citing authors

#	ARTICLE	IF	CITATIONS
1	A novel closed-loop supply chain based on the quality of returned products. Journal of Cleaner Production, 2017, 151, 344-355.	9.3	82
2	An interactive possibilistic programming approach for a multi-objective closed-loop supply chain network under uncertainty. International Journal of Systems Science, 2014, 45, 283-299.	5.5	30
3	Solving a grey project selection scheduling using a simulated shuffled frog leaping algorithm. Computers and Industrial Engineering, 2017, 107, 141-149.	6.3	25
4	Augmented $\hat{\mu}$ -constraint method in multi-objective flowshop problem with past sequence set-up times and a modified learning effect. International Journal of Production Research, 2015, 53, 5962-5976.	7.5	24
5	An accelerated Benders decomposition algorithm for reliable facility location problems in multi-echelon networks. Computers and Industrial Engineering, 2018, 124, 523-534.	6.3	24
6	A dynamic multi-commodity inventory and facility location problem in steel supply chain network design. International Journal of Advanced Manufacturing Technology, 2014, 70, 1267-1282.	3.0	21
7	Multi-echelon supply chain design considering unreliable facilities with facility hardening possibility. Applied Mathematical Modelling, 2018, 62, 321-337.	4.2	14
8	A hybrid integer grey programming for an integrated problem of project selection and scheduling with interval data. Journal of Industrial and Production Engineering, 2018, 35, 199-213.	3.1	11
9	A novel transportation location routing network for the sustainable closed-loop supply chain considering the quality of returns. Journal of Remanufacturing, 2020, 10, 79-106.	2.7	9
10	A fuzzy set covering-clustering algorithm for facility location problem. , 2011, , .		7
11	A hybrid differential evolution for general multi-objective flow shop problem with a modified learning effect. Proceedings of the Institution of Mechanical Engineers, Part B: Journal of Engineering Manufacture, 2016, 230, 2275-2285.	2.4	5
12	On the optimal modeling and evaluation of job shops with a total weighted tardiness objective: Constraint programming vs. mixed integer programming. Applied Mathematical Modelling, 2015, 39, 955-964.	4.2	4
13	Dynamic Multi-objective Maximal Covering Location Problem with Gradual Coverage. Lecture Notes in Management and Industrial Engineering, 2015, , 39-47.	0.4	2
14	Minimising the total cost of tardiness and overtime in a resumable capacitated job shop scheduling problem by using an efficient hybrid algorithm. International Journal of Industrial and Systems Engineering, 2017, 26, 318.	0.2	1
15	A Feedback-oriented Data Delay Modeling in a Dynamic Neural Network for Time Series Forecasting. Scientia Iranica, 2016, 23, 711-720.	0.4	0
