of a flow injection analytical system for short chain amide determination based on a tubular bioreactor and an ammonium sensor. <i>Analyst</i> , 2018, 143, 3859-3866.	1.7	3
52	Generation of high-affinity monoclonal antibodies of IgG class against native β -D-glucans from basidiomycete mushrooms. <i>Process Biochemistry</i> , 2016, 51, 333-342.	1.8	2
53	Improved purification and properties of glucose dehydrogenase from <i>Bacillus subtilis</i> . <i>Biochimie</i> , 1988, 70, 1401-1409.	1.3	1
54	Purification and Characterization of Monoclonal Antibodies Against the Free β -Subunit of Human Chorionic Gonadotrophin. <i>Molecular Biotechnology</i> , 2001, 17, 119-128.	1.3	1

#	ARTICLE	IF	CITATIONS
55	Substrate interaction with recombinant amidase from <i>Pseudomonas aeruginosa</i> during biocatalysis. <i>Biocatalysis and Biotransformation</i> , 2009, 27, 367-376.	1.1	1
56	Potentiometric biosensor for acrylamide determination in wastewater using wild type amidase from <i>Pseudomonas aeruginosa</i> . <i>WIT Transactions on Ecology and the Environment</i> , 2008, , .	0.0	1
57	Membrane Selectivity versus Sensor Response in Hydrogenated Amorphous Silicon CHEMFETs Using a Semi-Empirical Model. <i>Journal of Nanoscience and Nanotechnology</i> , 2011, 11, 8844-8847.	0.9	0
58	Non-enzymatic assay for glucose by using immobilized whole-cells of <i>E. coli</i> containing glucose binding protein fused to fluorescent proteins. <i>Sensors and Actuators B: Chemical</i> , 2015, 221, 236-241.	4.0	0
59	Field Effect and Light-Assisted a-Si:H Sensors for Detection of Ions in Solution. <i>Sensor Letters</i> , 2010, 8, 493-496.	0.4	0
