

Krekwit Shinlapawittayatorn

List of Publications by Year in Descending Order

Source: <https://exaly.com/author-pdf/7714261/krekwit-shinlapawittayatorn-publications-by-year.pdf>

Version: 2024-04-10

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
7	Acetylcholine exerts cytoprotection against hypoxia/reoxygenation-induced apoptosis, autophagy and mitochondrial impairment through both muscarinic and nicotinic receptors.. <i>Apoptosis: an International Journal on Programmed Cell Death</i> , 2022 , 27, 233	5.4	1
6	Targeting mitochondria as a therapeutic anti-gastric cancer approach.. <i>Apoptosis: an International Journal on Programmed Cell Death</i> , 2022 , 1	5.4	0
5	Vagus nerve stimulation exerts cardioprotection against myocardial ischemia/reperfusion injury predominantly through its efferent vagal fibers. <i>Basic Research in Cardiology</i> , 2018 , 113, 22	11.8	47
4	Revisiting the Cardioprotective Effects of Acetylcholine Receptor Activation against Myocardial Ischemia/Reperfusion Injury. <i>International Journal of Molecular Sciences</i> , 2018 , 19,	6.3	24
3	Subthreshold vagal nerve stimulation and the controversial findings regarding the anti-infarct effect against myocardial ischaemia-reperfusion injury. <i>Experimental Physiology</i> , 2017 , 102, 385	2.4	1
2	Vagus nerve stimulation initiated late during ischemia, but not reperfusion, exerts cardioprotection via amelioration of cardiac mitochondrial dysfunction. <i>Heart Rhythm</i> , 2014 , 11, 2278-87	6.7	61
1	Low-amplitude, left vagus nerve stimulation significantly attenuates ventricular dysfunction and infarct size through prevention of mitochondrial dysfunction during acute ischemia-reperfusion injury. <i>Heart Rhythm</i> , 2013 , 10, 1700-7	6.7	82
