#	ARTICLE	IF	CITATIONS
1	Respirable coal mine dust at surface mines, United States, 1982â€“2017. American Journal of Industrial Medicine, 2020, 63, 232-239.	2.1	34
2	Transplantation for work-related lung disease in the USA. Occupational and Environmental Medicine, 2020, 77, 790-794.	2.8	4
3	Causes of death among Federal Black Lung Benefits Program beneficiaries enrolled in Medicare, 1999â€“2016. American Journal of Industrial Medicine, 2020, 63, 973-979.	2.1	2
4	Prevalence of spirometry-defined airflow obstruction in never-smoking working US coal miners by pneumoconiosis status. Occupational and Environmental Medicine, 2020, 77, 265-267.	2.8	21
5	Current Review of Pneumoconiosis Among US Coal Miners. Current Environmental Health Reports, 2019, 6, 137-147.	6.7	63
6	Current Review of Pneumoconiosis Among US Coal Miners. Current Environmental Health Reports, 2019, , 1.	6.7	8
7	Continued increase in prevalence of r-type opacities among underground coal miners in the USA. Occupational and Environmental Medicine, 2019, 76, 479-481.	2.8	27
8	Medicare Claims Paid by the Federal Black Lung Benefits Program. Journal of Occupational and Environmental Medicine, 2019, 61, e510-e515.	1.7	2
9	Interstitial Lung Diseases in the U.S. Mining Industry: Using MSHA Data to Examine Trends and the Prevention Effects of Compliance with Health Regulations, 1996â€“2015. Risk Analysis, 2018, 38, 1962-1971.	2.7	10
10	Progressive Massive Fibrosis in Coal Miners From 3 Clinics in Virginia. JAMA - Journal of the American Medical Association, 2018, 319, 500.	7.4	62
11	Work Practices and Respiratory Health Status of Appalachian Coal Miners With Progressive Massive Fibrosis. Journal of Occupational and Environmental Medicine, 2018, 60, e575-e581.	1.7	19
12	Continued increase in lung transplantation for coal workersâ€™ pneumoconiosis in the United States. American Journal of Industrial Medicine, 2018, 61, 621-624.	2.1	15
13	Continued Increase in Prevalence of Coal Workersâ€™ Pneumoconiosis in the United States, 1970â€“2017. American Journal of Public Health, 2018, 108, 1220-1222.	2.7	134
14	Coal Workersâ€™ Pneumoconiosisâ€™ Attributable Years of Potential Life Lost to Life Expectancy and Potential Life Lost Before Age 65 Years â€™ United States, 1999â€“2016. Morbidity and Mortality Weekly Report, 2018, 67, 819-824.	15.1	27
15	Engineering controls are the most protective means of controlling respirable coal mine dust. Lancet Respiratory Medicine, the, 2017, 5, e18.	10.7	5
16	Respiratory morbidity among U.S. coal miners in states outside of central Appalachia. American Journal of Industrial Medicine, 2017, 60, 513-517.	2.1	16
17	Misclassification of occupational disease in lung transplant recipients. Journal of Heart and Lung Transplantation, 2017, 36, 588-590.	0.6	6
18	Linking Compensation and Health Surveillance Data Sets to Improve Knowledge of US Coal Minersâ€™ Health. Journal of Occupational and Environmental Medicine, 2017, 59, 930-934.	1.7	7

#	ARTICLE	IF	CITATIONS
19	Evaluation of high blood pressure and obesity among US coal miners participating in the Enhanced Coal Workers' Health Surveillance Program. <i>Journal of the American Society of Hypertension</i> , 2017, 11, 541-545.	2.3	14
20	Health and Social Conditions of the Poorest Versus Wealthiest Counties in the United States. <i>American Journal of Public Health</i> , 2017, 107, 130-135.	2.7	35
21	Lung transplantation is increasingly common among patients with coal workers' pneumoconiosis. <i>American Journal of Industrial Medicine</i> , 2016, 59, 175-177.	2.1	21
22	Resurgence of Progressive Massive Fibrosis in Coal Miners in Eastern Kentucky, 2016. <i>Morbidity and Mortality Weekly Report</i> , 2016, 65, 1385-1389.	15.1	81
23	Profusion of Opacities in Simple Coal Worker's Pneumoconiosis Is Associated With Reduced Lung Function. <i>Chest</i> , 2015, 148, 1293-1299.	0.8	29
24	Injury rates on new and old technology oil and gas rigs operated by the largest United States onshore drilling contractor. <i>American Journal of Industrial Medicine</i> , 2014, 57, 1188-1192.	2.1	14
25	Small mine size is associated with lung function abnormality and pneumoconiosis among underground coal miners in Kentucky, Virginia and West Virginia. <i>Occupational and Environmental Medicine</i> , 2014, 71, 690-694.	2.8	39
26	Developing an Academic Health Department in Northeast Tennessee. <i>Journal of Public Health Management and Practice</i> , 2014, 20, 315-323.	1.4	4
27	Resurgence of a Debilitating and Entirely Preventable Respiratory Disease among Working Coal Miners. <i>American Journal of Respiratory and Critical Care Medicine</i> , 2014, 190, 708-709.	5.6	77
28	The Development and Implementation of a Student-Led Farmers' Market on a Public University Campus. <i>Journal of Hunger and Environmental Nutrition</i> , 2014, 9, 81-95.	1.9	4
29	The burden of lung cancer in Tennessee--adopting a regional perspective. <i>Tennessee Medicine: Journal of the Tennessee Medical Association</i> , 2013, 106, 33-5, 41.	0.0	0
30	Implementing a weighted spatial smoothing algorithm to identify a lung cancer belt in the United States. <i>Cancer Epidemiology</i> , 2012, 36, 436-438.	1.9	4
31	Cancer Mortality Rates in Appalachia: Descriptive Epidemiology and an Approach to Explaining Differences in Outcomes. <i>Journal of Community Health</i> , 2012, 37, 804-813.	3.8	51
