#	ARTICLE	IF	CITATIONS
1	On the origin of magnetic fields in stars – II. The effect of numerical resolution. Monthly Notices of the Royal Astronomical Society, 2022, 511, 746-764.	1.6	9
2	The properties of clusters, and the orientation of magnetic fields relative to filaments, in magnetohydrodynamic simulations of colliding clouds. Monthly Notices of the Royal Astronomical Society, 2021, 502, 2285-2295.	1.6	13
3	Investigating the role of magnetic fields in star formation using molecular line profiles. Monthly Notices of the Royal Astronomical Society, 2021, 504, 2381-2389.	1.6	8
4	The impact of non-ideal magnetohydrodynamic processes on discs, outflows, counter-rotation, and magnetic walls during the early stages of star formation. Monthly Notices of the Royal Astronomical Society, 2021, 507, 2354-2372.	1.6	18
5	Do we need non-ideal magnetohydrodynamic to model protostellar discs?. Monthly Notices of the Royal Astronomical Society, 2021, 501, 5873-5891.	1.6	13
6	The formation and early evolution of embedded star clusters in spiral galaxies. Monthly Notices of the Royal Astronomical Society, 2021, 509, 6155-6168.	1.6	15
7	Non-ideal magnetohydrodynamics versus turbulence – I. Which is the dominant process in protostellar disc formation?. Monthly Notices of the Royal Astronomical Society, 2020, 495, 3795-3806.	1.6	19
8	Non-ideal magnetohydrodynamics versus turbulence II: Which is the dominant process in stellar core formation?. Monthly Notices of the Royal Astronomical Society, 2020, 495, 3807-3818.	1.6	15
9	Ambipolar diffusion and the molecular abundances in pre-stellar cores. Monthly Notices of the Royal Astronomical Society, 2019, 488, 2357-2364.	1.6	12
10	There is no magnetic braking catastrophe: low-mass star cluster and protostellar disc formation with non-ideal magnetohydrodynamics. Monthly Notices of the Royal Astronomical Society, 2019, 489, 1719-1741.	1.6	54
11	The collapse of a molecular cloud core to stellar densities using radiation non-ideal magnetohydrodynamics. Monthly Notices of the Royal Astronomical Society, 2018, 475, 1859-1880.	1.6	47
12	The Role of Magnetic Fields in the Formation of Protostellar Discs. Frontiers in Astronomy and Space Sciences, 2018, 5, .	1.1	56
13	<sc>Phantom</sc>: A Smoothed Particle Hydrodynamics and Magnetohydrodynamics Code for Astrophysics. Publications of the Astronomical Society of Australia, 2018, 35, .	1.3	267
14	On the origin of magnetic fields in stars. Monthly Notices of the Royal Astronomical Society, 2018, 481, 2450-2457.	1.6	24
15	Hall effect-driven formation of gravitationally unstable discs in magnetized molecular cloud cores. Monthly Notices of the Royal Astronomical Society, 2018, 480, 4434-4442.	1.6	24
16	The effect of extreme ionization rates during the initial collapse of a molecular cloud core. Monthly Notices of the Royal Astronomical Society, 2018, 476, 2063-2074.	1.6	26
17	Does turbulence determine the initial mass function?. Monthly Notices of the Royal Astronomical Society, 2017, 465, 105-110.	1.6	17
18	The effect of a wider initial separation on common envelope binary interaction simulations. Monthly Notices of the Royal Astronomical Society, 2017, 464, 4028-4044.	1.6	89

#	ARTICLE	IF	CITATIONS
19	The impact of non-ideal magnetohydrodynamics on binary star formation. Monthly Notices of the Royal Astronomical Society, 2017, 466, 1788-1804.	1.6	33
20	NICIL: A Stand Alone Library to Self-Consistently Calculate Non-Ideal Magnetohydrodynamic Coefficients in Molecular Cloud Cores. Publications of the Astronomical Society of Australia, 2016, 33, .	1.3	33
21	COMPARING SIMULATIONS OF AGN FEEDBACK. Astrophysical Journal, 2016, 825, 83.	1.6	20
22	Can non-ideal magnetohydrodynamics solve the magnetic braking catastrophe?. Monthly Notices of the Royal Astronomical Society, 2016, 457, 1037-1061.	1.6	115
23	Cloud angular momentum and effective viscosity in global SPH simulations with feedback. Monthly Notices of the Royal Astronomical Society, 2014, 442, 3674-3685.	1.6	4
24	Ambipolar diffusion in smoothed particle magnetohydrodynamics. Monthly Notices of the Royal Astronomical Society, 2014, 444, 1104-1112.	1.6	36
25	AGN feedback models: correlations with star formation and observational implications of time evolution. Monthly Notices of the Royal Astronomical Society, 2014, 443, 1125-1141.	1.6	26
26	A comparative study of AGN feedback algorithms. Monthly Notices of the Royal Astronomical Society, 2013, 431, 2513-2534.	1.6	59
27	Accretion disc particle accretion in major merger simulations. Monthly Notices of the Royal Astronomical Society, 2013, 431, 539-553.	1.6	13
28	Nonlinear evolution of gravitational fragmentation regulated by magnetic fields and ambipolar diffusion. New Astronomy, 2009, 14, 221-237.	0.8	33
29	Magnetically-regulated fragmentation induced by nonlinear flows and ambipolar diffusion. New Astronomy, 2009, 14, 483-495.	0.8	47
30	Disc formation and fragmentation using radiative non-ideal magnetohydrodynamics. Monthly Notices of the Royal Astronomical Society, 0, , .	1.6	31
