Elena V Orekhova

List of Publications by Year in descending order

Source: https://exaly.com/author-pdf/7636177/publications.pdf Version: 2024-02-01

#	Article	IF	CITATIONS
1	Excess of High Frequency Electroencephalogram Oscillations in Boys with Autism. Biological Psychiatry, 2007, 62, 1022-1029.	0.7	252
2	EEG alpha rhythm in infants. Clinical Neurophysiology, 1999, 110, 997-1012.	0.7	190
3	EEG hyper-connectivity in high-risk infants is associated with later autism. Journal of Neurodevelopmental Disorders, 2014, 6, 40.	1.5	163
4	EEG theta rhythm in infants and preschool children. Clinical Neurophysiology, 2006, 117, 1047-1062.	0.7	154
5	Sensory gating in young children with autism: Relation to age, IQ, and EEG gamma oscillations. Neuroscience Letters, 2008, 434, 218-223.	1.0	150
6	Abnormal EEG lateralization in boys with autism. Clinical Neurophysiology, 2007, 118, 1842-1854.	0.7	110
7	Theta synchronization during sustained anticipatory attention in infants over the second half of the first year of life. International Journal of Psychophysiology, 1999, 32, 151-172.	0.5	93
8	Functional EEG connectivity in infants associates with later restricted and repetitive behaviours in autism; a replication study. Translational Psychiatry, 2019, 9, 66.	2.4	81
9	Arousal and attention re-orienting in autism spectrum disorders: evidence from auditory event-related potentials. Frontiers in Human Neuroscience, 2014, 8, 34.	1.0	80
10	Alpha activity as an index of cortical inhibition during sustained internally controlled attention in infants. Clinical Neurophysiology, 2001, 112, 740-749.	0.7	79
11	High-frequency oscillatory response to illusory contour in typically developing boys and boys with autism spectrum disorders. Cortex, 2012, 48, 701-717.	1.1	64
12	The right hemisphere fails to respond to temporal novelty in autism: Evidence from an ERP study. Clinical Neurophysiology, 2009, 120, 520-529.	0.7	54
13	Auditory Cortex Responses to Clicks and Sensory Modulation Difficulties in Children with Autism Spectrum Disorders (ASD). PLoS ONE, 2012, 7, e39906.	1.1	47
14	Abnormal Pre-Attentive Arousal in Young Children with Autism Spectrum Disorder Contributes to Their Atypical Auditory Behavior: An ERP Study. PLoS ONE, 2013, 8, e69100.	1.1	45
15	Externally and internally controlled attention in infants: an EEG study. International Journal of Psychophysiology, 1998, 30, 339-351.	0.5	44
16	Frequency of gamma oscillations in humans is modulated by velocity of visual motion. Journal of Neurophysiology, 2015, 114, 244-255.	0.9	40
17	Disconnectivity of the cortical ocular motor control network in autism spectrum disorders. Neurolmage, 2012, 61, 1226-1234.	2.1	33
18	Auditory Magnetic Response to Clicks in Children and Adults: Its Components, Hemispheric Lateralization and Repetition Suppression Effect. Brain Topography, 2013, 26, 410-427.	0.8	29

Elena V Orekhova

#	Article	IF	CITATIONS
19	Inverted event-related potentials response to illusory contour in boys with autism. NeuroReport, 2007, 18, 931-935.	0.6	26
20	Altered modulation of gamma oscillation frequency by speed of visual motion in children with autism spectrum disorders. Journal of Neurodevelopmental Disorders, 2015, 7, 21.	1.5	25
21	Input-dependent modulation of MEG gamma oscillations reflects gain control in the visual cortex. Scientific Reports, 2018, 8, 8451.	1.6	23
22	Heritability and "environmentability" of electroencephalogram in infants: The twin study. Psychophysiology, 2003, 40, 727-741.	1.2	20
23	Globally elevated excitation–inhibition ratio in children with autism spectrum disorder and below-average intelligence. Molecular Autism, 2022, 13, 20.	2.6	20
24	Neural gain control measured through cortical gamma oscillations is associated with sensory sensitivity. Human Brain Mapping, 2019, 40, 1583-1593.	1.9	19
25	Abnormal Size-Dependent Modulation of Motion Perception in Children with Autism Spectrum Disorder (ASD). Frontiers in Neuroscience, 2017, 11, 164.	1.4	18
26	Left hemispheric deficit in the sustained neuromagnetic response to periodic click trains in children with ASD. Molecular Autism, 2020, 11, 100.	2.6	18
27	Reduced Oblique Effect in Children with Autism Spectrum Disorders (ASD). Frontiers in Neuroscience, 2016, 9, 512.	1.4	13
28	Spatial suppression in visual motion perception is driven by inhibition: Evidence from MEG gamma oscillations. NeuroImage, 2020, 213, 116753.	2.1	13
29	Unraveling superimposed EEG rhythms with multi-dimensional decomposition. Journal of Neuroscience Methods, 2011, 195, 47-60.	1.3	10
30	Modification of the Average Reference Montage. Journal of Clinical Neurophysiology, 2002, 19, 209-218.	0.9	9
31	Age-related and individual differences in the performance of a delayed response task (the A-not-B task) in infant twins aged 7?12 months. Neuroscience and Behavioral Physiology, 2005, 35, 481-490.	0.2	6
32	Additive effect of contrast and velocity suggests the role of strong excitatory drive in suppression of visual gamma response. PLoS ONE, 2020, 15, e0228937.	1.1	5
33	Developmental Continuity in the Capacity of Working Memory from Infancy to Preschool Age. Neuroscience and Behavioral Physiology, 2012, 42, 692-699.	0.2	4
34	Visual gamma oscillations predict sensory sensitivity in females as they do in males. Scientific Reports, 2021, 11, 12013.	1.6	4
35	The nature of individual differences in EEG parameters during homogeneous visual field in 5- and 6-year-old twins: A pilot study. Clinical Neurophysiology, 2009, 120, 1492-1500.	0.7	3

36 Title is missing!. , 2020, 15, e0228937.
