#	ARTICLE	IF	CITATIONS
1	Embedding power system's reliability within a long-term Energy System Optimization Model: Linking high renewable energy integration and future grid stability for France by 2050. Applied Energy, 2020, 257, 114037.	10.1	49
2	Optimal approaches to manage power system decarbonation. International Journal of Applied Electromagnetics and Mechanics, 2020, 64, 1447-1452.	0.6	0
3	From centralized to decentralized power systems: The shift on finitude constraints. Energy Procedia, 2019, 158, 4262-4267.	1.8	2
4	A lattice-based representation of power systems dedicated to synchronism analysis. International Journal of Applied Electromagnetics and Mechanics, 2019, 59, 1049-1056.	0.6	3
5	Basic magnetic formulation for power grid planning. , 2018, , .		0
6	Maximizing intermittency in 100% renewable and reliable power systems: A holistic approach applied to Reunion Island in 2030. Applied Energy, 2018, 227, 332-341.	10.1	41
7	Power System Synchronism in Planning Exercises: From Kuramoto Lattice Model to Kinetic Energy Aggregation. Energy Procedia, 2017, 105, 2712-2717.	1.8	3
8	Reliability-constrained scenarios with increasing shares of renewables for the French power sector in 2050. Energy Procedia, 2017, 142, 3041-3048.	1.8	7
9	Time reconciliation and space agregation to shed light on the plausibility of long-term low carbon pathways for power systems. , 2016, , .		1
10	Reprint of Feasible path toward 40%–100% renewable energy shares for power supply in France by 2050: A prospective analysis. Applied Energy, 2016, 184, 1529-1550.	10.1	50
11	Feasible path toward 40%–100% renewable energy shares for power supply in France by 2050: A prospective analysis. Applied Energy, 2016, 171, 501-522.	10.1	66
12	A Magnetodynamic Error Criterion and an Adaptive Meshing Strategy for Eddy Current Evaluation. IEEE Transactions on Magnetics, 2016, 52, 1-4.	2.1	0
13	Adaptive Meshing for Eddy Current Calculations. IEEE Transactions on Magnetics, 2015, 51, 1-4.	2.1	0
14	Increasing shares of intermittent sources in Reunion Island: Impacts on the future reliability of power supply. Renewable and Sustainable Energy Reviews, 2015, 46, 120-128.	16.4	46
15	Expanding Renewable Energy by Implementing Demand Response. Energy Procedia, 2014, 61, 1844-1847.	1.8	28
16	From Galilean Covariance to Maxwell Equations: Back to the Quasi-Static Regimes. IEEE Transactions on Magnetics, 2014, 50, 1-4.	2.1	3
17	Impacts of intermittent sources on the quality of power supply: The key role of reliability indicators. Applied Energy, 2014, 116, 333-343.	10.1	52
18	Expanding Renewable Energy by Implementing Dynamic Support through Storage Technologies. Energy Procedia, 2014, 61, 2000-2003.	1.8	16

#	ARTICLE	IF	CITATIONS
19	Enhancing Quasi-Static Modeling: A Claim for Electric Field Computation. IEEE Transactions on Magnetics, 2013, 49, 1629-1632.	2.1	3
20	A global approach of electromagnetism dedicated to further long-term planning. Proceedings in Applied Mathematics and Mechanics, 2007, 7, 2130003-2130004.	0.2	12
