#	Article	IF	CITATIONS
1	Topologically Enhanced Dual-Network Hydrogels with Rapid Recovery for Low-Hysteresis, Self-Adhesive Epidemic Electronics. ACS Applied Materials & Self-Adhesive Epidemic Electronics & Self-Adhesive &	8.0	53
2	Recognition of cough using features improved by sub-band energy transformation. , 2013, , .		6
3	An electronic stethoscope for heart diseases based on micro-electro-mechanical-system microphone. , 2016, , .		6
4	Selection of Encoding Cardinality for a Class of Fitness Functions to Obtain Order-1 Building Blocks. International Journal of Computational Intelligence Systems, 2015, 8, 62-74.	2.7	4
5	A kind of epistasisâ€tunable test functions for genetic algorithms. Concurrency Computation Practice and Experience, 2021, 33, e5030.	2.2	3
6	Selection of Encoding Cardinality for a Class of Fitness Functions to Obtain Order-1 Building Blocks. International Journal of Computational Intelligence Systems, 2015, 8, 62.	2.7	3
7	On the Supply of Superior Order-1 Building Blocks for a Class of Periodical Fitness Functions. International Journal of Computational Intelligence Systems, 2009, 2, 91-98.	2.7	2
8	Fitness landscape for simple genetic algorithms supplied with adequate superior order-1 building blocks. International Journal of Control, Automation and Systems, 2010, 8, 135-140.	2.7	1
9	A novel model variable selection method based on energy variation and its application to predictive modeling for achromic power. , 2009, , .		0
10	Encoding selection for a class of fitness functions based on locus interdependency. International Journal of Control, Automation and Systems, 2015, 13, 1277-1285.	2.7	0
11	A Modified Dual Microphone Adaptive Filter for Auscultation. , 2019, , .		0
12	A linear classifier for cough and pseudo-cough sounds in patients with cervical spinal cord injury. , 2020, , .		0
