#	Article	IF	Citations
1	Neutrophil-to-lymphocyte ratioâ€"a new diagnostic and prognostic marker of acute kidney injury. Barriers to broad clinical application. International Urology and Nephrology, 2023, 55, 101-106.	1.4	5
2	Anticipation of recovery of native renal function and liberation from renal replacement therapy in critically ill patients with severe acute kidney injury. Renal Replacement Therapy, 2022, 8, .	0.7	0
3	Current Approach to Successful Liberation from Renal Replacement Therapy in Critically Ill Patients with Severe Acute Kidney Injury: The Quest for Biomarkers Continues. Molecular Diagnosis and Therapy, 2021, 25, 1-8.	3.8	6
4	Risk of lung cancer and reninâ€"angiotensin blockade: a concise review. Journal of Cancer Research and Clinical Oncology, 2021, 147, 195-204.	2.5	19
5	The Neutrophil to Lymphocyte Ratio: An Ideal Marker for Early Diagnosis and Short-Term Prognosis of Acute Kidney Injury?. Kidney Diseases (Basel, Switzerland), 2021, 7, 241-243.	2.5	5
6	Platelet-to-lymphocyte ratio and prediction of progressive IgA nephropathy: myth or fact?. International Urology and Nephrology, 2021, 53, 2421-2422.	1.4	1
7	Obesity and the Survival of Critically Ill Patients with Acute Kidney Injury: A Paradox within the Paradox?. Kidney Diseases (Basel, Switzerland), 2020, 6, 13-21.	2.5	14
8	Intensity of renal replacement therapy and outcomes in critically ill patients with acute kidney injury: Critical appraisal of the dosing recommendations. Therapeutic Apheresis and Dialysis, 2020, 24, 620-627.	0.9	6
9	Gender differences in the susceptibility of hospital-acquired acute kidney injury: more questions than answers. International Urology and Nephrology, 2020, 52, 1911-1914.	1.4	21
10	High-volume online haemodiafiltration treatment and outcome of end-stage renal disease patients: more than one mode. International Urology and Nephrology, 2020, 52, 1501-1506.	1.4	13
11	Online hemodiafiltration and mortality risk in end-stage renal disease patients: A critical appraisal of current evidence. Kidney Research and Clinical Practice, 2019, 38, 159-168.	2.2	19
12	Renal Replacement Therapy Modality and Renal Recovery From ICU Acute Kidney Injury. Critical Care Medicine, 2018, 46, e625-e626.	0.9	1
13	Discontinuation of renal replacement therapy in critically ill patients with severe acute kidney injury: predictive factors of renal function recovery. International Urology and Nephrology, 2018, 50, 1845-1851.	1.4	21
14	Prevention of severe acute kidney injury by implementation of care bundles: Some progress but still a lot of work ahead. Saudi Journal of Kidney Diseases and Transplantation: an Official Publication of the Saudi Center for Organ Transplantation, Saudi Arabia, 2018, 29, 513.	0.3	3
15	Longâ€term renal recovery after acute kidney injury in hospitalized patients: Evidence for significant improvement?. Nephrology, 2017, 22, 733-733.	1.6	0
16	Obesity, acute kidney injury and outcome of critical illness. International Urology and Nephrology, 2017, 49, 461-466.	1.4	25
17	Cell cycle arrest biomarkers for the early prediction of acute kidney injury - full of promise, but not a mustâ€"have for yet. Journal of Renal Injury Prevention, 2017, 6, 177-183.	0.2	1
18	Sodium bicarbonate infusion for prevention of acute kidney injury: No evidence for superior benefit, but risk for harm?. International Urology and Nephrology, 2015, 47, 321-326.	1.4	14

#	Article	IF	Citations
19	Prevention of acute kidney injury by intravenous sodium bicarbonate: the end of a saga. Critical Care, 2014, 18, 672.	5.8	3
20	Assessment of Dialysis Dose in Critically Ill Maintenance Dialysis Patients. Therapeutic Apheresis and Dialysis, 2014, 18, 468-472.	0.9	2
21	Impact of advanced dialysis technology on the prevalence of dialysisâ€related amyloidosis in longâ€term maintenance dialysis patients. Hemodialysis International, 2014, 18, 136-141.	0.9	31
22	Choice of Renal Replacement Therapy Modality and Long-Term Dialysis Dependence. Where Do We Stand After Three Decades?. Critical Care Medicine, 2014, 42, e540-e541.	0.9	3
23	Continuous renal replacement therapy and maintenance dialysis patients with critical illness. Hemodialysis International, 2013, 17, 463-463.	0.9	0
24	Urinary biomarkers and acute kidney injury in children: the long road to clinical application. Pediatric Nephrology, 2013, 28, 837-842.	1.7	13
25	Effects of high efficiency post-dilution on-line hemodiafiltration or conventional hemodialysis on residual renal function and left ventricular hypertrophy. International Urology and Nephrology, 2013, 45, 1389-1396.	1.4	31
26	Severe acute hypophosphatemia during renal replacement therapy adversely affects outcome of critically ill patients with acute kidney injury. International Urology and Nephrology, 2013, 45, 191-197.	1.4	30
27	Long-term outcomes of survivors of ICU acute kidney injury requiring renal replacement therapy: a 10-year prospective cohort study. CKJ: Clinical Kidney Journal, 2012, 5, 297-302.	2.9	71
28	Hemodiafiltration and survival of end-stage renal disease patients: the long journey goes on. International Urology and Nephrology, 2012, 44, 1435-1440.	1.4	19
29	Update on Biomarkers of Acute Kidney Injury. Molecular Diagnosis and Therapy, 2012, 16, 199-207.	3.8	69
30	Hypertension Secondary to PHPT: Cause or Coincidence?. International Journal of Endocrinology, 2011, 2011, 1-6.	1.5	33
31	The dark side of high-intensity renal replacement therapy of acute kidney injury in critically ill patients. International Urology and Nephrology, 2010, 42, 435-440.	1.4	13
32	Disease Severity Adversely Affects Delivery of Dialysis in Acute Renal Failure. Nephron Clinical Practice, 2008, 107, c163-c169.	2.3	13
33	Five-year outcomes of severe acute kidney injury requiring renal replacement therapy. Nephrology Dialysis Transplantation, 2008, 23, 2235-2241.	0.7	146
34	More-intensive renal replacement therapy has no benefit in critically ill patients with acute kidney injury. Nature Clinical Practice Nephrology, 2008, 4, 596-597.	2.0	6
35	Renal recovery from acute tubular necrosis requiring renal replacement therapy: a prospective study in critically ill patients. Nephrology Dialysis Transplantation, 2006, 21, 1248-1252.	0.7	141
36	Daily Hemodialysis and the Outcome of Acute Renal Failure. New England Journal of Medicine, 2002, 346, 305-310.	27.0	820

#	Article	IF	Citations
37	Daily haemodialysis for acute renal failure. Current Opinion in Nephrology and Hypertension, 2002, 11, 589-592.	2.0	13
38	Ultrapure dialysis fluid slows loss of residual renal function in new dialysis patients. Nephrology Dialysis Transplantation, 2002, 17, 1814-1818.	0.7	125
39	Stopping smoking slows accelerated progression of renal failure in primary renal disease. Journal of Nephrology, 2002, 15, 270-4.	2.0	29
40	Are Standards for Dialysate Purity in Hemodialysis Insufficiently Strict?. Seminars in Dialysis, 2001, 14, 335-336.	1.3	0
41	Clinical manifestations of ABâ€amyloidosis: effects of biocompatibility and flux. Nephrology Dialysis Transplantation, 2000, 15, 840-845.	0.7	42
42	Biocompatible membranes preserve residual renal function in patients undergoing regular hemodialysis. American Journal of Kidney Diseases, 1997, 30, 366-373.	1.9	88
43	High-Flux Hemodialysis Postpones Clinical Manifestation of Dialysis-Related Amyloidosis. American Journal of Nephrology, 1996, 16, 484-488.	3.1	101
