#	ARTICLE	IF	CITATIONS
1	Preschool children's consistency of word production. <i>Clinical Linguistics and Phonetics</i> , 2023, 37, 223-241.	0.9	2
2	Atypical development of Broca's area in a large family with inherited stuttering. <i>Brain</i> , 2022, 145, 1177-1188.	7.6	6
3	CDK13-related disorder: Report of a series of 18 previously unpublished individuals and description of an epigenetic signature. <i>Genetics in Medicine</i> , 2022, 24, 1096-1107.	2.4	8
4	Self-reported impact of developmental stuttering across the lifespan. <i>Developmental Medicine and Child Neurology</i> , 2022, 64, 1297-1306.	2.1	7
5	The Genetic and Molecular Basis of Developmental Language Disorder: A Review. <i>Children</i> , 2022, 9, 586.	1.5	24
6	Social motivation a relative strength in DYRK1A syndrome on a background of significant speech and language impairments. <i>European Journal of Human Genetics</i> , 2022, 30, 800-811.	2.8	13
7	Speech and language phenotype in Phelan-McDermid (22q13.3) syndrome. <i>European Journal of Human Genetics</i> , 2021, 29, 564-574.	2.8	14
8	Self-limited focal epilepsy and childhood apraxia of speech with WAC pathogenic variants. <i>European Journal of Paediatric Neurology</i> , 2021, 30, 25-28.	1.6	7
9	Speech, Language, and Oromotor Skills in Patients With Polymicrogyria. <i>Neurology</i> , 2021, 96, e1898-e1912.	1.1	8
10	Speech and language deficits are central to SETBP1 haploinsufficiency disorder. <i>European Journal of Human Genetics</i> , 2021, 29, 1216-1225.	2.8	26
11	Clinical delineation of SETBP1 haploinsufficiency disorder. <i>European Journal of Human Genetics</i> , 2021, 29, 1198-1205.	2.8	12
12	Early Intervention for Children Aged 0 to 2 Years With or at High Risk of Cerebral Palsy. <i>JAMA Pediatrics</i> , 2021, 175, 846.	6.2	147
13	Severe speech impairment is a distinguishing feature of <i>FOXP1</i> -related disorder. <i>Developmental Medicine and Child Neurology</i> , 2021, 63, 1417-1426.	2.1	24
14	Is children's speech development changing? Preliminary evidence from Australian English-speaking 3-year-olds. <i>International Journal of Speech-Language Pathology</i> , 2021, , 1-10.	1.2	2
15	Psychosocial functioning following moderate-to-severe pediatric traumatic brain injury: recommended outcome instruments for research and remediation studies. <i>Neuropsychological Rehabilitation</i> , 2020, 30, 973-987.	1.6	7
16	What predicts nonword repetition performance?. <i>Child Neuropsychology</i> , 2020, 26, 518-533.	1.3	6
17	Communication in children born very preterm: a prospective cohort study. <i>Developmental Medicine and Child Neurology</i> , 2020, 62, 506-512.	2.1	9
18	The neural basis of nonword repetition in children with developmental speech or language disorder: An fMRI study. <i>Neuropsychologia</i> , 2020, 138, 107312.	1.6	13

#	ARTICLE	IF	CITATIONS
19	Factor analysis of signs of childhood apraxia of speech. <i>Journal of Communication Disorders</i> , 2020, 87, 106033.	1.5	18
20	Communication behaviours of children with cerebral palsy who are minimally verbal. <i>Child: Care, Health and Development</i> , 2020, 46, 617-626.	1.7	6
21	Predicting speech sound disorder outcomes in school-age children with hearing loss: The VicCHILD experience. <i>International Journal of Language and Communication Disorders</i> , 2020, 55, 537-546.	1.5	4
22	Speech in children with cerebral palsy. <i>Developmental Medicine and Child Neurology</i> , 2020, 62, 1374-1382.	2.1	24
23	Prevalence and features of comorbid stuttering and speech sound disorder at age 4 years. <i>Journal of Communication Disorders</i> , 2020, 84, 105976.	1.5	14
24	Severe childhood speech disorder. <i>Neurology</i> , 2020, 94, e2148-e2167.	1.1	68
25	Conversational Language in 3-Year-Old Children Born Very Preterm and at Term. <i>Journal of Speech, Language, and Hearing Research</i> , 2020, 63, 206-215.	1.6	9
26	Interventions for childhood apraxia of speech. <i>The Cochrane Library</i> , 2019, 2019, CD006278.	2.8	24
27	Preliminary evidence supports a range of speech sound interventions, but higher-quality studies are needed. <i>Evidence-Based Communication Assessment and Intervention</i> , 2019, 13, 181-186.	0.6	0
28	Expansion of phenotype of DDX3X syndrome: six new cases. <i>Clinical Dysmorphology</i> , 2019, 28, 169-174.	0.3	26
29	Motor speech impairment predicts expressive language in minimally verbal, but not low verbal, individuals with autism spectrum disorder. <i>Autism and Developmental Language Impairments</i> , 2019, 4, 239694151985633.	1.6	36
30	Looking to the Future: Speech, Language, and Academic Outcomes in an Adolescent with Childhood Apraxia of Speech. <i>Folia Phoniatrica Et Logopaedica</i> , 2019, 71, 203-215.	1.1	3
31	Inhibition of Upf2-Dependent Nonsense-Mediated Decay Leads to Behavioral and Neurophysiological Abnormalities by Activating the Immune Response. <i>Neuron</i> , 2019, 104, 665-679.e8.	8.1	43
32	Speech and language in bilateral perisylvian polymicrogyria: a systematic review. <i>Developmental Medicine and Child Neurology</i> , 2019, 61, 1145-1152.	2.1	9
33	Exploring the speech and language of individuals with non-syndromic submucous cleft palate: a preliminary report. <i>International Journal of Language and Communication Disorders</i> , 2019, 54, 767-778.	1.5	7
34	Recessive variants in ZNF142 cause a complex neurodevelopmental disorder with intellectual disability, speech impairment, seizures, and dystonia. <i>Genetics in Medicine</i> , 2019, 21, 2532-2542.	2.4	17
35	Music therapy for neurodevelopment in hospitalised infants. <i>Acta Paediatrica, International Journal of Paediatrics</i> , 2019, 108, 784-786.	1.5	1
36	Dorsal language stream anomalies in an inherited speech disorder. <i>Brain</i> , 2019, 142, 966-977.	7.6	16

#	ARTICLE	IF	CITATIONS
37	Speech Phenotyping in Unaffected Family Members of Individuals With Nonsyndromic Cleft Lip With or Without Palate. <i>Cleft Palate-Craniofacial Journal</i> , 2019, 56, 867-876.	0.9	2
38	Speech and language in children with Klinefelter syndrome. <i>Journal of Communication Disorders</i> , 2019, 78, 84-96.	1.5	23
39	Corticobulbar Tract Injury, Oromotor Impairment and Language Plasticity in Adolescents Born Preterm. <i>Frontiers in Human Neuroscience</i> , 2019, 13, 45.	2.0	6
40	Grey matter volume in developmental speech and language disorder. <i>Brain Structure and Function</i> , 2019, 224, 3387-3398.	2.3	14
41	Speech and Language Impairments After Childhood Arterial Ischemic Stroke: Does Hemisphere Matter?. <i>Pediatric Neurology</i> , 2019, 92, 55-59.	2.1	7
42	Outcome instruments in moderate-to-severe adult traumatic brain injury: recommendations for use in psychosocial research. <i>Neuropsychological Rehabilitation</i> , 2019, 29, 896-916.	1.6	51
43	A set of regulatory genes co-expressed in embryonic human brain is implicated in disrupted speech development. <i>Molecular Psychiatry</i> , 2019, 24, 1065-1078.	7.9	106
44	A Brain Marker for Developmental Speech Disorders. <i>Journal of Pediatrics</i> , 2018, 198, 234-239.e1.	1.8	17
45	Deep phenotyping of speech and language skills in individuals with 16p11.2 deletion. <i>European Journal of Human Genetics</i> , 2018, 26, 676-686.	2.8	58
46	Data resource profile: The Child LAnguage REpository (CLARE). <i>International Journal of Epidemiology</i> , 2018, 47, 688-688j.	1.9	3
47	Early speech development in Koolen de Vries syndrome limited by oral praxis and hypotonia. <i>European Journal of Human Genetics</i> , 2018, 26, 75-84.	2.8	30
48	Delayed and disordered development of articulation and phonology between four and seven years. <i>Child Language Teaching and Therapy</i> , 2018, 34, 87-99.	0.9	22
49	Communication interventions for autism spectrum disorder in minimally verbal children. <i>The Cochrane Library</i> , 2018, 2018, CD012324.	2.8	56
50	White matter microstructure is associated with language in children born very preterm. <i>NeuroImage: Clinical</i> , 2018, 20, 808-822.	2.7	28
51	Characterization of speech and language phenotype in children with <i>NRXN1</i> deletions. <i>American Journal of Medical Genetics Part B: Neuropsychiatric Genetics</i> , 2018, 177, 700-708.	1.7	10
52	Aetiology of childhood apraxia of speech: A clinical practice update for paediatricians. <i>Journal of Paediatrics and Child Health</i> , 2018, 54, 1090-1095.	0.8	29
53	The effects of music on hospitalised preterm neonates. <i>Acta Paediatrica, International Journal of Paediatrics</i> , 2018, 107, 1473-1473.	1.5	2
54	Articulation or phonology? Evidence from longitudinal error data. <i>Clinical Linguistics and Phonetics</i> , 2018, 32, 1027-1041.	0.9	22

#	ARTICLE	IF	CITATIONS
55	Feeding behavior in three-year-old children born <30 weeks and term-born peers. <i>Appetite</i> , 2018, 130, 117-122.	3.7	18
56	Receptive and expressive language characteristics of school-aged children with nonsyndromic cleft lip and/or palate. <i>International Journal of Language and Communication Disorders</i> , 2018, 53, 959-968.	1.5	12
57	A systematic review and meta-analysis of the prognosis of language outcomes for individuals with autism spectrum disorder. <i>Autism and Developmental Language Impairments</i> , 2018, 3, 239694151876761.	1.6	35
58	Speech and language characteristics in individuals with nonsyndromic submucous cleft palate—A systematic review. <i>Child: Care, Health and Development</i> , 2018, 44, 818-831.	1.7	26
59	Altered gray matter volumes in language-associated regions in children with developmental language disorder and speech sound disorder. <i>Developmental Psychobiology</i> , 2018, 60, 814-824.	1.6	10
60	Parent-reported patterns of loss and gain in communication in 1- to 2-year-old children are not unique to autism spectrum disorder. <i>Autism</i> , 2017, 21, 344-356.	4.1	17
61	Dysarthria and broader motor speech deficits in Dravet syndrome. <i>Neurology</i> , 2017, 88, 743-749.	1.1	22
62	Neuropredictors of oromotor feeding impairment in 12 month-old children. <i>Early Human Development</i> , 2017, 111, 49-55.	1.8	15
63	Who to Refer for Speech Therapy at 4 Years of Age Versus Who to “Watch and Wait?”. <i>Journal of Pediatrics</i> , 2017, 185, 200-204.e1.	1.8	55
64	Atypical Callosal Morphology in Children with Speech Sound Disorder. <i>Neuroscience</i> , 2017, 367, 211-218.	2.3	13
65	Childhood Brain Tumour. <i>Perspectives in Pragmatics, Philosophy and Psychology</i> , 2017, , 131-164.	0.2	1
66	Early neuroimaging markers of FOXP2 intragenic deletion. <i>Scientific Reports</i> , 2016, 6, 35192.	3.3	23
67	Consensus paper on post-operative pediatric cerebellar mutism syndrome: the Iceland Delphi results. <i>Child's Nervous System</i> , 2016, 32, 1195-1203.	1.1	141
68	Oromotor Feeding in Children Born Before 30 Weeks' Gestation and Term-Born Peers at 12 Months' Corrected Age. <i>Journal of Pediatrics</i> , 2016, 178, 113-118.e1.	1.8	36
69	No high-level evidence is available comparing gastrostomy or jejunostomy feeding and oral feeding alone for children with feeding difficulties related to cerebral palsy. <i>Evidence-Based Communication Assessment and Intervention</i> , 2016, 10, 66-70.	0.6	0
70	Brain basis of childhood speech and language disorders: are we closer to clinically meaningful MRI markers?. <i>Current Opinion in Pediatrics</i> , 2016, 28, 725-730.	2.0	26
71	Anatomy and lateralization of the human corticobulbar tracts: an fMRI-guided tractography study. <i>Brain Structure and Function</i> , 2016, 221, 3337-3345.	2.3	13
72	Language outcomes of children with cerebral palsy aged 5 years and 6 years: a population-based study. <i>Developmental Medicine and Child Neurology</i> , 2016, 58, 605-611.	2.1	52

#	ARTICLE	IF	CITATIONS
73	A highly penetrant form of childhood apraxia of speech due to deletion of 16p11.2. <i>European Journal of Human Genetics</i> , 2016, 24, 302-306.	2.8	60
74	Speech sound disorder at 4 years: prevalence, comorbidities, and predictors in a community cohort of children. <i>Developmental Medicine and Child Neurology</i> , 2015, 57, 578-584.	2.1	130
75	Neural correlates of childhood language disorder: a systematic review. <i>Developmental Medicine and Child Neurology</i> , 2015, 57, 706-717.	2.1	62
76	Parent questionnaires measuring feeding disorders in preschool children: a systematic review. <i>Developmental Medicine and Child Neurology</i> , 2015, 57, 798-807.	2.1	45
77	<i>GRIN2A</i> . <i>Neurology</i> , 2015, 84, 586-593.	1.1	65
78	New Genes for Focal Epilepsies with Speech and Language Disorders. <i>Current Neurology and Neuroscience Reports</i> , 2015, 15, 35.	4.2	56
79	Speech and language in a genotyped cohort of individuals with Kabuki syndrome. <i>American Journal of Medical Genetics, Part A</i> , 2015, 167, 1483-1492.	1.2	33
80	Identifying and managing common childhood language and speech impairments. <i>BMJ, The</i> , 2015, 350, h2318-h2318.	6.0	42
81	Innovative assessment reveals speech production and language comprehension are dissociable skills in severe cerebral palsy. <i>Developmental Medicine and Child Neurology</i> , 2015, 57, 215-216.	2.1	1
82	Comparability of Modern Recording Devices for Speech Analysis: Smartphone, Landline, Laptop, and Hard Disc Recorder. <i>Folia Phoniatrica Et Logopaedica</i> , 2014, 66, 244-250.	1.1	32
83	How relevant is the framework being used with autism spectrum disorders today?. <i>International Journal of Speech-Language Pathology</i> , 2014, 16, 43-49.	1.2	2
84	Motor speech impairment, activity, and participation in children with cerebral palsy. <i>International Journal of Speech-Language Pathology</i> , 2014, 16, 427-435.	1.2	54
85	Scientific forum topic: Translating knowledge to practice in childhood dysarthria. <i>International Journal of Speech-Language Pathology</i> , 2014, 16, 335-336.	1.2	2
86	Specific language impairment: a convenient label for whom?. <i>International Journal of Language and Communication Disorders</i> , 2014, 49, 416-451.	1.5	202
87	Procedural learning deficits in specific language impairment (SLI): A meta-analysis of serial reaction time task performance. <i>Cortex</i> , 2014, 51, 1-10.	2.4	165
88	Neural Correlates of Developmental Speech and Language Disorders: Evidence from Neuroimaging. <i>Current Developmental Disorders Reports</i> , 2014, 1, 215-227.	2.1	41
89	Neurobehaviour between birth and 40 weeks gestation in infants born <30 weeks gestation and parental psychological wellbeing: predictors of brain development and child outcomes. <i>BMC Pediatrics</i> , 2014, 14, 111.	1.7	59
90	Small intragenic deletion in <i>FOXP2</i> associated with childhood apraxia of speech and dysarthria. <i>American Journal of Medical Genetics, Part A</i> , 2013, 161, 2321-2326.	1.2	75

#	ARTICLE	IF	CITATIONS
91	Speech-language pathology insights into genetics and neuroscience: Beyond surface behaviour. International Journal of Speech-Language Pathology, 2013, 15, 245-254.	1.2	13
92	Pediatric traumatic brain injury: Language outcomes and their relationship to the arcuate fasciculus. Brain and Language, 2013, 127, 388-398.	1.6	25
93	Impaired Language Abilities and White Matter Abnormalities in Children Born Very Preterm and/or Very Low Birth Weight. Journal of Pediatrics, 2013, 162, 719-724.	1.8	97
94	Corticobulbar tract changes as predictors of dysarthria in childhood brain injury. Neurology, 2013, 80, 926-932.	1.1	32
95	Functional magnetic resonance imaging of chronic dysarthric speech after childhood brain injury: reliance on a left-hemisphere compensatory network. Brain, 2013, 136, 646-657.	7.6	32
96	Moving Ahead: A New Centre of Research Excellence in Brain Recovery, Focusing on Psychosocial Reintegration Following Traumatic Brain Injury. Brain Impairment, 2012, 13, 256-270.	0.7	9
97	Early sucking and swallowing problems as predictors of neurodevelopmental outcome in children with neonatal brain injury: a systematic review. Developmental Medicine and Child Neurology, 2012, 54, 796-806.	2.1	56
98	Speech and Oromotor Outcome in Adolescents Born Preterm: Relationship to Motor Tract Integrity. Journal of Pediatrics, 2012, 160, 402-408.e1.	1.8	35
99	Neural bases of childhood speech disorders: Lateralization and plasticity for speech functions during development. Neuroscience and Biobehavioral Reviews, 2012, 36, 439-458.	6.1	64
100	Dysphagia: Clinical management in adults and children.. International Journal of Therapy and Rehabilitation, 2011, 18, 500-500.	0.3	0
101	Evaluating service delivery for speech and swallowing problems following paediatric brain injury: an international survey. Journal of Evaluation in Clinical Practice, 2011, 17, 275-281.	1.8	14
102	Language Abilities in Children Who Were Very Preterm and/or Very Low Birth Weight: A Meta-Analysis. Journal of Pediatrics, 2011, 158, 766-774.e1.	1.8	296
103	Incidence of mutism, dysarthria and dysphagia associated with childhood posterior fossa tumour. Child's Nervous System, 2011, 27, 1129-1136.	1.1	49
104	Speech and oral motor profile after childhood hemispherectomy. Brain and Language, 2010, 114, 126-134.	1.6	24
105	The phenotype of Floatingâ€“Harbor syndrome in 10 patients. American Journal of Medical Genetics, Part A, 2010, 152A, 821-829.	1.2	43
106	Assessment of impairment or monitoring change in Friedreich ataxia. Movement Disorders, 2010, 25, 1753-1754.	3.9	6
107	Evaluation of communication assessment practices during the acute stages post stroke. Journal of Evaluation in Clinical Practice, 2010, 16, 1183-1188.	1.8	47
108	Parental consent for neuroimaging in paediatric research. Child: Care, Health and Development, 2010, 36, 241-248.	1.7	5
