#	ARTICLE	IF	CITATIONS
1	Central prolactin receptor distribution and pSTAT5 activation patterns in breeding and non-breeding zebra finches ( <i>Taeniopygia guttata</i> ). <i>General and Comparative Endocrinology</i> , 2021, 301, 113657.	0.8	6
2	A Neuro-hormonal Circuit for Paternal Behavior Controlled by a Hypothalamic Network Oscillation. <i>Cell</i> , 2020, 182, 960-975.e15.	13.5	43
3	Central prolactin binding site densities change seasonally in an adult male passerine bird ( <i>Junco</i> ) Tj ETQq1 1 0.784314 rgBT /Overlock 10 Tf 5	1.0	4
4	Mating in the absence of fertilization promotes a growth-reproduction versus lifespan trade-off in female mice. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2020, 117, 15748-15754.	3.3	17
5	Prolactin and avian parental care: New insights and unanswered questions. <i>Hormones and Behavior</i> , 2019, 111, 114-130.	1.0	40
6	Neuroendocrinology and Adaptive Physiology of Maternal Care. <i>Current Topics in Behavioral Neurosciences</i> , 2019, 43, 161-210.	0.8	13
7	Parental Behavior and Hormones in Non-Mammalian Vertebrates. , 2019, , 495-505.		2
8	Lowering prolactin reduces post-hatch parental care in male and female zebra finches ( <i>Taeniopygia</i> ) Tj ETQq0 0 0 rgBT /Overlock 10 Tf 5	1.0	22
9	Factors that influence the onset of parental care in zebra finches: Roles for egg stimuli and prolactin. <i>Behavioural Processes</i> , 2018, 153, 47-54.	0.5	10
10	Divorce in the socially monogamous zebra finch: Hormonal mechanisms and reproductive consequences. <i>Hormones and Behavior</i> , 2017, 87, 155-163.	1.0	16
11	Prolactin is related to individual differences in parental behavior and reproductive success in a biparental passerine, the zebra finch ( <i>Taeniopygia guttata</i> ). <i>General and Comparative Endocrinology</i> , 2016, 234, 88-94.	0.8	25
12	Relationship between prolactin, reproductive experience, and parental care in a biparental songbird, the zebra finch ( <i>Taeniopygia guttata</i> ). <i>General and Comparative Endocrinology</i> , 2016, 232, 17-24.	0.8	28
13	Oxytocin, Vasopressin and Related Peptides in the Regulation of Behavior. <i>Animal Behaviour</i> , 2014, 87, 240-241.	0.8	0
14	Behavioral effects of progesterone on pair bonding and partner preference in the female zebra finch ( <i>Taeniopygia guttata</i> ). <i>Behavioural Processes</i> , 2012, 90, 210-216.	0.5	33
