

# Naoto Hirano

## List of Publications by Year in Descending Order

**Source:** <https://exaly.com/author-pdf/7650565/naoto-hirano-publications-by-year.pdf>

**Version:** 2024-04-17

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

45  
papers

1,063  
citations

18  
h-index

32  
g-index

49  
ext. papers

1,239  
ext. citations

#	Paper	IF	Citations
45	A direct evidence for disturbance of whole sediment layer in the subducting Pacific plate by petit-spot magma/water/sediment interaction. <i>Marine Geology</i> , <b>2022</b> , 444, 106712	3.3	2
44	The mantle structure below petit-spot volcanoes. <i>Communications Earth &amp; Environment</i> , <b>2022</b> , 3,	6.1	1
43	Cretaceous to Miocene NW Pacific Plate Kinematic Constraints: Paleomagnetism and Ar-Ar Geochronology in the Mineoka Ophiolite Mlange (Japan). <i>Journal of Geophysical Research: Solid Earth</i> , <b>2021</b> , 126, e2020JB021492	3.6	1
42	Tokoro Belt (NE Hokkaido): an exhumed, Jurassic-Early Cretaceous seamount in the Late Cretaceous accretionary prism of northern Japan. <i>Geological Magazine</i> , <b>2021</b> , 158, 72-83	2	4
41	Multi-approach characterization of shallow-water carbonates off Minamitorishima and their depositional settings/history. <i>Island Arc</i> , <b>2021</b> , 30, e12400	2	2
40	A Paleogene magmatic overprint on Cretaceous seamounts of the western Pacific. <i>Island Arc</i> , <b>2021</b> , 30, e12386	2	6
39	Alkali basalt from the Seifu Seamount in the Sea of Japan: post-spreading magmatism in a back-arc setting. <i>Solid Earth</i> , <b>2020</b> , 11, 23-36	3.3	1
38	Melting of recycled ancient crust responsible for the Gutenberg discontinuity. <i>Nature Communications</i> , <b>2020</b> , 11, 172	17.4	5
37	Noble gas isotopic compositions of seamount lavas from the central Chile trench: Implications for petit-spot volcanism and the lithosphere asthenosphere boundary. <i>Earth and Planetary Science Letters</i> , <b>2020</b> , 552, 116611	5.3	3
36	Tectonic implications of carbonate deposits on the eastern slope of the Hahajima Seamount in the collision zone between the Izu-Bonin Arc on the Philippine Sea Plate and the Ogasawara Plateau on the Pacific Plate. <i>Island Arc</i> , <b>2020</b> , 29, e12368	2	1
35	Petit-spot volcanoes on the oldest portion of the Pacific plate. <i>Deep-Sea Research Part I: Oceanographic Research Papers</i> , <b>2019</b> , 154, 103142	2.5	6
34	Direct ascent to the surface of asthenospheric magma in a region of convex lithospheric flexure. <i>International Geology Review</i> , <b>2018</b> , 60, 1231-1243	2.3	12
33	Petit-spot as definitive evidence for partial melting in the asthenosphere caused by CO. <i>Nature Communications</i> , <b>2017</b> , 8, 14302	17.4	23
32	Electrical conductivity of old oceanic mantle in the northwestern Pacific I: 1-D profiles suggesting differences in thermal structure not predictable from a plate cooling model. <i>Earth, Planets and Space</i> , <b>2017</b> , 69,	2.9	16
31	Relict chromian spinels in Tulu Dimtu serpentinites and listvenite, Western Ethiopia: implications for the timing of listvenite formation. <i>International Geology Review</i> , <b>2017</b> , 59, 1621-1631	2.3	6
30	Geochemical/Petrological Interactions between Subducting Lithosphere and Petit-spot Magmas. <i>Journal of Geography (Chigaku Zasshi)</i> , <b>2017</b> , 126, 195-206	0.5	4
29	Submarine lava fields in French Polynesia. <i>Marine Geology</i> , <b>2016</b> , 373, 39-48	3.3	8

28	Geology and geochemistry of ferromanganese nodules in the Japanese Exclusive Economic Zone around Minamitorishima Island. <i>Geochemical Journal</i> , <b>2016</b> , 50, 539-555	0.9	36
27	Petit-spot geology reveals melts in upper-most asthenosphere dragged by lithosphere. <i>Earth and Planetary Science Letters</i> , <b>2015</b> , 426, 267-279	5.3	29
26	Missing western half of the Pacific Plate: Geochemical nature of the Izanagi-Pacific Ridge interaction with a stationary boundary between the Indian and Pacific mantles. <i>Geochemistry, Geophysics, Geosystems</i> , <b>2015</b> , 16, 3309-3332	3.6	28
25	Melt-rich lithosphere-asthenosphere boundary inferred from petit-spot volcanoes. <i>Geology</i> , <b>2014</b> , 42, 967-970	5	35
24	Carbon dioxide emission to Earth's surface by deep-sea volcanism. <i>Geology</i> , <b>2013</b> , 41, 1167-1170	5	20
23	Petit-spot lava fields off the central Chile trench induced by plate flexure. <i>Geochemical Journal</i> , <b>2013</b> , 47, 249-257	0.9	33
22	Conformity and precision of CO <sub>2</sub> densimetry in CO <sub>2</sub> inclusions: microthermometry versus Raman microspectroscopic densimetry. <i>Journal of Raman Spectroscopy</i> , <b>2012</b> , 43, 1126-1133	2.3	17
21	Direct evidence for upper mantle structure in the NW Pacific Plate: Microstructural analysis of a petit-spot peridotite xenolith. <i>Earth and Planetary Science Letters</i> , <b>2011</b> , 302, 194-202	5.3	19
20	Petit-spot volcanism: A new type of volcanic zone discovered near a trench. <i>Geochemical Journal</i> , <b>2011</b> , 45, 157-167	0.9	30
19	Retentivity of CO <sub>2</sub> in fluid inclusions in mantle minerals. <i>European Journal of Mineralogy</i> , <b>2011</b> , 23, 805-815	1.5	16
18	Role of plutonic and metamorphic block exhumation in a forearc ophiolite mélange belt: An example from the Mineoka belt, Japan <b>2011</b> ,		8
17	Mechanisms of low-flux intraplate volcanic fields Basin and Range (North America) and northwest Pacific Ocean. <i>Geology</i> , <b>2010</b> , 38, 55-58	5	60
16	New insights into the oceanic lithosphere from petit-spot volcanoes and "Super-Mohole" project. <i>Journal of the Geological Society of Japan</i> , <b>2010</b> , 116, 1-12	0.6	5
15	Noble gas isotopic compositions of mantle xenoliths from northwestern Pacific lithosphere. <i>Chemical Geology</i> , <b>2009</b> , 268, 313-323	4.2	18
14	Evidence for recycled plate material in Pacific upper mantle unrelated to plumes. <i>Geochimica Et Cosmochimica Acta</i> , <b>2009</b> , 73, 3028-3037	5.5	49
13	Seamounts, knolls and petit-spot monogenetic volcanoes on the subducting Pacific Plate. <i>Basin Research</i> , <b>2008</b> , 20, 543-553	3.2	48
12	Depleted mantle wedge and sediment fingerprint in unusual basalts from the Manihiki Plateau, central Pacific Ocean. <i>Geology</i> , <b>2007</b> , 35, 595	5	45
11	Subsurface structure of the petit-spot volcanoes on the northwestern Pacific Plate. <i>Geophysical Research Letters</i> , <b>2007</b> , 34, n/a-n/a	4.9	25

10	Paleo-Moho depth determined from the pressure of CO <sub>2</sub> fluid inclusions: Raman spectroscopic barometry of mantle- and crust-derived rocks. <i>Earth and Planetary Science Letters</i> , <b>2007</b> , 253, 369-377	5.3	40
9	Noble gas and geochronology study of the Hana Ridge, Haleakala volcano, Hawaii; implications to the temporal change of magma source and the structural evolution of the submarine ridge. <i>Chemical Geology</i> , <b>2007</b> , 238, 1-18	4.2	15
8	Volcanism in response to plate flexure. <i>Science</i> , <b>2006</b> , 313, 1426-8	33.3	210
7	Subsurface Structure of the "Petit-spot" Intra-plate Volcanism, in the Northwestern Pacific. <i>JAMSTEC Report of Research and Development</i> , <b>2006</b> , 3, 31-42	0	5
6	The chemical structure of the Hawaiian mantle plume. <i>Nature</i> , <b>2005</b> , 436, 837-40	50.4	83
5	Young, olivine xenocryst-bearing alkali-basalt from the oceanward slope of the Japan Trench. <i>Contributions To Mineralogy and Petrology</i> , <b>2004</b> , 148, 47-54	3.5	44
4	Construction of I-Xe and 40Ar-39Ar Dating System Using a Modified VG3600 Mass Spectrometer and the First I-Xe Data Obtained in Japan. <i>Journal of the Mass Spectrometry Society of Japan</i> , <b>2004</b> , 52, 219-229	0.2	18
3	The nature of faulting and deformation in the Mineoka ophiolite, NW Pacific Rim. <i>Geological Society Special Publication</i> , <b>2003</b> , 218, 299-314	1.7	5
2	Occurrence of the sandstone included in the alkali-basalt lava flow from the western Mineoka Belt, Boso Peninsula, Japan, and its tectonic significance.. <i>Journal of the Geological Society of Japan</i> , <b>2002</b> , 108, 691-700	0.6	12
1	Long-lived early Cretaceous seamount volcanism in the Mariana Trench, Western Pacific Ocean. <i>Marine Geology</i> , <b>2002</b> , 189, 371-379	3.3	5
