Kevin J Mcelwee

List of Publications by Year in Descending Order

Source: https://exaly.com/author-pdf/7669758/kevin-j-mcelwee-publications-by-year.pdf

Version: 2024-04-28

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

3,570 101 34 55 h-index g-index citations papers 106 4,085 5.11 2.7 avg, IF L-index ext. citations ext. papers

#	Paper	IF	Citations
101	In Vitro and Ex Vivo Hair Follicle Models to Explore Therapeutic Options for Hair Regeneration. <i>Pancreatic Islet Biology</i> , 2022 , 155-203	0.4	
100	Growth factor concentrations in platelet-rich plasma for androgenetic alopecia: An intra-subject, randomized, blinded, placebo-controlled, pilot study. <i>Experimental Dermatology</i> , 2020 , 29, 334-340	4	12
99	A "hair-raising" history of alopecia areata. <i>Experimental Dermatology</i> , 2020 , 29, 208-222	4	11
98	Increased expression of TLR7 and TLR9 in alopecia areata. Experimental Dermatology, 2020, 29, 254-258	3 4	4
97	Hair follicle immune privilege and its collapse in alopecia areata. <i>Experimental Dermatology</i> , 2020 , 29, 703-725	4	46
96	Sequential cyclic changes of hair roots revealed by dermoscopy demonstrate a progressive mechanism of diffuse alopecia areata over time. <i>Experimental Dermatology</i> , 2020 , 29, 223-230	4	2
95	Serum level of IL-4 predicts response to topical immunotherapy with diphenylcyclopropenone in alopecia areata. <i>Experimental Dermatology</i> , 2020 , 29, 231-238	4	11
94	Allergy promotes alopecia areata in a subset of patients. <i>Experimental Dermatology</i> , 2020 , 29, 239-242	4	4
93	Nonsurgical Induction of Alopecia Areata in C3H/HeJ Mice via Adoptive Transfer of Cultured Lymphoid Cells. <i>Methods in Molecular Biology</i> , 2020 , 2154, 121-131	1.4	2
92	Alopecia Areata is Associated with Increased Expression of Heart Disease Biomarker Cardiac Troponin I. <i>Acta Dermato-Venereologica</i> , 2018 , 98, 776-782	2.2	11
91	Fibroblast cell-based therapy prevents induction of alopecia areata in an experimental model. <i>Cell Transplantation</i> , 2018 , 27, 994-1004	4	12
90	Notch signaling is significantly suppressed in basal cell carcinomas and activation induces basal cell carcinoma cell apoptosis. <i>Molecular Medicine Reports</i> , 2017 , 15, 1441-1454	2.9	13
89	Experimental and early investigational drugs for androgenetic alopecia. <i>Expert Opinion on Investigational Drugs</i> , 2017 , 26, 917-932	5.9	8
88	Identification of Autoantigen Epitopes in Alopecia Areata. <i>Journal of Investigative Dermatology</i> , 2016 , 136, 1617-1626	4.3	38
87	Immunotherapy of melanoma: present options and future promises. <i>Cancer and Metastasis Reviews</i> , 2015 , 34, 115-28	9.6	49
86	eIF4E is an adverse prognostic marker of melanoma patient survival by increasing melanoma cell invasion. <i>Journal of Investigative Dermatology</i> , 2015 , 135, 1358-1367	4.3	17
85	Benefit of different concentrations of intralesional triamcinolone acetonide in alopecia areata: An intrasubject pilot study. <i>Journal of the American Academy of Dermatology</i> , 2015 , 73, 338-40	4.5	31

(2014-2015)

84	The role of lymphocytes in the development and treatment of alopecia areata. <i>Expert Review of Clinical Immunology</i> , 2015 , 11, 1335-51	5.1	36
83	Ratite oils promote keratinocyte cell growth and inhibit leukocyte activation. <i>Poultry Science</i> , 2015 , 94, 2288-96	3.9	3
82	Changes in serum free testosterone, sleep patterns, and 5-alpha-reductase type I activity influence changes in sebum excretion in female subjects. <i>Skin Research and Technology</i> , 2015 , 21, 47-53	1.9	7
81	Increased expression of neuropilin in melanoma progression and its prognostic significance in patients with melanoma. <i>Molecular Medicine Reports</i> , 2015 , 12, 2668-76	2.9	19
80	Hair follicle dermal sheath derived cells improve islet allograft survival without systemic immunosuppression. <i>Journal of Immunology Research</i> , 2015 , 2015, 607328	4.5	2
79	Allergy to dust mites may contribute to early onset and severity of alopecia areata. <i>Clinical and Experimental Dermatology</i> , 2015 , 40, 171-6	1.8	14
78	Transfer of Alopecia Areata to C3H/HeJ Mice Using Cultured Lymph Node-Derived Cells. <i>Journal of Investigative Dermatology</i> , 2015 , 135, 2530-2532	4.3	20
77	Animal Models for Alopecia Areata: What and Where?. <i>Journal of Investigative Dermatology Symposium Proceedings</i> , 2015 , 17, 23-6	1.1	12
76	Biology of the hair follicle and mechanisms of nonscarring and scarring alopecia. <i>Seminars in Cutaneous Medicine and Surgery</i> , 2015 , 34, 50-6	1.4	6
75	Prognostic Significance of Nuclear Phospho-ATM Expression in Melanoma. <i>PLoS ONE</i> , 2015 , 10, e0134	67 § .7	5
75 74	Prognostic Significance of Nuclear Phospho-ATM Expression in Melanoma. <i>PLoS ONE</i> , 2015 , 10, e0134 Stage-specific prognostic biomarkers in melanoma. <i>Oncotarget</i> , 2015 , 6, 4180-9	67§. ₇	5
		<i>,</i>	
74	Stage-specific prognostic biomarkers in melanoma. <i>Oncotarget</i> , 2015 , 6, 4180-9 High LIFr expression stimulates melanoma cell migration and is associated with unfavorable	3.3	20
74 73	Stage-specific prognostic biomarkers in melanoma. <i>Oncotarget</i> , 2015 , 6, 4180-9 High LIFr expression stimulates melanoma cell migration and is associated with unfavorable prognosis in melanoma. <i>Oncotarget</i> , 2015 , 6, 25484-98 Loss of tumor suppressors KAI1 and p27 identifies a unique subgroup of primary melanoma	3.3	20
74 73 72	Stage-specific prognostic biomarkers in melanoma. <i>Oncotarget</i> , 2015 , 6, 4180-9 High LIFr expression stimulates melanoma cell migration and is associated with unfavorable prognosis in melanoma. <i>Oncotarget</i> , 2015 , 6, 25484-98 Loss of tumor suppressors KAI1 and p27 identifies a unique subgroup of primary melanoma patients with poor prognosis. <i>Oncotarget</i> , 2015 , 6, 23026-35 Hair follicle mesenchyme-associated PD-L1 regulates T-cell activation induced apoptosis: a	3·3 3·3	20 28 8
74 73 72 71	Stage-specific prognostic biomarkers in melanoma. <i>Oncotarget</i> , 2015 , 6, 4180-9 High LIFr expression stimulates melanoma cell migration and is associated with unfavorable prognosis in melanoma. <i>Oncotarget</i> , 2015 , 6, 25484-98 Loss of tumor suppressors KAI1 and p27 identifies a unique subgroup of primary melanoma patients with poor prognosis. <i>Oncotarget</i> , 2015 , 6, 23026-35 Hair follicle mesenchyme-associated PD-L1 regulates T-cell activation induced apoptosis: a potential mechanism of immune privilege. <i>Journal of Investigative Dermatology</i> , 2014 , 134, 736-745 Frontal fibrosing alopecia: a retrospective clinical review of 62 patients with treatment outcome	3·3 3·3 4·3	20 28 8
74 73 72 71 70	Stage-specific prognostic biomarkers in melanoma. <i>Oncotarget</i> , 2015 , 6, 4180-9 High LIFr expression stimulates melanoma cell migration and is associated with unfavorable prognosis in melanoma. <i>Oncotarget</i> , 2015 , 6, 25484-98 Loss of tumor suppressors KAI1 and p27 identifies a unique subgroup of primary melanoma patients with poor prognosis. <i>Oncotarget</i> , 2015 , 6, 23026-35 Hair follicle mesenchyme-associated PD-L1 regulates T-cell activation induced apoptosis: a potential mechanism of immune privilege. <i>Journal of Investigative Dermatology</i> , 2014 , 134, 736-745 Frontal fibrosing alopecia: a retrospective clinical review of 62 patients with treatment outcome and long-term follow-up. <i>International Journal of Dermatology</i> , 2014 , 53, 1324-30 A combination of p300 and Braf expression in the diagnosis and prognosis of melanoma. <i>BMC</i>	3·3 3·3 4·3	20 28 8 31 97

66	An update on diagnosis and treatment of female pattern hair loss. <i>Expert Review of Dermatology</i> , 2013 , 8, 427-436		4
65	What causes alopecia areata?. <i>Experimental Dermatology</i> , 2013 , 22, 609-26	4	97
64	Early stage alopecia areata is associated with inflammation in the upper dermis and damage to the hair follicle infundibulum. <i>Australasian Journal of Dermatology</i> , 2013 , 54, 184-91	1.3	18
63	The basic science of hair biology: what are the causal mechanisms for the disordered hair follicle?. <i>Dermatologic Clinics</i> , 2013 , 31, 1-19	4.2	23
62	Endogenous retinoids in the pathogenesis of alopecia areata. <i>Journal of Investigative Dermatology</i> , 2013 , 133, 334-43	4.3	38
61	Somatostatin expression in human hair follicles and its potential role in immune privilege. <i>Journal of Investigative Dermatology</i> , 2013 , 133, 1722-30	4.3	16
60	Examining the relationship between alopecia areata, androgenetic alopecia, and emotional intelligence. <i>Journal of Cutaneous Medicine and Surgery</i> , 2013 , 17, 46-51	1.6	14
59	Non-scarring patchy alopecia in patients with systemic lupus erythematosus differs from that of alopecia areata. <i>Lupus</i> , 2013 , 22, 1439-45	2.6	24
58	Development of autoimmune hair loss disease alopecia areata is associated with cardiac dysfunction in C3H/HeJ mice. <i>PLoS ONE</i> , 2013 , 8, e62935	3.7	16
57	Assessment of hair density and caliber in Caucasian and Asian female subjects with female pattern hair loss by using the Folliscope. <i>Journal of the American Academy of Dermatology</i> , 2012 , 66, 166-7	4.5	22
56	Deficiency in nucleotide excision repair family gene activity, especially ERCC3, is associated with non-pigmented hair fiber growth. <i>PLoS ONE</i> , 2012 , 7, e34185	3.7	5
55	Integrin B -deficient mice show enhanced keratinocyte proliferation and retarded hair follicle regression after depilation. <i>Journal of Investigative Dermatology</i> , 2012 , 132, 547-55	4.3	22
54	CXCR3 ligands promote expression of functional indoleamine 2,3-dioxygenase in basal cell carcinoma keratinocytes. <i>British Journal of Dermatology</i> , 2011 , 165, 1030-6	4	18
53	Etiopathogenesis of alopecia areata: Why do our patients get it?. <i>Dermatologic Therapy</i> , 2011 , 24, 337-4	72.2	38
52	Hypothesis testing: CTLA4 co-stimulatory pathways critical in the pathogenesis of human and mouse alopecia areata. <i>Journal of Investigative Dermatology</i> , 2011 , 131, 2323-4	4.3	15
51	Lichen planopilaris and pseudopelade of Brocq involve distinct disease associated gene expression patterns by microarray. <i>Journal of Dermatological Science</i> , 2010 , 57, 27-36	4.3	18
50	Alopecia areata update: part I. Clinical picture, histopathology, and pathogenesis. <i>Journal of the American Academy of Dermatology</i> , 2010 , 62, 177-88, quiz 189-90	4.5	306
49	Alopecia areata update: part II. Treatment. <i>Journal of the American Academy of Dermatology</i> , 2010 , 62, 191-202, quiz 203-4	4.5	193

(2005-2010)

48	CXCR3/ligands are significantly involved in the tumorigenesis of basal cell carcinomas. <i>American Journal of Pathology</i> , 2010 , 176, 2435-46	5.8	79
47	Hair follicles from alopecia areata patients exhibit alterations in immune privilege-associated gene expression in advance of hair loss. <i>Journal of Investigative Dermatology</i> , 2010 , 130, 2677-80	4.3	65
46	Measuring cortisol and DHEA in fingernails: a pilot study. <i>Neuropsychiatric Disease and Treatment</i> , 2010 , 6, 1-7	3.1	44
45	Development of alopecia areata is associated with higher central and peripheral hypothalamic-pituitary-adrenal tone in the skin graft induced C3H/HeJ mouse model. <i>Journal of Investigative Dermatology</i> , 2009 , 129, 1527-38	4.3	53
44	Superficial, nodular, and morpheiform basal-cell carcinomas exhibit distinct gene expression profiles. <i>Journal of Investigative Dermatology</i> , 2008 , 128, 1797-805	4.3	39
43	Etiology of cicatricial alopecias: a basic science point of view. <i>Dermatologic Therapy</i> , 2008 , 21, 212-20	2.2	26
42	Hair physiology and its disorders. <i>Drug Discovery Today Disease Mechanisms</i> , 2008 , 5, e163-e171		21
