#	ARTICLE	IF	CITATIONS
1	Towards the Composition of Services by End-Users. Business and Information Systems Engineering, 2020, 62, 305-321.	4.0	4
2	Engineering human-in-the-loop interactions in cyber-physical systems. Information and Software Technology, 2020, 126, 106349.	3.0	28
3	A social network for supporting end users in the composition of services: definition and proof of concept. Computing (Vienna/New York), 2020, 102, 1909-1940.	3.2	4
4	Designing human-in-the-loop autonomous Cyber-Physical Systems. International Journal of Human Computer Studies, 2019, 130, 21-39.	3.7	50
5	DECODER - DEveloper COmpanion for Documented and annotatEd code Reference. Lecture Notes in Computer Science, 2019, , 596-601.	1.0	0
6	Software Knowledge Representation to Understand Software Systems. Lecture Notes in Computer Science, 2019, , 137-144.	1.0	0
7	Achieving autonomic Web service compositions with models at runtime. Computers and Electrical Engineering, 2017, 63, 332-352.	3.0	20
8	A mobile-based solution for supporting end-users in the composition of services. Multimedia Tools and Applications, 2017, 76, 16315-16345.	2.6	5
9	Self-adaptive unobtrusive interactions of mobile computing systems. Journal of Ambient Intelligence and Smart Environments, 2017, 9, 659-688.	0.8	2
10	Variability management in process families through change patterns. Information and Software Technology, 2016, 74, 86-104.	3.0	14
11	Designing the Human in the Loop of Self-Adaptive Systems. Lecture Notes in Computer Science, 2016, , 437-449.	1.0	12
12	Inferring loneliness levels in older adults from smartphones. Journal of Ambient Intelligence and Smart Environments, 2015, 7, 85-98.	0.8	25
13	On the usefulness and ease of use of a model-driven Method Engineering approach. Information Systems, 2015, 50, 36-50.	2.4	9
14	Addressing the evolution of automated user behaviour patterns by runtime model interpretation. Software and Systems Modeling, 2015, 14, 1387-1420.	2.2	9
15	VIVACE: A framework for the systematic evaluation of variability support in process-aware information systems. Information and Software Technology, 2015, 57, 248-276.	3.0	56
16	A personalized system for scalable distribution of multimedia content in multicast wireless networks. Multimedia Tools and Applications, 2015, 74, 9595-9621.	2.6	2
17	Dynamic adaptation of service compositions with variability models. Journal of Systems and Software, 2014, 91, 24-47.	3.3	101
18	Automating unobtrusive personalized services in ambient media environments. Multimedia Tools and Applications, 2014, 71, 159-178.	2.6	4

#	ARTICLE	IF	CITATIONS
19	Systems and Software Variability Management. , 2013, , .		91
20	Enhancing Modeling and Change Support for Process Families through Change Patterns. Lecture Notes in Business Information Processing, 2013, , 246-260.	0.8	14
21	Context-Adaptive Coordination of Pervasive Services by Interpreting Models during Runtime. Computer Journal, 2013, 56, 87-114.	1.5	19
22	Information Systems Development. , 2013, , .		2
23	Designing for user attention: A method for supporting unobtrusive routine tasks. Science of Computer Programming, 2013, 78, 1987-2008.	1.5	6
24	Prototyping Dynamic Software Product Lines to evaluate run-time reconfigurations. Science of Computer Programming, 2013, 78, 2399-2413.	1.5	14
25	Facing Uncertainty in Web Service Compositions. , 2013, , .		14
26	Incorporating Users into Aml System Design: From Requirements Toward Automation. , 2013, , 499-511.		2
27	Towards Run-Time Flexibility for Process Families: Open Issues and Research Challenges. Lecture Notes in Business Information Processing, 2013, , 477-488.	0.8	20
28	A Qualitative Comparison of Approaches Supporting Business Process Variability. Lecture Notes in Business Information Processing, 2013, , 560-572.	0.8	11
29	Enterprise, Business-Process and Information Systems Modeling. Lecture Notes in Business Information Processing, 2013, , .	0.8	4
30	The Conceptual Model Is The Code. Why Not?. , 2013, , 153-159.		2
31	Dynamic Evolution of Context-Aware Systems with Models at Runtime. Lecture Notes in Computer Science, 2012, , 70-86.	1.0	15
32	Applying CVL to business process variability management. , 2012, , .		10
33	Automating the development of information systems with the MOSKitt open source tool. , 2012, , .		0
34	Developing BP-driven web applications through the use of MDE techniques. Software and Systems Modeling, 2012, 11, 609-631.	2.2	10
35	The MOSKitt4ME Approach: Providing Process Support in a Method Engineering Context. Lecture Notes in Computer Science, 2012, , 228-241.	1.0	2
36	Conceptual Modeling. Lecture Notes in Computer Science, 2012, , .	1.0	6

#	ARTICLE	IF	CITATIONS
37	A Model-Driven Approach for the Design and Implementation of Software Development Methods. International Journal of Information System Modeling and Design, 2012, 3, 86-103.	0.9	6
38	Personalization for unobtrusive service interaction. Personal and Ubiquitous Computing, 2012, 16, 543-561.	1.9	22
39	Exploiting User Feedback for Adapting Mobile Interaction Obtrusiveness. Lecture Notes in Computer Science, 2012, , 274-281.	1.0	3
40	Systematic Reuse of Web Services through Software Product Line Engineering. , 2011, , .		9
41	Context-Aware Autonomous Web Services in Software Product Lines. , 2011, , .		26
42	A Survey of Requirements Specification in Model-Driven Development of Web Applications. ACM Transactions on the Web, 2011, 5, 1-51.	2.0	33
43	Implicit interaction design for pervasive workflows. Personal and Ubiquitous Computing, 2011, 15, 399-408.	1.9	7
44	Generating operation specifications from UML class diagrams: A model transformation approach. Data and Knowledge Engineering, 2011, 70, 365-389.	2.1	20
45	Improving the Cold-Start Problem in User Task Automation by Using Models at Runtime. , 2011, , 671-683.		7
46	Automatic generation of basic behavior schemas from UML class diagrams. Software and Systems Modeling, 2010, 9, 47-67.	2.2	13
47	Towards the Model Driven Development of context-aware pervasive systems. Pervasive and Mobile Computing, 2010, 6, 254-280.	2.1	70
48	Developing Mobile Business Processes for the Internet of Things. IEEE Pervasive Computing, 2010, 9, 18-26.	1.1	50
49	A Methodological Framework and Software Infrastructure for the Construction of Software Production Methods. Lecture Notes in Computer Science, 2010, , 112-125.	1.0	8
50	Software Product Lines: Going Beyond. Lecture Notes in Computer Science, 2010, , .	1.0	4
51	Supporting Runtime System Evolution to Adapt to User Behaviour. Notes on Numerical Fluid Mechanics and Multidisciplinary Design, 2010, , 378-392.	0.2	14
52	Designing and Prototyping Dynamic Software Product Lines: Techniques and Guidelines. Lecture Notes in Computer Science, 2010, , 331-345.	1.0	8
53	Adapting BPMN to Public Administration. Lecture Notes in Business Information Processing, 2010, , 114-120.	0.8	6
54	Automating Routine Tasks in Aml Systems by Using Models at Runtime. Lecture Notes in Computer Science, 2010, , 1-10.	1.0	2

#	ARTICLE	IF	CITATIONS
55	A Model-Driven Engineering Approach for Defining Rich Internet Applications. , 2010, , 40-58.		3
56	Refining Interaction Designs through Simplicity. Lecture Notes in Computer Science, 2010, , 31-40.	1.0	0
57	Service Obtrusiveness Adaptation. Lecture Notes in Computer Science, 2010, , 11-20.	1.0	0
58	Autonomic Computing through Reuse of Variability Models at Runtime: The Case of Smart Homes. Computer, 2009, 42, 37-43.	1.2	96
59	Introducing requirements traceability support in model-driven development of web applications. Information and Software Technology, 2009, 51, 749-768.	3.0	20
60	Using Feature Models for Developing Self-Configuring Smart Homes. , 2009, , .		17
61	Test-Driven Development of Model Transformations. Lecture Notes in Computer Science, 2009, , 748-752.	1.0	19
62	Presto: A pluggable platform for supporting user participation in smart workflows. , 2009, , .		2
63	A Framework for the Reconfiguration of Ubicomp Systems. Advances in Soft Computing, 2009, , 1-10.	0.4	4
64	Distributed Computing, Artificial Intelligence, Bioinformatics, Soft Computing, and Ambient Assisted Living. Lecture Notes in Computer Science, 2009, , .	1.0	8
65	Building Self-adaptive Services for Ambient Assisted Living. Lecture Notes in Computer Science, 2009, , 740-747.	1.0	6
66	Adoption of Software Product Lines to Develop Autonomic Pervasive Systems. , 2009, , 141-171.		1
67	Web Engineering: Modelling and Implementing Web Applications. Human-computer Interaction Series, 2008, , .	0.4	66
68	Applying Software Product Lines to Build Autonomic Pervasive Systems. , 2008, , .		31
69	Building Ubiquitous Business Process following an MDD approach. IEEE Latin America Transactions, 2008, 6, 347-354.	1.2	3
70	A survey on web modeling approaches for ubiquitous web applications. International Journal of Web Information Systems, 2008, 4, 234-305.	1.3	42
71	Applying the Oows Model-Driven Approach for Developing Web Applications. The Internet Movie Database Case Study. Human-computer Interaction Series, 2008, , 65-108.	0.4	12
72	A Model Driven Development Method for Developing Context-Aware Pervasive Systems. Lecture Notes in Computer Science, 2008, , 662-676.	1.0	8

#	ARTICLE	IF	CITATIONS
73	An Architecture to Automate Ambient Business System Development. Lecture Notes in Computer Science, 2008, , 240-257.	1.0	6
74	Handling Usability Aspects for the Construction of Business Process Driven Web Applications. , 2008, , 266-284.		0
75	Generation of Business Process Driven Web Applications by means of Model Transformations. IEEE Latin America Transactions, 2007, 5, 245-250.	1.2	1
76	A transformational approach to produce web application prototypes from a web requirements model. International Journal of Web Engineering and Technology, 2007, 3, 4.	0.1	15
77	Tool Support for Model Driven Development of Pervasive Systems. , 2007, , .		12
78	Software Engineering for Pervasive Systems. Applying Models, Frameworks and Transformations. , 2007, , .		3
79	Providing Methodological Support to Incorporate Presentation Properties in the Development of Web Services. Lecture Notes in Computer Science, 2007, , 139-148.	1.0	1
80	Model Centric Approach of Web Services Composition. , 2007, , 65-81.		4
81	Model Driven Design of Web Service Operations using Web Engineering Practices. , 2007, , 83-100.		2
82	Improving Communication in Requirements Engineering Activities for Web Applications. , 2007, , 242-247.		1
83	From Crosscutting Concerns to Web Systems Models. , 2007, , 573-582.		4
84	Requirements Engineering for Pervasive Systems. A Transformational Approach. , 2006, , .		4
85	A conceptual modeling approach for the design of web applications based on services. , 2006, , .		2
86	Conceptual modeling of service composition using aggregation and specialization relationships. , 2006, , .		5
87	Dealing with crosscutting concerns in a model based software production method. , 2006, , .		1
88	Towards an End-User Development Approach for Web Engineering Methods. Lecture Notes in Computer Science, 2006, , 528-543.	1.0	6
89	Describing Adaptive Navigation Requirements of Web Applications. Lecture Notes in Computer Science, 2006, , 318-322.	1.0	5
90	Building Business Process Driven Web Applications. Lecture Notes in Computer Science, 2006, , 322-337.	1.0	19

#	ARTICLE	IF	CITATIONS
91	Building Semantic Web Services Based on a Model Driven Web Engineering Method. Lecture Notes in Computer Science, 2006, , 173-182.	1.0	4
92	Designing Web Services for Supporting User Tasks: A Model Driven Approach. Lecture Notes in Computer Science, 2006, , 193-202.	1.0	8
93	Model to Text Transformation in Practice: Generating Code from Rich Associations Specifications. Lecture Notes in Computer Science, 2006, , 63-72.	1.0	8
94	Conceptual Modelling of Web Applications: The OOWS Approach. , 2006, , 277-302.		23
95	Building a Software Factory for Pervasive Systems Development. Notes on Numerical Fluid Mechanics and Multidisciplinary Design, 2005, , 342-356.	0.2	13
96	From Web Requirements to Navigational Design – A Transformational Approach. Lecture Notes in Computer Science, 2005, , 506-511.	1.0	9
97	Developing E-Commerce Applications from Task-Based Descriptions. Lecture Notes in Computer Science, 2005, , 65-75.	1.0	9
98	Transforming Web Requirements into Navigational Models: AN MDA Based Approach. Lecture Notes in Computer Science, 2005, , 320-336.	1.0	16
99	A Methodological Approach for Incorporating Adaptive Navigation Techniques into Web Applications. Lecture Notes in Computer Science, 2005, , 203-216.	1.0	3
100	Modelling Content Aggregation for Developing e-Commerce Web Sites. Lecture Notes in Computer Science, 2004, , 259-267.	1.0	1
101	Development of Web Applications from Web Enhanced Conceptual Schemas. Lecture Notes in Computer Science, 2003, , 232-245.	1.0	52
102	Implementing UML Association, Aggregation, and Composition. A Particular Interpretation Based on a Multidimensional Framework. Notes on Numerical Fluid Mechanics and Multidisciplinary Design, 2003, , 143-158.	0.2	12
103	Developing Web Applications from Conceptual Models. A Web Services Approach. Lecture Notes in Computer Science, 2003, , 40-51.	1.0	2
104	A Code Generation Process for Role Classes. An approach based on Formal Techniques and Design Patterns. Kluwer International Series in Engineering and Computer Science, 2003, , 137-153.	0.2	0
105	User Profiling Capabilities in OOWS. Lecture Notes in Computer Science, 2003, , 486-496.	1.0	3
106	Conceptual Modeling in the eXtreme. Information and Software Technology, 2002, 44, 659-669.	3.0	6
107	Automated code generation of dynamic specializations: an approach based on design patterns and formal techniques. Data and Knowledge Engineering, 2002, 40, 315-353.	2.1	8
108	The OO-method approach for information systems modeling: from object-oriented conceptual modeling to automated programming. Information Systems, 2001, 26, 507-534.	2.4	168

#	ARTICLE	IF	CITATIONS
109	From Object-Oriented Conceptual Modeling to Component-Based Development. Lecture Notes in Computer Science, 1999, , 332-341.	1.0	0
110	From Object Oriented Conceptual Modeling to Automated Programming in Java. Lecture Notes in Computer Science, 1998, , 183-196.	1.0	13
111	Linking object-oriented conceptual modeling with object-oriented implementation in Java. Lecture Notes in Computer Science, 1997, , 132-141.	1.0	3
112	OO-Method: An OO software production environment combining conventional and formal methods. Notes on Numerical Fluid Mechanics and Multidisciplinary Design, 1997, , 145-158.	0.2	18
113	Extracting knowledge from association relationships to build navigational models. , 0, , .		1
114	Navigational modeling and the semantic web. An ontology based approach. , 0, , .		2
115	Reverse Engineering of Web Pages Based on Derivations and Transformations. , 0, , .		9
116	A Model-Driven Method for the Integration of Web Applications. , 0, , .		0
117	Modeling and "smart" prototyping human-in-the-loop interactions for Aml environments. Personal and Ubiquitous Computing, 0, , 1.	1.9	1
118	A Framework Based on Design Patterns. , 0, , 56-103.		0
