#	ARTICLE	IF	CITATIONS
1	A random priming amplification method for whole genome sequencing of SARS-CoV-2 virus. <i>BMC Genomics</i> , 2022, 23, .	1.2	6
2	Virus Adaptation Following Experimental Infection of Chickens with a Domestic Duck Low Pathogenic Avian Influenza Isolate from the 2017 USA H7N9 Outbreak Identifies Polymorphic Mutations in Multiple Gene Segments. <i>Viruses</i> , 2021, 13, 1166.	1.5	2
3	Low pathogenic avian influenza virus infection retards colon microbiota diversification in two different chicken lines. <i>Animal Microbiome</i> , 2021, 3, 64.	1.5	11
4	Diverse Single-Stranded DNA Viruses Identified in Chicken Buccal Swabs. <i>Microorganisms</i> , 2021, 9, 2602.	1.6	6
5	Heterosubtypic immunity increases infectious dose required to infect Mallard ducks with Influenza A virus. <i>PLoS ONE</i> , 2018, 13, e0196394.	1.1	7
6	Characterization of H9N2 avian influenza viruses from the Middle East demonstrates heterogeneity at amino acid position 226 in the hemagglutinin and potential for transmission to mammals. <i>Virology</i> , 2018, 518, 195-201.	1.1	41
7	Efficacy of Two Licensed Avian Influenza H5 Vaccines Against Challenge with a 2015 U.S. H5N2 clade 2.3.4.4 Highly Pathogenic Avian Influenza Virus in Domestic Ducks. <i>Avian Diseases</i> , 2018, 63, 90.	0.4	6
8	Homologous and heterologous antigenic matched vaccines containing different H5 hemagglutinins provide variable protection of chickens from the 2014 U.S. H5N8 and H5N2 clade 2.3.4.4 highly pathogenic avian influenza viruses. <i>Vaccine</i> , 2017, 35, 6345-6353.	1.7	33
9	Virus-like particles displaying H5, H7, H9 hemagglutinins and N1 neuraminidase elicit protective immunity to heterologous avian influenza viruses in chickens. <i>Virology</i> , 2017, 501, 176-182.	1.1	47
10	Protection of commercial turkeys following inactivated or recombinant H5 vaccine application against the 2015 U.S. H5N2 clade 2.3.4.4 highly pathogenic avian influenza virus. <i>Veterinary Immunology and Immunopathology</i> , 2017, 191, 74-79.	0.5	16
11	Use of Sequence-Independent, Single-Primer-Amplification (SISPA) for rapid detection, identification, and characterization of avian RNA viruses. <i>Virology</i> , 2017, 509, 159-166.	1.1	117
12	Vaccination with virus-like particles containing H5 antigens from three H5N1 clades protects chickens from H5N1 and H5N8 influenza viruses. <i>Vaccine</i> , 2016, 34, 1575-1581.	1.7	32
