#	ARTICLE	IF	CITATIONS
1	Riociguat for the treatment of pulmonary arterial hypertension associated with connective tissue disease: results from PATENT-1 and PATENT-2. <i>Annals of the Rheumatic Diseases</i> , 2017, 76, 422-426.	0.5	108
2	Decreased epithelial and sputum miR-221-3p associates with airway eosinophilic inflammation and CXCL17 expression in asthma. <i>American Journal of Physiology - Lung Cellular and Molecular Physiology</i> , 2018, 315, L253-L264.	1.3	65
3	Platelet Distribution Width and Mean Platelet Volume in Idiopathic Pulmonary Arterial Hypertension. <i>Heart Lung and Circulation</i> , 2015, 24, 566-572.	0.2	35
4	High levels of serum lactate dehydrogenase correlate with the severity and mortality of idiopathic pulmonary arterial hypertension. <i>Experimental and Therapeutic Medicine</i> , 2015, 9, 2109-2113.	0.8	30
5	Echocardiographic Parameters in Patients with Pulmonary Arterial Hypertension: Correlations with Right Ventricular Ejection Fraction Derived from Cardiac Magnetic Resonance and Hemodynamics. <i>PLoS ONE</i> , 2013, 8, e71276.	1.1	29
6	Supplementation with Iron in Pulmonary Arterial Hypertension. Two Randomized Crossover Trials. <i>Annals of the American Thoracic Society</i> , 2021, 18, 981-988.	1.5	28
7	Transgelin as a potential target in the reversibility of pulmonary arterial hypertension secondary to congenital heart disease. <i>Journal of Cellular and Molecular Medicine</i> , 2018, 22, 6249-6261.	1.6	24
8	Potential biomarkers and targets in reversibility of pulmonary arterial hypertension secondary to congenital heart disease: an explorative study. <i>Pulmonary Circulation</i> , 2018, 8, 1-12.	0.8	21
9	Characteristics and long-term survival of patients with chronic thromboembolic pulmonary hypertension in China. <i>Respirology</i> , 2021, 26, 196-203.	1.3	21
10	Epithelial SERPINB10, a novel marker of airway eosinophilia in asthma, contributes to allergic airway inflammation. <i>American Journal of Physiology - Lung Cellular and Molecular Physiology</i> , 2019, 316, L245-L254.	1.3	20
11	Quantitative assessment of right ventricular glucose metabolism in idiopathic pulmonary arterial hypertension patients: a longitudinal study. <i>European Heart Journal Cardiovascular Imaging</i> , 2016, 17, 1161-1168.	0.5	16
12	The Value of the Electrocardiogram for Evaluating Prognosis in Patients with Idiopathic Pulmonary Arterial Hypertension. <i>Lung</i> , 2017, 195, 139-146.	1.4	16
13	The clinical characteristics and long-term prognosis of pulmonary arterial hypertension associated with hereditary hemorrhagic telangiectasia. <i>Pulmonary Circulation</i> , 2018, 8, 1-11.	0.8	15
14	Balloon pulmonary angioplasty reverse right ventricular remodelling and dysfunction in patients with inoperable chronic thromboembolic pulmonary hypertension: a systematic review and meta-analysis. <i>European Radiology</i> , 2021, 31, 3898-3908.	2.3	15
15	Dietary Geranylgeranyl Pyrophosphate Counteracts the Benefits of Statin Therapy in Experimental Pulmonary Hypertension. <i>Circulation</i> , 2021, 143, 1775-1792.	1.6	15
16	Characteristics, goal-oriented treatments and survival of pulmonary arterial hypertension in China: Insights from a national multicentre prospective registry. <i>Respirology</i> , 2022, 27, 517-528.	1.3	15
17	Prognostic Value of Pulmonary Artery Compliance in Patients with Pulmonary Arterial Hypertension Associated with Adult Congenital Heart Disease. <i>International Heart Journal</i> , 2017, 58, 731-738.	0.5	14
18	Nestin represents a potential marker of pulmonary vascular remodeling in pulmonary arterial hypertension associated with congenital heart disease. <i>Journal of Molecular and Cellular Cardiology</i> , 2020, 149, 41-53.	0.9	13

#	ARTICLE	IF	CITATIONS
19	Use of clinically relevant responder threshold criteria to evaluate the response to treatment in the Phase III PATENT-1 study. <i>Journal of Heart and Lung Transplantation</i> , 2015, 34, 338-347.	0.3	10
20	CYLD mediates human pulmonary artery smooth muscle cell dysfunction in congenital heart disease-associated pulmonary arterial hypertension. <i>Journal of Cellular Physiology</i> , 2021, 236, 6297-6311.	2.0	9
21	Impact of right ventricular dyssynchrony on prognosis of patients with idiopathic pulmonary arterial hypertension. <i>Pulmonary Circulation</i> , 2019, 9, 1-9.	0.8	8
22	Two-dimensional speckle tracking echocardiography assessed right ventricular function and exercise capacity in pre-capillary pulmonary hypertension. <i>International Journal of Cardiovascular Imaging</i> , 2019, 35, 1499-1508.	0.7	8
23	Value of lung perfusion scintigraphy in patients with idiopathic pulmonary arterial hypertension: a patchy pattern to consider. <i>Pulmonary Circulation</i> , 2019, 9, 1-7.	0.8	8
24	The value of three-dimensional echocardiography in risk stratification in pulmonary arterial hypertension: a cross-sectional study. <i>International Journal of Cardiovascular Imaging</i> , 2020, 36, 577-584.	0.7	7
25	Pulmonary Vascular Capacitance is Associated with Vasoreactivity and Long-Term Response to Calcium Channel Blockers in Idiopathic Pulmonary Arterial Hypertension. <i>Lung</i> , 2016, 194, 613-618.	1.4	5
26	Prognostic value of right ventricular ejection/filling parameters in <scp>IPAH</scp> using cardiac magnetic resonance: A prospective pilot study. <i>Respirology</i> , 2017, 22, 172-178.	1.3	5
27	Risk prediction in medically treated chronic thromboembolic pulmonary hypertension. <i>BMC Pulmonary Medicine</i> , 2021, 21, 128.	0.8	5
28	Comparison of the capability of risk stratification evaluation between two- and three-dimensional speckle-tracking strain in pre-capillary pulmonary hypertension. <i>Pulmonary Circulation</i> , 2019, 9, 1-9.	0.8	4
29	Association between splenectomy and portal hypertension in the development of pulmonary hypertension. <i>Pulmonary Circulation</i> , 2020, 10, 1-9.	0.8	3
30	Left ventricular peak early diastolic strain rate detected by two-dimensional speckle tracking echocardiography and disease severity in pre-capillary pulmonary hypertension. <i>Pulmonary Circulation</i> , 2019, 9, ???.	0.8	2
31	Prognostic value of hemodynamics and comorbidities in pulmonary hypertension due to advanced heart failure. <i>Heart and Lung: Journal of Acute and Critical Care</i> , 2020, 49, 158-164.	0.8	2
32	Two-dimensional speckle tracking echocardiography detected interventricular dyssynchrony predicts exercise capacity and disease severity in pre-capillary pulmonary hypertension. <i>Annals of Translational Medicine</i> , 2020, 8, 456-456.	0.7	2
33	Survival advantages of excess body mass index in patients with idiopathic pulmonary arterial hypertension. , 0, .		1
34	Risk prediction in pulmonary hypertension due to chronic heart failure: incremental prognostic value of pulmonary hemodynamics. <i>BMC Cardiovascular Disorders</i> , 2022, 22, 56.	0.7	0
