Version: 2024-02-01

127 papers	3,971 citations	136885 32 h-index	168321 53 g-index
135 all docs	135 docs citations	135 times ranked	4393 citing authors

#	Article	IF	Citations
1	Preschool childrenâ€™s consistency of word production. Clinical Linguistics and Phonetics, 2023, 37, 223-241.	0.5	2
2	Atypical development of Brocaâ€™s area in a large family with inherited stuttering. Brain, 2022, 145, 1177-1188.	3.7	6
3	CDK13-related disorder: Report of a series of 18 previously unpublished individuals and description of an epigenetic signature. Genetics in Medicine, 2022, 24, 1096-1107.	1.1	8
4	Selfâ€reported impact of developmental stuttering across the lifespan. Developmental Medicine and Child Neurology, 2022, 64, 1297-1306.	1.1	7
5	The Genetic and Molecular Basis of Developmental Language Disorder: A Review. Children, 2022, 9, 586.	0.6	24
6	Social motivation a relative strength in DYRK1A syndrome on a background of significant speech and language impairments. European Journal of Human Genetics, 2022, 30, 800-811.	1.4	13
7	Speech and language phenotype in Phelan-McDermid (22q13.3) syndrome. European Journal of Human Genetics, 2021, 29, 564-574.	1.4	14
8	Self-limited focal epilepsy and childhood apraxia of speech with WAC pathogenic variants. European Journal of Paediatric Neurology, 2021, 30, 25-28.	0.7	7
9	Speech, Language, and Oromotor Skills in Patients With Polymicrogyria. Neurology, 2021, 96, e1898-e1912.	1.5	8
10	Speech and language deficits are central to SETBP1 haploinsufficiency disorder. European Journal of Human Genetics, 2021, 29, 1216-1225.	1.4	26
11	Clinical delineation of SETBP1 haploinsufficiency disorder. European Journal of Human Genetics, 2021, 29, 1198-1205.	1.4	12
12	Early Intervention for Children Aged 0 to 2 Years With or at High Risk of Cerebral Palsy. JAMA Pediatrics, 2021, 175, 846.	3.3	147
13	Severe speech impairment is a distinguishing feature of FOXP1â€related disorder. Developmental Medicine and Child Neurology, 2021, 63, 1417-1426.	1.1	24
14	Is childrenâ€™s speech development changing? Preliminary evidence from Australian English-speaking 3-year-olds. International Journal of Speech-Language Pathology, 2021, , 1-10.	0.6	2
15	Psychosocial functioning following moderate-to-severe pediatric traumatic brain injury: recommended outcome instruments for research and remediation studies. Neuropsychological Rehabilitation, 2020, 30, 973-987.	1.0	7
16	What predicts nonword repetition performance?. Child Neuropsychology, 2020, 26, 518-533.	0.8	6
17	Communication in children born very preterm: a prospective cohort study. Developmental Medicine and Child Neurology, 2020, 62, 506-512.	1.1	9
18	The neural basis of nonword repetition in children with developmental speech or language disorder: An fMRI study. Neuropsychologia, 2020, 138, 107312.	0.7	13

#	Article	IF	Citations
19	Factor analysis of signs of childhood apraxia of speech. Journal of Communication Disorders, 2020, 87, 106033.	0.8	18
20	Communication behaviours of children with cerebral palsy who are minimally verbal. Child: Care, Health and Development, 2020, 46, 617-626.	0.8	6
21	Predicting speechâ€sound disorder outcomes in schoolâ€age children with hearing loss: The VicCHILD experience. International Journal of Language and Communication Disorders, 2020, 55, 537-546.	0.7	4
22	Speech in children with cerebral palsy. Developmental Medicine and Child Neurology, 2020, 62, 1374-1382.	1.1	24
23	Prevalence and features of comorbid stuttering and speech sound disorder at age 4 years. Journal of Communication Disorders, 2020, 84, 105976.	0.8	14
24	Severe childhood speech disorder. Neurology, 2020, 94, e2148-e2167.	1.5	68
25	Conversational Language in 3-Year-Old Children Born Very Preterm and at Term. Journal of Speech, Language, and Hearing Research, 2020, 63, 206-215.	0.7	9
26	Interventions for childhood apraxia of speech. The Cochrane Library, 2019, 2019, CD006278.	1.5	24
27	Preliminary evidence supports a range of speech sound interventions, but higher-quality studies are needed. Evidence-Based Communication Assessment and Intervention, 2019, 13, 181-186.	0.6	0
28	Expansion of phenotype of DDX3X syndrome: six new cases. Clinical Dysmorphology, 2019, 28, 169-174.	0.1	26
29	Motor speech impairment predicts expressive language in minimally verbal, but not low verbal, individuals with autism spectrum disorder. Autism and Developmental Language Impairments, 2019, 4, 239694151985633.	0.8	36
30	Looking to the Future: Speech, Language, and Academic Outcomes in an Adolescent with Childhood Apraxia of Speech. Folia Phoniatrica Et Logopaedica, 2019, 71, 203-215.	0.5	3
31	Inhibition of Upf2-Dependent Nonsense-Mediated Decay Leads to Behavioral and Neurophysiological Abnormalities by Activating the Immune Response. Neuron, 2019, 104, 665-679.e8.	3.8	43
32	Speech and language in bilateral perisylvian polymicrogyria: a systematic review. Developmental Medicine and Child Neurology, 2019, 61, 1145-1152.	1.1	9
33	Exploring the speech and language of individuals with nonâ€syndromic submucous cleft palate: a preliminary report. International Journal of Language and Communication Disorders, 2019, 54, 767-778.	0.7	7
34	Recessive variants in ZNF142 cause a complex neurodevelopmental disorder with intellectual disability, speech impairment, seizures, and dystonia. Genetics in Medicine, 2019, 21, 2532-2542.	1.1	17
35	Music therapy for neurodevelopment in hospitalised infants. Acta Paediatrica, International Journal of Paediatrics, 2019, 108, 784-786.	0.7	1
36	Dorsal language stream anomalies in an inherited speech disorder. Brain, 2019, 142, 966-977.	3.7	16

#	Article	IF	Citations
37	Speech Phenotyping in Unaffected Family Members of Individuals With Nonsyndromic Cleft Lip With or Without Palate. Cleft Palate-Craniofacial Journal, 2019, 56, 867-876.	0.5	2
38	Speech and language in children with Klinefelter syndrome. Journal of Communication Disorders, 2019, 78, 84-96.	0.8	23
39	Corticobulbar Tract Injury, Oromotor Impairment and Language Plasticity in Adolescents Born Preterm. Frontiers in Human Neuroscience, 2019, 13, 45.	1.0	6
40	Grey matter volume in developmental speech and language disorder. Brain Structure and Function, 2019, 224, 3387-3398.	1.2	14
41	Speech and Language Impairments After Childhood Arterial Ischemic Stroke: Does Hemisphere Matter?. Pediatric Neurology, 2019, 92, 55-59.	1.0	7
42	Outcome instruments in moderate-to-severe adult traumatic brain injury: recommendations for use in psychosocial research. Neuropsychological Rehabilitation, 2019, 29, 896-916.	1.0	51
43	A set of regulatory genes co-expressed in embryonic human brain is implicated in disrupted speech development. Molecular Psychiatry, 2019, 24, 1065-1078.	4.1	106
44	A Brain Marker for Developmental Speech Disorders. Journal of Pediatrics, 2018, 198, 234-239.e1.	0.9	17
45	Deep phenotyping of speech and language skills in individuals with 16p11.2 deletion. European Journal of Human Genetics, 2018, 26, 676-686.	1.4	58
46	Data resource profile: The Child LAnguage REpository (CLARE). International Journal of Epidemiology, 2018, 47, 688-688j.	0.9	3
47	Early speech development in Koolen de Vries syndrome limited by oral praxis and hypotonia. European Journal of Human Genetics, 2018, 26, 75-84.	1.4	30
48	Delayed and disordered development of articulation and phonology between four and seven years. Child Language Teaching and Therapy, 2018, 34, 87-99.	0.4	22
49	Communication interventions for autism spectrum disorder in minimally verbal children. The Cochrane Library, 2018, 2018, CD012324.	1.5	56
50	White matter microstructure is associated with language in children born very preterm. NeuroImage: Clinical, 2018, 20, 808-822.	1.4	28
51	Characterization of speech and language phenotype in children with NRXN1 deletions. American Journal of Medical Genetics Part B: Neuropsychiatric Genetics, 2018, 177, 700-708.	1.1	10
52	Aetiology of childhood apraxia of speech: A clinical practice update for paediatricians. Journal of Paediatrics and Child Health, 2018, 54, 1090-1095.	0.4	29
53	The effects of music on hospitalised preterm neonates. Acta Paediatrica, International Journal of Paediatrics, 2018, 107, 1473-1473.	0.7	2
54	Articulation or phonology? Evidence from longitudinal error data. Clinical Linguistics and Phonetics, 2018, 32, 1027-1041.	0.5	22

#	Article	IF	Citations
55	Feeding behavior in three-year-old children born <30 weeks and term-born peers. Appetite, 2018, 130, 117-122.	1.8	18
56	Receptive and expressive language characteristics of schoolâ€aged children with nonâ€syndromic cleft lip and/or palate. International Journal of Language and Communication Disorders, 2018, 53, 959-968.	0.7	12
57	A systematic review and meta-analysis of the prognosis of language outcomes for individuals with autism spectrum disorder. Autism and Developmental Language Impairments, 2018, 3, 239694151876761.	0.8	35
58	Speech and language characteristics in individuals with nonsyndromic submucous cleft palateâ€"A systematic review. Child: Care, Health and Development, 2018, 44, 818-831.	0.8	26
59	Altered gray matter volumes in languageâ€associated regions in children with developmental language disorder and speech sound disorder. Developmental Psychobiology, 2018, 60, 814-824.	0.9	10
60	Parent-reported patterns of loss and gain in communication in 1- to 2-year-old children are not unique to autism spectrum disorder. Autism, 2017, 21, 344-356.	2.4	17
61	Dysarthria and broader motor speech deficits in Dravet syndrome. Neurology, 2017, 88, 743-749.	1.5	22
62	Neuropredictors of oromotor feeding impairment in 12 month-old children. Early Human Development, 2017, 111, 49-55.	0.8	15
63	Who to Refer for Speech Therapy at 4 Years of Age Versus Who to â€œWatch and Waitâ€?. Journal of Pediatrics, 2017, 185, 200-204.e1.	0.9	55
64	Atypical Callosal Morphology in Children with Speech Sound Disorder. Neuroscience, 2017, 367, 211-218.	1.1	13
65	Childhood Brain Tumour. Perspectives in Pragmatics, Philosophy and Psychology, 2017, , 131-164.	0.2	1
66	Early neuroimaging markers of FOXP2 intragenic deletion. Scientific Reports, 2016, 6, 35192.	1.6	23
67	Consensus paper on post-operative pediatric cerebellar mutism syndrome: the Iceland Delphi results. Child's Nervous System, 2016, 32, 1195-1203.	0.6	141
68	Oromotor Feeding in Children Born Before 30 Weeks' Gestation and Term-Born Peers at 12 Months' Corrected Age. Journal of Pediatrics, 2016, 178, 113-118.e1.	0.9	36
69	No high-level evidence is available comparing gastrostomy or jejunostomy feeding and oral feeding alone for children with feeding difficulties related to cerebral palsy. Evidence-Based Communication Assessment and Intervention, 2016, 10, 66-70.	0.6	0
70	Brain basis of childhood speech and language disorders: are we closer to clinically meaningful MRI markers?. Current Opinion in Pediatrics, 2016, 28, 725-730.	1.0	26
71	Anatomy and lateralization of the human corticobulbar tracts: an fMRI-guided tractography study. Brain Structure and Function, 2016, 221, 3337-3345.	1.2	13
72	Language outcomes of children with cerebral palsy aged 5 years and 6Âyears: a populationâ€based study. Developmental Medicine and Child Neurology, 2016, 58, 605-611.	1.1	52

#	Article	IF	Citations
73	A highly penetrant form of childhood apraxia of speech due to deletion of 16p11.2. European Journal of Human Genetics, 2016, 24, 302-306.	1.4	60
74	Speech sound disorder at 4Âyears: prevalence, comorbidities, and predictors in a community cohort of children. Developmental Medicine and Child Neurology, 2015, 57, 578-584.	1.1	130
75	Neural correlates of childhood language disorder: a systematic review. Developmental Medicine and Child Neurology, 2015, 57, 706-717.	1.1	62
76	Parent questionnaires measuring feeding disorders in preschool children: a systematic review. Developmental Medicine and Child Neurology, 2015, 57, 798-807.	1.1	45
77	GRIN2A. Neurology, 2015, 84, 586-593.	1.5	65
78	New Genes for Focal Epilepsies with Speech and Language Disorders. Current Neurology and Neuroscience Reports, 2015, 15, 35.	2.0	56
79	Speech and language in a genotyped cohort of individuals with Kabuki syndrome. American Journal of Medical Genetics, Part A, 2015, 167, 1483-1492.	0.7	33
80	Identifying and managing common childhood language and speech impairments. BMJ, The, 2015, 350, h2318-h2318.	3.0	42
81	Innovative assessment reveals speech production and language comprehension are dissociable skills in severe cerebral palsy. Developmental Medicine and Child Neurology, 2015, 57, 215-216.	1.1	1
82	Comparability of Modern Recording Devices for Speech Analysis: Smartphone, Landline, Laptop, and Hard Disc Recorder. Folia Phoniatrica Et Logopaedica, 2014, 66, 244-250.	0.5	32
83	How relevant is the framework being used with autism spectrum disorders today?. International Journal of Speech-Language Pathology, 2014, 16, 43-49.	0.6	2
84	Motor speech impairment, activity, and participation in children with cerebral palsy. International Journal of Speech-Language Pathology, 2014, 16, 427-435.	0.6	54
85	Scientific forum topic: Translating knowledge to practice in childhood dysarthria. International Journal of Speech-Language Pathology, 2014, 16, 335-336.	0.6	2
86	Specific language impairment: a convenient label for whom?. International Journal of Language and Communication Disorders, 2014, 49, 416-451.	0.7	202
87	Procedural learning deficits in specific language impairment (SLI): A meta-analysis of serial reaction time task performance. Cortex, 2014, 51, 1-10.	1.1	165
88	Neural Correlates of Developmental Speech and Language Disorders: Evidence from Neuroimaging. Current Developmental Disorders Reports, 2014, 1, 215-227.	0.9	41
89	Neurobehaviour between birth and 40Âweeksâ€™ gestation in infants born <30Âweeksâ€™ gestation and parental psychological wellbeing: predictors of brain development and child outcomes. BMC Pediatrics, 2014, 14, 111.	0.7	59
90	Small intragenic deletion in FOXP2 associated with childhood apraxia of speech and dysarthria. American Journal of Medical Genetics, Part A, 2013, 161, 2321-2326.	0.7	75

#	Article	IF	Citations
91	Speech-language pathology insights into genetics and neuroscience: Beyond surface behaviour. International Journal of Speech-Language Pathology, 2013, 15, 245-254.	0.6	13
92	Pediatric traumatic brain injury: Language outcomes and their relationship to the arcuate fasciculus. Brain and Language, 2013, 127, 388-398.	0.8	25
93	Impaired Language Abilities and White Matter Abnormalities in Children Born Very Preterm and/or Very Low Birth Weight. Journal of Pediatrics, 2013, 162, 719-724.	0.9	97
94	Corticobulbar tract changes as predictors of dysarthria in childhood brain injury. Neurology, 2013, 80, 926-932.	1.5	32
95	Functional magnetic resonance imaging of chronic dysarthric speech after childhood brain injury: reliance on a left-hemisphere compensatory network. Brain, 2013, 136, 646-657.	3.7	32
96	Moving Ahead: A New Centre of Research Excellence in Brain Recovery, Focusing on Psychosocial Reintegration Following Traumatic Brain Injury. Brain Impairment, 2012, 13, 256-270.	0.5	9
97	Early sucking and swallowing problems as predictors of neurodevelopmental outcome in children with neonatal brain injury: a systematic review. Developmental Medicine and Child Neurology, 2012, 54, 796-806.	1.1	56
98	Speech and Oromotor Outcome in Adolescents Born Preterm: Relationship to Motor Tract Integrity. Journal of Pediatrics, 2012, 160, 402-408.e1.	0.9	35
99	Neural bases of childhood speech disorders: Lateralization and plasticity for speech functions during development. Neuroscience and Biobehavioral Reviews, 2012, 36, 439-458.	2.9	64
100	Dysphagia: Clinical management in adults and children.. International Journal of Therapy and Rehabilitation, 2011, 18, 500-500.	0.1	0
101	Evaluating service delivery for speech and swallowing problems following paediatric brain injury: an international survey. Journal of Evaluation in Clinical Practice, 2011, 17, 275-281.	0.9	14
102	Language Abilities in Children Who Were Very Preterm and/or Very Low Birth Weight: A Meta-Analysis. Journal of Pediatrics, 2011, 158, 766-774.e1.	0.9	296
103	Incidence of mutism, dysarthria and dysphagia associated with childhood posterior fossa tumour. Child's Nervous System, 2011, 27, 1129-1136.	0.6	49
104	Speech and oral motor profile after childhood hemispherectomy. Brain and Language, 2010, 114, 126-134.	0.8	24
105	The phenotype of Floatingâ€“Harbor syndrome in 10 patients. American Journal of Medical Genetics, Part A, 2010, 152A, 821-829.	0.7	43
106	Assessment of impairment or monitoring change in Friedreich ataxia. Movement Disorders, 2010, 25, 1753-1754.	2.2	6
107	Evaluation of communication assessment practices during the acute stages post stroke. Journal of Evaluation in Clinical Practice, 2010, 16, 1183-1188.	0.9	47
108	Parental consent for neuroimaging in paediatric research. Child: Care, Health and Development, 2010, 36, 241-248.	0.8	5

#	Article	IF	Citations
109	Talking EPC - speech pathologists' views of the Enhanced Primary Care items four years on. Australian Health Review, 2010, 34, 25.	0.5	5
110	Dysphagia in childhood traumatic brain injury: A reflection on the evidence and its implications for practice. Developmental Neurorehabilitation, 2010, 13, 192-203.	0.5	25
111	No change to current practice is currently warranted for the treatment of children with dysarthria acquired before three years of age, but randomized controlled trials are still needed. Evidence-Based Communication Assessment and Intervention, 2010, 4, 161-164.	0.6	0
112	Motor speech profile in relation to site of brain pathology: a developmental perspective. , 2010, , 95-116.		10
113	Factors affecting the quality of sound recording for speech and voice analysis. International Journal of Speech-Language Pathology, 2009, 11, 431-437.	0.6	35
114	Benchmarking clinical practice against best evidence: An example from breastfeeding infants with cleft lip and/or palate. Evidence-Based Communication Assessment and Intervention, 2009, 3, 48-66.	0.6	4
115	Pre and post-surgical dysphagia outcome associated with posterior fossa tumour in children. Journal of Neuro-Oncology, 2008, 87, 347-354.	1.4	26
116	Dysphagia is prevalent in children with severe cerebral palsy. Developmental Medicine and Child Neurology, 2008, 50, 567-567.	1.1	9
117	Intervention for childhood apraxia of speech. The Cochrane Library, 2008, , CD006278.	1.5	23
118	Speech and oral motor skills in children with Beckwith Wiedemann Syndrome: Pre- and post-tongue reduction surgery. International Journal of Speech-Language Pathology, 2006, 8, 45-55.	0.5	15
119	Clinical progression and outcome of dysphagia following paediatric traumatic brain injury: a prospective study. Brain Injury, 2004, 18, 359-376.	0.6	20
120	A case study of the resolution of paediatric dysphagia following brainstem injury: clinical and instrumental assessment. Journal of Clinical Neuroscience, 2004, 11, 182-190.	0.8	6
121	Clinical Characteristics of Acute Dysphagia in Pediatric Patients Following Traumatic Brain Injury. Journal of Head Trauma Rehabilitation, 2004, 19, 226-240.	1.0	12
122	Dysarthria and dysphagia as long-term sequelae in a child treated for posterior fossa tumour. Developmental Neurorehabilitation, 2003, 6, 67-75.	1.1	34
123	Incidence, Characteristics, and Predictive Factors for Dysphagia After Pediatric Traumatic Brain Injury. Journal of Head Trauma Rehabilitation, 2003, 18, 239-251.	1.0	41
124	Acute Characteristics of Pediatric Dysphagia Subsequent to Traumatic Brain Injury. Journal of Head Trauma Rehabilitation, 2002, 17, 220-241.	1.0	24
125	Communication intervention for autism spectrum disorders in minimally verbal children. The Cochrane Library, 0, , .	1.5	12
126	Automated Screening of Speech Development Issues in Children by Identifying Phonological Error Patterns. , 0, , .		9

#	Article	IF	Citations
127	Improving Child Speech Disorder Assessment by Incorporating Out-of-Domain Adult Speech. , 0, , .		9
