

Mikhail Y Kovalyov

List of Publications by Year in Descending Order

Source: <https://exaly.com/author-pdf/7579300/mikhail-y-kovalyov-publications-by-year.pdf>

Version: 2024-04-28

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
157	Dynamic pricing with demand disaggregation for hotel revenue management. <i>Journal of Heuristics</i> , 2021 , 27, 869-885	1.9	1
156	Profitability of a multi-model manufacturing line versus multiple dedicated lines. <i>International Journal of Production Economics</i> , 2021 , 236, 108113	9.3	0
155	Min-max controllable risk problems. <i>4or</i> , 2021 , 19, 93-101	1.4	0
154	Fixed interval scheduling with third-party machines. <i>Networks</i> , 2021 , 77, 361-371	1.6	
153	Provision-after-wait with preferences ordered by difference: Tighter complexity and better approximation. <i>European Journal of Operational Research</i> , 2021 , 289, 1008-1012	5.6	
152	No-idle parallel-machine scheduling of unit-time jobs with a small number of distinct release dates and deadlines. <i>Computers and Operations Research</i> , 2021 , 132, 105315	4.6	2
151	Fleet and charging infrastructure decisions for fast-charging city electric bus service. <i>Computers and Operations Research</i> , 2021 , 135, 105449	4.6	6
150	Approach to optimizing charging infrastructure of autonomous trolleybuses for urban routes. <i>Informatika</i> , 2021 , 18, 79-95	0.4	
149	On Finding Minimum Cardinality Subset of Vectors with a Constraint on the Sum of Squared Euclidean Pairwise Distances. <i>Lecture Notes in Computer Science</i> , 2020 , 40-45	0.9	1
148	Workforce reconfiguration strategies in manufacturing systems: a state of the art. <i>International Journal of Production Research</i> , 2020 , 1-24	7.8	21
147	Lot-size scheduling of a single product on unrelated parallel machines. <i>Optimization Letters</i> , 2020 , 14, 557-568	1.1	1
146	Three parallel task assignment problems with shared resources. <i>IIE Transactions</i> , 2020 , 52, 478-485	3.3	1
145	Minimizing machine assignment costs over ϵ -approximate solutions of the scheduling problem $P C_{max}$. <i>Theoretical Computer Science</i> , 2019 , 793, 70-78	1.1	0
144	Maximum Diversity Problem with Squared Euclidean Distance. <i>Lecture Notes in Computer Science</i> , 2019 , 541-551	0.9	4
143	Comments on ϵ -Proportionate flowshops with general position dependent processing times [Inf. Process. Lett. 111 (2011) 174-177] and Minimizing total load on a proportionate flowshop with position-dependent processing times and job-rejection [Inf. Process. Lett. 132 (2018) 39-43]. <i>Information Processing Letters</i> , 2019 , 147, 1-2	0.8	5
142	Minimizing the number of workers in a paced mixed-model assembly line. <i>European Journal of Operational Research</i> , 2019 , 272, 188-194	5.6	14
141	Semi-V-shape property for two-machine no-wait proportionate flow shop problem with TADC criterion. <i>International Journal of Production Research</i> , 2019 , 57, 560-566	7.8	10

140	Two-agent scheduling with deteriorating jobs on a single parallel-batching machine: refining computational complexity. <i>Journal of Scheduling</i> , 2019 , 22, 603-606	1.6	3
139	Workforce planning and assignment in mixed-model assembly lines as a factor of line reconfigurability: state of the art. <i>IFAC-PapersOnLine</i> , 2019 , 52, 2746-2751	0.7	9
138	Bi-criteria path problem with minimum length and maximum survival probability. <i>OR Spectrum</i> , 2019 , 41, 469-489	1.9	4
137	A parallel machine schedule updating game with compensations and clients averse to uncertain loss. <i>Computers and Operations Research</i> , 2019 , 103, 148-157	4.6	2
136	Single product lot-sizing on unrelated parallel machines with non-decreasing processing times. <i>Journal of Physics: Conference Series</i> , 2018 , 944, 012032	0.3	
135	Simple paths with exact and forbidden lengths. <i>Naval Research Logistics</i> , 2018 , 65, 78-85	1.5	1
134	A note on scheduling container storage operations of two non-passing stacking cranes. <i>Networks</i> , 2018 , 71, 271-280	1.6	10
133	An overview of revenue management and dynamic pricing models in hotel business. <i>RAIRO - Operations Research</i> , 2018 , 52, 119-141	2.2	11
132	Optimal workforce assignment to operations of a paced assembly line. <i>European Journal of Operational Research</i> , 2018 , 264, 200-211	5.6	24
131	A Batching Machine Model for Lot Scheduling on a Single Machine. <i>Foundations of Computing and Decision Sciences</i> , 2018 , 43, 37-40	0.7	
130	Complexity of Bi-objective Buffer Allocation Problem in Systems with Simple Structure. <i>Communications in Computer and Information Science</i> , 2018 , 278-287	0.3	0
129	Knapsack problem with objective value gaps. <i>Optimization Letters</i> , 2017 , 11, 31-39	1.1	1
128	Corrigendum to An FPTAS for the parallel two-stage flowshop problem [Theoret. Comput. Sci. 657 (2017) 64-72]. <i>Theoretical Computer Science</i> , 2017 , 687, 93-94	1.1	5
127	Integrated production scheduling and batch delivery with fixed departure times and inventory holding costs. <i>International Journal of Production Research</i> , 2017 , 55, 6193-6206	7.8	13
126	Graphs with maximal induced matchings of the same size. <i>Discrete Applied Mathematics</i> , 2017 , 216, 15-28		1
125	Pedestrian Route Search Based on OpenStreetMap. <i>Advances in Intelligent Systems and Computing</i> , 2017 , 87-96	0.4	5
124	Bi-criteria sequencing of courses and formation of classes for a bottleneck classroom. <i>Computers and Operations Research</i> , 2016 , 65, 53-63	4.6	0
123	Integrated Production and Delivery with Inventory Holding Costs. <i>IFAC-PapersOnLine</i> , 2016 , 49, 910-915	0.7	

122	Two-agent scheduling with agent specific batches on an unbounded serial batching machine. <i>Journal of Scheduling</i> , 2015 , 18, 423-434	1.6	30
121	Minimizing takeoff and landing risk in helicopter pickup and delivery operations. <i>Omega</i> , 2015 , 55, 73-80	7.2	9
120	Two faster algorithms for coordination of production and batch delivery: A note. <i>European Journal of Operational Research</i> , 2015 , 241, 927-930	5.6	10
119	Minimizing the number of workers for one cycle of a paced production line. <i>IFAC-PapersOnLine</i> , 2015 , 48, 2281-2286	0.7	0
118	On a single machine-scheduling problem with separated position and resource effects. <i>Optimization</i> , 2015 , 64, 909-911	1.2	3
117	Internet shopping with price sensitive discounts. <i>4or</i> , 2014 , 12, 35-48	1.4	14
116	A bibliography of non-deterministic lot-sizing models. <i>International Journal of Production Research</i> , 2014 , 52, 2293-2310	7.8	54
115	Minimizing setup costs in a transfer line design problem with sequential operation processing. <i>International Journal of Production Economics</i> , 2014 , 151, 186-194	9.3	11
114	Scientific school of Academician V. S. Tanaev: Results on the scheduling theory. <i>Automation and Remote Control</i> , 2014 , 75, 1241-1256	0.6	
113	A game mechanism for single machine sequencing with zero risk. <i>Omega</i> , 2014 , 44, 104-110	7.2	11
112	Due window assignment and scheduling on parallel machines: a FPTAS for a bottleneck criterion. <i>Bulletin of the Polish Academy of Sciences: Technical Sciences</i> , 2014 , 62, 805-808		1
111	A graph-theoretic approach to interval scheduling on dedicated unrelated parallel machines. <i>Journal of the Operational Research Society</i> , 2014 , 65, 1571-1579	2	9
110	Multiproduct batching and scheduling with buffered rework: The case of a car paint shop. <i>Naval Research Logistics</i> , 2014 , 61, 458-471	1.5	1
109	Scheduling arbitrary number of malleable tasks on multiprocessor systems. <i>Bulletin of the Polish Academy of Sciences: Technical Sciences</i> , 2014 , 62, 255-261		3
108	An $O(n \log n)$ algorithm for a single-item capacitated lot-sizing problem with linear costs and no backlogging. <i>International Journal of Production Research</i> , 2014 , 52, 3758-3761	7.8	4
107	Scheduling for fabrication and assembly in a two-machine flowshop with a fixed job sequence. <i>Annals of Operations Research</i> , 2014 , 217, 263-279	3.2	10
106	Strong NP-hardness of scheduling problems with learning or aging effect. <i>Annals of Operations Research</i> , 2013 , 206, 577-583	3.2	5
105	Lot-sizing on a single imperfect machine: ILP models and FPTAS extensions. <i>Computers and Industrial Engineering</i> , 2013 , 65, 561-569	6.4	5

104	Parallel machine scheduling and common due window assignment with job independent earliness and tardiness costs. <i>Information Sciences</i> , 2013 , 224, 109-117	7.7	22
103	Complexity of Buffer Capacity Allocation Problems for Production Lines with Unreliable Machines. <i>Mathematical Modelling and Algorithms</i> , 2013 , 12, 155-165		15
102	Comment on the strong NP-completeness of 3-PARTITION problem with B?km by Zhongyi Jiang, Fangfang Chen, Chunqing Wu. <i>Journal of the Operational Research Society</i> , 2013 , 64, 787-787	2	
101	A Transfer Line Design Problem with Setup Times and Costs. <i>IFAC Postprint Volumes IPPV / International Federation of Automatic Control</i> , 2013 , 46, 778-783		
100	Scheduling an unbounded batching machine with job processing time compatibilities. <i>Discrete Applied Mathematics</i> , 2012 , 160, 15-23	1	5
99	Total completion time minimization in two-machine flow shop scheduling problems with a fixed job sequence. <i>Discrete Optimization</i> , 2012 , 9, 29-39	1	8
98	Combinatorial design of a minimum cost transfer line. <i>Omega</i> , 2012 , 40, 31-41	7.2	31
97	Soft due window assignment and scheduling of unit-time jobs on parallel machines. <i>4or</i> , 2012 , 10, 347-360		14
96	Vyacheslav Tanaev: contributions to scheduling and related areas. <i>Journal of Scheduling</i> , 2012 , 15, 403-418		1
95	A generic FPTAS for partition type optimisation problems. <i>International Journal of Planning and Scheduling</i> , 2012 , 1, 209	0.8	7
94	Production Lot Sizes on a Single Imperfect Machine: FPTAS vs ILP models. <i>IFAC Postprint Volumes IPPV / International Federation of Automatic Control</i> , 2012 , 45, 590-595		
93	Graphs with Maximal Induced Matchings of the Same Size. <i>IFAC Postprint Volumes IPPV / International Federation of Automatic Control</i> , 2012 , 45, 57-62		
92	Two-Agent Scheduling on an Unbounded Serial Batching Machine. <i>Lecture Notes in Computer Science</i> , 2012 , 427-438	0.9	12
91	Minimizing the number of late jobs on a single machine under due date uncertainty. <i>Journal of Scheduling</i> , 2011 , 14, 351-360	1.6	21
90	Multi-product lot-sizing and sequencing on a single imperfect machine. <i>Computational Optimization and Applications</i> , 2011 , 50, 465-482	1.4	9
89	The simplified partial digest problem: Approximation and a graph-theoretic model. <i>European Journal of Operational Research</i> , 2011 , 208, 142-152	5.6	1
88	Creative heritage of Vyacheslav Sergeevich Tanaev: Seventieth anniversary. <i>Automation and Remote Control</i> , 2010 , 71, 2021-2028	0.6	
87	Multi-product lot sizing and scheduling on unrelated parallel machines. <i>IIE Transactions</i> , 2010 , 42, 514-524		20

86	Internet shopping optimization problem. <i>International Journal of Applied Mathematics and Computer Science</i> , 2010 , 20, 385-390	1.7	14
85	A generic approach to proving NP-hardness of partition type problems. <i>Discrete Applied Mathematics</i> , 2010 , 158, 1908-1912	1	4
84	A simple FPTAS for a single-item capacitated economic lot-sizing problem with a monotone cost structure. <i>European Journal of Operational Research</i> , 2010 , 200, 621-624	5.6	10
83	Product Partition and related problems of scheduling and systems reliability: Computational complexity and approximation. <i>European Journal of Operational Research</i> , 2010 , 207, 601-604	5.6	35
82	Minimizing total completion time on a batching machine with job processing time compatibilities. <i>Electronic Notes in Discrete Mathematics</i> , 2010 , 36, 1295-1302	0.3	6
81	The EOQ problem with decidable warehouse capacity: Analysis, solution approaches and applications. <i>Discrete Applied Mathematics</i> , 2009 , 157, 1806-1824	1	11
80	On the approximability of the Simplified Partial Digest Problem. <i>Discrete Applied Mathematics</i> , 2009 , 157, 3586-3592	1	0
79	Multi-product lot-sizing and scheduling on unrelated parallel machines to minimize makespan. <i>IFAC Postprint Volumes IPPV / International Federation of Automatic Control</i> , 2009 , 42, 828-833		3
78	Approximate solution of the control problem of supplies with many intervals and concave cost functions. <i>Automation and Remote Control</i> , 2008 , 69, 1181-1187	0.6	2
77	Scheduling jobs in a contaminated area: a model and heuristic algorithms. <i>Journal of the Operational Research Society</i> , 2008 , 59, 977-987	2	6
76	Group sequencing around a common due date. <i>Discrete Optimization</i> , 2008 , 5, 594-604	1	9
75	Batch scheduling of deteriorating reworkables. <i>European Journal of Operational Research</i> , 2008 , 189, 1317-1326	5.6	12
74	A single-item economic lot-sizing problem with a non-uniform resource: Approximation. <i>European Journal of Operational Research</i> , 2008 , 189, 877-889	5.6	8
73	Batch scheduling of step deteriorating jobs. <i>Journal of Scheduling</i> , 2008 , 11, 17-28	1.6	17
72	An FPTAS for a supply scheduling problem with non-monotone cost functions. <i>Naval Research Logistics</i> , 2008 , 55, 194-199	1.5	6
71	A survey of scheduling problems with setup times or costs. <i>European Journal of Operational Research</i> , 2008 , 187, 985-1032	5.6	919
70	Lot-Sizing and Sequencing on a Single Imperfect Machine. <i>Communications in Computer and Information Science</i> , 2008 , 117-125	0.3	2
69	Problem F2 Cmax with forbidden jobs in the first or last position is easy. <i>European Journal of Operational Research</i> , 2007 , 177, 1310-1311	5.6	1

68	Fixed interval scheduling: Models, applications, computational complexity and algorithms. <i>European Journal of Operational Research</i> , 2007 , 178, 331-342	5.6	118
67	Cost minimizing scheduling of work and rework processes on a single facility under deterioration of reworkables. <i>International Journal of Production Economics</i> , 2007 , 105, 345-356	9.3	29
66	Special issue on scheduling in batch-processing industries and supply chains. <i>International Journal of Production Economics</i> , 2007 , 105, 299-300	9.3	2
65	Batching and scheduling in a multi-machine flow shop. <i>Journal of Scheduling</i> , 2007 , 10, 353-364	1.6	19
64	Batching deteriorating items with applications in computer communication and reverse logistics. <i>European Journal of Operational Research</i> , 2007 , 182, 1002-1011	5.6	11
63	Soft Due Window Assignment and Scheduling on Parallel Machines. <i>IEEE Transactions on Systems, Man and Cybernetics, Part A: Systems and Humans</i> , 2007 , 37, 614-620		32
62	Simplified partial digest problem: enumerative and dynamic programming algorithms. <i>IEEE/ACM Transactions on Computational Biology and Bioinformatics</i> , 2007 , 4, 668-80	3	6
61	Evaluating flexible solutions in single machine scheduling via objective function maximization: the study of computational complexity. <i>RAIRO - Operations Research</i> , 2007 , 41, 1-18	2.2	7
60	Preemptable malleable task scheduling problem. <i>IEEE Transactions on Computers</i> , 2006 , 55, 486-490	2.5	34
59	A DISCRETE EOQ PROBLEM WITH MAXIMUM ORDER SIZE COSTS. <i>IFAC Postprint Volumes IPPV / International Federation of Automatic Control</i> , 2006 , 39, 259-263		
58	Scheduling with controllable release dates and processing times: Total completion time minimization. <i>European Journal of Operational Research</i> , 2006 , 175, 769-781	5.6	15
57	Batching work and rework processes with limited deterioration of reworkables. <i>Computers and Operations Research</i> , 2006 , 33, 1595-1605	4.6	55
56	Scheduling in a contaminated area: A model and polynomial algorithms. <i>European Journal of Operational Research</i> , 2006 , 173, 125-132	5.6	22
55	Scheduling with controllable release dates and processing times: Makespan minimization. <i>European Journal of Operational Research</i> , 2006 , 175, 751-768	5.6	18
54	Optimal testing and repairing a failed series system. <i>Journal of Combinatorial Optimization</i> , 2006 , 12, 279-295	0.9	10
53	An FPTAS for a single-item capacitated economic lot-sizing problem with monotone cost structure. <i>Mathematical Programming</i> , 2006 , 106, 453-466	2.1	38
52	Job Sequencing with Exponential Functions of Processing Times. <i>Informatica</i> , 2006 , 17, 13-24	2.9	17
51	Scheduling a no-wait flow shop containing unbounded batching machines. <i>IIE Transactions</i> , 2005 , 37, 685-696		8

50	Positive half-products and scheduling with controllable processing times. <i>European Journal of Operational Research</i> , 2005 , 165, 416-422	5.6	30
49	Single machine group scheduling with resource dependent setup and processing times. <i>European Journal of Operational Research</i> , 2005 , 162, 112-121	5.6	28
48	Group Scheduling with Controllable Setup and Processing Times: Minimizing Total Weighted Completion Time. <i>Annals of Operations Research</i> , 2005 , 133, 163-174	3.2	45
47	Batching in a two-stage flowshop with dedicated machines in the second stage. <i>IIE Transactions</i> , 2004 , 36, 87-93		24
46	Maximization Problems in Single Machine Scheduling. <i>Annals of Operations Research</i> , 2004 , 129, 21-32	3.2	12
45	Scheduling Malleable Tasks on Parallel Processors to Minimize the Makespan. <i>Annals of Operations Research</i> , 2004 , 129, 65-80	3.2	47
44	Single machine batch scheduling with jointly compressible setup and processing times. <i>European Journal of Operational Research</i> , 2004 , 153, 211-219	5.6	19
43	Batching decisions for assembly production systems. <i>European Journal of Operational Research</i> , 2004 , 157, 620-642	5.6	20
42	An FPTAS for scheduling a two-machine flowshop with one unavailability interval. <i>Naval Research Logistics</i> , 2004 , 51, 307-315	1.5	25
41	Batch scheduling with controllable setup and processing times to minimize total completion time. <i>Journal of the Operational Research Society</i> , 2003 , 54, 499-506	2	11
40	Scheduling a Single Server in a Two-machine Flow Shop. <i>Computing (Vienna/New York)</i> , 2003 , 70, 167-180	2.2	11
39	Scheduling jobs with piecewise linear decreasing processing times. <i>Naval Research Logistics</i> , 2003 , 50, 531-554	1.5	53
38	Single machine scheduling with a variable common due date and resource-dependent processing times. <i>Computers and Operations Research</i> , 2003 , 30, 1173-1185	4.6	59
37	The complexity of two group scheduling problems. <i>Journal of Scheduling</i> , 2002 , 5, 477-485	1.6	13
36	Fast fully polynomial approximation schemes for minimizing completion time variance. <i>European Journal of Operational Research</i> , 2002 , 137, 303-309	5.6	18
35	An unconstrained optimization problem is NP-hard given an oracle representation of its objective function: a technical note. <i>Computers and Operations Research</i> , 2002 , 29, 2087-2091	4.6	8
34	Minimizing the total weighted completion time of deteriorating jobs. <i>Information Processing Letters</i> , 2002 , 81, 81-84	0.8	82
33	A polynomial algorithm for lot-size scheduling of two type tasks. <i>Information Processing Letters</i> , 2002 , 83, 229-235	0.8	3

32	Approximation Schemes for Scheduling Jobs with Common Due Date on Parallel Machines to Minimize Total Tardiness. <i>Journal of Heuristics</i> , 2002 , 8, 415-428	1.9	17
31	A Computational Analysis Of Balanced Jit Optimization Algorithms. <i>Infor</i> , 2001 , 39, 299-316	0.5	12
30	Heuristic algorithms for lotsize scheduling with application in the tobacco industry. <i>Computers and Industrial Engineering</i> , 2001 , 39, 235-253	6.4	14
29	Single machine batch scheduling with resource dependent setup and processing times. <i>European Journal of Operational Research</i> , 2001 , 135, 177-183	5.6	44
28	Single Supplier Scheduling for Multiple Deliveries. <i>Annals of Operations Research</i> , 2001 , 107, 51-63	3.2	14
27	Single machine batch scheduling with sequential job processing. <i>IIE Transactions</i> , 2001 , 33, 413-420		16
26	Parallel machine batching and scheduling with deadlines. <i>Journal of Scheduling</i> , 2000 , 3, 109-123	1.6	10
25	Scheduling with batching: A review. <i>European Journal of Operational Research</i> , 2000 , 120, 228-249	5.6	688
24	Fully Polynomial Approximation Schemes for Decomposable Partition Problems 2000 , 397-401		3
23	A Fully Polynomial Approximation Scheme for the Weighted Earliness/Tardiness Problem. <i>Operations Research</i> , 1999 , 47, 757-761	2.3	64
22	Complexity of parallel machine scheduling with processing-plus-wait due dates to minimize maximum absolute lateness. <i>European Journal of Operational Research</i> , 1999 , 114, 403-410	5.6	11
21	A Fully Polynomial Approximation Scheme for Minimizing Makespan of Deteriorating Jobs. <i>Journal of Heuristics</i> , 1998 , 3, 287-297	1.9	62
20	Batch scheduling with deadlines on parallel machines. <i>Annals of Operations Research</i> , 1998 , 83, 23-40	3.2	22
19	Scheduling a batching machine. <i>Journal of Scheduling</i> , 1998 , 1, 31-54	1.6	317
18	An exact algorithm for batching and scheduling two part types in a mixed shop: A technical note. <i>International Journal of Production Economics</i> , 1998 , 55, 53-56	9.3	11
17	Uniform machine scheduling of unit-time jobs subject to resource constraints. <i>Discrete Applied Mathematics</i> , 1998 , 84, 253-257	1	10
16	Bicriterion Single Machine Scheduling with Resource Dependent Processing Times. <i>SIAM Journal on Optimization</i> , 1998 , 8, 617-630	2	72
15	Single Machine Scheduling to Minimize Batch Delivery and Job Earliness Penalties. <i>SIAM Journal on Optimization</i> , 1997 , 7, 547-559	2	30

14	Batch scheduling and common due date assignment problem: An NP-hard case. <i>Discrete Applied Mathematics</i> , 1997 , 80, 251-254	1	8
13	A polynomial approximation scheme for problem F2/rj/Cmax. <i>Operations Research Letters</i> , 1997 , 20, 75-79		15
12	Batch scheduling with deadlines on parallel machines: An NP-hard case. <i>Information Processing Letters</i> , 1997 , 64, 69-74	0.8	2
11	Single Machine Group Scheduling with Two Ordered Criteria. <i>Journal of the Operational Research Society</i> , 1996 , 47, 315-320	2	15
10	Parallel-Machine Batching and Scheduling to Minimize Total Completion Time. <i>IIE Transactions</i> , 1996 , 28, 953-956		34
9	Single machine batch scheduling to minimize the weighted number of late jobs. <i>Mathematical Methods of Operations Research</i> , 1996 , 43, 1-8	1	50
8	Batch scheduling and common due-date assignment on a single machine. <i>Discrete Applied Mathematics</i> , 1996 , 70, 231-245	1	21
7	Single machine scheduling with batch deliveries. <i>European Journal of Operational Research</i> , 1996 , 94, 277-283	5.6	104
6	Single machine scheduling subject to deadlines and resource dependent processing times. <i>European Journal of Operational Research</i> , 1996 , 94, 284-291	5.6	86
5	Single machine batch scheduling with deadlines and resource dependent processing times. <i>Operations Research Letters</i> , 1995 , 17, 243-249	1	33
4	Improving the complexities of approximation algorithms for optimization problems. <i>Operations Research Letters</i> , 1995 , 17, 85-87	1	33
