#	ARTICLE	IF	CITATIONS
1	Communicating With Residents About Risks Following the Fukushima Nuclear Accident. <i>Asia-Pacific Journal of Public Health</i> , 2017, 29, 74S-89S.	1.0	75
2	Japanese translation and linguistic validation of the US National Cancer Institute's Patient-Reported Outcomes version of the Common Terminology Criteria for Adverse Events (PRO-CTCAE). <i>Journal of Patient-Reported Outcomes</i> , 2017, 1, 8.	1.9	44
3	The role of radiological protection experts in stakeholder involvement in the recovery phase of post-nuclear accident situations: Some lessons from the Fukushima-Daïchi NPP accident. <i>Radioprotection</i> , 2019, 54, 259-270.	1.0	33
4	Lingering health-related anxiety about radiation among Fukushima residents as correlated with media information following the accident at Fukushima Daiichi Nuclear Power Plant. <i>PLoS ONE</i> , 2019, 14, e0217285.	2.5	32
5	Association between Health Literacy and Radiation Anxiety among Residents after a Nuclear Accident: Comparison between Evacuated and Non-Evacuated Areas. <i>International Journal of Environmental Research and Public Health</i> , 2018, 15, 1463.	2.6	28
6	Measuring and assessing individual external doses during the rehabilitation phase in Iitate village after the Fukushima Daiichi nuclear power plant accident. <i>Journal of Radiological Protection</i> , 2017, 37, 606-622.	1.1	23
7	The importance of good death components among cancer patients, the general population, oncologists, and oncology nurses in Japan: patients prefer "fighting against cancer". <i>Supportive Care in Cancer</i> , 2015, 23, 103-110.	2.2	22
8	Occurrence of depressive tendency and associated social factors among elderly persons forced by the Great East Japan Earthquake and nuclear disaster to live as long-term evacuees: a prospective cohort study. <i>BMJ Open</i> , 2017, 7, e014339.	1.9	21
9	Risk Factor for Incident Functional Disability and the Effect of a Preventive Exercise Program: A 4-Year Prospective Cohort Study of Older Survivors from the Great East Japan Earthquake and Nuclear Disaster. <i>International Journal of Environmental Research and Public Health</i> , 2018, 15, 1430.	2.6	15
10	Living in the Restoration Public Housing after the Great East Japan Earthquake Correlates with Lower Subjective Well-Being of Older Adults. <i>International Journal of Environmental Research and Public Health</i> , 2019, 16, 2696.	2.6	14
11	Effectiveness of using clinical guidelines for conducting palliative care family meetings in Japan. <i>Supportive Care in Cancer</i> , 2013, 21, 53-58.	2.2	13
12	The Association between Utilization of Media Information and Current Health Anxiety Among the Fukushima Daiichi Nuclear Disaster Evacuees. <i>International Journal of Environmental Research and Public Health</i> , 2020, 17, 3921.	2.6	13
13	Living conditions and health status of populations living in territories impacted by nuclear accidents " Some lessons for developing health surveillance programme. <i>Environment International</i> , 2021, 147, 106294.	10.0	10
14	A report that Fukushima residents are concerned about radiation from Land, Food and Radon. <i>Journal of Radiation Research</i> , 2016, 57, 418-421.	1.6	8
15	Antenatal and postnatal association of maternal bonding and mental health in Fukushima after the Great East Japan Earthquake of 2011: The Japan Environment and Children's Study (JECS). <i>Journal of Affective Disorders</i> , 2021, 278, 244-251.	4.1	8
16	Recovery from radiation anxiety and posttraumatic growth among community dwellers after the nuclear disaster in Fukushima. <i>Cogent Psychology</i> , 2019, 6, .	1.3	7
17	Trends in Suicide Mortality in 10 Years around the Great East Japan Earthquake: Analysis of Evacuation and Non-Evacuation Areas in Fukushima Prefecture. <i>International Journal of Environmental Research and Public Health</i> , 2021, 18, 6005.	2.6	7
18	Examples of practical activities related to public understanding of radiation risk following the Fukushima nuclear accident. <i>Radioprotection</i> , 2020, 55, 297-307.	1.0	7

#	ARTICLE	IF	CITATIONS
19	Associated factors related to participation in general health checkup and survey of the effect of low-dose radiation exposure on health of residents of Fukushima Prefecture after the Fukushima Daiichi nuclear power plant accident. <i>Preventive Medicine Reports</i> , 2020, 20, 101214.	1.8	6
20	Chemotherapy with low-dose capecitabine as palliative treatment in a patient with metastatic breast cancer: a case report. <i>Cases Journal</i> , 2009, 2, 9081.	0.4	4
21	Efficacy of group intervention involving physical activity on subjective well-being of elderly returnees after evacuation following the Great East Japan Earthquake. <i>Psychogeriatrics</i> , 2019, 19, 246-254.	1.2	4
22	Relationship between Psychological Factors and Social Support after Lifting of Evacuation Order in Fukushima Prefecture, Japan. <i>Behavioral Sciences (Basel, Switzerland)</i> , 2020, 10, 149.	2.1	4
23	The Current State and Problems of Radiation Risk Communication: Based on the Results of a 2012 Whole Village Survey. <i>PLOS Currents</i> , 2017, 9, .	1.4	4
24	Development of radiation education in schools after the Fukushima Daiichi nuclear power plant accident – a study from the perspectives of regionality, multidisciplinary and continuity. <i>Radioprotection</i> , 2020, 55, 317-324.	1.0	4
25	Views on life and death of physicians, nurses, cancer patients and general population in Japan. <i>PLoS ONE</i> , 2017, 12, e0176648.	2.5	3
26	Thinking and Acting with School Children in Fukushima: Implementation of a Participatory Theater Approach and Analysis of the Experiences of Teachers. <i>JMA Journal</i> , 2019, 3, 67-72.	0.8	2
27	Views on death with regard to end-of-life care preferences among cancer patients at a Japanese university hospital. <i>Palliative and Supportive Care</i> , 2015, 13, 969-979.	1.0	1
28	Panel Session toward Improved Communication and Engagement with the Public after the Fukushima Daiichi Nuclear Power Plant Accident: Study Reports and Discussion with Specialists from Relevant Fields. <i>Journal of Radiation Protection and Research</i> , 2021, 46, 134-142.	0.6	1
29	Panel Session toward Improved Communication and Engagement with Publics after the Fukushima Dai-ichi Nuclear Power Plant Accident. <i>Japanese Journal of Health Physics</i> , 2020, 55, 257-263.	0.1	1
30	Review of engagement activities to promote awareness of radiation and its associated risk amongst the Japanese public before and after the Fukushima Daiichi Nuclear Power Plant accident. <i>Journal of Radiological Protection</i> , 2021, 41, 1258-1287.	1.1	1
31	Long-term Follow-up of Affected Residents After Lifting Evacuation Orders in Fukushima Prefecture, Japan: Findings from an Interview-Based Psychological Survey. <i>Disaster Medicine and Public Health Preparedness</i> , 2021, , 1-7.	1.3	0
32	The effect of knowledge of cancer and radiation on the risk perception. <i>The Proceedings of the Annual Convention of the Japanese Psychological Association</i> , 2014, 78, 1EV-1-019-1EV-1-019.	0.0	0
33	Views on death and life of medical doctors involved in cancer treatment. <i>The Proceedings of the Annual Convention of the Japanese Psychological Association</i> , 2015, 79, 1PM-034-1PM-034.	0.0	0
34	Perceptions of Residents in Relation to Smartphone Applications to Promote Understanding of Radiation Exposure after the Fukushima Accident: A Cross-Sectional Study within and outside Fukushima Prefecture. <i>Journal of Radiation Protection and Research</i> , 2022, 47, 67-76.	0.6	0
