#	ARTICLE	IF	CITATIONS
1	Evaluation of an eHealth intervention aiming to promote healthy food habits from infancy -the Norwegian randomized controlled trial Early Food for Future Health. International Journal of Behavioral Nutrition and Physical Activity, 2019, 16, 1.	4.6	132
2	Development of a New Nordic Diet score and its association with gestational weight gain and fetal growth – a study performed in the Norwegian Mother and Child Cohort Study (MoBa). Public Health Nutrition, 2014, 17, 1909-1918.	2.2	89
3	Associations of adherence to the New Nordic Diet with risk of preeclampsia and preterm delivery in the Norwegian Mother and Child Cohort Study (MoBa). European Journal of Epidemiology, 2014, 29, 753-765.	5.7	59
4	Early food for future health: a randomized controlled trial evaluating the effect of an eHealth intervention aiming to promote healthy food habits from early childhood. BMC Public Health, 2017, 17, 729.	2.9	37
5	The <sc>F</sc>it for <sc>D</sc>elivery study: rationale for the recommendations and testâ€retest reliability of a dietary score measuring adherence to 10 specific recommendations for prevention of excessive weight gain during pregnancy. Maternal and Child Nutrition, 2015, 11, 20-32.	3.0	26
6	Timing of complementary feeding and associations with maternal and infant characteristics: A Norwegian cross-sectional study. PLoS ONE, 2018, 13, e0199455.	2.5	25
7	A cluster randomized web-based intervention trial to reduce food neophobia and promote healthy diets among one-year-old children in kindergarten: study protocol. BMC Pediatrics, 2018, 18, 232.	1.7	19
8	Examining the effects of an eHealth intervention from infant age 6 to 12 months on child eating behaviors and maternal feeding practices one year after cessation: The Norwegian randomized controlled trial Early Food for Future Health. PLoS ONE, 2019, 14, e0220437.	2.5	19
9	The effect of a prenatal lifestyle intervention on glucose metabolism: results of the Norwegian Fit for Delivery randomized controlled trial. BMC Pregnancy and Childbirth, 2017, 17, 167.	2.4	18
10	Adherence to the New Nordic Diet during pregnancy and subsequent maternal weight development: a study conducted in the Norwegian Mother and Child Cohort Study (MoBa). British Journal of Nutrition, 2018, 119, 1286-1294.	2.3	17
11	The Food4toddlers study - study protocol for a web-based intervention to promote healthy diets for toddlers: a randomized controlled trial. BMC Public Health, 2019, 19, 563.	2.9	16
12	Pre-pregnancy and early pregnancy dietary behavior in relation to maternal and newborn health in the Norwegian Fit for Delivery study – a post hoc observational analysis. Food and Nutrition Research, 2018, 62, .	2.6	16
13	Socio-economic status and maternal BMI are associated with duration of breast-feeding of Norwegian infants. Public Health Nutrition, 2018, 21, 1465-1473.	2.2	15
14	Effect of a Parent-Focused eHealth Intervention on Childrenâ€™s Fruit, Vegetable, and Discretionary Food Intake (Food4toddlers): Randomized Controlled Trial. Journal of Medical Internet Research, 2021, 23, e18311.	4.3	15
15	Preeclampsia and gestational weight gain in the Norwegian Fit for Delivery trial. BMC Research Notes, 2018, 11, 282.	1.4	14
16	An assessment of the testâ€retest reliability of the New Nordic Diet score. Food and Nutrition Research, 2015, 59, 28397.	2.6	10
17	The association between adherence to the New Nordic Diet and diet quality. Food and Nutrition Research, 2016, 60, 31017.	2.6	9
18	StudentKost: a cross-sectional study assessing college studentsâ€™ diets: reason for concern?. Journal of Nutritional Science, 2020, 9, e39.	1.9	9

#	ARTICLE	IF	CITATIONS
19	Development and description of New Nordic Diet scores across infancy and childhood in the Norwegian Mother, Father and Child Cohort Study (MoBa). <i>Maternal and Child Nutrition</i> , 2021, 17, e13150.	3.0	8
20	Effectiveness of a kindergarten-based intervention to increase vegetable intake and reduce food neophobia amongst 1-year-old children: a cluster randomised controlled trial. <i>Food and Nutrition Research</i> , 2021, 65, .	2.6	8
21	Childhood adherence to a potentially healthy and sustainable Nordic diet and later overweight: The Norwegian Mother, Father and Child Cohort Study (MoBa). <i>Maternal and Child Nutrition</i> , 2021, 17, e13101.	3.0	7
22	The mismatch between teaching practices and curriculum goals in Norwegian Home Economics classes: a missed opportunity. <i>Education Inquiry</i> , 2021, 12, 183-201.	2.9	7
23	Associations between parental food choice motives, health-promoting feeding practices, and infants' fruit and vegetable intakes: the Food4toddlers study. <i>Food and Nutrition Research</i> , 2020, 64, .	2.6	7
24	Family meal participation is associated with dietary intake among 12-month-olds in Southern Norway. <i>BMC Pediatrics</i> , 2021, 21, 128.	1.7	6
25	Alcohol consumption among students and its relationship with nutritional intake: a cross-sectional study. <i>Public Health Nutrition</i> , 2021, 24, 2877-2888.	2.2	5
26	Parental phone use during mealtimes with toddlers and the associations with feeding practices and shared family meals: a cross-sectional study. <i>BMC Public Health</i> , 2021, 21, 756.	2.9	5
27	Association between parental feeding practices and shared family meals. The Food4toddlers study. <i>Food and Nutrition Research</i> , 2020, 64, .	2.6	5
28	Diet and Neurodevelopmental Score in a Sample of One-Year-Old Children – A Cross-Sectional Study. <i>Nutrients</i> , 2019, 11, 1676.	4.1	4
29	Adherence to a healthy and potentially sustainable Nordic diet is associated with child development in The Norwegian Mother, Father and Child Cohort Study (MoBa). <i>Nutrition Journal</i> , 2022, 21, .	3.4	4
30	Wow! They really like celeriac! Kindergarten teachers' experiences of an intervention to increase 1-year-olds' acceptance of vegetables. <i>Appetite</i> , 2021, 166, 105581.	3.7	3
31	Associations between breastfeeding mode and duration and food neophobia in toddlerhood: A cross-sectional study among Norwegian toddlers. <i>Food and Nutrition Research</i> , 2020, 64, .	2.6	3
32	Effectiveness of a digital dietary intervention program targeting young adults before parenthood: protocol for the PREPARED randomised controlled trial. <i>BMJ Open</i> , 2021, 11, e055116.	1.9	3
33	Associations between infant and maternal characteristics measured at child age 5 months and maternal feeding styles and practices up to child age two years. <i>PLoS ONE</i> , 2022, 17, e0261222.	2.5	3
34	Process Evaluation of an eHealth Intervention (Food4toddlers) to Improve Toddlers' Diet: Randomized Controlled Trial. <i>JMIR Human Factors</i> , 2020, 7, e18171.	2.0	2
35	It is really just brilliant to get credits for something that is so important to you! Skills for Life: University students' perceptions of a planned dietary life skills course. <i>PLoS ONE</i> , 2022, 17, e0260890.	2.5	0
