citing authors

#	ARTICLE	IF	CITATIONS
1	Role of liquid and solid particles in solid-liquid mixed fluxes on sulfur removal from molten iron under centrifugal stirring by an impeller. Powder Technology, 2022, 396, 1-12.	2.1	4
2	Thermodynamic Basis of Isothermal Carbothermic Reduction of Oxide in Liquid Steel for Simultaneous Analysis of Soluble/Insoluble Oxygen Contents in the Steel Specimens. Metallurgical and Materials Transactions B: Process Metallurgy and Materials Processing Science, 2022, 53, 1980-1988.	1.0	6
3	Inclusion Agglomeration on Ultra-Low C Liquid Steel Surface: Roles of Ti in the Steel and the Oxygen Potential. Metals and Materials International, 2022, 28, 3106-3119.	1.8	4
4	Simultaneous Analysis of Soluble and Insoluble Oxygen Contents in Al-Killed Steels of Various C Contents and Supersaturation Phenomena in the Steel. ISIJ International, 2022, 62, 1705-1714.	0.6	4
5	Suppressing initial clog deposits on inner surface of submerged entry nozzle refractory for casting liquid steel: Absorbing CO gas by CO absorbers. Journal of the European Ceramic Society, 2022, 42, 6275-6287.	2.8	4
6	Effect of Trace of Oxygen in Ar Gas on Initial Growth of Nozzle Clogging Deposits on SEN for Ti Added Ultra-Low C Steel Casting. Steel Research International, 2022, 93, .	1.0	3
7	Evaporation of As and Sn from Liquid Iron: Experiments and a Kinetic Model during Top-Blown Oxygen Steelmaking Process. Materials, 2022, 15, 4771.	1.3	1
8	Dissolution Behavior of Sn in CaO-CaF <sub>2</sub> Molten Flux and Its Distribution Ratio Between CaO-CaF <sub>2</sub> Molten Flux and Liquid Iron. Jom, 2021, 73, 1080-1089.	0.9	5
9	Progress of Thermodynamic Modeling for Sulfide Dissolution in Molten Oxide Slags: Sulfide Capacity and Phase Diagram. Metallurgical and Materials Transactions B: Process Metallurgy and Materials Processing Science, 2021, 52, 2859-2882.	1.0	12
10	Reoxidation of Al-Killed Ultra-Low C Steel by FeO in RH Slag: Experiment, Reaction Rate Model Development, and Mechanism Analysis. Metallurgical and Materials Transactions B: Process Metallurgy and Materials Processing Science, 2021, 52, 3032-3044.	1.0	9
11	An Attempt to Correlate Electrochemical Desulfurization of Molten Iron Using CaO-Al <sub>2</sub> O <sub>3</sub> -MgO-sat. Molten Slag and Applied Electricity at 1673 K (1400 °C). Metallurgical and Materials Transactions B: Process Metallurgy and Materials Processing Science, 2021, 52, 2960-2970.	1.0	6
12	Simultaneous Analysis of Soluble and Insoluble Oxygen Contents in Steel Specimens Using Inert Gas Fusion Infrared Absorptiometry. ISIJ International, 2021, 61, 2464-2473.	0.6	12
13	Phase equilibria of Al <sub>2</sub> O <sub>3</sub> -TiO system under various oxygen partial pressure: Emphasis on stability of Al <sub>2</sub> TiO <sub>5</sub> -Ti <sub>3</sub> O <sub>5</sub> pseudobrookite solid solution. Journal of the European Ceramic Society, 2021, 41, 7362-7374.	2.8	16
14	Mathematical Modeling of the Early Stage of Clogging of the SEN During Continuous Casting of Ti-ULC Steel. Metallurgical and Materials Transactions B: Process Metallurgy and Materials Processing Science, 2021, 52, 4167-4178.	1.0	17
15	Dissolution kinetics of alumina in molten CaO-Al <sub>2</sub> O <sub>3</sub> -SiO <sub>2</sub> -FeO-MgO-SiO <sub>2</sub> oxide representing the RH slag in steelmaking process. Journal of the American Ceramic Society, 2020, 103, 2210-2224.	1.9	25
16	Reaction Between High Mn-High Al Steel and CaO-SiO <sub>2</sub> -Type Molten Mold Flux: Retardation of Al <sub>2</sub> O <sub>3</sub> Accumulation at High Al Content. Metallurgical and Materials Transactions B: Process Metallurgy and Materials Processing Science, 2020, 51, 3067-3078.	1.0	3
17	Critical evaluation and thermodynamic modeling of the Fe-P and Fe-Ca-P system. Calphad: Computer Coupling of Phase Diagrams and Thermochemistry, 2020, 70, 101795.	0.7	6
18	Experimental Study of High Temperature Phase Equilibria in the Iron-Rich Part of the Fe-P and Fe-C-P Systems. Metallurgical and Materials Transactions A: Physical Metallurgy and Materials Science, 2020, 51, 5351-5364.	1.1	16

#	ARTICLE	IF	CITATIONS
19	Growth of Initial Clog Deposits during Continuous Casting of Ti-ULC Steel – Formation and Reduction of the Initial Deposits at Nozzle/Steel Interface. ISIJ International, 2020, 60, 426-435.	0.6	18
20	The Uniqueness of a Correction to Interaction Parameter Formalism in a Thermodynamically Consistent Manner. Metallurgical and Materials Transactions B: Process Metallurgy and Materials Processing Science, 2020, 51, 795-804.	1.0	8
21	Kinetics of CO Gas Dissolution into Stirred Liquid Fe at 1823 K and Its Impact on Nozzle Clogging during Continuous Casting. ISIJ International, 2020, 60, 258-266.	0.6	11
22	Thermodynamic Modeling of Liquid Steel. ISIJ International, 2020, 60, 2717-2730.	0.6	8
23	A Reaction Between High Mn–High Al Steel and CaO-SiO <sub>2</sub> -Type Molten Mold Flux: Reduction of Additive Oxide Components in Mold Flux by Al in Steel. Metallurgical and Materials Transactions B: Process Metallurgy and Materials Processing Science, 2019, 50, 2077-2082.	1.0	10
24	Oxide Solubility Minimum in Liquid Fe-M-O Alloy. Metallurgical and Materials Transactions B: Process Metallurgy and Materials Processing Science, 2019, 50, 2942-2958.	1.0	4
25	Influence of Al/Ti Ratio in Ti-ULC Steel and Refractory Components of Submerged Entry Nozzle on Formation of Clogging Deposits. ISIJ International, 2019, 59, 749-758.	0.6	36
26	Evaporation of Cu, Sn, and S from Fe-C-Cu-Sn-S Liquid Alloys in the Temperature Range from 1513 K to 1873 K (1240 °C to 1600 °C). Metallurgical and Materials Transactions B: Process Metallurgy and Materials Processing Science, 2018, 49, 1089-1100.	1.0	5
27	Electrochemical Transfer of S Between Molten Steel and Molten Slag. Metallurgical and Materials Transactions B: Process Metallurgy and Materials Processing Science, 2018, 49, 1311-1321.	1.0	15
28	Development of a multicomponent reaction rate model coupling thermodynamics and kinetics for reaction between high Mn-high Al steel and CaO-SiO <sub>2</sub> -type molten mold flux. Calphad: Computer Coupling of Phase Diagrams and Thermochemistry, 2018, 61, 105-115.	0.7	19
29	Interfacial Reaction Between Ultra Low C Steel and Gas Generated from Refractory Material Used for Submerged Entry Nozzle for Continuous Casting. BHM-Zeitschrift Fuer Rohstoffe Geotechnik Metallurgie Werkstoffe Maschinen-Und Anlagentechnik, 2018, 163, 18-22.	0.4	15
30	Electrochemical Desulfurization of Molten Steel with Molten Slag: Reaction Rate and Current Efficiency. Journal of the Electrochemical Society, 2018, 165, E816-E825.	1.3	13
31	Oxide Stability Diagram of Liquid Steels – Construction and Utilization. ISIJ International, 2018, 58, 1371-1382.	0.6	12
32	Evaporation of S from Liquid Fe–C–S Alloy. ISIJ International, 2018, 58, 10-16.	0.6	7
33	A Reaction between High Mn–High Al Steel and CaO–SiO <sub>2</sub> -Type Molten Mold Flux: Reaction Mechanism Change by High Al Content ([pct Al] <sub>0</sub> = 5.2) in the Steel and Accumulation of Reaction Product at the Reaction Interface. ISIJ International, 2018, 58, 686-695.	0.6	29
34	On the Evaporation of S from Liquid Fe–C–S Alloy. Minerals, Metals and Materials Series, 2018, , 815-823.	0.3	0
35	Oxidation of Ti Added ULC Steel by CO Gas Simulating Interfacial Reaction between the Steel and SEN during Continuous Casting. ISIJ International, 2018, 58, 1257-1266.	0.6	29
36	Distribution of Alumina in Aluminum Prediction Based on Thermodynamic and Diffusion Analysis. Metallurgical and Materials Transactions A: Physical Metallurgy and Materials Science, 2017, 48, 2697-2700.	1.1	0

#	ARTICLE	IF	CITATIONS
37	Prediction of Phase Separation of Immiscible Ga-Tl Alloys. Metallurgical and Materials Transactions A: Physical Metallurgy and Materials Science, 2017, 48, 3130-3136.	1.1	4
38	Critical Evaluations and Thermodynamic Optimizations of the MnO-Mn <sub>2</sub> O <sub>3</sub> -SiO <sub>2</sub> and FeO-Fe <sub>2</sub> O <sub>3</sub> -MnO-Mn <sub>2</sub> O <sub>3</sub> -SiO <sub>2</sub> Systems. Metallurgical and Materials Transactions B: Process Metallurgy and Materials Processing Science, 2017, 48, 1721-1735.	1.0	6
39	Composites of copper and cast iron fabricated via the liquid: In the vicinity of the limits of strength in a non-deformed condition. Materials Characterization, 2017, 130, 260-269.	1.9	9
40	Thermodynamic Modeling of Fe-C-S Ternary System. ISIJ International, 2017, 57, 782-790.	0.6	14
41	Erratum to "Reassessment of Oxide Stability Diagram in the Fe-Al-Ti-O System" [ISIJ International, 57 (2017), No. 9, pp. 1665-1667]. ISIJ International, 2017, 57, 2269-2269.	0.6	6
42	Reassessment of Oxide Stability Diagram in the Fe-Al-Ti-O System. ISIJ International, 2017, 57, 1665-1667.	0.6	32
43	Regarding "Sulfide Capacity in Ladle Slag at Steelmaking Temperatures," C. Allertz, Du Sichen; MMTB 2015 December. Metallurgical and Materials Transactions B: Process Metallurgy and Materials Processing Science, 2016, 47, 3241-3243.	1.0	2
44	Calculation of property diagram as a Zero-Phase Fraction line of auxiliary phase. Calphad: Computer Coupling of Phase Diagrams and Thermochemistry, 2016, 55, 69-75.	0.7	2
45	Thermodynamic modeling of oxide phases in the Fe-Mn-O system. Journal of Physics and Chemistry of Solids, 2016, 98, 237-246.	1.9	15
46	Study on Oxide Inclusion Dissolution in Secondary Steelmaking Slags using High Temperature Confocal Scanning Laser Microscopy. Steel Research International, 2016, 87, 57-67.	1.0	46
47	In-situ X-ray fluoroscopic observation for motion of bubbles in liquid iron for correction of drag coefficient used in numerical simulation. Metals and Materials International, 2016, 22, 681-693.	1.8	2
48	Evaporation Mechanism of Cu from Liquid Fe Containing C and S. Metallurgical and Materials Transactions B: Process Metallurgy and Materials Processing Science, 2016, 47, 2164-2176.	1.0	12
49	Thermodynamic Modeling of Oxide Phases in the Mn-O System. Metallurgical and Materials Transactions E, 2016, 3, 156-170.	0.5	2
50	Aluminum Deoxidation Equilibria in Liquid Iron: Part III—Experiments and Thermodynamic Modeling of the Fe-Mn-Al-O System. Metallurgical and Materials Transactions B: Process Metallurgy and Materials Processing Science, 2016, 47, 2837-2847.	1.0	27
51	Simultaneous Evaporation of Cu and Sn from Liquid Steel. Metallurgical and Materials Transactions B: Process Metallurgy and Materials Processing Science, 2016, 47, 2564-2570.	1.0	11
52	A Novel Technology to Develop a Nickel-Enriched Layer on Slab Surface by Utilizing NiO-Containing Synthetic Powder. Metallurgical and Materials Transactions B: Process Metallurgy and Materials Processing Science, 2016, 47, 779-787.	1.0	1
53	A Reaction Model to Simulate Composition Change of Mold Flux During Continuous Casting of High Al Steel. , 2016, , 271-277.		0
54	Modeling surface tension of multicomponent liquid steel using Modified Quasichemical Model and Constrained Gibbs Energy Minimization. Metals and Materials International, 2015, 21, 765-774.	1.8	7

#	ARTICLE	IF	CITATIONS
55	Reassessment of TiN(s)=Ti+N Equilibration in Liquid Iron. ISIJ International, 2015, 55, 2318-2324.	0.6	11
56	Desulfurization of Liquid Steel by Passing Steel Droplets through a Slag Layer. ISIJ International, 2015, 55, 1581-1590.	0.6	6
57	Evaporation Mechanism of Sn and SnS from Liquid Fe: Part I: Experiment and Adsorption of S on Reaction Site. Metallurgical and Materials Transactions B: Process Metallurgy and Materials Processing Science, 2015, 46, 250-258.	1.0	13
58	Aluminum Deoxidation Equilibria in Liquid Iron: Part II. Thermodynamic Modeling. Metallurgical and Materials Transactions B: Process Metallurgy and Materials Processing Science, 2015, 46, 2224-2233.	1.0	33
59	Relationship between surface tension and Gibbs energy, and application of Constrained Gibbs Energy Minimization. Calphad: Computer Coupling of Phase Diagrams and Thermochemistry, 2015, 50, 23-31.	0.7	20
60	Calculation of surface tension using CALPHAD software as a Zero Phase Fraction line of $\alpha$ -surface phase. Calphad: Computer Coupling of Phase Diagrams and Thermochemistry, 2015, 50, 105-112.	0.7	2
61	Evaporation Mechanism of Sn and SnS from Liquid Fe: Part II: Residual Site and Evaporation Kinetics via Sn(g) and SnS(g). Metallurgical and Materials Transactions B: Process Metallurgy and Materials Processing Science, 2015, 46, 259-266.	1.0	11
62	Evaporation Mechanism of Sn and SnS from Liquid Fe: Part III. Effect of C on Sn Removal. Metallurgical and Materials Transactions B: Process Metallurgy and Materials Processing Science, 2015, 46, 267-277.	1.0	10
63	Compositional Evolution of Oxide Inclusions in Austenitic Stainless Steel during Continuous Casting. Steel Research International, 2015, 86, 284-292.	1.0	17
64	Development of thermodynamic database for high Mn-high Al steels: Phase equilibria in the Fe-Mn-Al-C system by experiment and thermodynamic modeling. Calphad: Computer Coupling of Phase Diagrams and Thermochemistry, 2015, 51, 89-103.	0.7	36
65	Thermodynamic Modeling of the Fe-Mn-C and the Fe-Mn-Al Systems Using the Modified Quasichemical Model for Liquid Phase. Journal of Phase Equilibria and Diffusion, 2015, 36, 453-470.	0.5	24
66	Aluminum Deoxidation Equilibria in Liquid Iron: Part I. Experimental. Metallurgical and Materials Transactions B: Process Metallurgy and Materials Processing Science, 2015, 46, 1826-1836.	1.0	39
67	Erratum to "Desulfurization of Liquid Steel by Passing Steel Droplets through a Slag Layer" [ISIJ Int. 55(8): 1581-1590 (2015)]. ISIJ International, 2015, 55, 2272-2272.	0.6	0
68	Erratum to "Thermodynamic Assessment of MnO and FeO Activities in Fe-Mn-Mg-P <sub>2</sub> O <sub>5</sub> -SiO <sub>2</sub> (CaO) Molten Slag" [ISIJ Int. 53(8): 1325-1333 (2013)]. ISIJ International, 2014, 54, 1456-1456.	1.0	4
69	In Situ Observation of the Dissolution of SiO <sub>2</sub> Particles in CaO-Al <sub>2</sub> O <sub>3</sub> Slags and Mathematical Analysis of its Dissolution Pattern. Journal of the American Ceramic Society, 2014, 97, 316-325.	1.9	66
70	Thermodynamic modeling and diffusion kinetic experiments of binary Mg-Gd and Mg-Y systems. Acta Materialia, 2014, 71, 164-175.	3.8	142
71	Phase equilibria and thermodynamics of Mn-C, Mn-Si, Si-C binary systems and Mn-Si-C ternary system by critical evaluation, combined with experiment and thermodynamic modeling. Calphad: Computer Coupling of Phase Diagrams and Thermochemistry, 2014, 46, 92-102.	0.7	33
72	Critical evaluation and thermodynamic optimization of Fe-Cu, Cu-C, Fe-C binary systems and Fe-Cu-C ternary system. Calphad: Computer Coupling of Phase Diagrams and Thermochemistry, 2014, 45, 127-137.	0.7	48

#	ARTICLE	IF	CITATIONS
73	Phase equilibria and thermodynamics of the Fe-Al-C system: Critical evaluation, experiment and thermodynamic optimization. <i>Acta Materialia</i> , 2014, 79, 1-15.	3.8	53
74	Determination of Gibbs Free Energy of Formation of MnV <sub>2</sub> O <sub>4</sub> Solid Solution at 1823 K (1550°C). <i>Metallurgical and Materials Transactions B: Process Metallurgy and Materials Processing Science</i> , 2014, 45, 131-141.	1.0	4
75	Microstructural evolution of a focused ion beam fabricated Mg nanopillar at high temperatures: Defect annihilation and sublimation. <i>Scripta Materialia</i> , 2014, 86, 44-47.	2.6	7
76	Critical evaluation and thermodynamic optimization of Mg-Ga system and effect of low pressure on phase equilibria. <i>Calphad: Computer Coupling of Phase Diagrams and Thermochemistry</i> , 2014, 46, 168-175.	0.7	10
77	Decarburization of Molten Fe-C Droplet: Numerical Simulation and Experimental Validation. <i>ISIJ International</i> , 2014, 54, 2559-2568.	0.6	4
78	Thermodynamic Optimization of Mn-Si-C System. , 2014, , 641-649.		0
79	A Reaction Between High Mn-High Al Steel and CaO-SiO <sub>2</sub> -Type Molten Mold Flux: Part I. Composition Evolution in Molten Mold Flux. <i>Metallurgical and Materials Transactions B: Process Metallurgy and Materials Processing Science</i> , 2013, 44, 299-308.	1.0	93
80	A Reaction Between High Mn-High Al Steel and CaO-SiO <sub>2</sub> -Type Molten Mold Flux: Part II. Reaction Mechanism, Interface Morphology, and Al <sub>2</sub> O <sub>3</sub> Accumulation in Molten Mold Flux. <i>Metallurgical and Materials Transactions B: Process Metallurgy and Materials Processing Science</i> , 2013, 44, 309-316.	1.0	81
81	The shape of liquid miscibility gaps and short-range-order. <i>Journal of Chemical Thermodynamics</i> , 2013, 60, 19-24.	1.0	7
82	Transmission electron microscopy and thermodynamic studies of CaO-added AZ31 Mg alloys. <i>Acta Materialia</i> , 2013, 61, 3267-3277.	3.8	55
83	Experimental investigation of phase equilibria and thermodynamic modeling of the CaO-Al <sub>2</sub> O <sub>3</sub> -CaS and the CaO-SiO <sub>2</sub> -CaS oxysulfide systems. <i>Acta Materialia</i> , 2013, 61, 683-696.	3.8	14
84	Thermodynamic Assessment of MnO and FeO Activities in FeO-MnO-MgO-P <sub>2</sub> O <sub>5</sub> -SiO <sub>2</sub> (CaO) Molten Slag. <i>ISIJ International</i> , 2013, 53, 1325-1333.	0.6	11
85	Thermodynamics of the MnO-FeO-MnS-FeS-SiO <sub>2</sub> System at SiO <sub>2</sub> Saturation under Reducing Condition: Immiscibility in the Liquid Phase. <i>ISIJ International</i> , 2013, 53, 751-760.	0.6	7
86	Activity Measurement of the CaS-MnS Sulfide Solid Solution and Thermodynamic Modeling of the CaO-MnO-Al <sub>2</sub> O <sub>3</sub> -CaS-MnS-Al <sub>2</sub> S <sub>3</sub> System. <i>ISIJ International</i> , 2013, 53, 2132-2141.	0.6	13
87	Feasibility of BF Hearth Protection Using Spinel Formation by Slag Composition Control. <i>ISIJ International</i> , 2013, 53, 1779-1785.	0.6	13
88	Influence of Partial Pressure of Sulfur and Oxygen on Distribution of Fe and Mn between Liquid Fe-Mn Oxysulfide and Molten Slag. <i>Metallurgical and Materials Transactions B: Process Metallurgy and Materials Processing Science</i> , 2012, 43, 1069-1077.	1.0	10
89	Thermodynamic evaluations and optimizations of binary Mg-light Rare Earth (La, Ce, Pr, Nd, Sm) systems. <i>Calphad: Computer Coupling of Phase Diagrams and Thermochemistry</i> , 2012, 38, 100-116.	0.7	64
90	Numerical Analysis of Surface Tension Gradient Effect on the Behavior of Gas Bubbles at the Solid/Liquid Interface of Steel. <i>ISIJ International</i> , 2012, 52, 1730-1739.	0.6	13
