#	ARTICLE	IF	CITATIONS
1	Global Longitudinal Strain and Strain Rate in Type Two Diabetes Patients with Chronic Heart Failure: Relevance to Osteoprotegerin. <i>Folia Medica</i> , 2016, 58, 164-173.	0.2	6
2	The signature of circulating microparticles in heart failure patients with metabolic syndrome. <i>Journal of Circulating Biomarkers</i> , 2016, 5, 184945441666365.	0.8	9
3	The Pattern of Circulating Microparticles in Diabetes Mellitus Patients with Known Subclinical Atherosclerosis. <i>Clinical &amp; Medical Biochemistry Open Access</i> , 2015, 01, .	0.1	2
4	The effect of angiotensin-2 receptor blocker valsartan on circulating level of endothelial progenitor cells in diabetic patients with asymptomatic coronary artery disease. <i>Diabetes and Metabolic Syndrome: Clinical Research and Reviews</i> , 2015, 9, 305-309.	1.8	6
5	Inflammatory phenotype of circulating endothelial-derived microparticles in chronic heart failure patients with metabolic syndrome. <i>Journal of Molecular Pathophysiology</i> , 2015, 4, 51.	0.3	2
6	P194Serum uric acid as independent predictor of decreased number of circulating proangiogenic progenitor cells in asymptomatic coronary artery disease patients. <i>Cardiovascular Research</i> , 2014, 103, S34.4-S34.	1.8	1
7	P202Interrelationship between circulating osteoprotegerin and subclinical coronary atherosclerosis in patients with type two diabetes mellitus. <i>Cardiovascular Research</i> , 2014, 103, S36.1-S36.	1.8	0
8	Circulating Endothelial Progenitor Cells as Markers for Severity of Ischemic Chronic Heart Failure. <i>Journal of Cardiac Failure</i> , 2014, 20, 438-447.	0.7	32
9	Relationship between circulating endothelial progenitor cells and insulin resistance in non-diabetic patients with ischemic chronic heart failure. <i>Diabetes and Metabolic Syndrome: Clinical Research and Reviews</i> , 2014, 8, 138-144.	1.8	18
10	Predictive Value of Circulating SPARC-Related protein Osteonectin in Patients with Symptomatic Moderate-to-Severe Ischemic-Induced Chronic Heart Failure. <i>International Journal of Cardiology and Lipidology Research</i> , 2014, 1, 43-51.	0.0	0
11	Circulating osteopontin as a marker of early coronary vascular calcification in type two diabetes mellitus patients with known asymptomatic coronary artery disease. <i>Atherosclerosis</i> , 2013, 229, 475-481.	0.4	61
12	Oral Abstract Session: Novel non-invasive risk marker. <i>Europace</i> , 2013, 15, ii118-ii118.	0.7	1
13	Serum Uric Acid as a Marker of Coronary Calcification in Patients with Asymptomatic Coronary Artery Disease with Preserved Left Ventricular Pump Function. <i>Cardiology Research and Practice</i> , 2013, 2013, 1-7.	0.5	17
14	Analysis of Various Subsets of Circulating Mononuclear Cells in Asymptomatic Coronary Artery Disease. <i>Journal of Clinical Medicine</i> , 2013, 2, 32-44.	1.0	15
15	Relationship between level of circulating endothelial progenitor cells and severity of ischemic chronic heart failure with preserved left ventricular ejection fraction. <i>Cardiologia Croatica</i> , 2013, 8, 294-294.	0.0	0
16	Circulating endothelial progenitor cells as a predictor of clinical outcomes in diabetic patients with symptomatic chronic heart failure. <i>Endocrine Abstracts</i> , 0, , .	0.0	0
17	A potential predict value of circulating osteoprotegerin in diabetic patients with asymptomatic coronary artery disease. <i>Endocrine Abstracts</i> , 0, , .	0.0	1
