#	ARTICLE	IF	CITATIONS
1	Myocardial Reperfusion Injury. <i>New England Journal of Medicine</i> , 2007, 357, 1121-1135.	13.9	3,156
2	Myocardial ischemia-reperfusion injury: a neglected therapeutic target. <i>Journal of Clinical Investigation</i> , 2013, 123, 92-100.	3.9	1,687
3	New directions for protecting the heart against ischaemiaâ€œreperfusion injury: targeting the Reperfusion Injury Salvage Kinase (RISK)-pathway. <i>Cardiovascular Research</i> , 2004, 61, 448-460.	1.8	873
4	Inhibiting Mitochondrial Fission Protects the Heart Against Ischemia/Reperfusion Injury. <i>Circulation</i> , 2010, 121, 2012-2022.	1.6	845
5	Remote Ischemic Preconditioning and Outcomes of Cardiac Surgery. <i>New England Journal of Medicine</i> , 2015, 373, 1408-1417.	13.9	603
6	Postconditioning: A Form of â€œModified Reperfusionâ€œProtects the Myocardium by Activating the Phosphatidylinositol 3-Kinase-Akt Pathway. <i>Circulation Research</i> , 2004, 95, 230-232.	2.0	602
7	Effect of remote ischaemic preconditioning on myocardial injury in patients undergoing coronary artery bypass graft surgery: a randomised controlled trial. <i>Lancet, The</i> , 2007, 370, 575-579.	6.3	598
8	Inflammation following acute myocardial infarction: Multiple players, dynamic roles, and novel therapeutic opportunities. , 2018, 186, 73-87.		533
9	Interaction of Risk Factors, Comorbidities, and Comedications with Ischemia/Reperfusion Injury and Cardioprotection by Preconditioning, Postconditioning, and Remote Conditioning. <i>Pharmacological Reviews</i> , 2014, 66, 1142-1174.	7.1	521
10	Evaluation of Techniques for the Quantification of Myocardial Scar of Differing Etiology Using Cardiac Magnetic Resonance. <i>JACC: Cardiovascular Imaging</i> , 2011, 4, 150-156.	2.3	514
11	Inhibiting mitochondrial permeability transition pore opening: a new paradigm for myocardial preconditioning?. <i>Cardiovascular Research</i> , 2002, 55, 534-543.	1.8	487
12	Multitarget Strategies to Reduce Myocardial Ischemia/Reperfusion Injury. <i>Journal of the American College of Cardiology</i> , 2019, 73, 89-99.	1.2	484
13	Postconditioning and protection from reperfusion injury: where do we stand? * Position Paper from the Working Group of Cellular Biology of the Heart of the European Society of Cardiology. <i>Cardiovascular Research</i> , 2010, 87, 406-423.	1.8	447
14	Remote ischaemic preconditioning: underlying mechanisms and clinical application. <i>Cardiovascular Research</i> , 2008, 79, 377-386.	1.8	440
15	Reperfusion injury salvage kinase signalling: taking a RISK for cardioprotection. <i>Heart Failure Reviews</i> , 2007, 12, 217-234.	1.7	436
16	Survival kinases in ischemic preconditioning and postconditioning. <i>Cardiovascular Research</i> , 2006, 70, 240-253.	1.8	425
17	Ischaemic conditioning and reperfusion injury. <i>Nature Reviews Cardiology</i> , 2016, 13, 193-209.	6.1	419
18	Ischemic preconditioning protects by activating prosurvival kinases at reperfusion. <i>American Journal of Physiology - Heart and Circulatory Physiology</i> , 2005, 288, H971-H976.	1.5	416

#	ARTICLE	IF	CITATIONS
19	The Reperfusion Injury Salvage Kinase Pathway: A Common Target for Both Ischemic Preconditioning and Postconditioning. <i>Trends in Cardiovascular Medicine</i> , 2005, 15, 69-75.	2.3	395
20	Inhibiting mitochondrial permeability transition pore opening at reperfusion protects against ischaemiaâ€œreperfusion injury. <i>Cardiovascular Research</i> , 2003, 60, 617-625.	1.8	350
21	Magnetic Resonance Perfusion or Fractional Flow Reserve in Coronary Disease. <i>New England Journal of Medicine</i> , 2019, 380, 2418-2428.	13.9	326
22	Transient Mitochondrial Permeability Transition Pore Opening Mediates Preconditioning-Induced Protection. <i>Circulation</i> , 2004, 109, 1714-1717.	1.6	319
23	Myocardial reperfusion injury: looking beyond primary PCI. <i>European Heart Journal</i> , 2013, 34, 1714-1722.	1.0	318
24	Practical guidelines for rigor and reproducibility in preclinical and clinical studies on cardioprotection. <i>Basic Research in Cardiology</i> , 2018, 113, 39.	2.5	311
25	The mitochondrial permeability transition pore: its fundamental role in mediating cell death during ischaemia and reperfusion. <i>Journal of Molecular and Cellular Cardiology</i> , 2003, 35, 339-341.	0.9	301
26	Extracellular vesicles in diagnostics and therapy of the ischaemic heart: Position Paper from the Working Group on Cellular Biology of the Heart of the European Society of Cardiology. <i>Cardiovascular Research</i> , 2018, 114, 19-34.	1.8	284
27	Novel targets and future strategies for acute cardioprotection: Position Paper of the European Society of Cardiology Working Group on Cellular Biology of the Heart. <i>Cardiovascular Research</i> , 2017, 113, 564-585.	1.8	278
28	Cardiovascular magnetic resonance measurement of myocardial extracellular volume in health and disease. <i>Heart</i> , 2012, 98, 1436-1441.	1.2	276
29	The mitochondrial permeability transition pore and its role in myocardial ischemia reperfusion injury. <i>Journal of Molecular and Cellular Cardiology</i> , 2015, 78, 23-34.	0.9	263
30	Ischaemic conditioning and targeting reperfusion injury: a 30-year voyage of discovery. <i>Basic Research in Cardiology</i> , 2016, 111, 70.	2.5	257
31	Mitochondrial morphology and cardiovascular disease. <i>Cardiovascular Research</i> , 2010, 88, 16-29.	1.8	254
32	Preconditioning and postconditioning: Underlying mechanisms and clinical application. <i>Atherosclerosis</i> , 2009, 204, 334-341.	0.4	253
33	Preconditioning and postconditioning: United at reperfusion. , 2007, 116, 173-191.		246
34	T1 Mapping for Myocardial Extracellular Volume Measurement by CMR. <i>JACC: Cardiovascular Imaging</i> , 2013, 6, 955-962.	2.3	245
35	Cardiac MRI Endpoints in Myocardial Infarction Experimental and Clinical Trials. <i>Journal of the American College of Cardiology</i> , 2019, 74, 238-256.	1.2	235
36	Preconditioning and postconditioning: The essential role of the mitochondrial permeability transition pore. <i>Cardiovascular Research</i> , 2007, 75, 530-535.	1.8	232

#	ARTICLE	IF	CITATIONS
37	The mitochondrial permeability transition pore as a target for preconditioning and postconditioning. <i>Basic Research in Cardiology</i> , 2009, 104, 189-202.	2.5	230
38	Preconditioning the Diabetic Heart: The Importance of Akt Phosphorylation. <i>Diabetes</i> , 2005, 54, 2360-2364.	0.3	228
39	Effect of remote ischaemic conditioning on clinical outcomes in patients with acute myocardial infarction (CONDI-2/ERIC-PPCI): a single-blind randomised controlled trial. <i>Lancet, The</i> , 2019, 394, 1415-1424.	6.3	223
40	Targeting reperfusion injury in patients with ST-segment elevation myocardial infarction: trials and tribulations. <i>European Heart Journal</i> , 2017, 38, ehw145.	1.0	220
41	Position Paper of the European Society of Cardiology Working Group Cellular Biology of the Heart: cell-based therapies for myocardial repair and regeneration in ischemic heart disease and heart failure. <i>European Heart Journal</i> , 2016, 37, 1789-1798.	1.0	210
42	Translating cardioprotection for patient benefit: position paper from the Working Group of Cellular Biology of the Heart of the European Society of Cardiology. <i>Cardiovascular Research</i> , 2013, 98, 7-27.	1.8	209
43	Mitochondrial fusion and fission proteins: novel therapeutic targets for combating cardiovascular disease. <i>British Journal of Pharmacology</i> , 2014, 171, 1890-1906.	2.7	206
44	Preconditioning protects by inhibiting the mitochondrial permeability transition. <i>American Journal of Physiology - Heart and Circulatory Physiology</i> , 2004, 287, H841-H849.	1.5	205
45	The therapeutic potential of ischemic conditioning: an update. <i>Nature Reviews Cardiology</i> , 2011, 8, 619-629.	6.1	205
46	Remote Ischemic Conditioning Reduces Myocardial Infarct Size and Edema in Patients With ST-Segment Elevation Myocardial Infarction. <i>JACC: Cardiovascular Interventions</i> , 2015, 8, 178-188.	1.1	199
47	The neural and humoral pathways in remote limb ischemic preconditioning. <i>Basic Research in Cardiology</i> , 2010, 105, 651-655.	2.5	197
48	Metformin protects the ischemic heart by the Akt-mediated inhibition of mitochondrial permeability transition pore opening. <i>Basic Research in Cardiology</i> , 2008, 103, 274-284.	2.5	185
49	Reducing myocardial infarct size: challenges and future opportunities. <i>Heart</i> , 2016, 102, 341-348.	1.2	185
50	Signalling via the reperfusion injury signalling kinase (RISK) pathway links closure of the mitochondrial permeability transition pore to cardioprotection. <i>International Journal of Biochemistry and Cell Biology</i> , 2006, 38, 414-419.	1.2	167
51	Reperfusion Injury Salvage Kinase and Survivor Activating Factor Enhancement Prosurvival Signaling Pathways in Ischemic Postconditioning: Two Sides of the Same Coin. <i>Antioxidants and Redox Signaling</i> , 2011, 14, 893-907.	2.5	166
52	Statins and cardioprotection " More than just lipid lowering?. , 2009, 122, 30-43.		164
53	Mitochondrial Dynamics in Cardiovascular Health and Disease. <i>Antioxidants and Redox Signaling</i> , 2013, 19, 400-414.	2.5	164
54	New horizons for newborn brain protection: enhancing endogenous neuroprotection. <i>Archives of Disease in Childhood: Fetal and Neonatal Edition</i> , 2015, 100, F541-F552.	1.4	164

#	ARTICLE	IF	CITATIONS
55	Diffuse myocardial fibrosis in severe aortic stenosis: an equilibrium contrast cardiovascular magnetic resonance study. <i>European Heart Journal Cardiovascular Imaging</i> , 2012, 13, 819-826.	0.5	161
56	Effect of remote ischaemic preconditioning on clinical outcomes in patients undergoing cardiac bypass surgery: a randomised controlled clinical trial. <i>Heart</i> , 2015, 101, 185-192.	1.2	160
57	Contrast-induced nephropathy following angiography and cardiac interventions. <i>Heart</i> , 2016, 102, 638-648.	1.2	160
58	Peri-procedural myocardial injury during percutaneous coronary intervention: an important target for cardioprotection. <i>European Heart Journal</i> , 2011, 32, 23-31.	1.0	157
59	Cross-talk between the survival kinases during early reperfusion: its contribution to ischemic preconditioning. <i>Cardiovascular Research</i> , 2004, 63, 305-312.	1.8	155
60	The coronary circulation in acute myocardial ischaemia/reperfusion injury: a target for cardioprotection. <i>Cardiovascular Research</i> , 2019, 115, 1143-1155.	1.8	151
61	Hearts deficient in both Mfn1 and Mfn2 are protected against acute myocardial infarction. <i>Cell Death and Disease</i> , 2016, 7, e2238-e2238.	2.7	150
62	Mitochondria in acute myocardial infarction and cardioprotection. <i>EBioMedicine</i> , 2020, 57, 102884.	2.7	148
63	ESC Working Group Cellular Biology of the Heart: Position Paper: improving the preclinical assessment of novel cardioprotective therapies. <i>Cardiovascular Research</i> , 2014, 104, 399-411.	1.8	143
64	Optimized Treatment of ST-Elevation Myocardial Infarction. <i>Circulation Research</i> , 2019, 125, 245-258.	2.0	140
65	HIF-1 reduces ischaemiaâ€“reperfusion injury in the heart by targeting the mitochondrial permeability transition pore. <i>Cardiovascular Research</i> , 2014, 104, 24-36.	1.8	136
66	Mitochondrial permeability transition pore as a target for cardioprotection in the human heart. <i>American Journal of Physiology - Heart and Circulatory Physiology</i> , 2005, 289, H237-H242.	1.5	135
67	The Second Window of Preconditioning (SWOP) Where Are We Now?. <i>Cardiovascular Drugs and Therapy</i> , 2010, 24, 235-254.	1.3	133
68	Cardiovascular Magnetic Resonance in Acute ST-Segmentâ€“Elevation Myocardial Infarction. <i>Circulation</i> , 2018, 137, 1949-1964.	1.6	128
69	Targeting Myocardial Reperfusion Injury â€” The Search Continues. <i>New England Journal of Medicine</i> , 2015, 373, 1073-1075.	13.9	127
70	The novel adipocytokine visfatin exerts direct cardioprotective effects. <i>Journal of Cellular and Molecular Medicine</i> , 2008, 12, 1395-1403.	1.6	125
71	Immune cells as targets for cardioprotection: new players and novel therapeutic opportunities. <i>Cardiovascular Research</i> , 2019, 115, 1117-1130.	1.8	125
72	Cardioprotection during cardiac surgery. <i>Cardiovascular Research</i> , 2012, 94, 253-265.	1.8	123

#	ARTICLE	IF	CITATIONS
73	Residual Myocardial Iron Following Intramyocardial Hemorrhage During the Convalescent Phase of Reperfused ST-Segmentâ€Elevation Myocardial Infarction and Adverse Left Ventricular Remodeling. Circulation: Cardiovascular Imaging, 2016, 9, .	1.3	120
74	ESC Joint Working Groups on Cardiovascular Surgery and the Cellular Biology of the Heart Position Paper: Peri-operative myocardial injury and infarction in patients undergoing coronary artery bypass graft surgery. European Heart Journal, 2017, 38, 2392-2411.	1.0	118
75	Mitochondrial fusion and fission proteins as novel therapeutic targets for treating cardiovascular disease. European Journal of Pharmacology, 2015, 763, 104-114.	1.7	114
76	Epigenomic and transcriptomic approaches in the post-genomic era: path to novel targets for diagnosis and therapy of the ischaemic heart? Position Paper of the European Society of Cardiology Working Group on Cellular Biology of the Heart. Cardiovascular Research, 2017, 113, 725-736.	1.8	114
77	Cyclosporin A and cardioprotection: from investigative tool to therapeutic agent. British Journal of Pharmacology, 2012, 165, 1235-1245.	2.7	113
78	Cardiac preconditioning for ischaemia: lost in translation. DMM Disease Models and Mechanisms, 2010, 3, 35-38.	1.2	105
79	Postconditioning protects human atrial muscle through the activation of the RISK pathway. Basic Research in Cardiology, 2007, 102, 453-459.	2.5	103
80	Remote ischemic conditioning: from experimental observation to clinical application: report from the 8th Biennial Hatter Cardiovascular Institute Workshop. Basic Research in Cardiology, 2015, 110, 453.	2.5	103
81	Effect of Remote Ischemic Preconditioning on Acute Kidney Injury in Nondiabetic Patients Undergoing Coronary Artery Bypass Graft Surgery: A Secondary Analysis of 2 Small Randomized Trials. American Journal of Kidney Diseases, 2010, 56, 1043-1049.	2.1	102
82	Loss of PINK1 Increases the Heart's Vulnerability to Ischemia-Reperfusion Injury. PLoS ONE, 2013, 8, e62400.	1.1	99
83	Hypoxia-inducible factor as a therapeutic target for cardioprotection. , 2012, 136, 69-81.		97
84	Time to Take Myocardial Reperfusion Injury Seriously. New England Journal of Medicine, 2008, 359, 518-520.	13.9	95
85	Leptin-induced cardioprotection involves JAK/STAT signaling that may be linked to the mitochondrial permeability transition pore. American Journal of Physiology - Heart and Circulatory Physiology, 2010, 299, H1265-H1270.	1.5	94
86	Realizing the clinical potential of ischemic preconditioning and postconditioning. Nature Clinical Practice Cardiovascular Medicine, 2005, 2, 568-575.	3.3	92
87	Effect of remote ischemic preconditioning on clinical outcomes in patients undergoing coronary artery bypass graft surgery (ERICCA): rationale and study design of a multi-centre randomized double-blinded controlled clinical trial. Clinical Research in Cardiology, 2012, 101, 339-348.	1.5	91
88	ESC Working Group on Cellular Biology of the Heart: position paper for Cardiovascular Research: tissue engineering strategies combined with cell therapies for cardiac repair in ischaemic heart disease and heart failure. Cardiovascular Research, 2019, 115, 488-500.	1.8	90
89	Coâ€morbidities and coâ€medications as confounders of cardioprotectionâ€”Does it matter in the clinical setting?. British Journal of Pharmacology, 2020, 177, 5252-5269.	2.7	90
90	Cardioprotective growth factors. Cardiovascular Research, 2009, 83, 179-194.	1.8	87

#	ARTICLE	IF	CITATIONS
91	Mitochondrial cyclophilin-D as a critical mediator of ischaemic preconditioning. <i>Cardiovascular Research</i> , 2010, 88, 67-74.	1.8	86
92	Chronic Metformin Associated Cardioprotection Against Infarction: Not Just a Glucose Lowering Phenomenon. <i>Cardiovascular Drugs and Therapy</i> , 2013, 27, 5-16.	1.3	86
93	Protection of organs other than the heart by remote ischemic conditioning. <i>Journal of Cardiovascular Medicine</i> , 2013, 14, 193-205.	0.6	86
94	Co-dependence of the neural and humoral pathways in the mechanism of remote ischemic conditioning. <i>Basic Research in Cardiology</i> , 2016, 111, 50.	2.5	84
95	Hypoxia signaling controls postnatal changes in cardiac mitochondrial morphology and function. <i>Journal of Molecular and Cellular Cardiology</i> , 2014, 74, 340-352.	0.9	82
96	Dipeptidyl peptidase-4 inhibitors and GLP-1 reduce myocardial infarct size in a glucose-dependent manner. <i>Cardiovascular Diabetology</i> , 2013, 12, 154.	2.7	81
97	Investigating the Signal Transduction Pathways Underlying Remote Ischemic Conditioning in the Porcine Heart. <i>Cardiovascular Drugs and Therapy</i> , 2012, 26, 87-93.	1.3	80
98	Non-coding RNAs as therapeutic targets for preventing myocardial ischemia-reperfusion injury. <i>Expert Opinion on Therapeutic Targets</i> , 2018, 22, 247-261.	1.5	80
99	Signalling pathways in ischaemic postconditioning. <i>Thrombosis and Haemostasis</i> , 2009, 101, 626-634.	1.8	79
100	RNase1 prevents the damaging interplay between extracellular RNA and tumour necrosis factor- α in cardiac ischaemia/reperfusion injury. <i>Thrombosis and Haemostasis</i> , 2014, 112, 1110-1119.	1.8	79
101	Myocardial Infarct Size by CMR in Clinical Cardioprotection Studies. <i>JACC: Cardiovascular Imaging</i> , 2017, 10, 230-240.	2.3	78
102	Remote Ischemic Conditioning Reduces Myocardial Infarct Size in STEMI Patients Treated by Thrombolysis. <i>Journal of the American College of Cardiology</i> , 2015, 65, 2764-2765.	1.2	77
103	Myocardial postconditioning: reperfusion injury revisited. <i>American Journal of Physiology - Heart and Circulatory Physiology</i> , 2005, 289, H2-H7.	1.5	76
104	Akt protects the heart against ischaemia-reperfusion injury by modulating mitochondrial morphology. <i>Thrombosis and Haemostasis</i> , 2015, 113, 513-521.	1.8	76
105	Mitochondrial-Shaping Proteins in Cardiac Health and Disease – the Long and the Short of It!. <i>Cardiovascular Drugs and Therapy</i> , 2017, 31, 87-107.	1.3	75
106	Ischemic preconditioning targets the reperfusion phase. <i>Basic Research in Cardiology</i> , 2007, 102, 445-452.	2.5	74
107	Cardioprotection in the aging, diabetic heart: the loss of protective Akt signalling. <i>Cardiovascular Research</i> , 2013, 99, 694-704.	1.8	74
108	Cardioprotection Techniques: Preconditioning, Postconditioning and Remote Con-ditioning (Basic) Tj ETQq0 0 0 rgBT/Overlock 10 Tf 50	0.9	74
