#	ARTICLE	IF	CITATIONS
1	Effect of natural resources, renewable energy and economic development on CO2 emissions in BRICS countries. <i>Science of the Total Environment</i> , 2019, 678, 632-638.	3.9	605
2	Determinants of the ecological footprint: Role of renewable energy, natural resources, and urbanization. <i>Sustainable Cities and Society</i> , 2020, 54, 101996.	5.1	562
3	Role of renewable energy and non-renewable energy consumption on EKC: Evidence from Pakistan. <i>Journal of Cleaner Production</i> , 2017, 156, 855-864.	4.6	474
4	Linking urbanization, human capital, and the ecological footprint in G7 countries: An empirical analysis. <i>Sustainable Cities and Society</i> , 2020, 55, 102064.	5.1	405
5	Financial development, globalization, and CO2 emission in the presence of EKC: evidence from BRICS countries. <i>Environmental Science and Pollution Research</i> , 2018, 25, 31283-31296.	2.7	354
6	Linking economic growth and ecological footprint through human capital and biocapacity. <i>Sustainable Cities and Society</i> , 2019, 47, 101516.	5.1	336
7	Modeling the dynamic linkage between financial development, energy innovation, and environmental quality: Does globalization matter?. <i>Business Strategy and the Environment</i> , 2021, 30, 176-184.	8.5	308
8	The effect of ICT on CO2 emissions in emerging economies: does the level of income matters?. <i>Environmental Science and Pollution Research</i> , 2018, 25, 22850-22860.	2.7	238
9	How do environmental technologies affect green growth? Evidence from BRICS economies. <i>Science of the Total Environment</i> , 2020, 712, 136504.	3.9	234
10	Analyzing the role of governance in CO2 emissions mitigation: The BRICS experience. <i>Structural Change and Economic Dynamics</i> , 2019, 51, 119-125.	2.1	233
11	The dynamics of ICT, foreign direct investment, globalization and economic growth: Panel estimation robust to heterogeneity and cross-sectional dependence. <i>Telematics and Informatics</i> , 2018, 35, 318-328.	3.5	231
12	Does biomass energy consumption help to control environmental pollution? Evidence from BRICS countries. <i>Science of the Total Environment</i> , 2019, 670, 1075-1083.	3.9	228
13	Nexus between financial development and CO2 emissions in Saudi Arabia: analyzing the role of globalization. <i>Environmental Science and Pollution Research</i> , 2018, 25, 28378-28390.	2.7	204
14	The moderating role of corruption between economic growth and CO2 emissions: Evidence from BRICS economies. <i>Energy</i> , 2018, 148, 506-513.	4.5	198
15	Impact of financial development and economic growth on environmental quality: an empirical analysis from Belt and Road Initiative (BRI) countries. <i>Environmental Science and Pollution Research</i> , 2019, 26, 2253-2269.	2.7	191
16	Renewable energy consumption, economic growth and human development index in Pakistan: Evidence form simultaneous equation model. <i>Journal of Cleaner Production</i> , 2018, 184, 1081-1090.	4.6	184
17	Dynamic relationship between tourism, economic growth, and environmental quality. <i>Journal of Sustainable Tourism</i> , 2018, 26, 1928-1943.	5.7	175
18	Investigation of the ecological footprint's driving factors: What we learn from the experience of emerging economies. <i>Sustainable Cities and Society</i> , 2019, 49, 101626.	5.1	171

#	ARTICLE	IF	CITATIONS
19	Does information and communication technology affect CO ₂ mitigation under the pathway of sustainable development during the mode of globalization?. Sustainable Development, 2020, 28, 857-867.	6.9	159
20	Relationship between energy consumption and environmental sustainability in OECD countries: The role of natural resources rents. Resources Policy, 2020, 69, 101803.	4.2	158
21	Analyzing the relationship between poverty, income inequality, and CO2 emission in Sub-Saharan African countries. Science of the Total Environment, 2020, 740, 139867.	3.9	152
22	Relationship between energy intensity and CO ₂ emissions: Does economic policy matter?. Sustainable Development, 2020, 28, 1457-1464.	6.9	152
23	Role of institutions in correcting environmental pollution: An empirical investigation. Sustainable Cities and Society, 2020, 53, 101901.	5.1	149
24	Energy production, economic growth and CO2 emission: evidence from Pakistan. Natural Hazards, 2018, 90, 27-50.	1.6	145
25	An empirical investigation of nuclear energy consumption and carbon dioxide (CO2) emission in India: Bridging IPAT and EKC hypotheses. Nuclear Engineering and Technology, 2021, 53, 2056-2065.	1.1	142
26	The nexus between energy consumption and financial development: estimating the role of globalization in Next-11 countries. Environmental Science and Pollution Research, 2018, 25, 18651-18661.	2.7	137
27	Imported technology and CO2 emission in China: Collecting evidence through bound testing and VECM approach. Renewable and Sustainable Energy Reviews, 2018, 82, 4204-4214.	8.2	136
28	The role of natural resources abundance and dependence in achieving environmental sustainability: Evidence from resource-based economies. Sustainable Development, 2021, 29, 143-154.	6.9	136
29	Mitigation pathways toward sustainable development: Is there any trade-off between environmental regulation and carbon emissions reduction?. Sustainable Development, 2020, 28, 813-822.	6.9	127
30	Modeling the impact of transport energy consumption on CO2 emission in Pakistan: Evidence from ARDL approach. Environmental Science and Pollution Research, 2018, 25, 9461-9473.	2.7	121
31	Towards cross-regional sustainable development: The nexus between information and communication technology, energy consumption, and CO ₂ emissions. Sustainable Development, 2019, 27, 990-1000.	6.9	120
32	The role of renewable and non-renewable energy consumption in CO2 emissions: a disaggregate analysis of Pakistan. Environmental Science and Pollution Research, 2018, 25, 31616-31629.	2.7	115
33	Is nuclear energy a better alternative for mitigating CO2 emissions in BRICS countries? An empirical analysis. Nuclear Engineering and Technology, 2020, 52, 2969-2974.	1.1	109
34	Modeling the non-linear relationship between financial development and energy consumption: statistical experience from OECD countries. Environmental Science and Pollution Research, 2019, 26, 8838-8846.	2.7	103
35	The role of nuclear energy in the correction of environmental pollution: Evidence from Pakistan. Nuclear Engineering and Technology, 2020, 52, 1327-1333.	1.1	100
36	Effects of information and communication technology and real income on CO2 emissions: The experience of countries along Belt and Road. Telematics and Informatics, 2019, 45, 101300.	3.5	97

#	ARTICLE	IF	CITATIONS
37	Renewable energy, technological innovation and the environment: A novel dynamic auto-regressive distributive lag simulation. <i>Renewable and Sustainable Energy Reviews</i> , 2021, 150, 111433.	8.2	91
38	An assessment of the environmental sustainability corridor: Investigating the non-linear effects of environmental taxation on CO_2 emissions. <i>Sustainable Development</i> , 2020, 28, 1010-1018.	6.9	88
39	The pathway toward pollution mitigation: Does institutional quality make a difference?. <i>Business Strategy and the Environment</i> , 2020, 29, 3571-3583.	8.5	82
40	An empirical analysis of financial development and energy demand: establishing the role of globalization. <i>Environmental Science and Pollution Research</i> , 2018, 25, 24326-24337.	2.7	81
41	Will regional economic integration influence carbon dioxide marginal abatement costs? Evidence from Chinese panel data. <i>Energy Economics</i> , 2018, 74, 263-274.	5.6	81
42	Linking biomass energy and CO ₂ emissions in China using dynamic Autoregressive-Distributed Lag simulations. <i>Journal of Cleaner Production</i> , 2020, 250, 119533.	4.6	77
43	Dynamic linkages between road transport energy consumption, economic growth, and environmental quality: evidence from Pakistan. <i>Environmental Science and Pollution Research</i> , 2018, 25, 7541-7552.	2.7	74
44	Toward achieving environmental sustainability target in Organization for Economic Cooperation and Development countries: The role of real income, research and development, and transport infrastructure. <i>Sustainable Development</i> , 2020, 28, 83-90.	6.9	71
45	Financial instability and CO ₂ emissions: the case of Saudi Arabia. <i>Environmental Science and Pollution Research</i> , 2018, 25, 26030-26045.	2.7	70
46	The effect of nuclear energy on the environment in the context of globalization: Consumption vs production-based CO ₂ emissions. <i>Nuclear Engineering and Technology</i> , 2022, 54, 1312-1320.	1.1	64
47	Poverty and vulnerability of environmental degradation in Sub-Saharan African countries: what causes what?. <i>Structural Change and Economic Dynamics</i> , 2020, 54, 143-149.	2.1	63
48	Moving toward sustainable development: The relationship between water productivity, natural resource rent, international trade, and carbon dioxide emissions. <i>Sustainable Development</i> , 2020, 28, 540-549.	6.9	59
49	Dark Triad, Perceptions of Organizational Politics and Counterproductive Work Behaviors: The Moderating Effect of Political Skills. <i>Frontiers in Psychology</i> , 2017, 8, 1972.	1.1	53
50	Does energy innovation play a role in achieving sustainable development goals in BRICS countries?. <i>Environmental Technology (United Kingdom)</i> , 2022, 43, 2290-2299.	1.2	50
51	A revisit to the relationship between financial development and energy consumption: Is globalization paramount?. <i>Energy</i> , 2021, 227, 120337.	4.5	41
52	The dynamic linkage between information and communication technology, human development index, and economic growth: evidence from Asian economies. <i>Environmental Science and Pollution Research</i> , 2019, 26, 26982-26990.	2.7	38
53	Testing the pollution haven hypothesis on the pathway of sustainable development: Accounting the role of nuclear energy consumption. <i>Nuclear Engineering and Technology</i> , 2021, 53, 2746-2752.	1.1	34
54	The corruption-emissions nexus: Do information and communication technologies make a difference?. <i>Utilities Policy</i> , 2021, 72, 101244.	2.1	34

#	ARTICLE	IF	CITATIONS
55	Analyzing energy innovation-emissions nexus in China: A novel dynamic simulation method. Energy, 2022, 244, 123010.	4.5	34
56	Nexus between carbon emission, financial development, and access to electricity: Incorporating the role of natural resources and population growth. Journal of Public Affairs, 2021, 21, .	1.7	25
57	Dynamics of ecological balance in OECD countries: Sustainable or unsustainable?. Sustainable Production and Consumption, 2021, 26, 638-647.	5.7	23
58	The nexus between economic globalization and human development in Asian countries: an empirical investigation. Environmental Science and Pollution Research, 2020, 27, 2622-2629.	2.7	18
59	The nexus between renewable energy, income inequality, and consumption-based CO ₂ emissions: An empirical investigation. Sustainable Development, 2022, 30, 1268-1277.	6.9	18
60	An empirical investigation between renewable energy consumption, globalization and human capital: A dynamic auto-regressive distributive lag simulation. Renewable Energy, 2022, 193, 195-203.	4.3	18
61	CO ₂ emissions in BRICS countries: what role can environmental regulation and financial development play?. Climatic Change, 2022, 172, .	1.7	18
62	Turning points for environmental sustainability: the potential role of income inequality, human capital, and globalization. Environmental Science and Pollution Research, 2022, 29, 40878-40892.	2.7	16
63	Ecological footprint analysis of the phosphorus industry in China. Environmental Science and Pollution Research, 2022, 29, 73461-73479.	2.7	13
64	Nexus between biomass energy consumption and environment in OECD countries: a panel data analysis. Biomass Conversion and Biorefinery, 2023, 13, 1905-1913.	2.9	3
65	Estimating the impact of information technology on economic growth in south Asian countries: The silver lining of education. Information Development, 2024, 40, 147-157.	1.4	2
66	Corruption, income inequality and decline in South Asia. Human Systems Management, 2019, 38, 235-241.	0.5	1
