## Letizia Amadori

## List of Publications by Citations

Source: https://exaly.com/author-pdf/7719697/letizia-amadori-publications-by-citations.pdf

Version: 2024-04-28

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

| 7                 | 300                | 5                   | 10              |
|-------------------|--------------------|---------------------|-----------------|
| papers            | citations          | h-index             | g-index         |
| 10<br>ext. papers | 490 ext. citations | <b>11.6</b> avg, IF | 2.34<br>L-index |

| # | Paper                                                                                                                                                                                                                            | IF   | Citations |
|---|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|-----------|
| 7 | Single-cell immune landscape of human atherosclerotic plaques. <i>Nature Medicine</i> , <b>2019</b> , 25, 1576-1588                                                                                                              | 50.5 | 247       |
| 6 | FBXO11 inactivation leads to abnormal germinal-center formation and lymphoproliferative disease. <i>Blood</i> , <b>2016</b> , 128, 660-6                                                                                         | 2.2  | 35        |
| 5 | Systems Pharmacology Identifies an Arterial Wall Regulatory Gene Network Mediating Coronary Artery Disease Side Effects of Antiretroviral Therapy. <i>Circulation Genomic and Precision Medicine</i> , <b>2019</b> , 12, e002390 | 5.2  | 5         |
| 4 | Integrative analysis of loss-of-function variants in clinical and genomic data reveals novel genes associated with cardiovascular traits. <i>BMC Medical Genomics</i> , <b>2019</b> , 12, 108                                    | 3.7  | 5         |
| 3 | A mechanistic framework for cardiometabolic and coronary artery diseases <b>2022</b> , 1, 85-100                                                                                                                                 |      | 5         |
| 2 | Integrative Prioritization of Causal Genes for Coronary Artery Disease <i>Circulation Genomic and Precision Medicine</i> , <b>2021</b> , CIRCGEN121003365                                                                        | 5.2  | 2         |
| 1 | Systematically evaluating DOTATATE and FDG as PET immuno-imaging tracers of cardiovascular inflammation <i>Scientific Reports</i> , <b>2022</b> , 12, 6185                                                                       | 4.9  | 1         |
