#	Article	IF	CITATIONS
1	How can ports act to reduce underwater noise from shipping? Identifying effective management frameworks. Marine Pollution Bulletin, 2022, 174, 113136.	5.0	4
2	Optimum acceptability of telecommunications networks: a multi-criteria approach. Operational Research, 2020, 20, 1899-1911.	2.0	2
3	Sustainability as a Multi-Criteria Concept: New Developments and Applications. Sustainability, 2020, 12, 7527.	3.2	9
4	The Sustainable Management of Land and Fisheries Resources Using Multicriteria Techniques: A Meta-Analysis. Land, 2020, 9, 380.	2.9	8
5	A multi-criteria approach for assigning weights in voting systems. Soft Computing, 2019, 23, 8181-8186.	3.6	9
6	Integrating Strategic and Tactical Forest-Management Models within a Multicriteria Context. Forest Science, 2019, 65, 178-188.	1.0	7
7	Advances and New Orientations in Goal Programming. Multiple Criteria Decision Making, 2019, , 231-246.	0.8	8
8	Bridging the Gap Between National and Ecosystem Accounting Application in Andalusian Forests, Spain. Ecological Economics, 2019, 157, 218-236.	5.7	50
9	Preface to the Special Issue on Multiple Criteria Decision Making: Current Challenges and Future Trends. International Transactions in Operational Research, 2018, 25, 759-761.	2.7	9
10	A critical survey of optimization methods in industrial forest plantations management. Scientia Agricola, 2018, 75, 239-245.	1.2	11
11	Measuring systems sustainability with multi-criteria methods: A critical review. European Journal of Operational Research, 2017, 258, 607-616.	5.7	225
12	Multifunctional natural forest silviculture economics revised: Challenges in meeting landowners' and society's wants. A review. Forest Systems, 2017, 26, eR01S.	0.3	7
13	Bentham, Marx and Rawls ethical principles: In search for a compromise. Omega, 2016, 62, 47-51.	5.9	18
14	Multiple criteria decision making and economics: an introduction. Annals of Operations Research, 2016, 245, 1-5.	4.1	10
15	Using quantitative techniques to evaluate and explain the sustainability of forest plantations. Canadian Journal of Forest Research, 2016, 46, 1157-1166.	1.7	21
16	Ranking of industrial forest plantations in terms of sustainability: A multicriteria approach. Journal of Environmental Management, 2016, 180, 123-132.	7.8	29
17	Properties underlying a preference aggregator based on satisficing logic. International Transactions in Operational Research, 2015, 22, 205-215.	2.7	6
18	Operations Research challenges in forestry: 33 open problems. Annals of Operations Research, 2015, 232, 11.	4.1	71

#	Article	IF	CITATIONS
19	Prologo. El profesor Enrique Ballestero: un ilustrado en el siglo XX. Economia Agraria Y Recursos Naturales, 2015, 15, 5-10.	0.2	0
20	Participatory Goal Programming in Forest Management: An Application Integrating Several Ecosystem Services. Forests, 2014, 5, 3352-3371.	2.1	37
21	How to combine inconsistent ordinal and cardinal preferences: A satisficing modelling approach. Computers and Industrial Engineering, 2014, 67, 168-172.	6.3	14
22	The optimal rotation of a flammable forest stand when both carbon sequestration and timber are valued: a multi-criteria approach. Natural Hazards, 2014, 72, 375-387.	3.4	17
23	Corporate social responsibility in portfolio selection: A "goal games―against nature approach. Computers and Industrial Engineering, 2014, 75, 260-265.	6.3	21
24	Dealing with the Sustainability Issue for Industrial Plantation Management. Managing Forest Ecosystems, 2014, , 393-413.	0.9	0
25	Optimal harvest scheduling in Eucalyptus plantations under a sustainability perspective. Forest Ecology and Management, 2013, 291, 367-376.	3.2	33
26	Goal programming in forest management: customising models for the decision-maker's preferences. Scandinavian Journal of Forest Research, 2013, 28, 166-173.	1.4	34
27	Operations research in the natural resource industry. International Transactions in Operational Research, 2012, 19, 39-62.	2.7	46
28	Characterization and explanation of the sustainability of the European wood manufacturing industries: A quantitative approach. Expert Systems With Applications, 2012, 39, 6618-6627.	7.6	30
29	Short communication. Economics of natural resources: in search of a unified theoretical framework. Spanish Journal of Agricultural Research, 2012, 10, 29.	0.6	4
30	The design of socially optimal decisions in a consensus scenario. Omega, 2011, 39, 179-185.	5.9	23
31	Computing efficient financial strategies: An extended compromise programming approach. Applied Mathematics and Computation, 2011, 217, 7831-7837.	2.2	2
32	Making sustainability rankings using compromise programming. An application to European paper industry. Silva Fennica, 2011, 45, .	1.3	29
33	Basic Aspects of the Multiple Criteria Decision Making Paradigm. Lecture Notes in Economics and Mathematical Systems, 2010, , 33-53.	0.3	1
34	Goal Programming: From Constrained Regression to Bounded Rationality Theories. Applied Optimization, 2010, , 311-328.	0.4	6
35	In Search of a European Paper Industry Ranking in Terms of Sustainability by Using Binary Goal Programming. Lecture Notes in Economics and Mathematical Systems, 2010, , 141-149.	0.3	4
36	Compromise Policies: An Integration of Economic and Environmental Criteria. Lecture Notes in Economics and Mathematical Systems, 2010, , 101-111.	0.3	0

#	Article	IF	CITATIONS
37	General Framework: Policy Making as a Problem with Multiple Criteria. Lecture Notes in Economics and Mathematical Systems, 2010, , 1-8.	0.3	0
38	Proposal for an Alternative Multicriteria Policy Approach Based on Welfare Functions. Lecture Notes in Economics and Mathematical Systems, 2010, , 125-133.	0.3	0
39	Joint Design of Economic and Environmental Policies: A Simonian Satisficing Approach. Lecture Notes in Economics and Mathematical Systems, 2010, , 113-123.	0.3	0
40	Multicriteria Economic Policies: General Ideas and Some Previous Experiences. Lecture Notes in Economics and Mathematical Systems, 2010, , 55-78.	0.3	0
41	Forest management with multiple criteria and multiple stakeholders: An application to two public forests in Spain. Scandinavian Journal of Forest Research, 2009, 24, 87-93.	1.4	60
42	Aggregation of preferences in participatory forest planning with multiple criteria: an application to the urban forest in Lycksele, Sweden. Canadian Journal of Forest Research, 2009, 39, 1979-1992.	1.7	40
43	Agricultural sustainable management: a normative approach based on goal programming. Journal of the Operational Research Society, 2009, 60, 534-543.	3.4	10
44	A Goal Programming Approach for a Joint Design of Macroeconomic and Environmental Policies: A Methodological Proposal and an Application to the Spanish Economy. Environmental Management, 2009, 43, 888-898.	2.7	24
45	A method for obtaining transitive approximations of aÂbinary relation. Annals of Operations Research, 2008, 163, 197-208.	4.1	5
46	Aggregation of ordinal and cardinal preferences: a framework based on distance functions. Journal of Multi-Criteria Decision Analysis, 2008, 15, 79-85.	1.9	11
47	Computing compromise solutions: On the connections between compromise programming and composite programming. Applied Mathematics and Computation, 2008, 195, 1-10.	2.2	49
48	Valuation of environmental goods: A shadow value perspective. Ecological Economics, 2008, 64, 517-520.	5.7	16
49	Making forestry decisions with multiple criteria: A review and an assessment. Forest Ecology and Management, 2008, 255, 3222-3241.	3.2	273
50	Using compromise programming for macroeconomic policy making in a general equilibrium framework: theory and application to the Spanish economy. Journal of the Operational Research Society, 2008, 59, 875-883.	3.4	22
51	Participatory decision-making in land use planning: An application in Costa Rica. Ecological Economics, 2007, 63, 740-748.	5.7	20
52	Inferring consensus weights from pairwise comparison matrices without suitable properties. Annals of Operations Research, 2007, 154, 123-132.	4.1	45
53	Multiple Criteria Decision-Making in Forest Planning: Recent Results and Current Challenges. , 2007, , 473-488.		14
54	Operations Research Models and the Management of Agricultural and Forestry Resources: A Review and Comparison. Interfaces, 2006, 36, 446-457.	1.5	135

#	Article	IF	CITATIONS
55	Interactive meta-goal programming. European Journal of Operational Research, 2006, 175, 135-154.	5.7	27
56	Formulating generalised â€~goal games' against nature: An illustration from decision-making under uncertainty in agriculture. Applied Mathematics and Computation, 2006, 175, 486-496.	2.2	11
57	Development and application of a multi-attribute sustainability function for Dutch dairy farming systems. Ecological Economics, 2006, 57, 640-658.	5.7	96
58	An analytical framework for aggregating multiattribute utility functions. Journal of the Operational Research Society, 2006, 57, 1241-1247.	3.4	19
59	In search of a natural systems sustainability index. Ecological Economics, 2004, 49, 401-405.	5.7	153
60	A general structure of achievement function for a goal programming model. European Journal of Operational Research, 2004, 153, 675-686.	5.7	212
61	Sustainability of forest management plans: a discrete goal programming approach. Journal of Environmental Management, 2004, 71, 351-359.	7.8	56
62	A method for dealing with inconsistencies in pairwise comparisons. European Journal of Operational Research, 2004, 158, 351-361.	5.7	49
63	Satisficing Logic And Goal Programming: Towards An Axiomatic Link. Infor, 2004, 42, 157-161.	0.6	8
64	Forest management optimisation models when carbon captured is considered: a goal programming approach. Forest Ecology and Management, 2003, 174, 447-457.	3.2	85
65	Transitive approximation to pairwise comparison matrices by using interval goal programming. Journal of the Operational Research Society, 2003, 54, 532-538.	3.4	36
66	Goal Programming. , 2003, , 489-500.		31
67	Forest management optimisation models and habitat diversity: a goal programming approach. Journal of the Operational Research Society, 2002, 53, 1175-1184.	3.4	12
68	Reply to the comments of Ganjavi et al. Journal of the Operational Research Society, 2002, 53, 929-930.	3.4	0
69	Final reply to the comments of Professors Ganjavi et al. Journal of the Operational Research Society, 2002, 53, 931-931.	3.4	Ο
70	Aggregation of preferences in an environmental economics context: a goal-programming approach. Omega, 2002, 30, 89-95.	5.9	71
71	Meta-goal programming. European Journal of Operational Research, 2002, 136, 422-429.	5.7	60
72	Managing forest biodiversity: a zero-one goal programming approach. Agricultural Systems, 2001, 68, 197-213.	6.1	33

#	Article	IF	CITATIONS
73	Aggregation of partial ordinal rankings: an interval goal programming approach. Computers and Operations Research, 2001, 28, 827-834.	4.0	84
74	Comments on properties of the minmax solutions in goal programming – a reply. European Journal of Operational Research, 2001, 131, 685-686.	5.7	2
75	A Note on Distributive Equity and Social Efficiency. Journal of Agricultural Economics, 2001, 52, 110-112.	3.5	10
76	Extended lexicographic goal programming: a unifying approach. Omega, 2001, 29, 63-71.	5.9	252
77	Combined Use of Goal Programming and the Analytic Hierarchy Process in Forest Management. Managing Forest Ecosystems, 2001, , 81-95.	0.9	6
78	Reply to Professor Ogryczak. Journal of the Operational Research Society, 2001, 52, 962-963.	3.4	1
79	Final reply to comments of Professor Ogryczak. Journal of the Operational Research Society, 2001, 52, 964-965.	3.4	0
80	Bi-criteria utility functions: Analytical considerations and implications in the short-run labour market. European Journal of Operational Research, 2000, 122, 91-100.	5.7	9
81	Risk programming for agricultural resource allocation: A multidimensional risk approach. Annals of Operations Research, 2000, 94, 57-68.	4.1	30
82	Determination of the optimal externality: Efficiency versus equity. European Journal of Operational Research, 1999, 113, 183-192.	5.7	5
83	On the Monotonicity of the Compromise Set in Multicriteria Problems. Journal of Optimization Theory and Applications, 1999, 102, 69-82.	1.5	25
84	Distance-based consensus methods: a goal programming approach. Omega, 1999, 27, 341-347.	5.9	73
85	Goal programming for decision making: An overview of the current state-of-the-art. European Journal of Operational Research, 1998, 111, 569-581.	5.7	503
86	Goal programming, compromise programming and reference point method formulations: linkages and utility interpretations. Journal of the Operational Research Society, 1998, 49, 986-991.	3.4	97
87	A non-interactive methodology to assess farmers' utility functions: An application to large farms in Andalusia, Spain. European Review of Agricultural Economics, 1998, 25, 92-102.	3.1	86
88	Multiple Criteria Decision Making and its Applications to Economic Problems. , 1998, , .		89
89	Optimal forest rotation age when carbon captured is considered: theory and applications. Journal of the Operational Research Society, 1998, 49, 121-131.	3.4	49
90	Work-leisure Trade-off in a Workers' Enterprise: A Decision Analysis Approach. , 1998, , 173-180.		0

Work-leisure Trade-off in a Workers' Enterprise: A Decision Analysis Approach. , 1998, , 173-180. 90

#	Article	IF	CITATIONS
91	Carbon Sequestration and Timber Production: A Bi-Criteria Optimisation Problem. Lecture Notes in Economics and Mathematical Systems, 1998, , 336-344.	0.3	1
92	Multicriteria decision analysis and environmental economics: An approximation. European Journal of Operational Research, 1997, 96, 81-89.	5.7	22
93	On farmers' objectives: A multi-criteria approach. European Journal of Operational Research, 1997, 96, 64-71.	5.7	123
94	Goal Programming and Multiple Criteria Decision Making: Some Reflections. Lecture Notes in Economics and Mathematical Systems, 1997, , 192-198.	0.3	3
95	Generating well-behaved utility functions for compromise programming. Journal of Optimization Theory and Applications, 1996, 91, 643-649.	1.5	19
96	Portfolio Selection: A Compromise Programming Solution. Journal of the Operational Research Society, 1996, 47, 1377-1386.	3.4	4
97	Dynamic Choices in Economics: A Compromise Approach. Lecture Notes in Economics and Mathematical Systems, 1996, , 11-24.	0.3	0
98	Utility optimization when the utility function is virtually unknown. Theory and Decision, 1994, 37, 233-243.	1.0	25
99	Carry on with redundancy in lexicographic goal programming. European Journal of Operational Research, 1994, 78, 441-442.	5.7	6
100	Relaxation of nutrient requirements on livestock rations through interactive multigoal programming. Agricultural Systems, 1994, 45, 443-453.	6.1	20
101	Multiple Criteria Decision Making: Some Connections with Economic Analysis. , 1994, , 223-232.		2
102	Weighting in compromise programming: A theorem on shadow prices. Operations Research Letters, 1993, 13, 325-329.	0.7	25
103	Economic optimization by compromise programming: The joint production model. Journal of Multi-Criteria Decision Analysis, 1993, 2, 65-72.	1.9	7
104	The application of the MCDM paradigm to the management of agricultural systems: Some basic considerations. Agricultural Systems, 1993, 41, 239-255.	6.1	58
105	Assessment of benefits of environmental measures. Landscape and Urban Planning, 1993, 27, 50-51.	7.5	0
106	An Interactive Multigoal Programming Model for Determining Livestock Rations: an Application to Dairy Cows in Andalusia, Spain. Journal of the Operational Research Society, 1992, 43, 945-953.	3.4	29
107	An Interactive Multigoal Programming Model for Determining Livestock Rations: An Application to Dairy Cows in Andalusia, Spain. Journal of the Operational Research Society, 1992, 43, 945.	3.4	2
108	An Introductory Overview of Goal Programming (GP) and some Related Multiple Criteria Decision Making (MCDM) Approaches11Readers with a basic knowledge of MCDM can skip this chapter and go on directly to Chapter 2 , 1991, , 1-12.		3

#	Article	IF	CITATIONS
109	Goal Programming with Penalty Functions. , 1991, , 74-85.		1
110	A theorem connecting utility function optimization and compromise programming. Operations Research Letters, 1991, 10, 421-427.	0.7	67
111	On Misconceptions in Goal Programming. Journal of the Operational Research Society, 1991, 42, 927.	3.4	0
112	Good and Poor Modelling Practices in Goal Programming. , 1991, , 25-49.		0
113	Paretian Efficiency in Goal Programming (In collaboration with Tahir Rehman). , 1991, , 13-24.		0
114	Relationship between Goal Programming (GP), Multiobjective Programming (MOP) and Compromise Programming (CP). , 1991, , 86-94.		0
115	Naive Prioritization and Redundancy in LGP11This chapter is a slightly modified version of the paper: "Redundancy in Lexicographic Goal Programming: An Empirical Approachâ€; published by Amador, F. and Romero, C. in the European Journal of Operational Research, Vol. 41, 1989, pp. 347–354.: (In) Tj ETQq1 1 0.78	4314 rgBT	/Overlock 1
116	Redundancy in lexicographic goal programming: An empirical approach. European Journal of Operational Research, 1989, 41, 347-354.	5.7	15
117	Determining Optimum Fertilizer Combinations Through Goal Programming with Penalty Functions: An Application to Sugar Beet Production in Spain. Journal of the Operational Research Society, 1988, 39, 61.	3.4	2
118	COMPROMISEâ€RISK PROGRAMMING FOR AGRICULTURAL RESOURCE ALLOCATION PROBLEMS: AN ILLUSTRATION. Journal of Agricultural Economics, 1988, 39, 271-276.	3.5	16
119	Determining Optimum Fertilizer Combinations Through Goal Programming with Penalty Functions: An Application to Sugar Beet production in Spain. Journal of the Operational Research Society, 1988, 39, 61-70.	3.4	23
120	Multiple Objectives in Agricultural Planning: A Compromise Programming Application. American Journal of Agricultural Economics, 1987, 69, 78-86.	4.3	51
121	Goal programming with penalty functions and livestock ration formulation. Agricultural Systems, 1987, 23, 117-132.	6.1	54
122	Natural resource management and the use of multiple criteria decision-making techniques: A review. European Review of Agricultural Economics, 1987, 14, 61-89.	3.1	80
123	An optimum location and size model for a food-processing plant in continuous space. Agricultural Systems, 1986, 22, 71-79.	6.1	2
124	A survey of generalized goal programming (1970–1982). European Journal of Operational Research, 1986, 25, 183-191.	5.7	93
125	Naive Weighting in Non-Preemptive Goal Programming. Journal of the Operational Research Society, 1985, 36, 647-648.	3.4	16
126	Multi-Objective and Goal-Programming Approaches as a Distance Function Model. Journal of the Operational Research Society, 1985, 36, 249-251.	3.4	29

#	Article	IF	CITATIONS
127	GOAL PROGRAMMING AND MULTIPLE CRITERIA DECISIONâ€MAKING IN FARM PLANNING: SOME EXTENSIONS. Journal of Agricultural Economics, 1985, 36, 171-185.	3.5	35
128	GOAL PROGRAMMING AND MULTIPLE CRITERIA DECISIONâ€MAKING IN FARM PLANNING: AN EXPOSITORY ANALYSISâ€A REPLY. Journal of Agricultural Economics, 1985, 36, 425-427.	3.5	3
129	A note—Effects of five sided penalty functions in goal programming. Omega, 1984, 12, 333.	5.9	19
130	Multiple-criteria decision-making techniques and their role in livestock ration formulation. Agricultural Systems, 1984, 15, 23-49.	6.1	56
131	A Note on Diet Planning in the Third World by Linear and Goal Programming. Journal of the Operational Research Society, 1984, 35, 555.	3.4	1
132	GOAL PROGRAMMING AND MULTIPLE CRITERIA DECISIONâ€MAKING IN FARM PLANNING: AN EXPOSITORY ANALYSIS. Journal of Agricultural Economics, 1984, 35, 177-190.	3.5	56
133	A Note on Diet Planning in the Third World by Linear and Goal Programming. Journal of the Operational Research Society, 1984, 35, 555-558.	3.4	15
134	Goal Programming via Multidimensional Scaling Applied to Senegalese Subsistence Farming: Comment. American Journal of Agricultural Economics, 1983, 65, 829-831.	4.3	8
135	OPTIMUM PREMIUM IN CROP DELIVERY*. Journal of Agricultural Economics, 1974, 25, 277-287.	3.5	0
136	An analysis of the degree of circularity of the wood products industry in Europe. Journal of Industrial Ecology, 0, , .	5.5	2
