

Daniel S Levine

List of Publications by Year in Descending Order

Source: <https://exaly.com/author-pdf/7698540/daniel-s-levine-publications-by-year.pdf>

Version: 2024-04-27

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
78	The Dark Triad trait of psychopathy and message framing predict risky decision-making during the COVID-19 pandemic. <i>International Journal of Psychology</i> , 2021 , 56, 623-631	1.9	3
77	One or two minds? Neural network modeling of decision making by the unified self. <i>Neural Networks</i> , 2019 , 120, 74-85	9.1	3
76	Optimal control using adaptive resonance theory and Q-learning. <i>Neurocomputing</i> , 2019 , 361, 119-125	5.4	4
75	Heuristics of Numerical Choice in Economic Contexts. <i>Springer Series in Cognitive and Neural Systems</i> , 2019 , 217-241	0.3	
74	Theory of the Brain and Mind 2019 , 191-203		2
73	Neural Network Models of Human Executive Function and Decision Making 2017 , 105-127		3
72	Neural network modeling of business decision making 2017 ,		2
71	Modeling the instinctive-emotional-thoughtful mind. <i>Cognitive Systems Research</i> , 2017 , 45, 82-94	4.8	3
70	Toward a neuro-developmental theory of decision attribute weighting 2016 ,		3
69	Response-Scale Formats and Psychological Distances Between Categories. <i>Applied Psychological Measurement</i> , 2016 , 40, 73-75	1.5	5
68	Certain and Uncertain Futures in the Brain. <i>Cognitive Systems Monographs</i> , 2016 , 71-80	0.2	
67	Optimal control of nonlinear discrete time-varying systems using a new neural network approximation structure. <i>Neurocomputing</i> , 2015 , 156, 157-165	5.4	30
66	A neural network model of decisions on the Asian Disease Problem 2015 ,		2
65	Evolutionary Neuroscience and Motivation in Organizations. <i>Monographs in Leadership and Management</i> , 2015 , 143-167		1
64	An attentional theory of emotional influences on risky decisions. <i>Progress in Brain Research</i> , 2013 , 202, 369-88	2.9	3
63	2012 ,		2
62	I think therefore I feel: Possible neural mechanisms for knowledge-based pleasure 2012 ,		4

61	The Drive for Creativity and the Escape from Creativity: Neurocognitive Mechanisms. <i>Cognitive Computation</i> , 2012 , 4, 292-305	4.4	22
60	Neural dynamics of affect, gist, probability, and choice. <i>Cognitive Systems Research</i> , 2012 , 15-16, 57-72	4.8	20
59	Value Maps, Drives, and Emotions 2011 , 135-168		2
58	Drive for Creativity 2010 ,		1
57	Modeling Ideational Creativity in Groups: Connecting Cognitive, Neural, and Computational Approaches. <i>Small Group Research</i> , 2010 , 41, 688-724	2.5	27
56	Evolution or culture, but music may soothe the savage breast. Commentary on Leonid Perlovsky, Musical emotions: functions, origins, evolution. <i>Physics of Life Reviews</i> , 2010 , 7, 39-40; discussion 49-54	2.1	1
55	Emotion in the Pursuit of Understanding. <i>International Journal of Synthetic Emotions</i> , 2010 , 1, 1-11	0.3	17
54	Introduction to the special issue on goal-directed neural systems. <i>Neural Networks</i> , 2009 , 22, 197-9	9.1	
53	Neural dynamics of idea generation and the effects of priming. <i>Neural Networks</i> , 2009 , 22, 674-86	9.1	46
52	Brain pathways for cognitive-emotional decision making in the human animal. <i>Neural Networks</i> , 2009 , 22, 286-93	9.1	64
51	SIMPLIFYING HEURISTICS VERSUS CAREFUL THINKING: SCIENTIFIC ANALYSIS OF MILLENNIAL SPIRITUAL ISSUES. <i>Zygon</i> , 2008 , 43, 797-821	0.3	35
50	A network model of rational versus irrational choices on a probability maximization task 2008 ,		8
49	Brain Mechanisms for Making, Breaking, and Changing Rules. <i>Communications in Computer and Information Science</i> , 2008 , 345-355	0.3	2
48	Executive dysfunction screening test for neuropsychiatric disorders. <i>International Journal of Neuroscience</i> , 2007 , 117, 507-18	2	
47	How Does the Brain Create, Change, and Selectively Override its Rules of Conduct? 2007 , 163-181		7
46	Neural modeling of the dual motive theory of economics. <i>Journal of Socio-Economics</i> , 2006 , 35, 613-625		30
45	Neural dynamics of psychotherapy: what modeling might tell us about us. <i>Neural Networks</i> , 2005 , 18, 639-45	9.1	5
44	A neural network model of foraging decisions made under predation risk. <i>Cognitive, Affective and Behavioral Neuroscience</i> , 2005 , 5, 434-51	3.5	6

43	is all affiliation the same? facilitation or complementarity?. <i>Behavioral and Brain Sciences</i> , 2005 , 28,	0.9	1
42	Angels, Devils, and Censors in the Brain. <i>Complexus</i> , 2004 , 2, 35-59		14
41	Nurture, Nature, and Caring: We Are Not Prisoners of Our Genes. <i>Brain and Mind</i> , 2002 , 3, 9-52		63
40	Introduction to the Special Issue on Brain Development and Caring Behavior. <i>Brain and Mind</i> , 2002 , 3, 1-7		6
39	In partial defense of softness. <i>Behavioral and Brain Sciences</i> , 2001 , 24, 421-422	0.9	1
38	A neural network theory of proportional analogy-making. <i>Neural Networks</i> , 2000 , 13, 149-83	9.1	19
37	Multiattribute Decision Making in Context: A Dynamic Neural Network Methodology. <i>Cognitive Science</i> , 1996 , 20, 271-299	2.2	30
36	Modeling Dysfunction of the Prefrontal Executive System. <i>Progress in Neural Processing</i> , 1996 , 413-439		
35	Learning and encoding higher order rules in neural networks. <i>Behavior Research Methods</i> , 1995 , 27, 178-182		3
34	Modeling the role of frontal lobes in sequential task performance. I. Basic structure and primacy effects. <i>Neural Networks</i> , 1994 , 7, 1167-1180	9.1	7
33	Methodological and theoretical issues in neural network models of frontal cognitive functions. <i>International Journal of Neuroscience</i> , 1993 , 72, 209-33	2	11
32	Parallel distributed processing and neuropsychology: a neural network model of Wisconsin Card Sorting and verbal fluency. <i>Neuropsychology Review</i> , 1992 , 3, 213-33	7.7	15
31	Parallel Distributed Processing and Neural Networks: Origins, Methodology and Cognitive Functions. <i>International Journal of Neuroscience</i> , 1991 , 60, 195-214	2	4
30	The example of psychology: Optimism, not optimality. <i>Behavioral and Brain Sciences</i> , 1991 , 14, 225-226	0.9	1
29	Exploring connectionist approaches to legal decision making. <i>Systems Research and Behavioral Science</i> , 1991 , 36, 133-139		5
28	Inhibition in the nervous system: models of its roles in choice and context determination. <i>Neurochemical Research</i> , 1991 , 16, 381-95	4.6	2
27	Parallel distributed processing and neural networks: origins, methodology and cognitive functions. <i>International Journal of Neuroscience</i> , 1991 , 60, 195-214	2	12
26	Neural network principles for theoretical psychology. <i>Behavior Research Methods</i> , 1989 , 21, 213-224		14

25	Modeling some effects of frontal lobe damage. Novelty and perseveration. <i>Neural Networks</i> , 1989 , 2, 103-116	9.1	136
24	Explanatory coherence in neural networks?. <i>Behavioral and Brain Sciences</i> , 1989 , 12, 479-479	0.9	1
23	SURVIVAL OF THE SYNAPSES. <i>The Sciences</i> , 1988 , 28, 46-52		2
22	Connectionism and motivation are compatible. <i>Behavioral and Brain Sciences</i> , 1987 , 10, 487-487	0.9	
21	Is chaos the only alternative to rigidity?. <i>Behavioral and Brain Sciences</i> , 1987 , 10, 180-180	0.9	
20	Neural dynamics of attentionally modulated Pavlovian conditioning: blocking, interstimulus interval, and secondary reinforcement. <i>Applied Optics</i> , 1987 , 26, 5015-30	1.7	193
19	A nonlinear compartmental formulation for some classical population interactions. <i>Mathematical Biosciences</i> , 1986 , 78, 131-141	3.9	1
18	Periodic or Unbounded Solutions for a Class of Three-Dimensional ODE Systems with Biological Applications. <i>North-Holland Mathematics Studies</i> , 1985 , 263-274		
17	Unbounded Oscillatory Solutions for a System of Interacting Populations. <i>SIAM Journal on Applied Mathematics</i> , 1985 , 45, 268-279	1.8	3
16	Qualitative theory of a third-order nonlinear system with examples in population dynamics and chemical kinetics. <i>Mathematical Biosciences</i> , 1985 , 77, 17-33	3.9	10
15	Neural population modeling and psychology: A review. <i>Mathematical Biosciences</i> , 1983 , 66, 1-86	3.9	66
14	Toward a unified theory of visual perception. <i>Behavioral and Brain Sciences</i> , 1983 , 6, 670	0.9	
13	Bifurcating periodic solutions for a class of age-structured predator-prey systems. <i>Bulletin of Mathematical Biology</i> , 1983 , 45, 901-915	2.1	10
12	Models of age-dependent predation and cannibalism via the McKendrick equation. <i>Computers and Mathematics With Applications</i> , 1983 , 9, 403-414	2.7	4
11	MODELS OF AGE-DEPENDENT PREDATION AND CANNIBALISM VIA THE McKENDRICK EQUATION 1983 , 403-414		
10	Some Age-Structure Effects in Predator-Prey Models. <i>Lecture Notes in Biomathematics</i> , 1983 , 304-316		1
9	On Populations that Cannibalize Their Young. <i>SIAM Journal on Applied Mathematics</i> , 1982 , 42, 94-108	1.8	42
8	On the stability of a predator-prey system with egg-eating predators. <i>Mathematical Biosciences</i> , 1981 , 56, 27-46	3.9	31

7	MODELS OF PREDATION AND CANNIBALISM IN AGE-STRUCTURED POPULATIONS 1981 , 145-161		
6	Existence of a limiting pattern for a system of nonlinear equations describing interpopulation competition. <i>The Bulletin of Mathematical Biophysics</i> , 1979 , 41, 617-628		3
5	On predator-prey interactions with predation dependent on age of prey. <i>Mathematical Biosciences</i> , 1979 , 47, 207-219	3.9	66
4	Visual illusions in neural networks: line neutralization, tilt after effect, and angle expansion. <i>Journal of Theoretical Biology</i> , 1976 , 61, 477-504	2.3	102
3	Some developmental and attentional biases in the contrast enhancement and short term memory of recurrent neural networks. <i>Journal of Theoretical Biology</i> , 1975 , 53, 341-80	2.3	152
2	Emotion in the Pursuit of Understanding 106-117		
1	Introduction to Neural and Cognitive Modeling		30
