citing authors

#	ARTICLE	IF	CITATIONS
1	Householdsâ€™ potential to decrease their environmental impacts. <i>International Journal of Energy Sector Management</i> , 2020, 14, 193-212.	2.3	6
2	Reduced carbon footprints of buildings: new Finnish standards and assessments. <i>Buildings and Cities</i> , 2020, 1, 182-197.	2.3	31
3	Drivers and benefits for district-scale energy refurbishment. <i>Cities</i> , 2019, 94, 80-95.	5.6	9
4	A new procedure for assessing the energy-efficient refurbishment of buildings on district scale. <i>Sustainable Cities and Society</i> , 2019, 46, 101454.	10.4	40
5	Impact of renewable energy technologies on the embodied and operational GHG emissions of a nearly zero energy building. <i>Journal of Building Engineering</i> , 2019, 22, 439-450.	3.4	32
6	User engaging practices for energy saving in buildings: Critical review and new enhanced procedure. <i>Energy and Buildings</i> , 2017, 148, 74-88.	6.7	30
7	Role of Municipal Steering in Sustainable Building and Refurbishment. <i>Energy Procedia</i> , 2016, 96, 650-661.	1.8	10
8	Lean Production of Cost Optimal Wooden nZEB. <i>Energy Procedia</i> , 2016, 96, 202-211.	1.8	6
9	Feasibility Studies of Energy Retrofits â€” Case Studies of Nearly Zero-energy Building Renovation. <i>Energy Procedia</i> , 2016, 96, 146-157.	1.8	24
10	Experiences with LCA in the Nordic Building Industry â€” Challenges, Needs and Solutions. <i>Energy Procedia</i> , 2016, 96, 82-93.	1.8	38
11	Usability of energy performance assessment tools for different use purposes with the focus on refurbishment projects. <i>Energy and Buildings</i> , 2016, 127, 217-228.	6.7	6
12	The significance of various factors for GHG emissions of buildings. <i>International Journal of Sustainable Engineering</i> , 2015, 8, 317-330.	3.5	17
13	Life cycle assessment of layers of green roofs. <i>Journal of Cleaner Production</i> , 2015, 90, 153-162.	9.3	76
14	Reducing embodied carbon during the design process of buildings. <i>Journal of Building Engineering</i> , 2015, 4, 1-13.	3.4	78
15	Material Efficiency of Building Construction. <i>Buildings</i> , 2014, 4, 266-294.	3.1	86
16	Durability considerations of refurbished external walls. <i>Construction and Building Materials</i> , 2014, 53, 162-172.	7.2	21
17	Comfort assessment in the context of sustainable buildings: Comparison of simplified and detailed human thermal sensation methods. <i>Building and Environment</i> , 2014, 71, 60-70.	6.9	65
18	Principles of GHG emissions assessment of wooden building products. <i>International Journal of Sustainable Building Technology and Urban Development</i> , 2013, 4, 306-317.	1.0	6

#	ARTICLE	IF	CITATIONS
19	The use of LCA studies and LCA outcomes in the decision-making processes of enterprises - discussion and conclusions on the basis of case studies. <i>International Journal of Product Lifecycle Management</i> , 2013, 6, 250.	0.3	4
20	New trends in sustainability assessment systems – based on top-down approach and stakeholders needs. <i>International Journal of Sustainable Building Technology and Urban Development</i> , 2012, 3, 256-269.	1.0	15
21	The role of design management in the sustainable building process. <i>Architectural Engineering and Design Management</i> , 2012, 8, 78-89.	1.7	33
22	Systematic method for the sustainability analysis of refurbishment concepts of exterior walls. <i>Construction and Building Materials</i> , 2012, 37, 783-790.	7.2	39
23	Barriers and drivers for sustainable building. <i>Building Research and Information</i> , 2011, 39, 239-255.	3.9	447
24	Life-cycle and information management of products – a case study of concrete element industry. <i>International Journal of Product Lifecycle Management</i> , 2011, 5, 253.	0.3	3
25	Environmental impacts of disposable cups with special focus on the effect of material choices and end of life. <i>Journal of Cleaner Production</i> , 2010, 18, 1458-1463.	9.3	32
26	Combining Building Renovation and Ground Source Heat Pump Installations for the Reduction of Greenhouse Gas Emissions: A Case Study in Vaasa Finland. <i>Journal of Green Building</i> , 2009, 4, 146-168.	0.8	1
27	Seeking sustainable solutions for office buildings. <i>Facilities</i> , 2007, 25, 437-451.	1.6	5
28	The influence of slag content on the microstructure, permeability and mechanical properties of concrete. <i>Cement and Concrete Research</i> , 1993, 23, 518-530.	11.0	42
29	The influence of slag content on the microstructure, permeability and mechanical properties of concrete Part 1 Microstructural studies and basic mechanical properties. <i>Cement and Concrete Research</i> , 1993, 23, 407-421.	11.0	67
