#	ARTICLE	IF	CITATIONS
1	Is time preference and present bias associated with the decision to start, quit or maintain physical activity over time?. Zeitschrift Fur Gesundheitswissenschaften, 2022, 30, 587-597.	0.8	0
2	UK general population willingness to pay for scale and polish, and detailed and personalized oral hygiene advice. Community Dentistry and Oral Epidemiology, 2022, 50, 233-242.	0.9	3
3	Psychological correlates of free colorectal cancer screening uptake in a Scottish sample: a cross-sectional observational study. BMJ Open, 2022, 12, e042210.	0.8	1
4	Pulpotomy for the Management of Irreversible Pulpitis in Mature Teeth (PIP): a feasibility study. Pilot and Feasibility Studies, 2022, 8, 77.	0.5	6
5	Examining the effectiveness of different dental recall strategies on maintenance of optimum oral health: the INTERVAL dental recalls randomised controlled trial. British Dental Journal, 2021, 230, 236-243.	0.3	9
6	The Value of Preventative Dental Care: A Discrete-Choice Experiment. Journal of Dental Research, 2021, 100, 723-730.	2.5	5
7	Examining the impact of oral hygiene advice and/or scale and polish on periodontal disease: the IQuaD cluster factorial randomised controlled trial. British Dental Journal, 2021, 230, 229-235.	0.3	4
8	Selective Caries Removal in Permanent Teeth (SCRiPT) for the treatment of deep carious lesions: a randomised controlled clinical trial in primary care. BMC Oral Health, 2021, 21, 336.	0.8	11
9	Game of Stones: feasibility randomised controlled trial of how to engage men with obesity in text message and incentive interventions for weight loss. BMJ Open, 2020, 10, e032653.	0.8	22
10	Recruiting men from across the socioeconomic spectrum via GP registers and community outreach to a weight management feasibility randomised controlled trial. BMC Medical Research Methodology, 2020, 20, 249.	1.4	3
11	Risk-based, 6-monthly and 24-monthly dental check-ups for adults: the INTERVAL three-arm RCT. Health Technology Assessment, 2020, 24, 1-138.	1.3	18
12	Text messaging and financial incentives to encourage weight loss in men with obesity: the Game of Stones feasibility RCT. Public Health Research, 2020, 8, 1-224.	0.5	4
13	The migration of UK trained GPs to Australia: Does risk attitude matter?. Health Policy, 2019, 123, 1093-1099.	1.4	7
14	The impact of quality and accessibility of primary care on emergency admissions for a range of chronic ambulatory care sensitive conditions (ACSCs) in Scotland: longitudinal analysis. BMC Family Practice, 2019, 20, 32.	2.9	11
15	A comparison of professional and private time preferences of General Practitioners. Social Science and Medicine, 2019, 222, 256-264.	1.8	4
16	Application of a discrete choice experiment approach to support the design of a hepatitis C testing service in primary care. International Journal of Drug Policy, 2019, 65, 1-7.	1.6	14
17	INTERVAL (investigation of NICE technologies for enabling risk-variable-adjusted-length) dental recalls trial: a multicentre randomised controlled trial investigating the best dental recall interval for optimum, cost-effective maintenance of oral health in dentate adults attending dental primary care. BMC Oral Health, 2018, 18, 135.	0.8	14
18	Improving the Quality of Dentistry (IQuaD): a cluster factorial randomised controlled trial comparing the effectiveness and cost-benefit of oral hygiene advice and/or periodontal instrumentation with routine care for the prevention and management of periodontal disease in dentate adults attending dental primary care. Health Technology Assessment, 2018, 22, 1-144.	1.3	37

#	ARTICLE	IF	CITATIONS
19	The role of time and risk preferences in adherence to physician advice on health behavior change. <i>European Journal of Health Economics</i> , 2017, 18, 373-386.	1.4	44
20	Doctorâ€™patient differences in risk and time preferences: A field experiment. <i>Journal of Health Economics</i> , 2016, 50, 171-182.	1.3	29
21	Achieving Good Outcomes for Asthma Living (GOAL): mixed methods feasibility and pilot cluster randomised controlled trial of a practical intervention for eliciting, setting and achieving goals for adults with asthma. <i>Trials</i> , 2016, 17, 584.	0.7	13
22	Always looking on the bright side of life? Exploring optimism and health in three UK post-industrial urban settings. <i>Journal of Public Health</i> , 2015, 37, 389-397.	1.0	9
23	Intergenerational transfer of time and risk preferences. <i>Journal of Economic Psychology</i> , 2015, 49, 187-204.	1.1	41
24	Telemonitoring for chronic obstructive pulmonary disease: a cost and cost-utility analysis of a randomised controlled trial. <i>Journal of Telemedicine and Telecare</i> , 2015, 21, 108-118.	1.4	37
25	quit4u: the effectiveness of combining behavioural support, pharmacotherapy and financial incentives to support smoking cessation. <i>Health Education Research</i> , 2015, 30, 121-133.	1.0	17
26	Comparing levels of social capital in three northern post-industrial UK cities. <i>Public Health</i> , 2015, 129, 629-638.	1.4	8
27	Comparing time and risk preferences across three post-industrial UK cities. <i>Social Science and Medicine</i> , 2015, 140, 54-61.	1.8	3
28	Specification of the Utility Function in Discrete Choice Experiments. <i>Value in Health</i> , 2014, 17, 297-301.	0.1	33
29	The use of global positional satellite location in dementia: a feasibility study for a randomised controlled trial. <i>BMC Psychiatry</i> , 2014, 14, 160.	1.1	26
30	THE ROLE OF TIME PREFERENCES IN THE INTERGENERATIONAL TRANSFER OF SMOKING. <i>Health Economics (United Kingdom)</i> , 2014, 23, 1493-1501.	0.8	6
31	Goal-setting intervention in patients with active asthma: protocol for a pilot cluster-randomised controlled trial. <i>Trials</i> , 2013, 14, 289.	0.7	9
32	IQuaD dental trial; improving the quality of dentistry: a multicentre randomised controlled trial comparing oral hygiene advice and periodontal instrumentation for the prevention and management of periodontal disease in dentate adults attending dental primary care. <i>BMC Oral Health</i> , 2013, 13, 58.	0.8	18
33	Effectiveness of telemonitoring integrated into existing clinical services on hospital admission for exacerbation of chronic obstructive pulmonary disease: researcher blind, multicentre, randomised controlled trial. <i>BMJ, The</i> , 2013, 347, f6070-f6070.	3.0	253
34	Efficacy and Cost of an Exercise Program for Functionally Impaired Older Patients With Heart Failure. <i>Circulation: Heart Failure</i> , 2012, 5, 209-216.	1.6	57
35	Is risk attitude really specific within the health context domain? Further evidence from an Italian survey using probability equivalent technique and face-to-face interviews. <i>Health, Risk and Society</i> , 2012, 14, 655-666.	0.9	5
36	Descriptive validity of alternative intertemporal models for health outcomes: an axiomatic test. <i>Health Economics (United Kingdom)</i> , 2011, 20, 770-782.	0.8	25

#	ARTICLE	IF	CITATIONS
37	Health, education and time preference. <i>Health Economics (United Kingdom)</i> , 2011, 20, 917-929.	0.8	89
38	Eliciting individual preferences for health care: a case study of perinatal care. <i>Health Expectations</i> , 2010, 13, 4-12.	1.1	19
39	Costs and benefits of tele-endoscopy clinics in a remote location. <i>Journal of Telemedicine and Telecare</i> , 2010, 16, 89-94.	1.4	12
40	Head and neck cancer assessment by flexible endoscopy and telemedicine. <i>Journal of Telemedicine and Telecare</i> , 2009, 15, 118-121.	1.4	50
41	Mapping the EORTC QLQ C-30 onto the EQ-5D Instrument: The Potential to Estimate QALYs without Generic Preference Data. <i>Value in Health</i> , 2009, 12, 167-171.	0.1	109
42	The impact of a telemetric chronic obstructive pulmonary disease monitoring service: randomised controlled trial with economic evaluation and nested qualitative study. <i>Primary Care Respiratory Journal: Journal of the General Practice Airways Group</i> , 2009, 18, 233-235.	2.5	27
43	Comparison of two methods of eliciting time preference for future health states. <i>Social Science and Medicine</i> , 2008, 67, 883-889.	1.8	13
44	Convergent validity between a discrete choice experiment and a direct, open-ended method: Comparison of preferred attribute levels and willingness to pay estimates. <i>Social Science and Medicine</i> , 2008, 67, 2043-2050.	1.8	24
45	Is risk attitude outcome specific within the health domain?. <i>Journal of Health Economics</i> , 2008, 27, 706-717.	1.3	36
46	Extrinsic Goals and Time Tradeoff. <i>Medical Decision Making</i> , 2007, 27, 406-413.	1.2	22
47	Does supplementary prenatal nursing and home visitation reduce healthcare costs in the year after childbirth?. <i>Journal of Advanced Nursing</i> , 2006, 56, 657-668.	1.5	3
48	Time preference bias in time trade-off. <i>European Journal of Health Economics</i> , 2005, 6, 107-111.	1.4	26
49	Repeated follow-up as a method for reducing non-trading behaviour in discrete choice experiments. <i>Social Science and Medicine</i> , 2004, 58, 2211-2218.	1.8	21
50	Predicting attendance for breast screening using routinely collected data. <i>Health Care Management Science</i> , 2003, 6, 229-236.	1.5	7
51	A review of studies assessing the costs and consequences of interventions to reduce mother-to-child HIV transmission in sub-Saharan Africa. <i>Aids</i> , 2003, 17, 1045-1052.	1.0	20
52	Valuing food safety improvements using willingness to pay. <i>Applied Health Economics and Health Policy</i> , 2003, 2, 99-107.	1.0	6
53	A comparison of the discounted utility model and hyperbolic discounting models in the case of social and private intertemporal preferences for health. <i>Journal of Economic Behavior and Organization</i> , 2002, 49, 79-96.	1.0	46
54	Decision making heuristics and the elicitation of preferences: being fast and frugal about the future. <i>Health Economics (United Kingdom)</i> , 2002, 11, 655-658.	0.8	32

#	ARTICLE	IF	CITATIONS
55	Access to specialist cancer care: is it equitable?. <i>British Journal of Cancer</i> , 2002, 87, 1221-1226.	2.9	29
56	Estimating time preferences for health using discrete choice experiments. <i>Social Science and Medicine</i> , 2001, 52, 1459-1470.	1.8	80
57	Negative and zero time preference for health. , 2000, 9, 171-175.		63
58	The efficient organization of blood donation: what determines the number of donors and donations?. <i>Transfusion Medicine</i> , 2000, 10, 5-11.	0.5	7
59	Valuing future private and social benefits: The discounted utility model versus hyperbolic discounting models. <i>Journal of Economic Psychology</i> , 2000, 21, 191-205.	1.1	69
60	Do People Value Their Own Future Health Differently from Others' Future Health?. <i>Medical Decision Making</i> , 1999, 19, 466-472.	1.2	21
61	Economic analysis of outreach assessment clinics in breast screening programmes. , 1999, 14, 57-67.		3
62	Cost-effectiveness of non-consensus double reading. <i>Breast</i> , 1998, 7, 243-246.	0.9	7
63	The efficient organization of blood donation. , 1998, 7, 455-463.		5
64	Feasibility of mobile provision of health services: a study of child monitoring centres in The Netherlands. , 1998, 13, 244-254.		1
65	Establishing Patient Preferences for Blood Transfusion Support: An Application of Conjoint Analysis. <i>Journal of Health Services Research and Policy</i> , 1998, 3, 70-76.	0.8	54
66	Constant and decreasing timing aversion for saving lives. <i>Social Science and Medicine</i> , 1997, 45, 1653-1659.	1.8	67
67	Saving future lives. A comparison of three discounting models. , 1997, 6, 341-350.		44
68	Using conjoint analysis to establish consumer preferences for fruit and vegetables. <i>British Food Journal</i> , 1996, 98, 5-12.	1.6	75
69	Methods for Eliciting Time Preferences Over Future Health Events. , 0, , 41-58.		2
