

List of Publications by Citations

**Source:** <https://exaly.com/author-pdf/7542001/yun-ji-publications-by-citations.pdf>  
**Version:** 2024-04-09

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.  
The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

22 papers	463 citations	10 h-index	21 g-index
24 ext. papers	576 ext. citations	6.1 avg, IF	3.77 L-index

#	Paper	IF	Citations
22	Recent Development in Chemical Depolymerization of Lignin: A Review. <i>Hindawi Journal of Chemistry</i> , <b>2013</b> , 2013, 1-9		158
21	Biodegradation of lignin by fungi, bacteria and laccases. <i>Bioresource Technology</i> , <b>2016</b> , 220, 414-424	11	68
20	Microbial treatment of industrial lignin: Successes, problems and challenges. <i>Renewable and Sustainable Energy Reviews</i> , <b>2017</b> , 77, 1179-1205	16.2	61
19	Converting forage sorghum and sunn hemp into biofuels through dilute acid pretreatment. <i>Industrial Crops and Products</i> , <b>2013</b> , 49, 598-609	5.9	43
18	Kenaf biomass biodecomposition by basidiomycetes and actinobacteria in submerged fermentation for production of carbohydrates and phenolic compounds. <i>Bioresource Technology</i> , <b>2014</b> , 173, 352-360	11	16
17	Production of lignin based insoluble polymers (anionic hydrogels) by <i>C. versicolor</i> . <i>Scientific Reports</i> , <b>2017</b> , 7, 17507	4.9	14
16	Using fractal dimension and shape factors to characterize the microcrystalline cellulose (MCC) particle morphology and powder flowability. <i>Powder Technology</i> , <b>2020</b> , 364, 241-250	5.2	13
15	Fungal Biotransformation of Insoluble Kraft Lignin into a Water Soluble Polymer. <i>Industrial &amp; Engineering Chemistry Research</i> , <b>2017</b> , 56, 6103-6113	3.9	11
14	Morphological changes of lignin during separation of wheat straw components by the hydrothermal-ethanol method. <i>Bioresource Technology</i> , <b>2019</b> , 294, 122157	11	10
13	Pore structure and pertinent physical properties of nanofibrillated cellulose (NFC)-based foam materials. <i>Carbohydrate Polymers</i> , <b>2018</b> , 201, 141-150	10.3	9
12	Foam materials with controllable pore structure prepared from nanofibrillated cellulose with addition of alcohols. <i>Industrial Crops and Products</i> , <b>2018</b> , 125, 314-322	5.9	8
11	On the Synthesis and Characterization of Polylactic Acid, Polyhydroxyalkanoate, Cellulose Acetate, and Their Engineered Blends by Solvent Casting. <i>Journal of Materials Engineering and Performance</i> , <b>2020</b> , 29, 5542-5556	1.6	7
10	On the Design of Novel Biofoams Using Lignin, Wheat Straw, and Sugar Beet Pulp as Precursor Material. <i>ACS Omega</i> , <b>2020</b> , 5, 17078-17089	3.9	5
9	Pretreatment and Enzymatic Hydrolysis of Kenaf as a Potential Source for Lignocellulosic Biofuel and Green Chemicals. <i>Current Organic Chemistry</i> , <b>2013</b> , 17, 1624-1632	1.7	5
8	Control of structure and properties of cellulose nanofibrils (CNF)-based foam materials by using ethanol additives prior to freeze-drying. <i>Wood Science and Technology</i> , <b>2019</b> , 53, 837-854	2.5	3
7	Determining the kinetics of sunflower hulls using dilute acid pretreatment in the production of xylose and furfural. <i>Green Processing and Synthesis</i> , <b>2014</b> , 3,	3.9	3
6	Wheat straw components fractionation, with efficient delignification, by hydrothermal treatment followed by facilitated ethanol extraction. <i>Bioresource Technology</i> , <b>2020</b> , 316, 123882	11	3

5	Recent Progress on Oxygen Delignification of Softwood Kraft Pulp <b>2018</b> , 67-97		3
4	Effects of acid hydrolysis waste liquid recycle on preparation of microcrystalline cellulose. <i>Green Processing and Synthesis</i> , <b>2019</b> , 8, 348-354	3.9	2
3	Synthesis and Tribological Behavior of Ultra High Molecular Weight Polyethylene (UHMWPE)-Lignin Composites. <i>Lubricants</i> , <b>2016</b> , 4, 31	3.1	1
2	An integrative cellulose-based composite material with controllable structure and properties for solar-driven water evaporation. <i>Cellulose</i> , <b>2022</b> , 29, 2461	5.5	0
1	Correlation between the powder characteristics and particle morphology of microcrystalline cellulose (MCC) and its tablet application performance. <i>Powder Technology</i> , <b>2022</b> , 399, 117194	5.2	0
