#	ARTICLE	IF	CITATIONS
1	Effects of physical training on physical performance in institutionalised elderly patients (70+) with multiple diagnoses. <i>Age and Ageing</i> , 2004, 33, 13-23.	1.6	115
2	Effects of a physical and nutritional intervention program for frail elderly people over age 75. A randomized controlled pilot treatment trial. <i>Aging Clinical and Experimental Research</i> , 2008, 20, 159-170.	2.9	71
3	Adherence to physical exercise recommendations in people over 65–The SNAC-Kungsholmen study. <i>European Journal of Public Health</i> , 2013, 23, 799-804.	0.3	53
4	Effects of a physical training and nutritional intervention program in frail elderly people regarding habitual physical activity level and activities of daily living—A randomized controlled pilot study. <i>Archives of Gerontology and Geriatrics</i> , 2010, 51, 283-289.	3.0	49
5	Feasibility of preoperative supervised home-based exercise in older adults undergoing colorectal cancer surgery – A randomized controlled design. <i>PLoS ONE</i> , 2019, 14, e0219158.	2.5	39
6	Physical training in institutionalized elderly people with multiple diagnoses—a controlled pilot study. <i>Archives of Gerontology and Geriatrics</i> , 2005, 40, 29-44.	3.0	29
7	Better preoperative physical performance reduces the odds of complication severity and discharge to care facility after abdominal cancer resection in people over the age of 70 – A prospective cohort study. <i>European Journal of Surgical Oncology</i> , 2018, 44, 1760-1767.	1.0	26
8	The effect of exercise of the affected foot in stroke patients—a randomized controlled pilot trial. <i>Clinical Rehabilitation</i> , 2006, 20, 645-655.	2.2	20
9	Downton Fall Risk Index during hospitalisation is associated with fall-related injuries after discharge: a longitudinal observational study. <i>Journal of Physiotherapy</i> , 2018, 64, 172-177.	1.7	15
10	Is Midlife Occupational Physical Activity Related to Disability in Old Age? The SNAC-Kungsholmen Study. <i>PLoS ONE</i> , 2013, 8, e70471.	2.5	15
11	Effects of physical training on aerobic capacity in frail elderly people (75+ years). Influence of lung capacity, cardiovascular disease and medical drug treatment: a randomized controlled pilot trial. <i>Aging Clinical and Experimental Research</i> , 2010, 22, 85-94.	2.9	14
12	Short-term postoperative physical decline and patient-reported recovery in people aged 70 or older undergoing abdominal cancer resection—A prospective cohort study. <i>Journal of Geriatric Oncology</i> , 2019, 10, 610-617.	1.0	12
13	Physical Fitness in Older People Recently Diagnosed with Cognitive Impairment Compared to Older People Recently Discharged from Hospital. <i>Dementia and Geriatric Cognitive Disorders Extra</i> , 2017, 6, 396-406.	1.3	6
14	Readmission within three months after inpatient geriatric care—Incidence, diagnosis and associated factors in a Swedish cohort. <i>PLoS ONE</i> , 2021, 16, e0248972.	2.5	6
15	ReCOV: recovery and rehabilitation during and after COVID-19 – a study protocol of a longitudinal observational study on patients, next of kin and health care staff. <i>BMC Sports Science, Medicine and Rehabilitation</i> , 2021, 13, 70.	1.7	3
16	Reduce sitting and lying: What do we know and what requires further research?. <i>European Journal of Physiotherapy</i> , 2016, 18, 1-2.	1.3	0
17	Associations between a composite score of hemoglobin, CRP and albumin and physical performance in older patients undergoing gastrointestinal cancer surgery. <i>Clinical Nutrition ESPEN</i> , 2021, 46, 330-335.	1.2	0
