citing authors

#	ARTICLE	IF	CITATIONS
1	Investigation of additive manufacturing from the heat-resistant steel powder produced by recycling of the machining chips. Journal of Manufacturing Processes, 2021, 64, 1070-1076.	5.9	10
2	Mechanical and microstructural characterization of WC-Co consolidated by binder jetting additive manufacturing. International Journal of Refractory Metals and Hard Materials, 2021, 100, 105639.	3.8	36
3	Additive Manufacturing of Ti-48Al-2Cr-2Nb Alloy Using Gas Atomized and Mechanically Alloyed Plasma Spheroidized Powders. Materials, 2020, 13, 3952.	2.9	15
4	Microstructure, densification, and mechanical properties of titanium intermetallic alloy manufactured by laser powder bed fusion additive manufacturing with high-temperature preheating using gas atomized and mechanically alloyed plasma spheroidized powders. Additive Manufacturing, 2020, 34, 101374.	3.0	22
5	Influence of the metal chips disintegration method on the physical and mechanical properties of metal powders obtained. Vibroengineering PROCEDIA, 2020, 32, 32-37.	0.5	3
6	Synthesis of the ZrB <sub>2</sub> -SiC ultra-high temperature ceramic powder by plasma spheroidization. , 2020, , .		0
7	Microstructure and phase composition of the Nb-Si based in-situ composite from plasma spheroidized powder. Materials Today: Proceedings, 2020, 30, 545-548.	1.8	5
8	The Effect of Laser Power on the Microstructure of the Nb-Si Based <i>In Situ</i> Composite, Fabricated by Laser Metal Deposition. Key Engineering Materials, 2019, 822, 556-562.	0.4	5
9	Morphology of High-Strength Heat-Resistant Steel Powder for Machines for Additive Production from Shavings. Metal Science and Heat Treatment, 2019, 60, 710-714.	0.6	7
10	Synthesis of Nb-based powder alloy by mechanical alloying and plasma spheroidization processes for additive manufacturing. Materials Letters, 2019, 245, 188-191.	2.6	36
11	Fabrication of the Nb-16Si Alloy Powder for Additive Technologies by Mechanical Alloying and Spheroidization in Electric-Arc Discharge Thermal Plasma. Russian Journal of Non-Ferrous Metals, 2018, 59, 671-676.	0.6	20
12	Structure and mechanical properties of austenitic 316L steel produced by selective laser melting. Russian Metallurgy (Metally), 2016, 2016, 930-934.	0.5	12
13	Synthesis of the <i>In Situ</i> Nb-Si Composites by Binder Jetting Additive Manufacturing Technology. Key Engineering Materials, 0, 822, 311-319.	0.4	6
14	Effect of the Mechanical Alloying and Spark Plasma Sintering on Microstructure, Phase Composition and Chemical Elements Distribution of Nb-Si Based Composite. Key Engineering Materials, 0, 822, 617-627.	0.4	9
