#	Article	IF	CITATIONS
1	Rhythm and Reaching: The Influence of Rhythmic Auditory Cueing in a Goal-Directed Reaching Task With Adults Diagnosed With Cerebral Palsy. Adapted Physical Activity Quarterly, 2022, 39, 1-16.	0.8	2
2	Manipulation of physical 3-D and virtual 2-D stimuli: comparing digit placement and fixation position. Experimental Brain Research, 2021, 239, 1863-1875.	1.5	0
3	Priming of the Sander Parallelogram illusion separates perception from action. Experimental Brain Research, 2021, 239, 2207-2220.	1.5	1
4	Changes in Metabolic Activity and Gait Function by Dual-Task Cognitive Game-Based Treadmill System in Parkinson's Disease: Protocol of a Randomized Controlled Trial. Frontiers in Aging Neuroscience, 2021, 13, 680270.	3.4	5
5	Eye–hand coordination: memory-guided grasping during obstacle avoidance. Experimental Brain Research, 2021, 240, 453.	1.5	0
6	The influence of the Sander parallelogram illusion and early, middle and late vision on goal-directed reaching and grasping. Experimental Brain Research, 2020, 238, 2993-3003.	1.5	3
7	Grasping a 2D virtual target: The influence of target position and movement on gaze and digit placement. Human Movement Science, 2020, 71, 102625.	1.4	1
8	Eye–hand coordination in reaching and grasping vertically moving targets. Experimental Brain Research, 2020, 238, 1433-1440.	1.5	3
9	Neural Correlates of Perceptual Grouping Under Conditions of Inattention and Divided Attention. Perception, 2020, 49, 495-514.	1.2	5
10	Both reaching and grasping are impacted by temporarily induced paresthesia. Somatosensory & Motor Research, 2020, 37, 106-116.	0.9	2
11	Perception With and Without Attention: Neural Correlates of Grouping by Similarity in Preattention and Divided-Attention Conditions. Journal of Vision, 2019, 19, 151.	0.3	0
12	The interacting effects of treadmill walking and different types of visuospatial cognitive task: Discriminating dual task and age effects. Archives of Gerontology and Geriatrics, 2017, 73, 50-59.	3.0	14
13	Grasping occluded targets: investigating the influence of target visibility, allocentric cue presence, and direction of motion on gaze and grasp accuracy. Experimental Brain Research, 2017, 235, 2705-2716.	1.5	4
14	Cluttered environments: Differential effects of obstacle position on grasp and gaze locations Canadian Journal of Experimental Psychology, 2016, 70, 242-247.	0.8	4
15	Looking without Perceiving: Impaired Preattentive Perceptual Grouping in Autism Spectrum Disorder. PLoS ONE, 2016, 11, e0158566.	2.5	10
16	The influence of object shape and center of mass on grasp and gaze. Frontiers in Psychology, 2015, 6, 1537.	2.1	20
17	Anticipatory gaze strategies when grasping moving objects. Experimental Brain Research, 2015, 233, 3413-3423.	1.5	13
18	Integrated testing of standing balance and cognition: Test–retest reliability and construct validity. Gait and Posture, 2015, 41, 146-152.	1.4	19

JONATHAN J MAROTTA

#	Article	IF	CITATIONS
19	An In-School-Based Program of Combined Fine Motor Exercise and Educational Activities for Children with Neurodevelopmental Disorders. Games for Health Journal, 2014, 3, 326-332.	2.0	7
20	Gaze strategies during visually-guided versus memory-guided grasping. Experimental Brain Research, 2013, 225, 291-305.	1.5	21
21	The interacting effect of cognitive and motor task demands on performance of gait, balance and cognition in young adults. Gait and Posture, 2013, 38, 596-602.	1.4	50
22	Posterior cortical atrophy: visuomotor deficits in reaching and grasping. Frontiers in Human Neuroscience, 2013, 7, 294.	2.0	18
23	Posterior cortical atrophy: an investigation of scan paths generated during face matching tasks. Frontiers in Human Neuroscience, 2013, 7, 309.	2.0	9
24	Behavioural Distinction between Strategic Control and Spatial Realignment during Visuomotor Adaptation in a Viewing Window Task. PLoS ONE, 2012, 7, e48759.	2.5	2
25	Novel claustrum activation observed during a visuomotor adaptation task using a viewing window paradigm. Behavioural Brain Research, 2011, 223, 395-402.	2.2	11
26	A novel integrative method for analyzing eye and hand behaviour during reaching and grasping in an MRI environment. Behavior Research Methods, 2011, 43, 399-408.	4.0	3
27	"Graspability―of objects affects gaze patterns during perception and action tasks. Experimental Brain Research, 2011, 212, 177-187.	1.5	29
28	When What's Left Is Right: Visuomotor Transformations in an Aged Population. PLoS ONE, 2009, 4, e5484.	2.5	9
29	Mental Rotation of Faces in Healthy Aging and Alzheimer's Disease. PLoS ONE, 2009, 4, e6120.	2.5	31
30	The specificity of learned associations in visuomotor and perceptual processing. Experimental Brain Research, 2008, 187, 595-601.	1.5	5
31	Temporal integration limits of stereovision in reaching and grasping. Experimental Brain Research, 2008, 189, 91-98.	1.5	5
32	A new window into the interactions between perception and action. Journal of Neuroscience Methods, 2007, 160, 128-134.	2.5	7
33	Task-Specific Sensorimotor Adaptation to Reversing Prisms. Journal of Neurophysiology, 2005, 93, 1104-1110.	1.8	18
34	Detailed Exploration of Face-related Processing in Congenital Prosopagnosia: 1. Behavioral Findings. Journal of Cognitive Neuroscience, 2005, 17, 1130-1149.	2.3	213
35	Behavioral Change and Its Neural Correlates in Visual Agnosia After Expertise Training. Journal of Cognitive Neuroscience, 2005, 17, 554-568.	2.3	61
36	Patient Schn: has Goldstein and Gelb's case withstood the test of time?. Neuropsychologia, 2004, 42, 633-638.	1.6	26

Jonathan J Marotta

#	Article	IF	CITATIONS
37	Hemispatial neglect: its effects on visual perception and visually guided grasping. Neuropsychologia, 2003, 41, 1262-1271.	1.6	33
38	Kinematic Rules for Upper and Lower Arm Contributions to Grasp Orientation. Journal of Neurophysiology, 2003, 90, 3816-3827.	1.8	39
39	The effects of rotation and inversion on face processing in prosopagnosia. Cognitive Neuropsychology, 2002, 19, 31-47.	1.1	54
40	The Role of Familiar Size in the Control of Grasping. Journal of Cognitive Neuroscience, 2001, 13, 8-17.	2.3	63
41	Does a monocularly presented size-contrast illusion influence grip aperture?. Neuropsychologia, 1998, 36, 491-497.	1.6	85
42	The role of head movements in the control of manual prehension. Experimental Brain Research, 1998, 120, 134-138.	1.5	56
43	The role of learned pictorial cues in the programming and control of grasping. Experimental Brain Research, 1998, 121, 465-470.	1.5	65
44	The removal of binocular cues disrupts the calibration of grasping in patients with visual form agnosia. Experimental Brain Research, 1997, 116, 113-121.	1.5	108
45	Adapting to monocular vision: grasping with one eye. Experimental Brain Research, 1995, 104, 107-14.	1.5	58
