#	ARTICLE	IF	CITATIONS
1	The utilisation of regulated standardised care packages by Danish chiropractors: a mixed methods study. <i>Chiropractic & Manual Therapies</i> , 2022, 30, 14.	1.5	1
2	Adapting the determinants of implementation behavior questionnaire to evaluate implementation of a structured low back pain programme using mixed methods. <i>Health Science Reports</i> , 2021, 4, e266.	1.5	10
3	Adherence and characteristics of participants enrolled in a standardised programme of patient education and exercises for low back pain, GLA:D® Back – a prospective observational study. <i>BMC Musculoskeletal Disorders</i> , 2021, 22, 473.	1.9	7
4	Mind the gap – Evaluation of the promotion initiatives for implementation of the GLA:D® back clinician courses. <i>Musculoskeletal Science and Practice</i> , 2021, 53, 102373.	1.3	2
5	Self-management at the core of back pain care: 10 key points for clinicians. <i>Brazilian Journal of Physical Therapy</i> , 2021, 25, 396-406.	2.5	48
6	Factors influencing implementation of the GLA:D Back, an educational/exercise intervention for low back pain: a mixed-methods study. <i>JB International Evidence Implementation</i> , 2021, 19, 394-408.	3.2	7
7	GLA:D® Back: group-based patient education integrated with exercises to support self-management of persistent back pain – feasibility of implementing standardised care by a course for clinicians. <i>Pilot and Feasibility Studies</i> , 2019, 5, 65.	1.2	19
8	GLA:D® Back: implementation of group-based patient education integrated with exercises to support self-management of back pain - protocol for a hybrid effectiveness-implementation study. <i>BMC Musculoskeletal Disorders</i> , 2019, 20, 85.	1.9	27
9	Pain extent is more strongly associated with disability, psychological factors, and neck muscle function in people with non-traumatic versus traumatic chronic neck pain: a cross sectional study. <i>European Journal of Physical and Rehabilitation Medicine</i> , 2019, 55, 71-78.	2.2	25
10	GLA:D® Back group-based patient education integrated with exercises to support self-management of back pain – development, theories and scientific evidence –. <i>BMC Musculoskeletal Disorders</i> , 2018, 19, 418.	1.9	40
11	Chronic neck pain patients with traumatic or non-traumatic onset: Differences in characteristics. A cross-sectional study. <i>Scandinavian Journal of Pain</i> , 2017, 14, 1-8.	1.3	42
12	Responsiveness of clinical tests for people with neck pain. <i>BMC Musculoskeletal Disorders</i> , 2017, 18, 548.	1.9	24
13	Does a combination of physical training, specific exercises and pain education improve health-related quality of life in patients with chronic neck pain? A randomised control trial with a 4-month follow up. <i>Manual Therapy</i> , 2016, 26, 132-140.	1.6	43
14	Reliability, construct and discriminative validity of clinical testing in subjects with and without chronic neck pain. <i>BMC Musculoskeletal Disorders</i> , 2014, 15, 408.	1.9	74
15	Neck exercises, physical and cognitive behavioural-graded activity as a treatment for adult whiplash patients with chronic neck pain: Design of a randomised controlled trial. <i>BMC Musculoskeletal Disorders</i> , 2011, 12, 274.	1.9	17
