

# Phillip G Popovich

## List of Publications by Citations

**Source:** <https://exaly.com/author-pdf/7817461/phillip-g-popovich-publications-by-citations.pdf>  
**Version:** 2024-04-03

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.  
The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

144 papers	14,988 citations	60 h-index	122 g-index
186 ext. papers	17,310 ext. citations	7.4 avg, IF	6.73 L-index

#	Paper	IF	Citations
144	Identification of two distinct macrophage subsets with divergent effects causing either neurotoxicity or regeneration in the injured mouse spinal cord. <i>Journal of Neuroscience</i> , <b>2009</b> , 29, 13435-44	6.6	1523
143	Basso Mouse Scale for locomotion detects differences in recovery after spinal cord injury in five common mouse strains. <i>Journal of Neurotrauma</i> , <b>2006</b> , 23, 635-59	5.4	953
142	Cellular inflammatory response after spinal cord injury in Sprague-Dawley and Lewis rats. <i>Journal of Comparative Neurology</i> , <b>1997</b> , 377, 443-64	3.4	708
141	Inflammation and its role in neuroprotection, axonal regeneration and functional recovery after spinal cord injury. <i>Experimental Neurology</i> , <b>2008</b> , 209, 378-88	5.7	661
140	Depletion of hematogenous macrophages promotes partial hindlimb recovery and neuroanatomical repair after experimental spinal cord injury. <i>Experimental Neurology</i> , <b>1999</b> , 158, 351-65	5.7	536
139	Wallerian degeneration: gaining perspective on inflammatory events after peripheral nerve injury. <i>Journal of Neuroinflammation</i> , <b>2011</b> , 8, 110	10.1	504
138	Novel Markers to Delineate Murine M1 and M2 Macrophages. <i>PLoS ONE</i> , <b>2015</b> , 10, e0145342	3.7	487
137	Microglia induce motor neuron death via the classical NF- $\kappa$ B pathway in amyotrophic lateral sclerosis. <i>Neuron</i> , <b>2014</b> , 81, 1009-1023	13.9	393
136	Rats and mice exhibit distinct inflammatory reactions after spinal cord injury. <i>Journal of Comparative Neurology</i> , <b>2003</b> , 462, 223-40	3.4	283
135	Cytokine mRNA profiles in contused spinal cord and axotomized facial nucleus suggest a beneficial role for inflammation and gliosis. <i>Experimental Neurology</i> , <b>1998</b> , 152, 74-87	5.7	273
134	The neuropathological and behavioral consequences of intraspinal microglial/macrophage activation. <i>Journal of Neuropathology and Experimental Neurology</i> , <b>2002</b> , 61, 623-33	3.1	249
133	Pattern recognition receptors and central nervous system repair. <i>Experimental Neurology</i> , <b>2014</b> , 258, 5-16	5.7	247
132	Toll-like receptor (TLR)-2 and TLR-4 regulate inflammation, gliosis, and myelin sparing after spinal cord injury. <i>Journal of Neurochemistry</i> , <b>2007</b> , 102, 37-50	6	229
131	Can the immune system be harnessed to repair the CNS?. <i>Nature Reviews Neuroscience</i> , <b>2008</b> , 9, 481-93	13.5	222
130	Comparative analysis of lesion development and intraspinal inflammation in four strains of mice following spinal contusion injury. <i>Journal of Comparative Neurology</i> , <b>2006</b> , 494, 578-94	3.4	213
129	Concept of autoimmunity following spinal cord injury: possible roles for T lymphocytes in the traumatized central nervous system. <i>Journal of Neuroscience Research</i> , <b>1996</b> , 45, 349-63	4.4	213
128	A quantitative spatial analysis of the blood-spinal cord barrier. I. Permeability changes after experimental spinal contusion injury. <i>Experimental Neurology</i> , <b>1996</b> , 142, 258-75	5.7	204

127	Central nervous system regenerative failure: role of oligodendrocytes, astrocytes, and microglia. <i>Cold Spring Harbor Perspectives in Biology</i> , <b>2014</b> , 7, a020602	10.2	203
126	Remote activation of microglia and pro-inflammatory cytokines predict the onset and severity of below-level neuropathic pain after spinal cord injury in rats. <i>Experimental Neurology</i> , <b>2008</b> , 212, 337-47	5.7	184
125	Traumatic spinal cord injury produced by controlled contusion in mouse. <i>Journal of Neurotrauma</i> , <b>2000</b> , 17, 299-319	5.4	176
124	Inflammation and axon regeneration. <i>Current Opinion in Neurology</i> , <b>2011</b> , 24, 577-83	7.1	173
123	Macrophages promote axon regeneration with concurrent neurotoxicity. <i>Journal of Neuroscience</i> , <b>2009</b> , 29, 3956-68	6.6	173
122	Pathological CNS autoimmune disease triggered by traumatic spinal cord injury: implications for autoimmune vaccine therapy. <i>Journal of Neuroscience</i> , <b>2002</b> , 22, 2690-700	6.6	171
121	Manipulating neuroinflammatory reactions in the injured spinal cord: back to basics. <i>Trends in Pharmacological Sciences</i> , <b>2003</b> , 24, 13-7	13.2	168
120	Deficient CX3CR1 signaling promotes recovery after mouse spinal cord injury by limiting the recruitment and activation of Ly6Clo/iNOS <sup>+</sup> macrophages. <i>Journal of Neuroscience</i> , <b>2011</b> , 31, 9910-22	6.6	166
119	Immune activation promotes depression 1 month after diffuse brain injury: a role for primed microglia. <i>Biological Psychiatry</i> , <b>2014</b> , 76, 575-84	7.9	165
118	Gut dysbiosis impairs recovery after spinal cord injury. <i>Journal of Experimental Medicine</i> , <b>2016</b> , 213, 2603-2620	12.2	154
117	Fractalkine receptor (CX3CR1) deficiency sensitizes mice to the behavioral changes induced by lipopolysaccharide. <i>Journal of Neuroinflammation</i> , <b>2010</b> , 7, 93	10.1	142
116	The paradox of chronic neuroinflammation, systemic immune suppression, autoimmunity after traumatic chronic spinal cord injury. <i>Experimental Neurology</i> , <b>2014</b> , 258, 121-129	5.7	136
115	IL-4 signaling drives a unique arginase <sup>+</sup> /IL-1 $\beta$ microglia phenotype and recruits macrophages to the inflammatory CNS: consequences of age-related deficits in IL-4R $\alpha$ after traumatic spinal cord injury. <i>Journal of Neuroscience</i> , <b>2014</b> , 34, 8904-17	6.6	135
114	Impaired antibody synthesis after spinal cord injury is level dependent and is due to sympathetic nervous system dysregulation. <i>Experimental Neurology</i> , <b>2007</b> , 207, 75-84	5.7	132
113	Extracellular matrix regulation of inflammation in the healthy and injured spinal cord. <i>Experimental Neurology</i> , <b>2014</b> , 258, 24-34	5.7	127
112	B cells produce pathogenic antibodies and impair recovery after spinal cord injury in mice. <i>Journal of Clinical Investigation</i> , <b>2009</b> , 119, 2990-9	15.9	126
111	Bone marrow chimeric rats reveal the unique distribution of resident and recruited macrophages in the contused rat spinal cord. <i>Journal of Neuropathology and Experimental Neurology</i> , <b>2001</b> , 60, 676-85	3.1	119
110	MicroRNAs: Roles in Regulating Neuroinflammation. <i>Neuroscientist</i> , <b>2018</b> , 24, 221-245	7.6	118

109	Passive or active immunization with myelin basic protein impairs neurological function and exacerbates neuropathology after spinal cord injury in rats. <i>Journal of Neuroscience</i> , <b>2004</b> , 24, 3752-61	6.6	118
108	Spinal cord injury triggers systemic autoimmunity: evidence for chronic B lymphocyte activation and lupus-like autoantibody synthesis. <i>Journal of Neurochemistry</i> , <b>2006</b> , 99, 1073-87	6	116
107	Neuroinflammation in spinal cord injury: therapeutic targets for neuroprotection and regeneration. <i>Progress in Brain Research</i> , <b>2009</b> , 175, 125-37	2.9	115
106	Stress exacerbates neuropathic pain via glucocorticoid and NMDA receptor activation. <i>Brain, Behavior, and Immunity</i> , <b>2009</b> , 23, 851-60	16.6	105
105	An efficient and reproducible method for quantifying macrophages in different experimental models of central nervous system pathology. <i>Journal of Neuroscience Methods</i> , <b>2009</b> , 181, 36-44	3	104
104	Autonomic dysreflexia causes chronic immune suppression after spinal cord injury. <i>Journal of Neuroscience</i> , <b>2013</b> , 33, 12970-81	6.6	102
103	Control of the Inflammatory Macrophage Transcriptional Signature by miR-155. <i>PLoS ONE</i> , <b>2016</b> , 11, e0159724	3.7	95
102	Immunological regulation of neuronal degeneration and regeneration in the injured spinal cord. <i>Progress in Brain Research</i> , <b>2000</b> , 128, 43-58	2.9	87
101	Oligodendrocyte generation is differentially influenced by toll-like receptor (TLR) 2 and TLR4-mediated intraspinal macrophage activation. <i>Journal of Neuropathology and Experimental Neurology</i> , <b>2007</b> , 66, 1124-35	3.1	78
100	Characterization and modeling of monocyte-derived macrophages after spinal cord injury. <i>Journal of Neurochemistry</i> , <b>2007</b> , 102, 1083-94	6	77
99	Localization of transforming growth factor-beta1 and receptor mRNA after experimental spinal cord injury. <i>Experimental Neurology</i> , <b>2000</b> , 163, 220-30	5.7	77
98	Cognitive deficits develop 1month after diffuse brain injury and are exaggerated by microglia-associated reactivity to peripheral immune challenge. <i>Brain, Behavior, and Immunity</i> , <b>2016</b> , 54, 95-109	16.6	76
97	Molecular control of physiological and pathological T-cell recruitment after mouse spinal cord injury. <i>Journal of Neuroscience</i> , <b>2005</b> , 25, 6576-83	6.6	74
96	Stress hormones collaborate to induce lymphocyte apoptosis after high level spinal cord injury. <i>Journal of Neurochemistry</i> , <b>2009</b> , 110, 1409-21	6	73
95	Ferritin stimulates oligodendrocyte genesis in the adult spinal cord and can be transferred from macrophages to NG2 cells in vivo. <i>Journal of Neuroscience</i> , <b>2012</b> , 32, 5374-84	6.6	71
94	B cells and autoantibodies: complex roles in CNS injury. <i>Trends in Immunology</i> , <b>2010</b> , 31, 332-8	14.4	71
93	Hematogenous macrophages express CD8 and distribute to regions of lesion cavitation after spinal cord injury. <i>Experimental Neurology</i> , <b>2003</b> , 182, 275-87	5.7	69
92	Traumatic brain injury-induced neuronal damage in the somatosensory cortex causes formation of rod-shaped microglia that promote astrogliosis and persistent neuroinflammation. <i>Glia</i> , <b>2018</b> , 66, 2719-2736	9.2	68

91	Macrophage migration inhibitory factor potentiates autoimmune-mediated neuroinflammation. <i>Journal of Immunology</i> , <b>2013</b> , 191, 1043-54	5.3	67
90	Microglia-organized scar-free spinal cord repair in neonatal mice. <i>Nature</i> , <b>2020</b> , 587, 613-618	50.4	66
89	PPAR agonists as therapeutics for CNS trauma and neurological diseases. <i>ASN Neuro</i> , <b>2013</b> , 5, e00129	5.3	63
88	Emerging concepts in myeloid cell biology after spinal cord injury. <i>Neurotherapeutics</i> , <b>2011</b> , 8, 252-61	6.4	63
87	Elevation of the neurotoxin quinolinic acid occurs following spinal cord trauma. <i>Brain Research</i> , <b>1994</b> , 633, 348-52	3.7	62
86	Silencing spinal interneurons inhibits immune suppressive autonomic reflexes caused by spinal cord injury. <i>Nature Neuroscience</i> , <b>2016</b> , 19, 784-7	25.5	61
85	Cell-Type-Specific Interleukin 1 Receptor 1 Signaling in the Brain Regulates Distinct Neuroimmune Activities. <i>Immunity</i> , <b>2019</b> , 50, 317-333.e6	32.3	60
84	miR-155 Deletion in Female Mice Prevents Diet-Induced Obesity. <i>Scientific Reports</i> , <b>2016</b> , 6, 22862	4.9	60
83	Spinal cord injury therapies in humans: an overview of current clinical trials and their potential effects on intrinsic CNS macrophages. <i>Expert Opinion on Therapeutic Targets</i> , <b>2011</b> , 15, 505-18	6.4	60
82	Alterations in immune cell phenotype and function after experimental spinal cord injury. <i>Journal of Neurotrauma</i> , <b>2001</b> , 18, 957-66	5.4	60
81	Development of a database for translational spinal cord injury research. <i>Journal of Neurotrauma</i> , <b>2014</b> , 31, 1789-99	5.4	59
80	Gut Microbiota Are Disease-Modifying Factors After Traumatic Spinal Cord Injury. <i>Neurotherapeutics</i> , <b>2018</b> , 15, 60-67	6.4	57
79	Minimum information about a spinal cord injury experiment: a proposed reporting standard for spinal cord injury experiments. <i>Journal of Neurotrauma</i> , <b>2014</b> , 31, 1354-61	5.4	56
78	MICAL flavoprotein monooxygenases: expression during neural development and following spinal cord injuries in the rat. <i>Molecular and Cellular Neurosciences</i> , <b>2006</b> , 31, 52-69	4.8	56
77	Analysis of TGF-beta 1 gene expression in contused rat spinal cord using quantitative RT-PCR. <i>Journal of Neurotrauma</i> , <b>1995</b> , 12, 1003-14	5.4	55
76	Progranulin expression is upregulated after spinal contusion in mice. <i>Acta Neuropathologica</i> , <b>2010</b> , 119, 123-33	14.3	52
75	Deletion of the Fractalkine Receptor, CX3CR1, Improves Endogenous Repair, Axon Sprouting, and Synaptogenesis after Spinal Cord Injury in Mice. <i>Journal of Neuroscience</i> , <b>2017</b> , 37, 3568-3587	6.6	51
74	E6020, a synthetic TLR4 agonist, accelerates myelin debris clearance, Schwann cell infiltration, and remyelination in the rat spinal cord. <i>Glia</i> , <b>2017</b> , 65, 883-899	9	51

73	Eliciting inflammation enables successful rehabilitative training in chronic spinal cord injury. <i>Brain</i> , <b>2018</b> , 141, 1946-1962	11.2	51
72	Independent evaluation of the effects of glibenclamide on reducing progressive hemorrhagic necrosis after cervical spinal cord injury. <i>Experimental Neurology</i> , <b>2012</b> , 233, 615-22	5.7	51
71	Toll-Like Receptors and Dectin-1, a C-Type Lectin Receptor, Trigger Divergent Functions in CNS Macrophages. <i>Journal of Neuroscience</i> , <b>2015</b> , 35, 9966-76	6.6	50
70	System x(c)(-) regulates microglia and macrophage glutamate excitotoxicity in vivo. <i>Experimental Neurology</i> , <b>2012</b> , 233, 333-41	5.7	50
69	Damage control in the nervous system: beware the immune system in spinal cord injury. <i>Nature Medicine</i> , <b>2009</b> , 15, 736-7	50.5	50
68	Macrophage migration inhibitory factor (MIF) is essential for inflammatory and neuropathic pain and enhances pain in response to stress. <i>Experimental Neurology</i> , <b>2012</b> , 236, 351-62	5.7	47
67	Spinal cord injury causes chronic liver pathology in rats. <i>Journal of Neurotrauma</i> , <b>2015</b> , 32, 159-69	5.4	46
66	Debate: "is increasing neuroinflammation beneficial for neural repair?". <i>Journal of NeuroImmune Pharmacology</i> , <b>2006</b> , 1, 195-211	6.9	46
65	miR-155 Deletion in Mice Overcomes Neuron-Intrinsic and Neuron-Extrinsic Barriers to Spinal Cord Repair. <i>Journal of Neuroscience</i> , <b>2016</b> , 36, 8516-32	6.6	45
64	Semi-automated Sholl analysis for quantifying changes in growth and differentiation of neurons and glia. <i>Journal of Neuroscience Methods</i> , <b>2010</b> , 190, 71-9	3	44
63	Fecal transplant prevents gut dysbiosis and anxiety-like behaviour after spinal cord injury in rats. <i>PLoS ONE</i> , <b>2020</b> , 15, e0226128	3.7	40
62	Spinal cord injury with unilateral versus bilateral primary hemorrhage--effects of glibenclamide. <i>Experimental Neurology</i> , <b>2012</b> , 233, 829-35	5.7	40
61	MicroRNA-155 deletion reduces anxiety- and depressive-like behaviors in mice. <i>Psychoneuroendocrinology</i> , <b>2016</b> , 63, 362-9	5	38
60	p53 Regulates the neuronal intrinsic and extrinsic responses affecting the recovery of motor function following spinal cord injury. <i>Journal of Neuroscience</i> , <b>2012</b> , 32, 13956-70	6.6	38
59	Effects of gabapentin on muscle spasticity and both induced as well as spontaneous autonomic dysreflexia after complete spinal cord injury. <i>Frontiers in Physiology</i> , <b>2012</b> , 3, 329	4.6	38
58	Macrophage depletion alters the blood-nerve barrier without affecting Schwann cell function after neural injury. <i>Journal of Neuroscience Research</i> , <b>2007</b> , 85, 766-77	4.4	37
57	Differential expression of MHC class II antigen in the contused rat spinal cord. <i>Journal of Neurotrauma</i> , <b>1993</b> , 10, 37-46	5.4	37
56	TLR4 Deficiency Impairs Oligodendrocyte Formation in the Injured Spinal Cord. <i>Journal of Neuroscience</i> , <b>2016</b> , 36, 6352-64	6.6	36

55	A mouse model of ischemic spinal cord injury with delayed paralysis caused by aortic cross-clamping. <i>Anesthesiology</i> , <b>2010</b> , 113, 880-91	4.3	36
54	Independent evaluation of the anatomical and behavioral effects of Taxol in rat models of spinal cord injury. <i>Experimental Neurology</i> , <b>2014</b> , 261, 97-108	5.7	35
53	Achieving CNS axon regeneration by manipulating convergent neuro-immune signaling. <i>Cell and Tissue Research</i> , <b>2012</b> , 349, 201-13	4.2	35
52	Toll-like receptors in spinal cord injury. <i>Current Topics in Microbiology and Immunology</i> , <b>2009</b> , 336, 121-363	3.3	35
51	Glucocorticoids and macrophage migration inhibitory factor (MIF) are neuroendocrine modulators of inflammation and neuropathic pain after spinal cord injury. <i>Seminars in Immunology</i> , <b>2014</b> , 26, 409-14	10.7	34
50	Strategies for spinal cord injury repair. <i>Progress in Brain Research</i> , <b>2000</b> , 128, 3-8	2.9	33
49	A silver lining of neuroinflammation: Beneficial effects on myelination. <i>Experimental Neurology</i> , <b>2016</b> , 283, 550-9	5.7	32
48	Developing a data sharing community for spinal cord injury research. <i>Experimental Neurology</i> , <b>2017</b> , 295, 135-143	5.7	30
47	Emerging targets for reprogramming the immune response to promote repair and recovery of function after spinal cord injury. <i>Current Opinion in Neurology</i> , <b>2018</b> , 31, 334-344	7.1	29
46	Central nervous system and non-central nervous system antigen vaccines exacerbate neuropathology caused by nerve injury. <i>European Journal of Neuroscience</i> , <b>2007</b> , 25, 2053-64	3.5	28
45	The spleen as a neuroimmune interface after spinal cord injury. <i>Journal of Neuroimmunology</i> , <b>2018</b> , 321, 1-11	3.5	28
44	High mobility group box-1 (HMGB1) is increased in injured mouse spinal cord and can elicit neurotoxic inflammation. <i>Brain, Behavior, and Immunity</i> , <b>2018</b> , 72, 22-33	16.6	27
43	The spinal cord-gut-immune axis as a master regulator of health and neurological function after spinal cord injury. <i>Experimental Neurology</i> , <b>2020</b> , 323, 113085	5.7	26
42	The neuroanatomical-functional paradox in spinal cord injury. <i>Nature Reviews Neurology</i> , <b>2021</b> , 17, 53-62	15	26
41	A reassessment of a classic neuroprotective combination therapy for spinal cord injured rats: LPS/pregnenolone/indomethacin. <i>Experimental Neurology</i> , <b>2012</b> , 233, 677-85	5.7	23
40	Spinal cord neuropathology in rat experimental autoimmune encephalomyelitis: modulation by oral administration of myelin basic protein. <i>Journal of Neuropathology and Experimental Neurology</i> , <b>1997</b> , 56, 1323-38	3.1	23
39	Galectin-1 in injured rat spinal cord: implications for macrophage phagocytosis and neural repair. <i>Molecular and Cellular Neurosciences</i> , <b>2015</b> , 64, 84-94	4.8	22
38	Intraspinal TLR4 activation promotes iron storage but does not protect neurons or oligodendrocytes from progressive iron-mediated damage. <i>Experimental Neurology</i> , <b>2017</b> , 298, 42-56	5.7	18

37	Stress Increases Peripheral Axon Growth and Regeneration through Glucocorticoid Receptor-Dependent Transcriptional Programs. <i>ENeuro</i> , <b>2017</b> , 4,	3.9	18
36	MiR-155 deletion reduces ischemia-induced paralysis in an aortic aneurysm repair mouse model: Utility of immunohistochemistry and histopathology in understanding etiology of spinal cord paralysis. <i>Annals of Diagnostic Pathology</i> , <b>2018</b> , 36, 12-20	2.2	17
