

Suttira Intapad

List of Publications by Citations

Source: <https://exaly.com/author-pdf/7539962/suttira-intapad-publications-by-citations.pdf>

Version: 2024-04-27

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

33
papers

505

#	Paper	IF	Citations
33	Fetal programming and cardiovascular pathology. <i>Comprehensive Physiology</i> , 2015 , 5, 997-1025	7.7	130
32	Renal denervation abolishes the age-dependent increase in blood pressure in female intrauterine growth-restricted rats at 12 months of age. <i>Hypertension</i> , 2013 , 61, 828-34	8.5	77
31	Sex differences in the developmental origins of cardiovascular disease. <i>Physiology</i> , 2014 , 29, 122-32	9.8	47
30	Reduced uterine perfusion pressure induces hypertension in the pregnant mouse. <i>American Journal of Physiology - Regulatory Integrative and Comparative Physiology</i> , 2014 , 307, R1353-7	3.2	43
29	Effect of low birth weight on women's health. <i>Clinical Therapeutics</i> , 2014 , 36, 1913-1923	3.5	35
28	Hypersensitivity to acute ANG II in female growth-restricted offspring is exacerbated by ovariectomy. <i>American Journal of Physiology - Regulatory Integrative and Comparative Physiology</i> , 2011 , 301, R1199-205	3.2	29
27	Chronic Blockade of the Androgen Receptor Abolishes Age-Dependent Increases in Blood Pressure in Female Growth-Restricted Rats. <i>Hypertension</i> , 2016 , 67, 1281-90	8.5	19
26	Enhancement of vascular relaxation in rat aorta by phytoestrogens from <i>Curcuma comosa</i> Roxb. <i>Vascular Pharmacology</i> , 2009 , 51, 284-90	5.9	18
25	Intrauterine growth restriction programs an accelerated age-related increase in cardiovascular risk in male offspring. <i>American Journal of Physiology - Renal Physiology</i> , 2016 , 311, F312-9	4.3	18
24	Glucose intolerance develops prior to increased adiposity and accelerated cessation of estrous cyclicity in female growth-restricted rats. <i>Pediatric Research</i> , 2016 , 79, 962-70	3.2	16
23	Long-term effect of phytoestrogens from <i>Curcuma comosa</i> Roxb. on vascular relaxation in ovariectomized rats. <i>Journal of Agricultural and Food Chemistry</i> , 2012 , 60, 758-64	5.7	16
22	Pregnancy Complications and Later Development of Hypertension. <i>Current Cardiovascular Risk Reports</i> , 2013 , 7, 183-189	0.9	12
21	Male and Female Intrauterine Growth-Restricted Offspring Differ in Blood Pressure, Renal Function, and Glucose Homeostasis Responses to a Postnatal Diet High in Fat and Sugar. <i>Hypertension</i> , 2019 , 73, 620-629	8.5	10
20	Sex-Specific Effect of Endothelin in the Blood Pressure Response to Acute Angiotensin II in Growth-Restricted Rats. <i>Hypertension</i> , 2015 , 66, 1260-6	8.5	9
19	Testosterone is protective against impaired glucose metabolism in male intrauterine growth-restricted offspring. <i>PLoS ONE</i> , 2017 , 12, e0187843	3.7	5
18	Sphingosine-1-phosphate signaling in blood pressure regulation. <i>American Journal of Physiology - Renal Physiology</i> , 2019 , 317, F638-F640	4.3	4
17	Macula Densa NOS1 Modulates Renal Hemodynamics and Blood Pressure during Pregnancy: Role in Gestational Hypertension. <i>Journal of the American Society of Nephrology: JASN</i> , 2021 , 32, 2485-2500	12.7	4

16	Androgen Receptor Blockade Differentially Regulates Blood Pressure in Growth-Restricted Versus Ovarian Deficient Rats. <i>Hypertension</i> , 2019 , 74, 975-982	8.5	3
15	Sphingolipids and Kidney Disease: Possible Role of Preeclampsia and Intrauterine Growth Restriction (IUGR).. <i>Kidney360</i> , 2021 , 2, 534-541	1.8	2
14	Imbalance of Sphingolipids Synthesis/Degradation Pathway in Preeclamptic Mouse Placenta and Kidney of Intrauterine Growth Restricted Mouse Fetus. <i>FASEB Journal</i> , 2019 , 33, 593.3	0.9	1
13	Insights into the Mechanisms of Fetal Growth Restriction-Induced Programming of Hypertension. <i>Integrated Blood Pressure Control</i> , 2021 , 14, 141-152	3.5	0
12	Sex Differences in Fetal Programming of Blood Pressure and Kidney Gene Expression of Intrauterine Growth Restricted Mouse Model. <i>FASEB Journal</i> , 2020 , 34, 1-1	0.9	
11	Role of Sphingosine -1-Phosphate on Expression of MAPK and Akt Signaling Pathways in Hypoxic Human Extravillous Trophoblasts. <i>FASEB Journal</i> , 2018 , 32, 729.1	0.9	
10	Sphingosine-1-Phosphate Type 1 Receptor and eNOS Signaling Pathway Play a Role in High Blood Pressure of Intrauterine Growth Restricted Mouse. <i>FASEB Journal</i> , 2018 , 32, 883.1	0.9	
9	Intrauterine Growth Restriction (IUGR) Induced by Reduced Uterine Perfusion in The Mouse Programs Impaired Glucose Homeostasis in Female Offspring. <i>FASEB Journal</i> , 2015 , 29, 811.21	0.9	
8	Impact of Commercial Vendor on The Developmental Programming of Later Chronic Health. <i>FASEB Journal</i> , 2015 , 29, 811.20	0.9	
7	Impact of Chronic Salt Load on Mean Arterial Pressure in Female Growth Restricted Rats at One Year of Age. <i>FASEB Journal</i> , 2015 , 29, 966.8	0.9	
6	Postmenopausal Hypertension Is Blunted Following Chronic Flutamide Treatment in Intrauterine Growth Restricted Female Rat. <i>FASEB Journal</i> , 2015 , 29, 966.2	0.9	
5	Intrauterine growth restriction induces a greater susceptibility to hypertension and metabolic dysfunction with aging in female growth-restricted rats. <i>FASEB Journal</i> , 2012 , 26, 1101.4	0.9	
4	Renal denervation abolishes age-dependent hypertension in female intrauterine growth restricted rats.. <i>FASEB Journal</i> , 2013 , 27, 906.17	0.9	
3	Impaired pancreatic function contributes to the age-dependent development of metabolic syndrome in female intrauterine growth restricted rats.. <i>FASEB Journal</i> , 2013 , 27, 1114.8	0.9	
2	Fetal exposure to high levels of corticosterone in a low birth weight rat model. <i>FASEB Journal</i> , 2013 , 27, 1b890	0.9	
1	A study of plasma corticosterone levels in an intrauterine growth restricted rat model at prenatal E19 and postnatal P14. <i>FASEB Journal</i> , 2013 , 27, 1b895	0.9
