

Kenshi Yao

List of Publications by Year in Descending Order

Source: <https://exaly.com/author-pdf/7594480/kenshi-yao-publications-by-year.pdf>

Version: 2024-04-25

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
131	Endoscopic Characterization of Gastric Lesions and Resection Strategy 2022 , 151-170		
130	Diagnosis of histological type of early gastric cancer by magnifying narrow-band imaging: A multicenter prospective study.. <i>DEN Open</i> , 2022 , 2, e61		0
129	Visualization of Absorbed Lipid in the Normal Duodenal Epithelium Using Magnifying Endoscopy with Narrow-Band Imaging.. <i>Digestive Diseases and Sciences</i> , 2022 , 1	4	
128	A comparative study of demarcation line diagnostic performance between non-magnifying observation with white light and non-magnifying observation with narrow-band light for early gastric cancer.. <i>Gastric Cancer</i> , 2022 , 1	7.6	
127	Diagnosis of Early Gastric Cancer: Endoscopic Diagnosis and Classification: VS Classification System for the Diagnosis of Early Gastric Cancer by Magnifying Endoscopy 2021 , 43-55		
126	Author's reply to the letter to the editor on "A case of gastric signet-ring cell carcinoma with a long-term retrospective follow-up of 17years". <i>Clinical Journal of Gastroenterology</i> , 2021 , 1	1.1	1
125	Measurement of intragastric pressure: an objective method to ascertain whether gastric wall extension is sufficient for assessment of the non-extension sign. <i>Endoscopy International Open</i> , 2021 , 9, E530-E536	3	1
124	Possible Earlier Diagnosis of Ulcerative Colitis-Associated Neoplasia: A Retrospective Analysis of Interval Cases during Surveillance. <i>Journal of Clinical Medicine</i> , 2021 , 10,	5.1	3
123	Image-Enhanced Endoscopy and Its Corresponding Histopathology in the Stomach. <i>Gut and Liver</i> , 2021 , 15, 329-337	4.8	2
122	Nature of a white opaque substance visualized by magnifying endoscopy in colorectal hyperplastic polyps. <i>Endoscopy International Open</i> , 2021 , 9, E1077-E1083	3	
121	Early gastric cancer detection in high-risk patients: a multicentre randomised controlled trial on the effect of second-generation narrow band imaging. <i>Gut</i> , 2021 , 70, 67-75	19.2	30
120	Usefulness of vessel plus surface classification system for the diagnosis of early gastric cancer after eradication. <i>Annals of Gastroenterology</i> , 2021 , 34, 354-360	2.2	0
119	Gastric metaplasia of the duodenal mucosa in Crohn's disease: novel histological and endoscopic findings. <i>Endoscopy International Open</i> , 2021 , 9, E181-E189	3	1
118	Endoscopic Characterization of Gastric Lesions and Resection Strategy 2021 , 1-20		0
117	Does previous biopsy lead to cancer overdiagnosis of superficial non-ampullary duodenal epithelial tumors?. <i>Endoscopy International Open</i> , 2021 , 9, E58-E65	3	2
116	Usefulness of an artificial intelligence system for the detection of esophageal squamous cell carcinoma evaluated with videos simulating overlooking situation. <i>Digestive Endoscopy</i> , 2021 , 33, 1101-1109	3.7	6
115	A case of early autoimmune gastritis with characteristic endoscopic findings. <i>Clinical Journal of Gastroenterology</i> , 2021 , 14, 718-724	1.1	3

114	Histological Architecture of Gastric Epithelial Neoplasias That Showed Absent Microsurface Patterns, Visualized by Magnifying Endoscopy with Narrow-Band Imaging. <i>Clinical Endoscopy</i> , 2021 , 54, 222-228	2.5	
113	Characteristic endoscopic findings of gastric adenocarcinoma of fundic-gland mucosa type. <i>Gastric Cancer</i> , 2021 , 24, 1307-1319	7.6	0
112	White Opaque Substance, a New Optical Marker on Magnifying Endoscopy: Usefulness in Diagnosing Colorectal Epithelial Neoplasms. <i>Clinical Endoscopy</i> , 2021 , 54, 570-577	2.5	0
111	A case of gastric signet-ring cell carcinoma with a long-term retrospective follow-up of 17 years. <i>Clinical Journal of Gastroenterology</i> , 2021 , 14, 1337-1343	1.1	2
110	Irregularly branched microvessels as visualized by magnifying endoscopy: a reliable marker for predicting deep submucosal invasion of superficial esophageal squamous cell carcinoma. <i>Endoscopy International Open</i> , 2020 , 8, E234-E240	3	
109	Guidelines for endoscopic diagnosis of early gastric cancer. <i>Digestive Endoscopy</i> , 2020 , 32, 663-698	3.7	41
108	Histological subtype of gastric adenocarcinoma: two cases of mixed fundic and pyloric mucosa-type adenocarcinoma. <i>Ecancermedicalscience</i> , 2020 , 14, 1143	2.7	0
107	White Opaque Substance (WOS) in gastrointestinal lesions. <i>Gastroenterología Y Hepatología</i> , 2020 , 45, 377-377	0.9	
106	Histological subtype of gastric adenocarcinoma: two cases of mixed fundic and pyloric mucosa-type adenocarcinoma. <i>Ecancermedicalscience</i> , 2020 , 14, 1143	2.7	
105	Diagnosis of early gastric cancer using image enhanced endoscopy: a systematic approach. <i>Translational Gastroenterology and Hepatology</i> , 2020 , 5, 50	5.2	5
104	Near-focus magnification and second-generation narrow-band imaging for early gastric cancer in a randomized trial. <i>Journal of Gastroenterology</i> , 2020 , 55, 1127-1137	6.9	2
103	Learning Effect of Diagnosing Depth of Invasion Using Non-Extension Sign in Early Gastric Cancer. <i>Digestion</i> , 2020 , 101, 191-197	3.6	2
102	Efficacy of enteral nutrition in patients with Crohn's disease on maintenance anti-TNF-alpha antibody therapy: a meta-analysis. <i>Journal of Gastroenterology</i> , 2020 , 55, 133-141	6.9	11
101	Antacids may increase the appearance of white opaque substance in -eradicated gastric epithelial neoplasia. <i>Endoscopy International Open</i> , 2019 , 7, E1144-E1149	3	2
100	Analysis of factors related to poor outcome after e-learning training in endoscopic diagnosis of early gastric cancer using magnifying narrow-band imaging. <i>Gastrointestinal Endoscopy</i> , 2019 , 90, 440-447.e1	5.2	9
99	Endoscopic microanatomy of the normal gastrointestinal mucosa with narrow band technology and magnification. <i>Gastroenterología Y Hepatología (English Edition)</i> , 2019 , 42, 117-126	0.1	
98	Utility of a standardized training program for endoscopic diagnosis of early gastrointestinal neoplasia. <i>Endoscopy International Open</i> , 2019 , 7, E452-E458	3	3
97	Crohn's disease-specific mortality: a 30-year cohort study at a tertiary referral center in Japan. <i>Journal of Gastroenterology</i> , 2019 , 54, 42-52	6.9	6

96	Self-study of the non-extension sign in an e-learning program improves diagnostic accuracy of invasion depth of early gastric cancer. <i>Endoscopy International Open</i> , 2019 , 7, E871-E882	3	1
95	Endoscopic Diagnosis 2019 , 119-145		
94	An Asian consensus on standards of diagnostic upper endoscopy for neoplasia. <i>Gut</i> , 2019 , 68, 186-197	19.2	50
93	Endoscopic microanatomy of the normal gastrointestinal mucosa with narrow band technology and magnification. <i>Gastroenterologā Y Hepatologā</i> , 2019 , 42, 117-126	0.9	1
92	Validity of conventional endoscopy using "non-extension sign" for optical diagnosis of colorectal deep submucosal invasive cancer. <i>Endoscopy International Open</i> , 2018 , 6, E156-E164	3	7
91	Multiple convex demarcation line for prediction of benign depressed gastric lesions in magnifying narrow-band imaging. <i>Endoscopy International Open</i> , 2018 , 6, E145-E155	3	2
90	Delineation of the extent of early gastric cancer by magnifying narrow-band imaging and chromoendoscopy: a multicenter randomized controlled trial. <i>Endoscopy</i> , 2018 , 50, 566-576	3.4	40
89	Comparison of the diagnostic performance between magnifying chromoendoscopy and magnifying narrow-band imaging for superficial colorectal neoplasms: an online survey. <i>Gastrointestinal Endoscopy</i> , 2018 , 87, 1318-1323	5.2	24
88	Clinical predictors of histologic type of gastric cancer. <i>Gastrointestinal Endoscopy</i> , 2018 , 87, 1014-1022	5.2	17
87	Comparison of Small Bowel Lesions Using Capsule Endoscopy in Ulcerative Colitis and Crohn's Disease: A Single-Center Retrospective Analysis. <i>Digestion</i> , 2018 , 98, 119-126	3.6	6
86	White opaque substance visualized by magnifying narrow-band imaging is associated with intragastric acid conditions. <i>Endoscopy International Open</i> , 2018 , 6, E830-E837	3	9
85	Risk factors for severity of colonic diverticular hemorrhage. <i>Intestinal Research</i> , 2018 , 16, 458-466	4.1	3
84	Magnified Endoscopic Findings of Multiple White Flat Lesions: A New Subtype of Gastric Hyperplastic Polyps in the Stomach. <i>Clinical Endoscopy</i> , 2018 , 51, 558-562	2.5	7
83	Development of Image-enhanced Endoscopy of the Gastrointestinal Tract: A Review of History and Current Evidences. <i>Journal of Clinical Gastroenterology</i> , 2018 , 52, 295-306	3	14
82	Trough level of infliximab is useful for assessing mucosal healing in Crohn's disease: a prospective cohort study. <i>Intestinal Research</i> , 2018 , 16, 223-232	4.1	10
81	Diagnostic performance of conventional endoscopy in the identification of submucosal invasion by early gastric cancer: the "non-extension sign" as a simple diagnostic marker. <i>Gastric Cancer</i> , 2017 , 20, 304-313	7.6	27
80	New subtype of gastric adenocarcinoma: mixed fundic and pyloric mucosa-type adenocarcinoma. <i>Clinical Journal of Gastroenterology</i> , 2017 , 10, 224-228	1.1	5
79	Extending magnifying NBI diagnosis of intestinal metaplasia in the stomach: the white opaque substance marker. <i>Endoscopy</i> , 2017 , 49, 529-535	3.4	39

78	Evaluation of an e-learning system for diagnosis of gastric lesions using magnifying narrow-band imaging: a multicenter randomized controlled study. <i>Endoscopy</i> , 2017 , 49, 957-967	3.4	39
77	Multiple white flat lesions in the gastric corpus are not intestinal metaplasia. <i>Endoscopy</i> , 2017 , 49, 615-616	3.4	5
76	Clinical Application of Magnification Endoscopy with NBI in the Stomach and the Duodenum 2017 , 73-93		
75	Development of an e-learning system for teaching endoscopists how to diagnose early gastric cancer: basic principles for improving early detection. <i>Gastric Cancer</i> , 2017 , 20, 28-38	7.6	27
74	Endoluminal Diagnosis of Early Gastric Cancer and Its Precursors: Bridging the Gap Between Endoscopy and Pathology. <i>Advances in Experimental Medicine and Biology</i> , 2016 , 908, 293-316	3.6	14
73	The nature of the white opaque substance within colorectal neoplastic epithelium as visualized by magnifying endoscopy with narrow-band imaging. <i>Endoscopy International Open</i> , 2016 , 4, E1151-E1157	3	7
72	Development of an E-learning System for the Endoscopic Diagnosis of Early Gastric Cancer: An International Multicenter Randomized Controlled Trial. <i>EBioMedicine</i> , 2016 , 9, 140-147	8.8	27
71	Novel Endoscopic Findings as Visualized by Magnifying Endoscopy with Narrow-Band Imaging: White Opaque Substance Is Present in Colorectal Hyperplastic Polyps. <i>Digestion</i> , 2016 , 93, 127-31	3.6	5
70	Expression of adipophilin in gastric epithelial neoplasia is associated with intestinal differentiation and discriminates between adenoma and adenocarcinoma. <i>Virchows Archiv Fur Pathologische Anatomie Und Physiologie Und Fur Klinische Medizin</i> , 2016 , 468, 169-77	5.1	8
69	Increase in colonic diverticular hemorrhage and confounding factors. <i>World Journal of Gastrointestinal Pharmacology and Therapeutics</i> , 2016 , 7, 440-6	3	17
68	Two cases of adenocarcinoma occurring in sporadic fundic gland polyps observed by magnifying endoscopy with narrow band imaging. <i>World Journal of Gastroenterology</i> , 2016 , 22, 9028-9034	5.6	13
67	Intracellular mechanisms underlying lipid accumulation (white opaque substance) in gastric epithelial neoplasms: A pilot study of expression profiles of lipid-metabolism-associated genes. <i>Journal of Gastroenterology and Hepatology (Australia)</i> , 2016 , 31, 776-81	4	17
66	Surveillance of patients with gastric precancerous conditions. <i>Baillieres Best Practice and Research in Clinical Gastroenterology</i> , 2016 , 30, 913-922	2.5	18
65	Guidelines for endoscopic submucosal dissection and endoscopic mucosal resection for early gastric cancer. <i>Digestive Endoscopy</i> , 2016 , 28, 3-15	3.7	321
64	Magnifying endoscopy simple diagnostic algorithm for early gastric cancer (MESDA-G). <i>Digestive Endoscopy</i> , 2016 , 28, 379-393	3.7	122
63	Narrow-band imaging and white-light endoscopy with optical magnification in the diagnosis of dysplasia in Barrett's esophagus: results of the Asia-Pacific Barrett's Consortium. <i>Endoscopy International Open</i> , 2015 , 3, E14-8	3	11
62	The "white globe appearance" (WGA): a novel marker for a correct diagnosis of early gastric cancer by magnifying endoscopy with narrow-band imaging (M-NBI). <i>Endoscopy International Open</i> , 2015 , 3, E120-4	3	30
61	Lipid is absorbed in the stomach by epithelial neoplasms (adenomas and early cancers): a novel functional endoscopy technique. <i>Endoscopy International Open</i> , 2015 , 3, E318-22	3	9

60 Atlas of Neoplastic Lesions in the Stomach **2015**, 185-244

59 Optimizing early upper gastrointestinal cancer detection at endoscopy. *Nature Reviews Gastroenterology and Hepatology*, **2015**, 12, 660-7 24.2 74

58 Improvement in the visibility of colorectal polyps by using blue laser imaging (with video). *Gastrointestinal Endoscopy*, **2015**, 82, 542-9 5.2 55

57 Can we accurately diagnose minute gastric cancers (5mm)? Chromoendoscopy (CE) vs magnifying endoscopy with narrow band imaging (M-NBI). *Gastric Cancer*, **2015**, 18, 590-6 7.6 32

56 A significant feature of microvessels in magnifying narrow-band imaging for diagnosis of early gastric cancer. *Endoscopy International Open*, **2015**, 3, E590-6 3 14

55 Histologic differentiation and mucin phenotype in white opaque substance-positive gastric neoplasias. *Endoscopy International Open*, **2015**, 3, E597-604 3 8

54 Highest power magnification with narrow-band imaging is useful for improving diagnostic performance for endoscopic delineation of early gastric cancers. *BMC Gastroenterology*, **2015**, 15, 155 3 14

53 Long-term course of Crohn's disease in Japan: Incidence of complications, cumulative rate of initial surgery, and risk factors at diagnosis for initial surgery. *Journal of Gastroenterology and Hepatology (Australia)*, **2015**, 30, 1713-9 4 28

52 Clinical Application of Magnifying Endoscopy with Narrow-Band Imaging in the Stomach. *Clinical Endoscopy*, **2015**, 48, 481-90 2.5 39

51 The vessels within epithelial circle (VEC) pattern as visualized by magnifying endoscopy with narrow-band imaging (ME-NBI) is a useful marker for the diagnosis of papillary adenocarcinoma: a case-controlled study. *Gastric Cancer*, **2014**, 17, 469-77 7.6 25

50 White opaque substance visualized using magnifying endoscopy with narrow-band imaging in colorectal epithelial neoplasms. *Digestive Diseases and Sciences*, **2014**, 59, 2544-9 4 12

49 Absent microsurface pattern is characteristic of early gastric cancer of undifferentiated type: magnifying endoscopy with narrow-band imaging. *Gastrointestinal Endoscopy*, **2014**, 80, 1194-1198.e1 5.2 17

48 Dense-type crypt opening seen on magnifying endoscopy with narrow-band imaging is a feature of gastric adenoma. *Digestive Endoscopy*, **2014**, 26, 57-62 3.7 14

47 An efficient diagnostic strategy for small, depressed early gastric cancer with magnifying narrow-band imaging: a post-hoc analysis of a prospective randomized controlled trial. *Gastrointestinal Endoscopy*, **2014**, 79, 55-63 5.2 49

46 Diagnostic performance and limitations of magnifying narrow-band imaging in screening endoscopy of early gastric cancer: a prospective multicenter feasibility study. *Gastric Cancer*, **2014**, 17, 669-79 7.6 86

45 An educational intervention to improve the endoscopist's ability to correctly diagnose small gastric lesions using magnifying endoscopy with narrow-band imaging. *Annals of Gastroenterology*, **2014**, 27, 149-155 2.2 11

44 Zoom Gastroscopy **2014**, 5

43 The Vessels Plus Surface (VS) Classification System in the Diagnosis of Early Gastric Cancer **2014**, 89-98 1

42	Microanatomies as Visualized Using Magnifying Endoscopy with Narrow Band Imaging in the Stomach: Which Microanatomical Structures Can We Visualize in the Glandular Epithelium Using Narrow Band Imaging, and How Is This Achieved? 2014 , 57-69		3
41	Principles of Magnifying Endoscopy with Narrow-Band Imaging 2014 , 49-56		
40	Basic Principles for the Interpretation of Magnified Endoscopic (ME) Findings: Vessels (V) Plus Surface (S) Classification System 2014 , 1-2		
39	Microvascular Architecture Characteristic of Early Gastric Cancer as Visualized by Magnifying Endoscopy (ME) and Clinical Applications 2014 , 27-48		
38	The Proposed Vessels Plus Surface (VS) Classification System: Principles for Interpretation of Magnifying Endoscopy with Narrow-Band Imaging (M-NBI) Findings 2014 , 71-72		
37	Magnifying Endoscopy (ME) of the Stomach Targeting the Microvascular Architecture 2014 , 3-12		
36	Clinical Applications of Magnifying Endoscopy with Narrow-Band Imaging (M-NBI) of the Stomach 2014 , 83-87		2
35	Gastric crystal-storing histiocytosis detected with asymptomatic Sjögren's syndrome: report of a case and summary. <i>Clinical Journal of Gastroenterology</i> , 2013 , 6, 237-42	1.1	10
34	Screening and treating intermediate lesions to prevent gastric cancer. <i>Gastroenterology Clinics of North America</i> , 2013 , 42, 317-35	4.4	8
33	Magnifying endoscopy with narrow-band imaging is useful in the differential diagnosis between low-grade adenoma and early cancer of superficial elevated gastric lesions. <i>Gastric Cancer</i> , 2013 , 16, 140-6	7.6	60
32	White opaque substance represents an intracytoplasmic accumulation of lipid droplets: immunohistochemical and immunoelectron microscopic investigation of 26 cases. <i>Digestive Endoscopy</i> , 2013 , 25, 147-55	3.7	38
31	Detection and characterization of early gastric cancer for curative endoscopic submucosal dissection. <i>Digestive Endoscopy</i> , 2013 , 25 Suppl 1, 44-54	3.7	48
30	The endoscopic diagnosis of early gastric cancer. <i>Annals of Gastroenterology</i> , 2013 , 26, 11-22	2.2	108
29	Validity of the usefulness of microvascular architecture and microsurface structure using magnifying endoscopy with narrow-band imaging in the colorectal neoplasm. <i>Annals of Gastroenterology</i> , 2013 , 26, 45-51	2.2	8
28	Usefulness of magnifying narrow-band imaging endoscopy for the diagnosis of gastric and colorectal lesions. <i>Digestion</i> , 2012 , 85, 74-9	3.6	29
27	Nature of white opaque substance in gastric epithelial neoplasia as visualized by magnifying endoscopy with narrow-band imaging. <i>Digestive Endoscopy</i> , 2012 , 24, 419-25	3.7	72
26	Magnifying narrowband imaging is more accurate than conventional white-light imaging in diagnosis of gastric mucosal cancer. <i>Gastroenterology</i> , 2011 , 141, 2017-2025.e3	13.3	260
25	Usefulness of magnifying endoscopy with narrow-band imaging for determining the horizontal extent of early gastric cancer when there is an unclear margin by chromoendoscopy (with video). <i>Gastrointestinal Endoscopy</i> , 2011 , 74, 1259-67	5.2	140

24	Magnifying endoscopy for diagnosing and delineating early gastric cancer. <i>Endoscopy</i> , 2009 , 41, 462-7	3.4	309
23	White opaque substance within superficial elevated gastric neoplasia as visualized by magnification endoscopy with narrow-band imaging: a new optical sign for differentiating between adenoma and carcinoma. <i>Gastrointestinal Endoscopy</i> , 2008 , 68, 574-80	5.2	132
22	Clinical application of magnification endoscopy and narrow-band imaging in the upper gastrointestinal tract: new imaging techniques for detecting and characterizing gastrointestinal neoplasia. <i>Gastrointestinal Endoscopy Clinics of North America</i> , 2008 , 18, 415-33, vii-viii	3.3	71
21	A New Diagnostic VS Classification System Produced by Magnification Endoscopy Plus Narrow-Band Imaging in the Stomach: Microvascular Architecture and Microsurface Structure 2008 , 169-176		9
20	Novel zoom endoscopy technique for diagnosis of small flat gastric cancer: a prospective, blind study. <i>Clinical Gastroenterology and Hepatology</i> , 2007 , 5, 869-78	6.9	80
19	Magnification endoscopy outlines the microvascular architecture and extent of Barrett's intramucosal carcinoma prior to endoscopic resection. <i>Gastrointestinal Endoscopy</i> , 2006 , 63, 1064-5; discussion 1065	5.2	13
18	CLINICAL AND ENDOSCOPIC HEALING AFTER INFLIXIMAB TREATMENT IN PATIENTS WITH CROHN'S DISEASE. <i>Digestive Endoscopy</i> , 2006 , 18, 29-33	3.7	11
17	Novel zoom endoscopy technique for visualizing the microvascular architecture in gastric mucosa. <i>Clinical Gastroenterology and Hepatology</i> , 2005 , 3, S23-6	6.9	49
16	A REVIEW OF CURRENT CLINICAL APPLICATIONS OF UPPER GASTROINTESTINAL ZOOM ENDOSCOPY. <i>Digestive Endoscopy</i> , 2005 , 17, S2-S4	3.7	
15	New diagnostic approaches for early detection of gastric cancer. <i>Digestive Diseases</i> , 2004 , 22, 327-33	3.2	24
14	CURRENT STATUS OF ENDOSCOPIC TREATMENT FOR UPPER GASTROINTESTINAL STRICTURE: CHAIRPERSON'S REVIEW. <i>Digestive Endoscopy</i> , 2004 , 16, S2-S4	3.7	
13	EARLY GASTRIC CANCER: PROPOSAL FOR A NEW DIAGNOSTIC SYSTEM BASED ON MICROVASCULAR ARCHITECTURE AS VISUALIZED BY MAGNIFIED ENDOSCOPY. <i>Digestive Endoscopy</i> , 2004 , 16, S110-S117	3.7	18
12	Gastric microvascular architecture as visualized by magnifying endoscopy: body and antral mucosa without pathologic change demonstrate two different patterns of microvascular architecture. <i>Gastrointestinal Endoscopy</i> , 2004 , 59, 596-7; author reply 597	5.2	32
11	DETERMINING THE HORIZONTAL EXTENT OF EARLY GASTRIC CARCINOMA: TWO MODERN TECHNIQUES BASED ON DIFFERENCES IN THE MUCOSAL MICROVASCULAR ARCHITECTURE and DENSITY BETWEEN CARCINOMATOUS and NON-CARCINOMATOUS MUCOSA. <i>Digestive Endoscopy</i> , 2002 , 14, 363	3.7	30
10	A new stereoscopic endoscopy system: accurate 3-dimensional measurement in vitro and in vivo with distortion-correction function. <i>Gastrointestinal Endoscopy</i> , 2002 , 55, 412-20	5.2	25
9	Novel magnified endoscopic findings of microvascular architecture in intramucosal gastric cancer. <i>Gastrointestinal Endoscopy</i> , 2002 , 56, 279-84	5.2	171
8	Novel magnified endoscopic findings of microvascular architecture in intramucosal gastric cancer. <i>Gastrointestinal Endoscopy</i> , 2002 , 56, 279-284	5.2	145
7	Microgastroscopic findings of mucosal microvascular architecture as visualized by magnifying endoscopy. <i>Digestive Endoscopy</i> , 2001 , 13, S27	3.7	9

6	Microgastroscopic findings of mucosal microvascular architecture as visualized by magnifying endoscopy. <i>Digestive Endoscopy</i> , 2001 , 13, S27-S33	3-7	48
5	Superficial depressed type of poorly differentiated adenocarcinoma in the transverse colon. <i>Digestive Endoscopy</i> , 2000 , 12, 61-67	3-7	
4	Microaggregate of immunostained macrophages in noninflamed gastroduodenal mucosa: a new useful histological marker for differentiating Crohn's colitis from ulcerative colitis. <i>American Journal of Gastroenterology</i> , 2000 , 95, 1967-73	0-7	24
3	Hemoglobin content in intramucosal gastric carcinoma as a marker of histologic differentiation: a clinical application of quantitative electronic endoscopy. <i>Gastrointestinal Endoscopy</i> , 2000 , 52, 241-5	5-2	50
2	Longitudinal changes of serum insulin concentration and insulin antibody features in persistent insulin autoimmune syndrome (Hirata's disease). <i>Autoimmunity</i> , 1994 , 19, 279-84	3	24
1	Clinical Application of Magnification Endoscopy with NBI in the Stomach and the Duodenum 81-103		3
