#	ARTICLE	IF	CITATIONS
1	A large-scale genome-wide association study of Asian populations uncovers genetic factors influencing eight quantitative traits. <i>Nature Genetics</i> , 2009, 41, 527-534.	21.4	937
2	Sample Size and Statistical Power Calculation in Genetic Association Studies. <i>Genomics and Informatics</i> , 2012, 10, 117.	0.8	409
3	The use of "overall accuracy" to evaluate the validity of screening or diagnostic tests. <i>Journal of General Internal Medicine</i> , 2004, 19, 460-465.	2.6	198
4	Adiponectin Concentrations: A Genome-wide Association Study. <i>American Journal of Human Genetics</i> , 2010, 87, 545-552.	6.2	136
5	Association between IRF6 and nonsyndromic cleft lip with or without cleft palate in four populations. <i>Genetics in Medicine</i> , 2007, 9, 219-227.	2.4	107
6	Analysis of candidate genes on chromosome 2 in oral cleft case-parent trios from three populations. <i>Human Genetics</i> , 2006, 120, 501-518.	3.8	54
7	Stroke risk prediction model: A risk profile from the Korean study. <i>Atherosclerosis</i> , 2008, 197, 318-325.	0.8	54
8	High throughput SNP and expression analyses of candidate genes for non-syndromic oral clefts. <i>Journal of Medical Genetics</i> , 2005, 43, 598-608.	3.2	53
9	Maternal transmission effects of the PAX genes among cleft case-parent trios from four populations. <i>European Journal of Human Genetics</i> , 2009, 17, 831-839.	2.8	48
10	Tooth loss, hypertension and risk for stroke in a Korean population. <i>Atherosclerosis</i> , 2009, 203, 550-556.	0.8	46
11	Evidence that TGFA influences risk to cleft lip with/without cleft palate through unconventional genetic mechanisms. <i>Human Genetics</i> , 2009, 126, 385-394.	3.8	44
12	BMI and Stroke Risk in Korean Women. <i>Obesity</i> , 2008, 16, 396-401.	3.0	41
13	Comparing Whole-Genome Amplification Methods and Sources of Biological Samples for Single-Nucleotide Polymorphism Genotyping. <i>Clinical Chemistry</i> , 2005, 51, 1520-1523.	3.2	34
14	Male-specific genetic effect on hypertension and metabolic disorders. <i>Human Genetics</i> , 2014, 133, 311-319.	3.8	29
15	Meta-Analysis of Homogeneous Subgroups Reveals Association between <i>PDE4D</i> Gene Variants and Ischemic Stroke. <i>Neuroepidemiology</i> , 2011, 36, 213-222.	2.3	26
16	Candidate gene polymorphisms for diabetes mellitus, cardiovascular disease and cancer are associated with longevity in Koreans. <i>Experimental and Molecular Medicine</i> , 2009, 41, 772.	7.7	25
17	Association between genes on chromosome 4p16 and non-syndromic oral clefts in four populations. <i>European Journal of Human Genetics</i> , 2010, 18, 726-732.	2.8	25
18	Initial growth pattern of children with cleft before alveolar bone graft stage according to cleft type. <i>Angle Orthodontist</i> , 2011, 81, 1103-1110.	2.4	24

#	ARTICLE	IF	CITATIONS
19	Associations between the risk of tooth agenesis and single-nucleotide polymorphisms of MSX1 and PAX9 genes in nonsyndromic cleft patients. <i>Angle Orthodontist</i> , 2013, 83, 1036-1042.	2.4	20
20	<it>ADIPOQ</it> Gene Variants Associated with Susceptibility to Obesity and Low Serum Adiponectin Levels in Healthy Koreans. <i>Epidemiology and Health</i> , 2011, 33, e2011003.	1.9	20
21	Association Between PAX9 Single-Nucleotide Polymorphisms and Nonsyndromic Cleft Lip With or Without Cleft Palate. <i>Journal of Craniofacial Surgery</i> , 2012, 23, 1262-1266.	0.7	19
22	Family history of diabetes and risk of atherosclerotic cardiovascular disease in Korean men and women. <i>Atherosclerosis</i> , 2008, 197, 224-231.	0.8	18
23	Genetic risk assessment for cardiovascular disease with seven genes associated with plasma C-reactive protein concentrations in Asian populations. <i>Hypertension Research</i> , 2014, 37, 692-698.	2.7	16
24	Risk prediction of pulmonary tuberculosis using genetic and conventional risk factors in adult Korean population. <i>PLoS ONE</i> , 2017, 12, e0174642.	2.5	16
25	Association between<i>MSX1</i> SNPs and Nonsyndromic Cleft Lip with or without Cleft Palate in the Korean Population. <i>Journal of Korean Medical Science</i> , 2013, 28, 522.	2.5	12
26	Excess maternal transmission of markers in <i>TCOF1</i> among cleft palate caseâ€parent trios from three populations. <i>American Journal of Medical Genetics, Part A</i> , 2008, 146A, 2327-2331.	1.2	10
27	Genetic Risk Prediction for Normal-Karyotype Acute Myeloid Leukemia Using Whole-Exome Sequencing. <i>Genomics and Informatics</i> , 2013, 11, 46.	0.8	6
28	Finding pathway regulators: gene set approach using peak identification algorithms. <i>BMC Proceedings</i> , 2007, 1, S90.	1.6	5
29	Identification of somatic mutations using whole-exome sequencing in Korean patients with acute myeloid leukemia. <i>BMC Medical Genetics</i> , 2017, 18, 23.	2.1	5
30	Analyses of longitudinal effects of gene-environment interactions on plasma C-reactive protein levels: the Hallym Aging Study. <i>Genes and Genomics</i> , 2013, 35, 131-139.	1.4	3
31	Investigation of Parental Transmission of RUNX2 Single Nucleotide Polymorphism and Its Association with Nonsyndromic Cleft Lip with or Without Palate. <i>Cleft Palate-Craniofacial Journal</i> , 2014, 51, 234-239.	0.9	3
32	Genetic Effect of Transforming Growth Factor Alpha Gene Variants on the Risk of Nonsyndromic Cleft Lip with or without Palate in Korean Populations. <i>Cleft Palate-Craniofacial Journal</i> , 2015, 52, 293-300.	0.9	3
33	The Liability Threshold Model for Predicting the Risk of Cardiovascular Disease in Patients with Type 2 Diabetes: A Multi-Cohort Study of Korean Adults. <i>Metabolites</i> , 2021, 11, 6.	2.9	3
34	Effect of interactions between genetic polymorphisms and cigarette smoking on plasma triglyceride levels in elderly Koreans: the Hallym Aging Study. <i>Genes and Genomics</i> , 2015, 37, 173-181.	1.4	2
35	Interactions of genetic and non-genetic factors on plasma hs-CRP concentration in a Korean community-based cohort study. <i>Genes and Genomics</i> , 2015, 37, 231-239.	1.4	1
36	Identification of pleiotropic genetic variants affecting osteoporosis risk in a Korean elderly cohort. <i>Journal of Bone and Mineral Metabolism</i> , 2019, 37, 43-52.	2.7	0
