#	ARTICLE	IF	CITATIONS
1	Worldwide trends in body-mass index, underweight, overweight, and obesity from 1975 to 2016: a pooled analysis of 2416 population-based measurement studies in 128·9 million children, adolescents, and adults. Lancet, The, 2017, 390, 2627-2642.	6.3	5,010
2	Trends in adult body-mass index in 200 countries from 1975 to 2014: a pooled analysis of 1698 population-based measurement studies with 19·2 million participants. Lancet, The, 2016, 387, 1377-1396.	6.3	3,941
3	Alcohol Dosing and Total Mortality in Men and Women. Archives of Internal Medicine, 2006, 166, 2437.	4.3	777
4	Meta-Analysis of Wine and Beer Consumption in Relation to Vascular Risk. Circulation, 2002, 105, 2836-2844.	1.6	517
5	SCORE2 risk prediction algorithms: new models to estimate 10-year risk of cardiovascular disease in Europe. European Heart Journal, 2021, 42, 2439-2454.	1.0	491
6	Thrombotic complications in childhood acute lymphoblastic leukemia: a meta-analysis of 17 prospective studies comprising 1752 pediatric patients. Blood, 2006, 108, 2216-2222.	0.6	330
7	Sex Differences and Similarities in Atrial Fibrillation Epidemiology, Risk Factors, and Mortality in Community Cohorts. Circulation, 2017, 136, 1588-1597.	1.6	307
8	Polymorphisms in the Coagulation Factor VII Gene and the Risk of Myocardial Infarction. New England Journal of Medicine, 1998, 338, 79-85.	13.9	288
9	Identification of heart rate—associated loci and their effects on cardiac conduction and rhythm disorders. Nature Genetics, 2013, 45, 621-631.	9.4	282
10	The -174G/C Interleukin-6 Polymorphism Influences Postoperative Interleukin-6 Levels and Postoperative Atrial Fibrillation. Is Atrial Fibrillation an Inflammatory Complication?. Circulation, 2003, 108, 195II--199.	1.6	264
11	Alcohol Consumption and Mortality in Patients With Cardiovascular Disease. Journal of the American College of Cardiology, 2010, 55, 1339-1347.	1.2	248
12	Application of High-Sensitivity Troponin in Suspected Myocardial Infarction. New England Journal of Medicine, 2019, 380, 2529-2540.	13.9	230
13	Metabolic syndrome in young children: definitions and results of the IDEFICS study. International Journal of Obesity, 2014, 38, S4-S14.	1.6	228
14	Pulmonary Function and Abdominal Adiposity in the General Population. Chest, 2006, 129, 853-862.	0.4	205
15	Troponin I and cardiovascular risk prediction in the general population: the BiomarCaRE consortium. European Heart Journal, 2016, 37, 2428-2437.	1.0	200
16	Effects of moderate beer consumption on health and disease: A consensus document. Nutrition, Metabolism and Cardiovascular Diseases, 2016, 26, 443-467.	1.1	196
17	Wine, beer or spirit drinking in relation to fatal and non-fatal cardiovascular events: a meta-analysis. European Journal of Epidemiology, 2011, 26, 833-850.	2.5	195
18	Age- And Sex-Related Variations in Platelet Count in Italy: A Proposal of Reference Ranges Based on 40987 Subjects' Data. PLoS ONE, 2013, 8, e54289.	1.1	190

#	Article	IF	Citations
19	Application of non-HDL cholesterol for population-based cardiovascular risk stratification: results from the Multinational Cardiovascular Risk Consortium. Lancet, The, 2019, 394, 2173-2183.	6.3	177
20	Socio-economic determinants of physical activity across the life course: A "DEterminants of DIet and Physical ACtivity" (DEDIPAC) umbrella literature review. PLoS ONE, 2018, 13, e0190737.	1.1	175
21	Spousal Concordance for Major Coronary Risk Factors: A Systematic Review and Meta-Analysis. American Journal of Epidemiology, 2008, 169, 1-8.	1.6	169
22	Mediterranean diet, dietary polyphenols and low grade inflammation: results from the MOLIâ€SANI study. British Journal of Clinical Pharmacology, 2017, 83, 107-113.	1.1	164
23	Relation of the âˆ'174 G/C polymorphism of interleukin-6 to interleukin-6 plasma levels and to length of hospitalization after surgical coronary revascularization. American Journal of Cardiology, 2001, 88, 1125-1128.	0.7	161
24	Lipoprotein(a) and the risk of cardiovascular disease in the European population: results from the BiomarCaRE consortium. European Heart Journal, 2017, 38, 2490-2498.	1.0	161
25	The 4G/5G Polymorphism of PAI-1 Promoter Gene and the Risk of Myocardial Infarction: A Meta-analysis. Thrombosis and Haemostasis, 1998, 80, 1029-1030.	1.8	153
26	White blood cell count, sex and age are major determinants of heterogeneity of platelet indices in an adult general population: results from the MOLI-SANI project. Haematologica, 2011, 96, 1180-1188.	1.7	151
27	Genomewide Association Study Using a High-Density Single Nucleotide Polymorphism Array and Case-Control Design Identifies a Novel Essential Hypertension Susceptibility Locus in the Promoter Region of Endothelial NO Synthase. Hypertension, 2012, 59, 248-255.	1.3	144
28	Conversion of Urine Proteinâ€"Creatinine Ratio or Urine Dipstick Protein to Urine Albuminâ€"Creatinine Ratio for Use in Chronic Kidney Disease Screening and Prognosis. Annals of Internal Medicine, 2020, 173, 426-435.	2.0	144
29	Common cardiovascular risk factors and in-hospital mortality in 3,894 patients with COVID-19: survival analysis and machine learning-based findings from the multicentre Italian CORIST Study. Nutrition, Metabolism and Cardiovascular Diseases, 2020, 30, 1899-1913.	1.1	137
30	HIV infection, HAART, and endothelial adhesion molecules: current perspectives. Lancet Infectious Diseases, The, 2004, 4, 213-222.	4.6	133
31	Nutrition knowledge is associated with higher adherence to Mediterranean diet and lower prevalence of obesity. Results from the Moli-sani study. Appetite, 2013, 68, 139-146.	1.8	128
32	Decline of the Mediterranean diet at a time of economic crisis. Results from the Moli-sani study. Nutrition, Metabolism and Cardiovascular Diseases, 2014, 24, 853-860.	1.1	119
33	Adherence to a Mediterranean diet is associated with a better health-related quality of life: a possible role of high dietary antioxidant content. BMJ Open, 2013, 3, e003003.	0.8	118
34	Low income is associated with poor adherence to a Mediterranean diet and a higher prevalence of obesity: cross-sectional results from the Moli-sani study. BMJ Open, 2012, 2, e001685.	0.8	117
35	Response variability to aspirin as assessed by the platelet function analyzer (PFA)-100. Thrombosis and Haemostasis, 2008, 99, 14-26.	1.8	116
36	Blood pressure and metabolic changes during dietary L-arginine supplementation in humans. American Journal of Hypertension, 2000, 13, 547-551.	1.0	115

#	Article	IF	Citations
37	Seasonality of cardiovascular risk factors: an analysis including over 230â€¦000 participants in 15 countries. Heart, 2014, 100, 1517-1523.	1.2	113
38	Psychological determinants of physical activity across the life course: A "DEterminants of DIet and Physical ACtivity" (DEDIPAC) umbrella systematic literature review. PLoS ONE, 2017, 12, e0182709.	1.1	112
39	Platelet Glycoprotein Receptor IIIa Polymorphism PlA1/PlA2 and Coronary Risk: a Meta-Analysis. Thrombosis and Haemostasis, 2001, 85, 626-633.	1.8	110
40	Modulation of haemostatic function and prevention of experimental thrombosis by red wine in rats: a role for increased nitric oxide production. British Journal of Pharmacology, 1999, 127, 747-755.	2.7	109
41	The Mediterranean diet: The reasons for a success. Thrombosis Research, 2012, 129, 401-404.	0.8	106
42	Ultra-processed food consumption is associated with increased risk of all-cause and cardiovascular mortality in the Moli-sani Study. American Journal of Clinical Nutrition, 2021, 113, 446-455.	2.2	103
43	Regular Consumption of Dark Chocolate Is Associated with Low Serum Concentrations of C-Reactive Protein in a Healthy Italian Population. Journal of Nutrition, 2008, 138, 1939-1945.	1.3	102
44	Percentiles of fasting serum insulin, glucose, HbA1c and HOMA-IR in pre-pubertal normal weight European children from the IDEFICS cohort. International Journal of Obesity, 2014, 38, S39-S47.	1.6	102
45	Thrombotic complications in adult patients with lymphoma: a meta-analysis of 29 independent cohorts including 18 018 patients and 1149 events. Blood, 2010, 115, 5322-5328.	0.6	101
46	Association of Polymorphism (Val66Met) of Brain-Derived Neurotrophic Factor with Suicide Attempts in Depressed Patients. Neuropsychobiology, 2008, 57, 139-145.	0.9	100
47	Behavioral determinants of physical activity across the life course: a â€œDEterminants of DIet and Physical ACtivityâ€•(DEDIPAC) umbrella systematic literature review. International Journal of Behavioral Nutrition and Physical Activity, 2017, 14, 58.	2.0	100
48	A score of low-grade inflammation and risk of mortality: prospective findings from the Moli-sani study. Haematologica, 2016, 101, 1434-1441.	1.7	97
49	Liquid chromatographyâ€"tandem mass spectrometry analysis of oleuropein and its metabolite hydroxytyrosol in rat plasma and urine after oral administration. Journal of Chromatography B: Analytical Technologies in the Biomedical and Life Sciences, 2003, 785, 47-56.	1.2	95
50	Alcohol consumption and nâ€"3 polyunsaturated fatty acids in healthy men and women from 3 European populations. American Journal of Clinical Nutrition, 2009, 89, 354-362.	2.2	94
51	Adherence to the traditional Mediterranean diet and mortality in subjects with diabetes. Prospective results from the MOLI-SANI study. European Journal of Preventive Cardiology, 2016, 23, 400-407.	0.8	92
52	Polyphenol intake is associated with low-grade inflammation, using a novel data analysis from the Moli-sani study. Thrombosis and Haemostasis, 2016, 115, 344-352.	1.8	91
53	Cardiovascular and Overall Mortality Risk in Relation to Alcohol Consumption in Patients With Cardiovascular Disease. Circulation, 2010, 121, 1951-1959.	1.6	90
54	Predictors of Long-Term Recurrent Vascular Events After Ischemic Stroke at Young Age. Circulation, 2014, 129, 1668-1676.	1.6	90

#	Article	IF	Citations
55	Use of hydroxychloroquine in hospitalised COVID-19 patients is associated with reduced mortality: Findings from the observational multicentre Italian CORIST study. European Journal of Internal Medicine, 2020, 82, 38-47.	1.0	88
56	Heparin in COVID-19 Patients Is Associated with Reduced In-Hospital Mortality: The Multicenter Italian CORIST Study. Thrombosis and Haemostasis, 2021, 121, 1054-1065.	1.8	87
57	A life course examination of the physical environmental determinants of physical activity behaviour: A â€œDeterminants of Diet and Physical Activityâ€•(DEDIPAC) umbrella systematic literature review. PLoS ONE, 2017, 12, e0182083.	1.1	85
58	Bcl I Polymorphism in the Fibrinogen Î²-Chain Gene Is Associated With the Risk of Familial Myocardial Infarction by Increasing Plasma Fibrinogen Levels. Arteriosclerosis, Thrombosis, and Vascular Biology, 1997, 17, 3489-3494.	1.1	82
59	Adherence to the Mediterranean diet is associated with lower platelet and leukocyte counts: results from the Moli-sani study. Blood, 2014, 123, 3037-3044.	0.6	82
60	Prevalence and cardiovascular risk profile of chronic kidney disease in Italy: results of the 2008â€"12 National Health Examination Survey. Nephrology Dialysis Transplantation, 2015, 30, 806-814.	0.4	82
61	Challenges to the Mediterranean diet at a time of economic crisis. Nutrition, Metabolism and Cardiovascular Diseases, 2016, 26, 1057-1063.	1.1	82
62	4G/5G Promoter PAI-1 Gene Polymorphism Is Associated with Plasmatic PAI-1 Activity in Italians: A Model of Gene-Environment Interaction. Thrombosis and Haemostasis, 1998, 79, 354-358.	1.8	81
63	Alcohol consumption, cardiac biomarkers, and risk of atrial fibrillation and adverse outcomes. European Heart Journal, 2021, 42, 1170-1177.	1.0	79
64	Association of D-dimer levels with all-cause mortality in a healthy adult population: findings from the MOLI-SANI study. Haematologica, 2013, 98, 1476-1480.	1.7	74
65	Mediterranean diet and mortality in the elderly: a prospective cohort study and a meta-analysis. British Journal of Nutrition, 2018, 120, 841-854.	1.2	74
66	Associations between Dietary Pulses Alone or with Other Legumes and Cardiometabolic Disease Outcomes: An Umbrella Review and Updated Systematic Review and Meta-analysis of Prospective Cohort Studies. Advances in Nutrition, 2019, 10, S308-S319.	2.9	74
67	Epidemiology of breast cancer, a paradigm of the â€œcommon soilâ€•hypothesis. Seminars in Cancer Biology, 2021, 72, 4-10.	4.3	74
68	IL1B gene promoter haplotype pairs predict clinical levels of interleukin-1Î² and C-reactive protein. Human Genetics, 2008, 123, 387-398.	1.8	73
69	Periodontal Disease and Recurrent Cardiovascular Events in Survivors of Myocardial Infarction (MI): The Western New York Acute MI Study. Journal of Periodontology, 2010, 81, 502-511.	1.7	73
70	Consumption of cocoa, tea and coffee and risk of cardiovascular disease. European Journal of Internal Medicine, 2012, 23, 15-25.	1.0	73
71	Assessment of diet, physical activity and biological, social and environmental factors in a multi-centre European project on diet- and lifestyle-related disorders in children (IDEFICS). Zeitschrift Fur Gesundheitswissenschaften, 2006, 14, 279-289.	0.8	72
72	Distribution of short and lifetime risks for cardiovascular disease in Italians. European Journal of Preventive Cardiology, 2012, 19, 723-730.	0.8	72

#	Article	IF	Citations
73	Association Between Migraine and Cervical Artery Dissection. JAMA Neurology, 2017, 74, 512.	4.5	71
74	COVID-19 lockdown impact on lifestyle habits of Italian adults. Acta Biomedica, 2020, 91, 87-89.	0.2	71
75	Physical activity and clustered cardiovascular disease risk factors in young children: a cross-sectional study (the IDEFICS study). BMC Medicine, 2013, 11, 172.	2.3	69
76	Chlamydia pneumoniae and cytomegalovirus seropositivity, inflammatory markers, and the risk of myocardial infarction at a young age. American Heart Journal, 2001, 142, 633-640.	1.2	67
77	Genetic control of postoperative systemic inflammatory reaction and pulmonary and renal complications after coronary artery surgery. Journal of Thoracic and Cardiovascular Surgery, 2003, 126, 1107-1112.	0.4	66
78	Association of proinflammatory diet with low-grade inflammation: results from the Moli-sani study. Nutrition, 2018, 54, 182-188.	1.1	66
79	Contributions of mean and shape of blood pressure distribution to worldwide trends and variations in raised blood pressure: a pooled analysis of 1018 population-based measurement studies with 88.6 million participants. International Journal of Epidemiology, 2018, 47, 872-883i.	0.9	65
80	Intercorrelations between serum, salivary, and hair cortisol and child‑reported estimates of stress in elementary school girls. Psychophysiology, 2012, 49, 1072-1081.	1.2	61
81	Gene-specific DNA methylation profiles and LINE-1 hypomethylation are associated with myocardial infarction risk. Clinical Epigenetics, 2015, 7, 133.	1.8	61
82	Antithrombotic Effect of Polyphenols in Experimental Models. Annals of the New York Academy of Sciences, 2002, 957, 174-188.	1.8	60
83	Educational class inequalities in the incidence of coronary heart disease in Europe. Heart, 2016, 102, 958-965.	1.2	60
84	Predictors of Migraine Subtypes in Young Adults With Ischemic Stroke. Stroke, 2011, 42, 17-21.	1.0	59
85	Using concept mapping in the development of the EU-PAD framework (EUropean-Physical Activity) Tj ETQq1 1 0.784314 rgBT /Overlock	1.2	58
86	Chili Pepper Consumption and Mortality in Italian Adults. Journal of the American College of Cardiology, 2019, 74, 3139-3149.	1.2	57
87	Edible Mushrooms and Beta-Glucans: Impact on Human Health. Nutrients, 2021, 13, 2195.	1.7	57
88	Genes Encoding Fibrinogen and Cardiovascular Risk. Hypertension, 2001, 38, 1199-1203.	1.3	55
89	Metabolic Syndrome and Breast Cancer Risk: A Case-Cohort Study Nested in a Multicentre Italian Cohort. PLoS ONE, 2015, 10, e0128891.	1.1	55
90	Supplementation with vitamin E alone is associated with reduced myocardial infarction: A meta-analysis. Nutrition, Metabolism and Cardiovascular Diseases, 2015, 25, 354-363.	1.1	54

#	Article	IF	Citations
91	Socio-cultural determinants of physical activity across the life course: a 'Determinants of Diet and Physical Activity' (DEDIPAC) umbrella systematic literature review. International Journal of Behavioral Nutrition and Physical Activity, 2017, 14, 173.	2.0	54
92	Sex-Specific Epidemiology of Heart Failure Risk and Mortality in Europe. JACC: Heart Failure, 2019, 7, 204-213.	1.9	54
93	Impact of Nationwide Lockdowns Resulting from the First Wave of the COVID-19 Pandemic on Food Intake, Eating Behaviors, and Diet Quality: A Systematic Review. Advances in Nutrition, 2022, 13, 388-423.	2.9	54
94	Prevention of postoperative atrial fibrillation in open heart surgery patients by preoperative supplementation of n-3 polyunsaturated fatty acids: An updated meta-analysis. Journal of Thoracic and Cardiovascular Surgery, 2013, 146, 906-911.	0.4	52
95	Different Anticoagulant Regimens, Mortality, and Bleeding in Hospitalized Patients with COVID-19: A Systematic Review and an Updated Meta-Analysis. Seminars in Thrombosis and Hemostasis, 2021, 47, 372-391.	1.5	52
96	Prevention of cardiovascular risk by moderate alcohol consumption: epidemiologic evidence and plausible mechanisms. Internal and Emergency Medicine, 2010, 5, 291-297.	1.0	51
97	The association of high-sensitivity c-reactive protein and other biomarkers with cardiovascular disease in patients treated for HIV: a nested case–control study. BMC Infectious Diseases, 2013, 13, 414.	1.3	51
98	High adherence to the Mediterranean diet is associated with cardiovascular protection in higher but not in lower socioeconomic groups: prospective findings from the Moli-sani study. International Journal of Epidemiology, 2017, 46, 1478-1487.	0.9	51
99	PFA-100 closure time to predict cardiovascular events in aspirin-treated cardiovascular patients: A meta-analysis of 19 studies comprising 3,003 patients. Thrombosis and Haemostasis, 2008, 99, 1129-1131.	1.8	50
100	Homocysteine Lowering by Folate-Rich Diet or Pharmacological Supplementations in Subjects with Moderate Hyperhomocysteinemia. Nutrients, 2013, 5, 1531-1543.	1.7	50
101	B-vitamins intake, DNA-methylation of One Carbon Metabolism and homocysteine pathway genes and myocardial infarction risk: The EPICOR study. Nutrition, Metabolism and Cardiovascular Diseases, 2014, 24, 483-488.	1.1	50
102	Mediterranean-type diet is associated with higher psychological resilience in a general adult population: findings from the Moli-sani study. European Journal of Clinical Nutrition, 2018, 72, 154-160.	1.3	50
103	Prevalence, awareness, treatment and control of hypertension in healthy unrelated male–female pairs of European regions: the dietary habit profile in European communities with different risk of myocardial infarction – the impact of migration as a model of gene–environment interaction project. Journal of Hypertension, 2008, 26, 2303-2311.	0.3	49
104	Alcohol consumption and cardiovascular risk: mechanisms of action and epidemiologic perspectives. Future Cardiology, 2009, 5, 467-477.	0.5	48
105	Colorectal cancer risk and dyslipidemia: A case–cohort study nested in an Italian multicentre cohort. Cancer Epidemiology, 2014, 38, 144-151.	0.8	47
106	Dietary anthocyanins and health: data from FLORA and ATHENA EU projects. British Journal of Clinical Pharmacology, 2017, 83, 103-106.	1.1	47
107	Mediterranean Diet and Low-grade Subclinical Inflammation: The Moli-sani Study. Endocrine, Metabolic and Immune Disorders - Drug Targets, 2015, 15, 18-24.	0.6	47
108	Obesity and the Risk of Intracerebral Hemorrhage. Stroke, 2013, 44, 1584-1589.	1.0	46

#	Article	IF	Citations
109	Nut consumption is inversely associated with both cancer and total mortality in a Mediterranean population: prospective results from the Moli-sani study. British Journal of Nutrition, 2015, 114, 804-811.	1.2	46
110	Diet and primary prevention of stroke: Systematic review and dietary recommendations by the ad hoc Working Group of the Italian Society of Human Nutrition. Nutrition, Metabolism and Cardiovascular Diseases, 2018, 28, 309-334.	1.1	46
111	High‐sensitivity C‐reactive Protein is a Predictive Factor of Adiposity in Children: Results of the Identification and prevention of Dietary‐and lifestyle‐induced health Effects in Children and InfantS (IDEFICS) Study. Journal of the American Heart Association, 2013, 2, e000101.	1.6	45
112	Preoperative C-reactive protein level and outcome following coronary surgery. European Journal of Cardio-thoracic Surgery, 2002, 22, 521-526.	0.6	44
113	Elevated levels of D-dimers increase the risk of ischaemic and haemorrhagic stroke. Thrombosis and Haemostasis, 2014, 112, 941-946.	1.8	44
114	National trends in total cholesterol obscure heterogeneous changes in HDL and non-HDL cholesterol and total-to-HDL cholesterol ratio: a pooled analysis of 458 population-based studies in Asian and Western countries. International Journal of Epidemiology, 2020, 49, 173-192.	0.9	44
115	Adherence to Mediterranean diet and anthropometric and metabolic parameters in an observational study in the ˜Alto Molise™ region: The MOLI-SAL project. Nutrition, Metabolism and Cardiovascular Diseases, 2008, 18, 415-421.	1.1	43
116	Epigenome-wide association study of adiposity and future risk of obesity-related diseases. International Journal of Obesity, 2018, 42, 2022-2035.	1.6	43
117	Combination of Renin-Angiotensin System Polymorphisms Is Associated With Altered Renal Sodium Handling and Hypertension. Hypertension, 2004, 43, 598-602.	1.3	42
118	Negative life events, emotions and psychological difficulties as determinants of salivary cortisol in Belgian primary school children. Psychoneuroendocrinology, 2012, 37, 1506-1515.	1.3	42
119	Does the FTO gene interact with the socioeconomic status on the obesity development among young European children? Results from the IDEFICS study. International Journal of Obesity, 2015, 39, 1-6.	1.6	42
120	Adherence to the Mediterranean diet and risk of stroke and stroke subtypes. European Journal of Epidemiology, 2019, 34, 337-349.	2.5	42
121	Ultra-processed food intake and all-cause and cause-specific mortality in individuals with cardiovascular disease: the Moli-sani Study. European Heart Journal, 2022, 43, 213-224.	1.0	42
122	NT-proBNP (N-Terminal Pro-B-Type Natriuretic Peptide) and the Risk of Stroke. Stroke, 2019, 50, 610-617.	1.0	41
123	Flavonoid and lignan intake in a Mediterranean population: proposal for a holistic approach in polyphenol dietary analysis, the Moli-sani Study. European Journal of Clinical Nutrition, 2016, 70, 338-345.	1.3	40
124	Egg consumption and cardiovascular risk: a dose‐response meta-analysis of prospective cohort studies. European Journal of Nutrition, 2021, 60, 1833-1862.	1.8	40
125	Rebuttal to "Aspirin response variability assessed with the PFA-100 device" by Reny et al.. Thrombosis and Haemostasis, 2008, 99, 969-969.	1.8	39
126	5,10‐Methylenetetrahydrofolate reductase (MTHFR) C677T and A1298C polymorphisms: genotype frequency and association with homocysteine and folate levels in middle‐southern Italian adults.. Cell Biochemistry and Function, 2014, 32, 1-4.	1.4	39

#	Article	IF	Citations
