Juan Camilo Solarte Toro

List of Publications by Year in descending order

Source: https://exaly.com/author-pdf/7728562/publications.pdf Version: 2024-02-01

#	Article	IF	CITATIONS
1	Acid pretreatment of lignocellulosic biomass for energy vectors production: A review focused on operational conditions and techno-economic assessment for bioethanol production. Renewable and Sustainable Energy Reviews, 2019, 107, 587-601.	16.4	227
2	Evaluation of biogas and syngas as energy vectors for heat and power generation using lignocellulosic biomass as raw material. Electronic Journal of Biotechnology, 2018, 33, 52-62.	2.2	121
3	The potential use of lignin as a platform product in biorefineries: A review. Renewable and Sustainable Energy Reviews, 2021, 138, 110688.	16.4	120
4	Fermentation, thermochemical and catalytic processes in the transformation of biomass through efficient biorefineries. Catalysis Today, 2018, 302, 61-72.	4.4	58
5	Thermochemical processing of woody biomass: A review focused on energy-driven applications and catalytic upgrading. Renewable and Sustainable Energy Reviews, 2021, 136, 110376.	16.4	57
6	Biorefineries as the base for accomplishing the sustainable development goals (SDGs) and the transition to bioeconomy: Technical aspects, challenges and perspectives. Bioresource Technology, 2021, 340, 125626.	9.6	57
7	Integral use of orange peel waste through the biorefinery concept: an experimental, technical, energy, and economic assessment. Biomass Conversion and Biorefinery, 2021, 11, 645-659.	4.6	54
8	Agricultural Waste Management Through Energy Producing Biorefineries: The Colombian Case. Waste and Biomass Valorization, 2016, 7, 789-798.	3.4	36
9	Performance evaluation and economic analysis of the bioethanol and flour production using rejected unripe plantain fruits (Musa paradisiaca L.) as raw material. Food and Bioproducts Processing, 2020, 121, 29-42.	3.6	36
10	Pre-feasibility analysis of the production of mucic acid from orange peel waste under the biorefinery concept. Biochemical Engineering Journal, 2020, 161, 107680.	3.6	33
11	Techno-economic feasibility of bioethanol production via biorefinery of olive tree prunings (OTP): optimization of the pretreatment stage. Holzforschung, 2018, 73, 3-13.	1.9	24
12	Economic and social assessment of biorefineries: The case of Coffee Cut-Stems (CCS) in Colombia. Bioresource Technology Reports, 2020, 9, 100397.	2.7	22
13	Study of biorefineries based on experimental data: production of bioethanol, biogas, syngas, and electricity using coffee-cut stems as raw material. Environmental Science and Pollution Research, 2021, 28, 24590-24604.	5.3	19
14	Techno-Economic and Environmental Analysis of Biogas Production from Plantain Pseudostem Waste in Colombia. Waste and Biomass Valorization, 2020, 11, 3161-3171.	3.4	17
15	Effect of dilute sulfuric acid pretreatment on the physicochemical properties and enzymatic hydrolysis of coffee cut-stems. Energy, 2020, 195, 116986.	8.8	16
16	Influence of products portfolio and process contextualization on the economic performance of small- and large-scale avocado biorefineries. Bioresource Technology, 2021, 342, 126060.	9.6	13
17	A comprehensive review on the economic assessment of biorefineries: The first step towards sustainable biomass conversion. Bioresource Technology Reports, 2021, 15, 100776.	2.7	11
18	A Biorefinery Approach for an Integral Valorisation of Avocado Peel and Seeds Through Supercritical Fluids. Waste and Biomass Valorization, 2022, 13, 3973-3988.	3.4	11

#	Article	IF	CITATIONS
19	Environmental life cycle assessment (E-LCA) and social impact assessment (SIA) of small-scale biorefineries implemented in rural zones: the avocado (Persea Americana var. Americana) case in Colombia. Environmental Science and Pollution Research, 2023, 30, 8790-8808.	5.3	10
20	Review of the impact of socio-economic conditions on the development and implementation of biorefineries. Fuel, 2022, 328, 125169.	6.4	8
21	Evaluación de la digestión y co-digestión anaerobia de residuos de comida y de poda en bioreactores a escala laboratorio. Revista Ion, 2017, 30, 105-116.	0.2	6
22	Fermentative Production of Ethanol Using Pinus patula as Raw Material: Economic and Energy Assessment. Waste and Biomass Valorization, 2020, 11, 1777-1788.	3.4	3
23	Alternatives for cocaine disposal: An experimental, techno-economic, and environmental comparison between incineration and biological degradation. Journal of Cleaner Production, 2021, 296, 126462.	9.3	3
24	Economic and social aspects of biorefineries. , 2020, , 199-231.		2
25	Supply chain and environmental assessment of the essential oil production using Calendula (Calendula Officinalis) as raw material. Heliyon, 2020, 6, e05606.	3.2	2
26	Cocaine degradation using a rotating biological disc reactor: Techno-economic and environmental analysis using experimental data. Journal of Hazardous Materials, 2021, 404, 124219.	12.4	0
