#	ARTICLE	IF	CITATIONS
1	Confirmation of efficacy, elucidation of mechanism, and new search for indications of radon therapy. Journal of Clinical Biochemistry and Nutrition, 2022, 70, 87-92.	1.4	4
2	Mechanisms of action of radon therapy on cytokine levels in normal mice and rheumatoid arthritis mouse model. Journal of Clinical Biochemistry and Nutrition, 2022, 70, 154-159.	1.4	3
3	A simple method for estimating the potential of the pyroelectric crystal surface. Applied Radiation and Isotopes, 2022, 185, 110230.	1.5	1
4	Radon Solubility and Diffusion in the Skin Surface Layer. International Journal of Environmental Research and Public Health, 2022, 19, 7761.	2.6	0
5	Dosimetry of radon progeny deposited on skin in air and thermal water. Journal of Radiation Research, 2021, 62, 634-644.	1.6	3
6	Radon inhalation decreases DNA damage induced by oxidative stress in mouse organs via the activation of antioxidative functions. Journal of Radiation Research, 2021, 62, 861-867.	1.6	8
7	Evaluation of the redox state in mouse organs following radon inhalation. Journal of Radiation Research, 2021, 62, 206-216.	1.6	7
8	The Effects of Low-Dose-Rate $\hat{\text{I}}^3$ -irradiation on Forced Swim Test-Induced Immobility and Oxidative Stress in Mice. Acta Medica Okayama, 2021, 75, 169-175.	0.2	0
9	X-Irradiation at 0.5 $\hat{\text{A}}\text{Gy}$ after the forced swim test reduces forced swimming-induced immobility in mice. Journal of Radiation Research, 2020, 61, 517-523.	1.6	7
10	Comparison of antioxidative effects between radon and thoron inhalation in mouse organs. Radiation and Environmental Biophysics, 2020, 59, 473-482.	1.4	6
11	Basic Study on Enhancement of Antioxidant Function by Low-dose Irradiation in Mouse Brain and Its Combined Effect with Ascorbic Acid. Radioisotopes, 2020, 69, 45-53.	0.2	1
12	Pressure dependence of X-rays produced by an LiTaO ₃ single crystal over a wide range of pressure. Applied Radiation and Isotopes, 2018, 135, 40-42.	1.5	3
13	Knowledge Discovery of Suppressive Effect of Disease and Increased Anti-oxidative Function by Low-dose Radiation Using Self-organizing Map. Radioisotopes, 2018, 67, 43-57.	0.2	0
14	Measurements of radon activity concentration in mouse tissues and organs. Radiation and Environmental Biophysics, 2017, 56, 161-165.	1.4	9
15	Protective effects of hot spring water drinking and radon inhalation on ethanol-induced gastric mucosal injury in mice. Journal of Radiation Research, 2017, 58, 614-625.	1.6	15
16	Analysis of liver damage from radon, X-ray, or alcohol treatments in mice using a self-organizing map. Journal of Radiation Research, 2017, 58, 33-40.	1.6	6
17	Radon inhalation induces manganese-superoxide dismutase in mouse brain via nuclear factor- $\hat{\text{I}}^{\text{B}}$ activation. Journal of Radiation Research, 2017, 58, 887-893.	1.6	15
18	Activation of Antioxidative Functions by Radon Inhalation Enhances the Mitigation Effects of Pregabalin on Chronic Constriction Injury-Induced Neuropathic Pain in Mice. Oxidative Medicine and Cellular Longevity, 2016, 2016, 1-8.	4.0	6

#	ARTICLE	IF	CITATIONS
19	Radon inhalation suppresses nephropathy in streptozotocin-induced type-1 diabetic mice. Journal of Nuclear Science and Technology, 2016, 53, 909-915.	1.3	8
20	Pressure dependence of X-rays produced by an LiTaO ₃ single crystal at the pressures of 1–20 Pa. Applied Radiation and Isotopes, 2016, 116, 134-137.	1.5	1
21	Evaluating the protective effects of radon inhalation or ascorbic acid treatment after transient global cerebral ischemic injury in gerbils. Journal of Nuclear Science and Technology, 2016, 53, 1681-1685.	1.3	3
22	Difference in the action mechanism of radon inhalation and radon hot spring water drinking in suppression of hyperuricemia in mice. Journal of Radiation Research, 2016, 57, 250-257.	1.6	16
23	Study on Antidepressant-Like Effects of Radon Inhalation on Forced Swim Induced Depression in Mice. Radioisotopes, 2016, 65, 493-506.	0.2	4
24	Combined effects of radon inhalation and antioxidant vitamin administration on acute alcohol-induced hepatopathy in mice. Journal of Nuclear Science and Technology, 2015, 52, 1512-1518.	1.3	7
25	Radon Inhalation Protects Against Transient Global Cerebral Ischemic Injury in Gerbils. Inflammation, 2014, 37, 1675-1682.	3.8	16
26	Antinociceptive Effects of Radon Inhalation on Formalin-Induced Inflammatory Pain in Mice. Inflammation, 2013, 36, 355-363.	3.8	24
27	Study of antioxidative effects and anti-inflammatory effects in mice due to low-dose X-irradiation or radon inhalation. Journal of Radiation Research, 2013, 54, 587-596.	1.6	56
28	Study on Health Effects of Exposure to Radon &Recent Studies on Effects and Mechanisms of Radon Therapy. Transactions of the Atomic Energy Society of Japan, 2013, 12, 267-276.	0.3	1
29	Suppression of Dextran Sulfate Sodium-Induced Colitis in Mice by Radon Inhalation. Mediators of Inflammation, 2012, 2012, 1-11.	3.0	62
30	Inhibitory Effects of Pretreatment with Radon on Acute Alcohol-Induced Hepatopathy in Mice. Mediators of Inflammation, 2012, 2012, 1-10.	3.0	13
31	Comparative Study on the Inhibitory Effects of α -Tocopherol and Radon on Carbon Tetrachloride-Induced Renal Damage. Renal Failure, 2012, 34, 1181-1187.	2.1	15
32	Comparative study on the inhibitory effects of antioxidant vitamins and radon on carbon tetrachloride-induced hepatopathy. Journal of Radiation Research, 2012, 53, 830-839.	1.6	21
33	Activation of Biodefense System by Low-Dose Irradiation or Radon Inhalation and Its Applicable Possibility for Treatment of Diabetes and Hepatopathy. Isrn Endocrinology, 2012, 2012, 1-11.	2.0	4
34	Protective Effects of Radon Inhalation on Carrageenan-Induced Inflammatory Paw Edema in Mice. Inflammation, 2012, 35, 713-722.	3.8	37
35	Pressure dependence of X-rays produced by an LiTaO ₃ single crystal at low pressures. Nuclear Instruments and Methods in Physics Research, Section A: Accelerators, Spectrometers, Detectors and Associated Equipment, 2012, 669, 66-69.	1.6	13
36	Inhibitory Effects of Prior Low-dose X-irradiation on Cold-induced Brain Injury in Mouse. Inflammation, 2012, 35, 89-97.	3.8	31

#	ARTICLE	IF	CITATIONS
37	Inhibitory Effects of Pre and Post Radon Inhalation on Carbon Tetrachloride-induced Oxidative Damage in Mouse Organs. <i>Radioisotopes</i> , 2012, 61, 231-241.	0.2	7
38	Study of the Response of Superoxide Dismutase in Mouse Organs to Radon Using a New Large-scale Facility for Exposing Small Animals to Radon. <i>Journal of Radiation Research</i> , 2011, 52, 775-781.	1.6	30
39	Radon Inhalation Protects Mice from Carbon-Tetrachloride-Induced Hepatic and Renal Damage. <i>Inflammation</i> , 2011, 34, 559-567.	3.8	29
40	Studies on possibility for alleviation of lifestyle diseases by low-dose irradiation or radon inhalation. <i>Radiation Protection Dosimetry</i> , 2011, 146, 360-363.	0.8	8
41	Performance of the first Japanese large-scale facility for radon inhalation experiments with small animals. <i>Radiation Protection Dosimetry</i> , 2011, 146, 31-33.	0.8	12
42	A comparative study on effect of continuous radon inhalation on several-time acute alcohol-induced oxidative damages of liver and brain in mouse. <i>Radiation Safety Management</i> , 2011, 10, 1-7.	0.4	1
43	Physiologically Based Pharmacokinetic Modeling of Inhaled Radon to Calculate Absorbed Doses in Mice, Rats, and Humans. <i>Journal of Nuclear Science and Technology</i> , 2010, 47, 731-738.	1.3	48
44	Physiologically Based Pharmacokinetic Modeling of Inhaled Radon to Calculate Absorbed Doses in Mice, Rats, and Humans. <i>Journal of Nuclear Science and Technology</i> , 2010, 47, 731-738.	1.3	10
45	Basic Study on Active Changes in Biological Function of Mouse Liver Graft in Cold Storage after Low-Dose X-Irradiation. <i>Journal of Clinical Biochemistry and Nutrition</i> , 2009, 45, 219-226.	1.4	12
46	Basic Study on Activation of Antioxidation Function in Some Organs of Mice by Radon Inhalation Using New Radon Exposure Device. <i>Radioisotopes</i> , 2008, 57, 241-251.	0.2	16
47	Inhibitory Effects of Prior Low-dose X-irradiation on Ischemia-reperfusion Injury in Mouse Paw. <i>Journal of Radiation Research</i> , 2007, 48, 505-513.	1.6	26
48	Histological changes in spleens of radio-sensitive and radio-resistant mice exposed to low-dose X-ray irradiation. <i>Physiological Chemistry and Physics and Medical NMR</i> , 2006, 38, 21-9.	0.2	7
49	Basic study on biochemical mechanism of thoron and thermal therapy. <i>Physiological Chemistry and Physics and Medical NMR</i> , 2006, 38, 85-92.	0.2	6
50	Effects of post low-dose X-ray irradiation on carbon tetrachloride-induced acatalasemic mice liver damage. <i>Physiological Chemistry and Physics and Medical NMR</i> , 2005, 37, 109-26.	0.2	12
51	Inhibitory Effects of Prior Low-dose X-ray Irradiation on Carbon Tetrachloride-induced Hepatopathy in Acatalasemic Mice. <i>Journal of Radiation Research</i> , 2004, 45, 89-95.	1.6	28
52	Potential inhibitory effects of low-dose thoron inhalation and ascorbic acid administration on alcohol-induced hepatopathy in mice. <i>Journal of Radiation Research</i> , 0, , .	1.6	1
