

Tim Wollesen

List of Publications by Year in Descending Order

Source: <https://exaly.com/author-pdf/7402803/tim-wollesen-publications-by-year.pdf>

Version: 2024-04-26

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

32
papers

654

#	Paper	IF	Citations
32	Methods in Brain Development of Molluscs. <i>Methods in Molecular Biology</i> , 2020 , 2047, 311-324	1.4	
31	Remnants of ancestral larval eyes in an eyeless mollusk? Molecular characterization of photoreceptors in the scaphopod. <i>EvoDevo</i> , 2019 , 10, 25	3.2	0
30	The quagga mussel genome and the evolution of freshwater tolerance. <i>DNA Research</i> , 2019 , 26, 411-422	4.5	13
29	Complete mitochondrial genomes of two scaphopod molluscs. <i>Mitochondrial DNA Part B: Resources</i> , 2019 , 4, 3161-3162	0.5	1
28	Expression of six3 and otx in Solenogastres (Mollusca) supports an ancestral role in bilaterian anterior-posterior axis patterning. <i>Evolution & Development</i> , 2018 , 20, 17-28	2.6	4
27	The evolution of molluscs. <i>Biological Reviews</i> , 2018 , 94, 102	13.5	54
26	Staggered Hox expression is more widespread among molluscs than previously appreciated. <i>Proceedings of the Royal Society B: Biological Sciences</i> , 2018 , 285,	4.4	14
25	Ancestral and novel roles of Pax family genes in mollusks. <i>BMC Evolutionary Biology</i> , 2017 , 17, 81	3	9
24	Brain regionalization genes are co-opted into shell field patterning in Mollusca. <i>Scientific Reports</i> , 2017 , 7, 5486	4.9	14
23	Cell Proliferation Pattern and Twist Expression in an Aplacophoran Mollusk Argue Against Segmented Ancestry of Mollusca. <i>Journal of Experimental Zoology Part B: Molecular and Developmental Evolution</i> , 2016 , 326, 422-436	1.8	9
22	Hox and ParaHox gene expression in early body plan patterning of polyplacophoran mollusks. <i>Journal of Experimental Zoology Part B: Molecular and Developmental Evolution</i> , 2016 , 326, 89-104	1.8	27
21	Mollusca 2015 , 103-153		20
20	Comparative 3D microanatomy and histology of the eyes and central nervous systems in coleoid cephalopod hatchlings. <i>Organisms Diversity and Evolution</i> , 2015 , 15, 37-64	1.7	18
19	From complex to simple: myogenesis in an aplacophoran mollusk reveals key traits in aculiferan evolution. <i>BMC Evolutionary Biology</i> , 2015 , 15, 201	3	19
18	Ancestral role of Pax2/5/8 in molluscan brain and multimodal sensory system development. <i>BMC Evolutionary Biology</i> , 2015 , 15, 231	3	20
17	The ParaHox gene Gsx patterns the apical organ and central nervous system but not the foregut in scaphopod and cephalopod mollusks. <i>EvoDevo</i> , 2015 , 6, 41	3.2	22
16	Development of the nervous system in Solenogastres (Mollusca) reveals putative ancestral spiralian features. <i>EvoDevo</i> , 2014 , 5, 48	3.2	21

15	POU genes are expressed during the formation of individual ganglia of the cephalopod central nervous system. <i>EvoDevo</i> , 2014 , 5, 41	3.2	22
14	Methods in brain development of molluscs. <i>Methods in Molecular Biology</i> , 2014 , 1082, 117-25	1.4	
13	Aplacophoran mollusks evolved from ancestors with polyplacophoran-like features. <i>Current Biology</i> , 2013 , 23, 2130-4	6.3	49
12	Spiral cleavage and early embryology of a loxosomatid entoproct and the usefulness of spiralian apical cross patterns for phylogenetic inferences. <i>BMC Developmental Biology</i> , 2012 , 12, 11	3.1	10
11	Analysis of neurotransmitter distribution in brain development of benthic and pelagic octopod cephalopods. <i>Journal of Morphology</i> , 2012 , 273, 776-90	1.6	19
10	The VD1/RPD2 β -neuropeptide is highly expressed in the brain of cephalopod mollusks. <i>Cell and Tissue Research</i> , 2012 , 348, 439-52	4.2	7
9	Cephalopod genomics: A plan of strategies and organization. <i>Standards in Genomic Sciences</i> , 2012 , 7, 175-88		40
8	Cellular and muscular growth patterns during sipunculan development. <i>Journal of Experimental Zoology Part B: Molecular and Developmental Evolution</i> , 2011 , 316B, 227-40	1.8	20
7	Expression of serotonin (5-HT) during CNS development of the cephalopod mollusk, <i>Idiosepius notoides</i> . <i>Cell and Tissue Research</i> , 2010 , 342, 161-78	4.2	22
6	FMRamide gene and peptide expression during central nervous system development of the cephalopod mollusk, <i>Idiosepius notoides</i> . <i>Evolution & Development</i> , 2010 , 12, 113-30	2.6	36
5	Pygmy squids and giant brains: mapping the complex cephalopod CNS by phalloidin staining of vibratome sections and whole-mount preparations. <i>Journal of Neuroscience Methods</i> , 2009 , 179, 63-7	3	45
4	Segmental mode of neural patterning in sipuncula. <i>Current Biology</i> , 2008 , 18, 1129-32	6.3	82
3	Myogenesis in <i>Aplysia californica</i> (Cooper, 1863) (Mollusca, Gastropoda, Opisthobranchia) with special focus on muscular remodeling during metamorphosis. <i>Journal of Morphology</i> , 2008 , 269, 776-89	1.6	15
2	Neurogenesis of cephalic sensory organs of <i>Aplysia californica</i> . <i>Cell and Tissue Research</i> , 2007 , 330, 361-72	4.2	19
1	The quagga mussel genome and the evolution of freshwater tolerance: Supplementary Material		3
