

# Magnus Edinger

## List of Publications by Citations

**Source:** <https://exaly.com/author-pdf/7477987/magnus-edinger-publications-by-citations.pdf>

**Version:** 2024-04-27

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

24  
papers

777  
citations

| #  | Paper                                                                                                                                                                                                                                  | IF   | Citations |
|----|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|-----------|
| 24 | Tailoring controlled-release oral dosage forms by combining inkjet and flexographic printing techniques. <i>European Journal of Pharmaceutical Sciences</i> , <b>2012</b> , 47, 615-23                                                 | 5.1  | 97        |
| 23 | Evaluation of different substrates for inkjet printing of rasagiline mesylate. <i>European Journal of Pharmaceutics and Biopharmaceutics</i> , <b>2013</b> , 85, 1075-83                                                               | 5.7  | 85        |
| 22 | Printing technologies in fabrication of drug delivery systems. <i>Expert Opinion on Drug Delivery</i> , <b>2013</b> , 10, 1711-23                                                                                                      | 8    | 84        |
| 21 | Behavior of printable formulations of loperamide and caffeine on different substrates--effect of print density in inkjet printing. <i>International Journal of Pharmaceutics</i> , <b>2013</b> , 453, 488-97                           | 6.5  | 73        |
| 20 | A step toward development of printable dosage forms for poorly soluble drugs. <i>Journal of Pharmaceutical Sciences</i> , <b>2013</b> , 102, 3694-704                                                                                  | 3.9  | 69        |
| 19 | QR encoded smart oral dosage forms by inkjet printing. <i>International Journal of Pharmaceutics</i> , <b>2018</b> , 536, 138-145                                                                                                      | 6.5  | 63        |
| 18 | Hyperspectral imaging in quality control of inkjet printed personalised dosage forms. <i>International Journal of Pharmaceutics</i> , <b>2015</b> , 483, 244-9                                                                         | 6.5  | 40        |
| 17 | Visualization and Non-Destructive Quantification of Inkjet-Printed Pharmaceuticals on Different Substrates Using Raman Spectroscopy and Raman Chemical Imaging. <i>Pharmaceutical Research</i> , <b>2017</b> , 34, 1023-1036           | 4.5  | 28        |
| 16 | Quantification of microwave-induced amorphization of celecoxib in PVP tablets using transmission Raman spectroscopy. <i>European Journal of Pharmaceutical Sciences</i> , <b>2018</b> , 117, 62-67                                     | 5.1  | 27        |
| 15 | Application of a colorimetric technique in quality control for printed pediatric orodispersible drug delivery systems containing propranolol hydrochloride. <i>International Journal of Pharmaceutics</i> , <b>2016</b> , 511, 606-618 | 6.5  | 27        |
| 14 | Edible solid foams as porous substrates for inkjet-printable pharmaceuticals. <i>European Journal of Pharmaceutics and Biopharmaceutics</i> , <b>2019</b> , 136, 38-47                                                                 | 5.7  | 24        |
| 13 | Social aspects in additive manufacturing of pharmaceutical products. <i>Expert Opinion on Drug Delivery</i> , <b>2017</b> , 14, 927-936                                                                                                | 8    | 23        |
| 12 | Near-infrared chemical imaging (NIR-CI) of 3D printed pharmaceuticals. <i>International Journal of Pharmaceutics</i> , <b>2016</b> , 515, 324-330                                                                                      | 6.5  | 21        |
| 11 | Analytical aspects of printed oral dosage forms. <i>International Journal of Pharmaceutics</i> , <b>2018</b> , 553, 97-108.5                                                                                                           | 10.5 | 19        |
| 10 | Data-enriched edible pharmaceuticals (DEEP) of medical cannabis by inkjet printing. <i>International Journal of Pharmaceutics</i> , <b>2020</b> , 589, 119866                                                                          | 6.5  | 16        |
| 9  | Quantification of Inkjet-Printed Pharmaceuticals on Porous Substrates Using Raman Spectroscopy and Near-Infrared Spectroscopy. <i>AAPS PharmSciTech</i> , <b>2019</b> , 20, 207                                                        | 3.9  | 15        |
| 8  | Unintended consequences for patients of future personalized pharmacoprinting. <i>International Journal of Clinical Pharmacy</i> , <b>2018</b> , 40, 321-324                                                                            | 2.3  | 15        |

|   |                                                                                                                                                                                                                                                           |      |    |
|---|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|----|
| 7 | Quantification of caffeine and loperamide in printed formulations by infrared spectroscopy. <i>Journal of Drug Delivery Science and Technology</i> , <b>2016</b> , 34, 60-70                                                                              | 4.5  | 14 |
| 6 | Fabrication of drug-loaded edible carrier substrates from nanosuspensions by flexographic printing. <i>International Journal of Pharmaceutics</i> , <b>2015</b> , 494, 603-610                                                                            | 6.5  | 13 |
| 5 | Integration of personalized drug delivery systems into digital health. <i>Advanced Drug Delivery Reviews</i> , <b>2021</b> , 176, 113857                                                                                                                  | 18.5 | 10 |
| 4 | In silico product design of pharmaceuticals. <i>Asian Journal of Pharmaceutical Sciences</i> , <b>2016</b> , 11, 492-499                                                                                                                                  | 9    | 7  |
| 3 | Formulation of co-amorphous systems from naproxen and naproxen sodium and in situ monitoring of physicochemical state changes during dissolution testing by Raman spectroscopy. <i>International Journal of Pharmaceutics</i> , <b>2020</b> , 587, 119662 | 6.5  | 6  |
| 2 | Data-Enriched Edible Pharmaceuticals (DEEP) with Bespoke Design, Dose and Drug Release. <i>Pharmaceutics</i> , <b>2021</b> , 13,                                                                                                                          | 6.4  | 1  |
| 1 | 3D printing in oral drug delivery <b>2020</b> , 359-386                                                                                                                                                                                                   |      |    |
