RUVA WANC

| # | Article                                                                                                                                                                                                                                                  | IF  | CITATIONS |
|---|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 1 | Selective recognition and enrichment of sterigmatocystin in wheat by thermo-responsive imprinted polymer based on magnetic halloysite nanotubes. Journal of Chromatography A, 2020, 1619, 460952.                                                        | 3.7 | 23        |
| 2 | Selective recognition and enrichment of carbamazepine in biological samples by magnetic imprinted polymer based on reversible addition-fragmentation chain transfer polymerization. Journal of Chromatography A, 2019, 1591, 62-70.                      | 3.7 | 31        |
| 3 | Colorimetric sensor for cimetidine detection in human urine based on <scp>d</scp> -xylose protected gold nanoparticles. Analyst, The, 2018, 143, 2369-2376.                                                                                              | 3.5 | 6         |
| 4 | Novel mixed hemimicelles based on nonionic surfactant–imidazolium ionic liquid and magnetic<br>halloysite nanotubes as efficient approach for analytical determination. Analytical and Bioanalytical<br>Chemistry, 2018, 410, 7357-7371.                 | 3.7 | 11        |
| 5 | Colorimetric chiral recognition of d/l-phenylalanine based on triangular silver nanoplates. Amino Acids, 2018, 50, 1269-1278.                                                                                                                            | 2.7 | 10        |
| 6 | Determination of quinolones in wastewater by porous β-cyclodextrin polymer based solid-phase<br>extraction coupled with HPLC. Journal of Chromatography B: Analytical Technologies in the<br>Biomedical and Life Sciences, 2017, 1068-1069, 24-32.       | 2.3 | 35        |
| 7 | Solid phase extraction based on porous magnetic graphene oxide/β-cyclodextrine composite coupled with high performance liquid chromatography for determination of antiepileptic drugs in plasma samples. Journal of Chromatography A, 2017, 1524, 49-56. | 3.7 | 31        |
